

The BARCM is located in the oldest building on the campus of Florida A&M University. The building was completed in 1907, with the assistance of a \$10,000 grant from Andrew Carnegie. This building is still standing and has been placed on the National Register of Historic Places.

The purpose of the Black Archives was set forth in 1971 in an act of the Florida legislature that mandated the establishment of a repository to "serve the state by collecting and preserving source materials on or about Black Americans from the earliest beginnings to the present."

The BARCM was formally dedicated and officially opened in 1977. Part of its scholarly and cultural responsibility is the collection of any materials reflecting the Black presence and participation in local, regional, national and international history. The BARCM has the largest repository of African American history and artifacts in the southeast including over 500,000 artifacts, manuscripts, art work, and oral history tapes, as well as meeting and research rooms and a mobile touring museum.

The Black Archives Research Center and Museum (BARCM) is presently 3000 square feet. It is planned that the interior of the present building be restored to its original appearance. True to the Carnegie-style architectural design, the building can easily be divided into four wings; two on the first floor and two on the second floor. The building which was originally the campus library and post office, would be used solely as museum space and would house permanent collections as well as traveling or touring exhibits. As such, there would only be a need for one staff person on site, a tour guide or docent. There is also potential for housing a museum store and gift shop at this location. This enterprise could possibly generate revenues toward the ongoing support and maintenance of the building. The basement of the Carnegie building would be used for an educational "Underground Railroad" for grades K-12.

With proper funding, the Carnegie building would be "connected" (via catwalk or breezeway) to the larger 33,000 square foot space that is proposed to be built directly behind it. The larger 33,000 square foot space would be used as a research library, an archives, and as much-needed storage space. In addition, work space and preservation laboratory would be housed on the sub-level. While the Carnegie building would be used for major exhibitions and educational programs, the larger and newer space would be designated almost solely for serious study and analysis of the various collections. Tours would be prohibited in the larger space.

Mr. LOTT. Mr. President, I ask unanimous consent that the bill be deemed read the third time, and passed, the motion to reconsider be laid upon the table, and that any statements related to the bill appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 1559) was deemed read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONSTRUCTION OF A CENTER FOR REGIONAL BLACK CULTURE.

(a) FINDINGS.—Congress makes the following findings:

(1) Currently 500,000 historically important artifacts of the Civil War era and the early days of the civil rights movement in the Southeast region of the United States are housed at Florida A&M University.

(2) To preserve this large repository of African-American history and artifacts it is appropriate that the Federal Government share in the cost of construction of this national repository for culture and history.

(b) DEFINITION.—In this section:

(1) CENTER.—The term "Center" means the Center for Historically Black Heritage at Florida A&M University.

(2) SECRETARY.—The term "Secretary" means the Secretary of Interior acting through the Director of the National Park Service.

(c) CONSTRUCTION OF CENTER.—The Secretary may award a grant to the State of Florida to pay for the Federal share of the cost, design, construction, furnishing, and equipping of the Center at Florida A&M University.

(d) GRANT REQUIREMENTS.—

(1) IN GENERAL.—In order to receive a grant awarded under subsection (c), Florida A&M University, shall submit to the Secretary a proposal.

(2) FEDERAL SHARE.—The Federal share described in subsection (c) shall be 50 percent.

(e) AUTHORIZATION OF APPROPRIATION.—There is authorized to be appropriated to the Secretary of Interior to carry out this section a total of \$3,800,000 for fiscal year 1998 and any succeeding fiscal years. Funds appropriated pursuant to the authority of the preceding sentence shall remain available until expended.

OCEANS ACT OF 1997

Mr. NICKLES. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of calendar No. 288, S. 1213.

The PRESIDING OFFICER. The clerk will report.

A bill (S. 1213) to establish a National Ocean Council, a Commission on Ocean Policy, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to omit the part struck through and insert the part printed in italic:

So as to make the bill read:

S. 1213

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Oceans Act of 1997".

SEC. 2. CONGRESSIONAL FINDINGS; PURPOSE AND OBJECTIVES.

(a) FINDINGS.—The Congress makes the following findings:

(1) Covering more than two-thirds of the Earth's surface, the oceans and Great Lakes play a critical role in the global water cycle and in regulating climate, sustain a large part of Earth's biodiversity, provide an important source of food and a wealth of other natural products, act as a frontier to scientific exploration, are critical to national security, and provide a vital means of transportation. The coasts, transition between land and open ocean, are regions of remarkably high biological productivity, contribute more than 30 percent of the Gross Domestic Product, and are of considerable importance for recreation, waste disposal, and mineral exploration.

(2) Ocean and coastal resources are susceptible to change as a direct and indirect result of human activities, and such changes can significantly impact the ability of the oceans and Great Lakes to provide the benefits upon which the Nation depends. Changes in ocean and coastal processes could affect global climate patterns, marine productivity and biodiversity, environmental quality, national security, economic competitiveness, availability of energy, vulnerability to natural hazards, and transportation safety and efficiency.

(3) Ocean and coastal resources are not infinite, and human pressure on them is increasing. One half of the Nation's population lives within 50 miles of the coast, ocean and coastal resources once considered inexhaustible are now threatened with depletion, and if population trends continue as expected, pressure on and conflicting demands for ocean and coastal resources will increase further as will vulnerability to coastal hazards.

(4) Marine technologies hold tremendous promise for expanding the range and increasing the utility of products from the oceans and Great Lakes, improving the stewardship of ocean and coastal resources, and contributing to business and manufacturing innovations and the creation of new jobs.

(5) Marine research has uncovered the link between oceanic and atmospheric processes and improved understanding of world climate patterns and forecasts. Important new advances, including availability of military technology, have made feasible the exploration of large areas of the ocean which were inaccessible several years ago. In designating 1998 as "The Year of the Ocean", the United Nations highlights the value of increasing our knowledge of the oceans.

(6) It has been 30 years since the Commission on Marine Science, Engineering, and Resources (known as the Stratton Commission) conducted a comprehensive examination of ocean and coastal activities that led to enactment of major legislation and the establishment of key oceanic and atmospheric institutions.

(7) A review of existing activities is essential to respond to the changes that have occurred over the past three decades and to develop an effective new policy for the twenty-first century to conserve and use sustainable ocean and coastal resources, protect the marine environment, explore ocean frontiers, protect human safety, and create marine technologies and economic opportunities.

(8) While significant Federal ocean and coastal programs are underway, those programs would benefit from a coherent national ocean and coastal policy that reflects the need for cost-effective allocation of fiscal resources, improved interagency coordination, and strengthened partnerships with State, private, and international entities engaged in ocean and coastal activities.

(b) PURPOSE AND OBJECTIVES.—The purpose of this Act is to develop and maintain a coordinated, comprehensive, and long-range national policy with respect to ocean and coastal activities that will assist the Nation in meeting the following objectives:

(1) The protection of life and property against natural and manmade hazards.

(2) Responsible stewardship, including use, of fishery resources and other ocean and coastal resources.

(3) The protection of the marine environment and prevention of marine pollution.

(4) The enhancement of marine-related commerce, transportation, and national security, and the resolution of conflicts among users of the marine environment.

(5) The expansion of human knowledge of the marine environment including the role of

the oceans in climate and global environmental change and the advancement of education and training in fields related to ocean and coastal activities.

(6) The continued investment in and development and improvement of the capabilities, performance, use, and efficiency of technologies for use in ocean and coastal activities.

(7) Close cooperation among all government agencies and departments to ensure—

(A) coherent regulation of ocean and coastal activities;

(B) availability and appropriate allocation of Federal funding, personnel, facilities, and equipment for such activities; and

(C) cost-effective and efficient operation of Federal departments, agencies, and programs involved in ocean and coastal activities.

(8) The preservation of the role of the United States as a leader in ocean and coastal activities, and, when it is in the national interest, the cooperation by the United States with other nations and international organizations in ocean and coastal activities.

SEC. 3. DEFINITIONS.

As used in this Act—

(1) The term "Commission" means the Commission on Ocean Policy.

(2) The term "Council" means the National Ocean Council.

(3) The term "marine research" means scientific exploration, including basic science, engineering, mapping, surveying, monitoring, assessment, and information management, of the oceans, coasts, and Great Lakes—

(A) to describe and advance understanding of—

(i) the role of the oceans, coasts and Great Lakes in weather and climate, natural hazards, and the processes that regulate the marine environment; and

(ii) the manner in which such role, processes, and environment are affected by human actions;

(B) for the conservation, management and sustainable use of living and nonliving resources; and

(C) to develop and implement new technologies related to sustainable use of the marine environment.

(4) The term "marine environment" includes—

(A) the oceans, including coastal and offshore waters and the adjacent shore lands;

(B) the continental shelf;

(C) the Great Lakes; and

(D) the ocean and coastal resources thereof.

(5) The term "ocean and coastal activities" includes activities related to marine research, fisheries and other ocean and coastal resource stewardship and use, marine aquaculture, energy and mineral resource extraction, national security, marine transportation, recreation and tourism, waste management, pollution mitigation and prevention, and natural hazard reduction.

(6) The term "ocean and coastal resource" means, with respect to the oceans, coasts, and Great Lakes, any living or non-living natural resource (including all forms of animal and plant life found in the marine environment, habitat, biodiversity, water quality, minerals, oil, and gas) and any significant historic, cultural or aesthetic resource.

SEC. 4. NATIONAL OCEAN AND COASTAL POLICY.

(a) EXECUTIVE RESPONSIBILITIES.—The President, with the assistance of the Council and the advice of the Commission, shall—

(1) develop and maintain a coordinated, comprehensive, and long-range national policy with respect to ocean and coastal activities; and

(2) with regard to Federal agencies and departments—

(A) review significant ocean and coastal activities, including plans, priorities, accomplishments, and infrastructure requirements;

(B) plan and implement an integrated and cost-effective program of ocean and coastal activities including, but not limited to, marine research, stewardship of ocean and coastal resources, protection of the marine environment, maritime transportation safety and efficiency, the marine aspects of national security, marine recreation and tourism, and marine aspects of weather, climate, and natural hazards;

(C) designate responsibility for funding and conducting ocean and coastal activities; and

(D) ensure cooperation and resolve differences arising from laws and regulations applicable to ocean and coastal activities which result in conflicts among participants in such activities.

(b) COOPERATION AND CONSULTATION.—In carrying out responsibilities under this Act, the President and the Council may use such staff, interagency, and advisory arrangements as they find necessary and appropriate and shall consult with non-Federal organizations and individuals involved in ocean and coastal activities.

SEC. 5. NATIONAL OCEAN COUNCIL.

(a) ESTABLISHMENT.—The President shall establish a National Ocean Council which shall consist of—

(1) the Secretary of Commerce, who shall be Chairman of the Council;

(2) the Secretary of the Navy;

(3) the Secretary of State;

(4) the Secretary of Transportation;

(5) the Secretary of the Interior;

(6) the Administrator of the Environmental Protection Agency;

(7) the Director of the National Science Foundation;

(8) the Director of the Office of Science and Technology Policy;

(9) the Chairman of the Council on Environmental Quality;

(10) the Chairman of the National Economic Council;

(11) the Director of the Office of Management and Budget; and

(12) such other Federal officers and officials as the President considers appropriate.

(b) ADMINISTRATION.—

(1) The President or the Chairman of the Council may from time to time designate one of the members of the Council to preside over meetings of the Council during the absence or unavailability of such Chairman.

(2) Each member of the Council may designate an officer of his or her agency or department appointed with the advice and consent of the Senate to serve on the Council as an alternate in the event of the unavoidable absence of such member.

(3) An executive secretary shall be appointed by the Chairman of the Council, with the approval of the Council. The executive secretary shall be a permanent employee of one of the agencies or departments represented on the Council and shall remain in the employ of such agency or department.

(4) For the purpose of carrying out the functions of the Council, each Federal agency or department represented on the Council shall furnish necessary assistance to the Council. Such assistance may include—

(A) detailing employees to the Council to perform such functions, consistent with the purposes of this section, as the Chairman of the Council may assign to them; and

(B) undertaking, upon request of the Chairman of the Council, such special studies for the Council as are necessary to carry out its functions.

(5) The Chairman of the Council shall have the authority to make personnel decisions regarding any employees detailed to the Council.

(c) FUNCTIONS.—The Council shall—

(1) serve as the forum for developing an ocean and coastal policy and program, taking into consideration the Commission report, and for overseeing implementation of such policy and program;

(2) improve coordination and cooperation, and eliminate duplication, among Federal agencies and departments with respect to ocean and coastal activities;

(3) work with academic, State, industry, public interest, and other groups involved in ocean and coastal activities to provide for periodic review of the Nation's ocean and coastal policy;

(4) cooperate with the Secretary of State in—

(A) providing representation at international meetings and conferences on ocean and coastal activities in which the United States participates; and

(B) coordinating the Federal activities of the United States with programs of other nations; and

(5) report at least biennially on Federal ocean and coastal programs, priorities, and accomplishments and provide budgetary advice as specified in section 7.

SEC. 6. COMMISSION ON OCEAN POLICY.

(a) ESTABLISHMENT.—

[(1) The President shall, within 90 days of the enactment of this Act, establish a Commission on Ocean Policy. The Commission shall be composed of 15 members including individuals drawn from Federal and State governments, industry, academic and technical institutions, and public interest organizations involved with ocean and coastal activities. Members shall be appointed for the life of the Commission as follows:

(A) 7 shall be appointed by the President of the United States, no more than 3 of whom may be from the executive branch of the Government.]

[(B) 2 shall be appointed by the Majority Leader of the Senate in consultation with the Chairman of the Senate Committee on Commerce, Science, and Transportation.

(C) 2 shall be appointed by the Minority Leader of the Senate in consultation with the Ranking Member of the Senate Committee on Commerce, Science, and Transportation.

(D) 2 shall be appointed by the Speaker of the House of Representatives in consultation with the Chairman of the House Committee on Resources and the Chairman of the House Committee on Science.

(E) 2 shall be appointed by the Minority Leader of the House of Representatives in consultation with the Ranking Member of the House Committee on Resources and the Ranking Member of the House Committee on Science.]

(1) The President shall, within 90 days after the enactment of this Act, establish a Commission on Ocean Policy. The Commission shall be composed of 16 members including individuals drawn from State and local governments, industry, academic and technical institutions, and public interest organizations involved with ocean and coastal activities. Members shall be appointed for the life of the Commission as follows:

(A) 4 shall be appointed by the President of the United States.

(B) 4 shall be appointed by the President chosen from a list of 8 proposed members submitted by the Majority Leader of the Senate in consultation with the Chairman of the Senate Committee on Commerce, Science, and Transportation.

(C) 4 shall be appointed by the President chosen from a list of 8 proposed members submitted by the Speaker of the House of Representatives in consultation with the Chairman of the House Committee on Resources and the Chairman of the House Committee on Science.

(D) 2 shall be appointed by the President chosen from a list of 4 proposed members submitted by the Minority Leader of the Senate in consultation with the Ranking Member of the Senate Committee on Commerce, Science, and Transportation.

(E) 2 shall be appointed by the President chosen from a list of 4 proposed members submitted by the Minority Leader of the House in consultation with the Ranking Member of the House Committee on Resources and the Ranking Member of the House Committee on Science.

(2) CHAIRMAN.—The President shall select a Chairman and Vice Chairman from among such 15 members.

(3) ADVISORY MEMBERS TO THE COMMISSION.—The President shall appoint 4 advisory members from among the Members of the Senate and House of Representatives as follows:

(A) Two Members, one from each party, selected from the Senate.

(B) Two Members, one from each party, selected from the House of Representatives.

(b) FINDINGS AND RECOMMENDATIONS.—The Commission shall report to the President and the Congress on a comprehensive national ocean and coastal policy to carry out the purpose and objectives of this Act. In developing the findings and recommendations of the report, the Commission shall—

(1) review and suggest any necessary modifications to United States laws, regulations, and practices necessary to define and implement such policy;

(2) assess the condition and adequacy of investment in existing and planned facilities and equipment associated with ocean and coastal activities including human resources, vessels, computers, satellites, and other appropriate technologies and platforms;

(3) review existing and planned ocean and coastal activities of Federal agencies and departments, assess the contribution of such activities to development of an integrated long-range program for marine research, ocean and coastal resource management, and protection of the marine environment, and identify any such activities in need of reform to improve efficiency and effectiveness;

(4) examine and suggest mechanisms to address the interrelationships among ocean and coastal activities, the legal and regulatory framework in which they occur, and their inter-connected and cumulative effects on the marine environment, ocean and coastal resources, and marine productivity and biodiversity;

(5) review the known and anticipated demands for ocean and coastal resources, including an examination of opportunities and limitations with respect to the use of ocean and coastal resources within the exclusive economic zone, projected impacts in coastal areas, and the adequacy of existing efforts to manage such use and minimize user conflicts;

(6) evaluate relationships among Federal, State, and local governments and the private sector for planning and carrying out ocean and coastal activities and address the most appropriate division of responsibility for such activities;

(7) identify opportunities for the development of or investment in new products, technologies, or markets that could contribute to the objectives of this Act;

(8) consider the relationship of the ocean and coastal policy of the United States to the United Nations Convention on the Law of the Sea and other international agreements, and actions available to the United States to effect collaborations between the United States and other nations, including the development of cooperative international programs for marine research, protection of the marine environment, and ocean and coastal resource management; and

(9) engage in any other preparatory work deemed necessary to carry out the duties of the Commission pursuant to this Act.

(c) DUTIES OF CHAIRMAN.—In carrying out the provisions of this subsection, the Chairman of the Commission shall be responsible for—

(1) the assignment of duties and responsibilities among staff personnel and their continuing supervision; and

(2) the use and expenditures of funds available to the Commission.

(d) COMPENSATION OF MEMBERS.—Each member of the Commission who is not an officer or employee of the Federal Government, or whose compensation is not precluded by a State, local, or Native American tribal government position, shall be compensated at a rate equal to the daily equivalent of the annual rate payable for Level IV of the Executive Schedule under section 5315 of title 5, United States Code, for each day (including travel time) during which such member is engaged in the performance of the duties of the Commission. All members of the Commission who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

(e) STAFF.—

(1) The Chairman of the Commission may, without regard to the civil service laws and regulations, appoint and terminate an executive director who is knowledgeable in administrative management and ocean and coastal policy and such other additional personnel as may be necessary to enable the Commission to perform its duties. The employment and termination of an executive director shall be subject to confirmation by a majority of the members of the Commission.

(2) The executive director shall be compensated at a rate not to exceed the rate payable for Level V of the Executive Schedule under section 5316 of title 5, United States Code. The Chairman may fix the compensation of other personnel without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification of positions and General Schedule pay rates, except that the rate of pay for such personnel may not exceed the rate payable for GS-15, step 7, of the General Schedule under section 5332 of such title.

(3) Upon request of the Chairman of the Commission, the head of any Federal Agency shall detail appropriate personnel of the agency to the Commission to assist the Commission in carrying out its functions under this Act. Federal Government employees detailed to the Commission shall serve without reimbursement from the Commission, and such detailee shall retain the rights, status, and privileges of his or her regular employment without interruption.

(4) The Commission may accept and use the services of volunteers serving without compensation, and to reimburse volunteers for travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code. Except for the purposes of chapter 81 of title 5, United States Code, relating to compensation for work injuries, and chapter 171 of title 28, United States Code, relating to tort claims, a volunteer under this section may not be considered to be an employee of the United States for any purpose.

(5) The Commission is authorized to procure the temporary and intermittent services of experts and consultants in accordance with section 3109 of title 5, United States Code, but at rates not to exceed the daily rate payable for GS-15, step 7, of the General

Schedule under section 5332 of title 5, United States Code.

(f) ADMINISTRATION.—

(1) All meetings of the Commission shall be open to the public, except when the Chairman of the Commission or a majority of the members of the Commission determine that the meeting or any portion of it may be closed to the public. Interested persons shall be permitted to appear at open meetings and present oral or written statement on the subject matter of the meeting. The Commission may administer oaths or affirmations to any person appearing before it.

(2) All open meetings of the Commission shall be preceded by timely public notice in the Federal Register of the time, place, and subject of the meeting.

(3) Minutes of each meeting shall be kept and shall contain a record of the people present, a description of the discussion that occurred, and copies of all statements filed. Subject to section 552 of title 5, United States Code, the minutes and records of all meetings and other documents that were made available to or prepared for the Commission shall be available for public inspection and copying at a single location in the offices of the Commission.

(4) The Federal Advisory Committee Act (5 U.S.C. App.) does not apply to the Commission.

(g) COOPERATION WITH OTHER AGENCIES.—

(1) The Commission is authorized to secure directly from any Federal agency or department any information it deems necessary to carry out its functions under this Act. Each such agency or department is authorized to cooperate with the Commission and, to the extent permitted by law, to furnish such information to the Commission, upon the request of the Chairman of the Commission.

(2) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(3) The General Services Administration shall provide to the Commission on a reimbursable basis the administrative support services that the Commission may request.

(4) The Commission may enter into contracts with Federal and State agencies, private firms, institutions, and individuals to assist the Commission in carrying out its duties. The Commission may purchase and contract without regard to sections 303 of the Federal Property and Administration Services Act of 1949 (41 U.S.C. 253), section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. 416), and section 8 of the Small Business Act (15 U.S.C. 637), pertaining to competition and publication requirements, and may arrange for printing without regard to the provisions of title 44, United States Code. The contracting authority of the Commission under this Act is effective only to the extent that appropriations are available for contracting purposes.

(h) REPORT.—The Commission shall submit to the President, via the Council, and to the Congress not later than 18 months after the establishment of the Commission, a final report of its findings and recommendations. The Commission shall cease to exist 30 days after it has submitted its final report.

(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to support the activities of the Commission a total of \$6,000,000 for fiscal years 1998 and 1999. Any sums appropriated shall remain available remain available without fiscal year limitation until expended.

SEC. 7. REPORT AND BUDGET COORDINATION.

(a) BIENNIAL REPORT.—Beginning in January, 1999, the President, through the Council, shall transmit to the Congress biennially a report, which shall include—

(1) a comprehensive description of the ocean and coastal activities and related accomplishments of all agencies and departments of the United States during the preceding two fiscal years; and

(2) an evaluation of such activities and accomplishments in terms of the purpose and objectives of this Act. Reports made under this section shall contain such recommendations for legislation as the President may consider necessary or desirable.

(b) BUDGET COORDINATION.—

(1) Each year the Council shall provide general guidance to each Federal agency or department involved in ocean or coastal activities with respect to the preparation of requests for appropriations.

(2) Working in conjunction with the Council, each agency or department involved in such activities shall include with its annual request for appropriations a report which—

(A) identifies significant elements of the proposed agency or department budget relating to ocean and coastal activities; and

(B) specifies how each such element contributes to the implementation of a national ocean and coastal policy.

(3) Each agency or department that submits a report under paragraph (1) shall submit such report simultaneously to the Council.

(4) The President shall, in a timely fashion, provide the Council with an opportunity to review and comment on the budget estimate of each such agency or department.

(5) The President shall identify in each annual budget submitted to the Congress under section 1105 of title 31, United States Code, those elements of each agency or department budget that contribute to the implementation of a national ocean and coastal policy.

SEC. 8. REPEAL OF 1966 STATUTE.

The Marine Resources and Engineering Development Act of 1966 (33 U.S.C. 1101 et seq.) is repealed.

AMENDMENT NO. 1639

(Purpose: To modify the bill as reported)

Mr. NICKLES. Mr. President, I send an amendment to the desk on behalf of Ms. SNOWE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma [Mr. NICKLES], for Ms. SNOWE and Mr. HOLLINGS, proposes an amendment numbered 1639.

Mr. NICKLES. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

Mr. CHAFEE. Mr. President, I rise today in support of S. 1213, the Oceans Act of 1997 and to thank the bill's principal sponsors for addressing my concerns. This legislation has broad, bipartisan support and as the senior Senator from the Ocean State, I am glad the United States Senate will be on the record on ocean and coastal policy as we enter 1998, which the United Nation has designated as the "Year of the Ocean."

The Oceans Act of 1997 is a significant bill. Its 1966 predecessor, the Marine Resources and Engineering Development Act, was one of the seminal developments in environmental law. The

act created the Commission on Marine Science, Engineering, and Resources, better known as the Stratton Commission. The Stratton Commission's report, "Our Nation and the Sea" was delivered in 1969 and, among its many important recommendations, led directly to the creation of National Oceanographic and Atmospheric Administration in 1970.

I would note that two distinguished Rhode Islanders played leading roles in the Stratton Commission. University of Rhode Island Professor Emeritus John A. Knauss, then the Dean of the University of Rhode Island's Graduate School of Oceanography, was a Commission member and chaired the panel on Environmental Monitoring and on Management and Development of the Coastal Zone. Professor Emeritus Lewis Alexander of the University of Rhode Island, who has had a distinguished career in government and academia, was the Commission's Deputy Director. I expect that the Rhode Islanders will play key roles in the new Stratton Commission.

The value of our oceans and coastal areas cannot be underestimated. More than half of the United States population lives in or near a coastal area. The commercial fishing industry alone, which depends on these areas, contributes \$11 billion dollars per year to the national economy. Moreover, oceans are the lifeblood of the world. The health of our marine resources is intertwined with that of ecosystems throughout the world.

The purpose of the bill before us is to develop and maintain a comprehensive national policy for our oceans and coastal areas. A national ocean policy includes a broad range of issues from commerce, environmental protection, scientific research, to national security. To that end, the bill establishes a 16-member National Ocean Commission, which will be assisted by an interagency National Ocean Council, in developing and making recommendations to Congress for a national oceans policy.

As originally reported by the Committee on Commerce, Science and Technology, the creation of the National Ocean Council, raised two concerns. First, how would the National Ocean Council affect the execution of existing environmental laws? Second, is it timely now to create a permanent Council prior to the report of the independent National Ocean Commission created in the bill?

The manager's amendment that is before us to day answers both of these questions. Any possible ambiguity regarding the National Ocean Council's role is resolved. Existing responsibilities under federal law are unaffected.

I was concerned creation of a permanent Council now would unduly constrain the Commission's recommendations. The manager's amendment makes it clear, however, that the National Ocean Council's function is to assist the independent National Ocean

Commission in the preparation of its report. After the Commission completes its report, the Council will take the Commission report into account in developing an implementation plan for a national ocean and coastal policy. The National Ocean Council will also cease to exist one year after the Commission submits its report.

Before closing, I want to commend Senators HOLLINGS for his persistence with respect to oceans and coastal policy. I also want to thank him, as well as Senators SNOWE and MCCAIN, for addressing my concerns in the manager's amendment.

Mr. HOLLINGS. Mr. President, I rise in support of Senate passage of S. 1213, the Oceans Act of 1997. The bill calls for an action plan for the twenty-first century to explore, protect, and make better use of our oceans and coasts. Its passage is, quite simply, the most important step we can take today to ensure the future of our oceans and coasts.

I thank my colleagues for their support, in particular, the leadership of the Commerce Committee, Senators MCCAIN and SNOWE, for their cosponsorship and their efforts over the last several weeks to bring this bill to the floor. Following in the Commerce Committee tradition with respect to ocean issues, this has been a bipartisan process. I also thank the other cosponsors of the legislation, Senators STEVENS, KERRY, BREAUX, INOUE, KENNEDY, BOXER, BIDEN, LAUTENBERG, AKAKA, MURKOWSKI, THURMOND, and MURRAY for their continued support. Finally, I want to express my appreciation to the numerous academic, environmental, and industry groups who agree that the time has come for this bill.

The legislation that is before the Senate today is a substitute by Senator SNOWE and myself, that reflects the comments received from the administration and concerns expressed by Senator CHAFEE and others. The essential elements of the bill remain the same as the committee-reported version and would establish two new entities. First is a 16-member Commission on Ocean Policy (Commission) to provide recommendations for a national ocean and coastal policy. Second is the National Ocean Council (Council), a high-level Federal interagency working group to advise the President and the Commission, assist in policy development and implementation, and coordinate Federal programs relating to ocean and coastal activities.

The changes made by the Snowe-Hollings substitute focus primarily on addressing concerns expressed regarding the establishment of the Council. Over the past two weeks, the National Security Council and the Department of Commerce have worked under Secretary Daley's able leadership to pull together the views of the numerous Federal entities involved in ocean and coastal activities. The results of that effort are reflected in the amendment,

and I am including a letter from Secretary Daley expressing the administration's support for S. 1213 following my statement. At Senator CHAFEE's request, we also have agreed to sunset the Council one year after the Commission completes its report. As we have discussed with both the administration and Senator CHAFEE, the purpose of the Council is to ensure coordinated input by Federal agencies and departments in the development and implementation of a national ocean and coastal policy. The Council is intended to provide an important forum for administration ocean policy discussions, not to supersede other ongoing coordination mechanisms like the interagency working group on international ocean policy, nor to interfere with ongoing Federal activities under existing law. The changes made by the substitute should clarify that intent, and if, based on experience and the Commission recommendations, the Council proves to be an effective long-term mechanism for coordinating Federal ocean activities, it could be extended either administratively or legislatively.

In 1966, Congress enacted the Marine Resources and Engineering Development Act (1966 Act). This bill would update and replace that legislation. The 1966 Act established the Stratton Commission whose report, "Our Nation and the Sea," defined national objectives and programs with respect to the oceans and in conjunction with the 1966 Act laid the foundation for U.S. ocean and coastal policy and programs, guiding their development for three decades.

While the Stratton Commission displayed broad vision, the world has changed in numerous ways since 1966. The U.S. legal and bureaucratic framework related to the oceans has grown enormously in the past 30 years. In 1966, there was no NOAA, no Environmental Protection Agency, and no laws like the Clean Water Act, Endangered Species Act, the Marine Mammal Protection Act, the Marine Protection, Research, and Sanctuaries Act, the Magnuson-Stevens Fishery Conservation and Management Act, or the Oil Pollution Act. Today people who work and live on the water face a patchwork of confusing and sometimes contradictory federal and state regulations. Fishermen tell me they need a law degree to go fishing. This bill will allow us to reduce conflicts while maintaining environmental and health safeguards.

Oceans and coasts face pressures today that the authors of the 1966 Act could not have foreseen. Today, over 50 percent of the U.S. population lives in coastal areas which account for less than 10 percent of our land area. By the year 2010, 127 million people, an estimated 60 percent of Americans, will live along the coast. Greater understanding of ocean and coastal ecosystems and improved management are essential to maintain healthy coasts and to prepare for and protect communities from natural hazards like hurricanes.

We need to do a better job of managing and using marine resources as demonstrated by fish kills, oil spills, the invasion of zebra mussels, and the death of thousands of marine animals from marine plastic debris. We have fallen short in defending our shores and waters. In recent years, New England has struggled with the collapse of their traditional cod, haddock, and flounder. In other regions, overfished stocks include sharks, swordfish, bluefin tuna, salmon, red snapper, grouper, and weakfish. Restoring fisheries could add an estimated \$2.9 billion to the economy each year. However, we are allowing about 20,000 acres of coastal wetlands, important fish habitat, to disappear each year. Louisiana alone has lost half a million acres of wetlands since the mid 1950's.

Environmental threats to the oceans are growing increasingly complex. This past summer, local newspapers reported daily on *Pfiesteria*, the tiny killer cell wreaking havoc in the Chesapeake Bay and North Carolina. Thousands of fish were killed—literally eaten alive by this toxic organism—and some fishermen, swimmers, boaters, and scientists exposed to the cell experienced memory loss, skin lesions, and other troubling symptoms. Scientists suspect everything from inadequate city sewage plants to farm manure and fertilizer runoff. The technical, legal, and management tools to address *Pfiesteria* may exist collectively within a variety of federal and state agencies. However, we currently lack a structured and effective means to bring this expertise to bear on the problem.

Another challenge is El Niño, the cyclical warming of ocean waters off the western coast of South America. The warming results in significant shifts in weather patterns, including rainfall and temperatures in the United States and elsewhere. Experts estimate that an additional 150 Americans die in storms and flooding in El Niño years. While El Niño is a natural phenomenon, human effects on the oceans and atmosphere may increase its magnitude and frequency. Advanced forecasts could reduce by up to \$1 billion the agricultural, economic, and social impacts resulting from El Niño. In addition, action to reduce global warming and other changes to the oceans and atmosphere may reduce the severity of future El Niño events.

We have an opportunity to take economic and scientific advantage of recent technological advances related to the oceans. Today, we still have explored only a tiny fraction of the sea, but with the use of new technologies what we have found is truly incredible. For example, hydrothermal vents, hot water geysers on the deep ocean floor, were discovered just 20 years ago by oceanographers trying to understand the formation of the earth's crust. Now this discovery has led to the identification of nearly 300 new types of marine animals with untold pharmaceutical and biomedical potential.

A re-examination of national policies is also essential to maintain U.S. leadership on international ocean issues. On November 16, 1994, the U.N. Convention on the Law of the Sea entered into force for most countries of the world. Although the United States has accepted most provisions of the treaty as customary international law and 120 other nations are party, U.S. ratification remains in question. At issue is whether changes made to the treaty in 1994 adequately correct the seabed mining provisions that the United States has opposed for twelve years.

The last 31 years have brought great changes to our oceans and coast. Our nation needs to reexamine our policies and programs so that we can continue to explore, protect, and sustainably use ocean resources now and throughout the twenty-first century. The Oceans Act of 1997 will guide us through that process with the vision it demands. I urge the Senate to pass S. 1213.

I ask unanimous consent a letter dated November 9, 1997 from the Secretary of Commerce be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF COMMERCE,
Washington, DC, November 9, 1997.

Hon. JOHN MCCAIN,
Chairman, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The purpose of this letter is to provide the Administration's views on the Oceans Act of 1997 (S. 1213) as reported by the Senate Committee on Commerce, Science and Transportation. As you prepare to bring the bill to the Senate floor, your consideration of the Administration's views would be appreciated.

The Committee has developed a bill that supports and furthers the Administration's ocean policy goals. The Administration has in place robust interagency mechanisms for coordinating ocean policy issues. We believe that the bill, as modified by the Manager's Amendment that was recently provided to us, would be consistent with, and assist in achieving, the Administration's domestic ocean policy objectives. Accordingly, the Administration supports Senate passage of S. 1213, as modified by the Manager's Amendment.

We have been advised by the Office of Management and Budget that there is no objection to the submission of this letter to the Congress from the standpoint of the program of the President.

Sincerely,

WILLIAM M. DALEY.

Mr. NICKLES. Mr. President, I ask unanimous consent that the amendment be agreed to, that the bill be considered read the third time, and passed, as amended, and that any statements relating to the bill appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 1639) was agreed to.

The bill (S. 1213) was considered read the third time, and passed, as amended, as follows:

S. 1213

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Oceans Act of 1997".

SEC. 2. CONGRESSIONAL FINDINGS; PURPOSE AND OBJECTIVES.

(a) FINDINGS.—The Congress makes the following findings:

(1) Covering more than two-thirds of the Earth's surface, the oceans and Great Lakes play a critical role in the global water cycle and in regulating climate, sustain a large part of Earth's biodiversity, provide an important source of food and a wealth of other natural products, act as a frontier to scientific exploration, are critical to national security, and provide a vital means of transportation. The coasts, transition between land and open ocean, are regions of remarkably high biological productivity, contribute more than 30 percent of the Gross Domestic Product, and are of considerable importance for recreation, waste disposal, and mineral exploration.

(2) Ocean and coastal resources are susceptible to change as a direct and indirect result of human activities, and such changes can significantly impact the ability of the oceans and Great Lakes to provide the benefits upon which the Nation depends. Changes in ocean and coastal processes could affect global climate patterns, marine productivity and biodiversity, environmental quality, national security, economic competitiveness, availability of energy, vulnerability to natural hazards, and transportation safety and efficiency.

(3) Ocean and coastal resources are not infinite, and human pressure on them is increasing. One half of the Nation's population lives within 50 miles of the coast, ocean and coastal resources once considered inexhaustible are now threatened with depletion, and if population trends continue as expected, pressure on and conflicting demands for ocean and coastal resources will increase further as will vulnerability to coastal hazards.

(4) Marine transportation is key to United States participation in the global economy and to the wide range of activities carried out in ocean and coastal regions. Inland waterway and ports are the link between marine activities in ocean and coastal regions and the supporting transportation infrastructure ashore. International trade is expected to triple by 2020. The increase has the potential to outgrow—

(A) the capabilities of the marine transportation system to ensure safety; and

(B) the existing capacity of ports and waterways.

(5) Marine technologies hold tremendous promise for expanding the range and increasing the utility of products from the oceans and Great Lakes, improving the stewardship of ocean and coastal resources, and contributing to business and manufacturing innovations and the creation of new jobs.

(6) Research has uncovered the link between oceanic and atmospheric processes and improved understanding of world climate patterns and forecasts. Important new advances, including availability of military technology, have made feasible the exploration of large areas of the ocean which were inaccessible several years ago. In designating 1998 as "The Year of the Ocean", the United Nations highlights the value of increasing our knowledge of the oceans.

(7) It has been 30 years since the Commission on Marine Science, Engineering, and Resources (known as the Stratton Commission) conducted a comprehensive examination of

ocean and coastal activities that led to enactment of major legislation and the establishment of key oceanic and atmospheric institutions.

(8) A review of existing activities is essential to respond to the changes that have occurred over the past three decades and to develop an effective new policy for the twenty-first century to conserve and use, in a sustainable manner, ocean and coastal resources, protect the marine environment, explore ocean frontiers, protect human safety, and create marine technologies and economic opportunities.

(9) Changes in United States laws and policies since the Stratton Commission, such as the enactment of the Coastal Zone Management Act, have increased the role of the States in the management of ocean and coastal resources.

(10) While significant Federal and State ocean and coastal programs are underway, those Federal programs would benefit from a coherent national ocean and coastal policy that reflects the need for cost-effective allocation of fiscal resources, improved inter-agency coordination, and strengthened partnerships with State, private, and international entities engaged in ocean and coastal activities.

(b) PURPOSE AND OBJECTIVES.—The purpose of this Act is to develop and maintain, consistent with the obligations of the United States under international law, a coordinated, comprehensive, and long-range national policy with respect to ocean and coastal activities that will assist the Nation in meeting the following objectives:

(1) The protection of life and property against natural and manmade hazards.

(2) Responsible stewardship, including use, of fishery resources and other ocean and coastal resources.

(3) The protection of the marine environment and prevention of marine pollution.

(4) The enhancement of marine-related commerce and transportation, the resolution of conflicts among users of the marine environment, and the engagement of the private sector in innovative approaches for sustainable use of marine resources.

(5) The expansion of human knowledge of the marine environment including the role of the oceans in climate and global environmental change and the advancement of education and training in fields related to ocean and coastal activities.

(6) The continued investment in and development and improvement of the capabilities, performance, use, and efficiency of technologies for use in ocean and coastal activities.

(7) Close cooperation among all government agencies and departments to ensure—

(A) coherent regulation of ocean and coastal activities;

(B) availability and appropriate allocation of Federal funding, personnel, facilities, and equipment for such activities; and

(C) cost-effective and efficient operation of Federal departments, agencies, and programs involved in ocean and coastal activities.

(8) The enhancement of partnerships with State and local governments with respect to oceans and coastal activities, including the management of ocean and coastal resources and identification of appropriate opportunities for policy-making and decision-making at the State and local level.

(9) The preservation of the role of the United States as a leader in ocean and coastal activities, and, when it is in the national interest, the cooperation by the United States with other nations and international organizations in ocean and coastal activities.

SEC. 3. DEFINITIONS.

As used in this Act—

(1) The term "Commission" means the Commission on Ocean Policy.

(2) The term "Council" means the National Ocean Council.

(3) The term "marine environment" includes—

(A) the oceans, including coastal and offshore waters and the adjacent shore lands;

(B) the continental shelf;

(C) the Great Lakes; and

(D) the ocean and coastal resources thereof.

(4) The term "ocean and coastal activities" includes activities related to oceanography, fisheries and other ocean and coastal resource stewardship and use, marine aquaculture, energy and mineral resource extraction, marine transportation, recreation and tourism, waste management, pollution mitigation and prevention, and natural hazard reduction.

(5) The term "ocean and coastal resource" means, with respect to the oceans, coasts, and Great Lakes, any living or non-living natural resource (including all forms of animal and plant life found in the marine environment, habitat, biodiversity, water quality, minerals, oil, and gas) and any significant historic, cultural or aesthetic resource.

(6) The term "oceanography" means scientific exploration, including marine scientific research, engineering, mapping, surveying, monitoring, assessment, and information management, of the oceans, coasts, and Great Lakes—

(A) to describe and advance understanding of—

(i) the role of the oceans, coasts and Great Lakes in weather and climate, natural hazards, and the processes that regulate the marine environment; and

(ii) the manner in which such role, processes, and environment are affected by human actions;

(B) for the conservation, management and sustainable use of living and nonliving resources; and

(C) to develop and implement new technologies related to sustainable use of the marine environment.

SEC. 4. NATIONAL OCEAN AND COASTAL POLICY.

(a) EXECUTIVE RESPONSIBILITIES.—The President, with the assistance of the Council and the advice of the Commission, shall—

(1) develop and maintain a coordinated, comprehensive, and long-range national policy with respect to ocean and coastal activities consistent with obligations of the United States under international law; and

(2) with regard to Federal agencies and departments—

(A) review significant ocean and coastal activities, including plans, priorities, accomplishments, and infrastructure requirements;

(B) plan and implement an integrated and cost-effective program of ocean and coastal activities including, but not limited to, oceanography, stewardship of ocean and coastal resources, protection of the marine environment, maritime transportation safety and efficiency, marine recreation and tourism, and marine aspects of weather, climate, and natural hazards;

(C) designate responsibility for funding and conducting ocean and coastal activities; and

(D) ensure cooperation and resolve differences arising from laws and regulations applicable to ocean and coastal activities which result in conflicts among participants in such activities.

(b) COOPERATION AND CONSULTATION.—In carrying out responsibilities under this Act, the President may use such staff, inter-agency, and advisory arrangements as the President finds necessary and appropriate and shall consult with non-Federal organizations and individuals involved in ocean and coastal activities.

SEC. 5. NATIONAL OCEAN COUNCIL.

(a) **ESTABLISHMENT.**—The President shall establish a National Ocean Council and appoint a Chairman from among its members. The Council shall consist of—

- (1) the Secretary of Commerce;
- (2) the Secretary of Defense;
- (3) the Secretary of State;
- (4) the Secretary of Transportation;
- (5) the Secretary of the Interior;
- (6) the Attorney General;
- (7) the Administrator of the Environmental Protection Agency;
- (8) the Director of the National Science Foundation;
- (9) the Director of the Office of Science and Technology Policy;
- (10) the Chairman of the Council on Environmental Quality;
- (11) the Chairman of the National Economic Council;
- (12) the Director of the Office of Management and Budget; and
- (13) such other Federal officers and officials as the President considers appropriate.

(b) ADMINISTRATION.—

(1) The President or the Chairman of the Council may from time to time designate one of the members of the Council to preside over meetings of the Council during the absence or unavailability of such Chairman.

(2) Each member of the Council may designate an officer of his or her agency or department appointed with the advice and consent of the Senate to serve on the Council as an alternate in the event of the unavoidable absence of such member.

(3) An executive secretary shall be appointed by the Chairman of the Council, with the approval of the Council. The executive secretary shall be a permanent employee of one of the agencies or departments represented on the Council and shall remain in the employ of such agency or department.

(4) For the purpose of carrying out the functions of the Council, each Federal agency or department represented on the Council shall furnish necessary assistance to the Council. Such assistance may include—

(A) detailing employees to the Council to perform such functions, consistent with the purposes of this section, as the Chairman of the Council may assign to them; and

(B) undertaking, upon request of the Chairman of the Council, such special studies for the Council as are necessary to carry out its functions.

(5) The Chairman of the Council shall have the authority to make personnel decisions regarding any employees detailed to the Council.

(c) FUNCTIONS.—The Council shall—

(1) assist the Commission in completing its report under section 6;

(2) serve as the forum for developing an implementation plan for a national ocean and coastal policy and program, taking into consideration the Commission report;

(3) improve coordination and cooperation, and eliminate duplication, among Federal agencies and departments with respect to ocean and coastal activities; and

(4) assist the President in the preparation of the first report required by section 7(a).

(d) **SUNSET.**—The Council shall cease to exist one year after the Commission has submitted its final report under section 6(h).

(e) SAVINGS PROVISION.—

(1) Council activities are not intended to supersede or interfere with other Executive Branch mechanisms and responsibilities.

(2) Nothing in this Act has any effect on the authority or responsibility of any Federal officer or agency under any other Federal law.

SEC. 6. COMMISSION ON OCEAN POLICY.**(a) ESTABLISHMENT.**—

(1) **IN GENERAL.**—The President shall, within 90 days after the enactment of this Act, establish a Commission on Ocean Policy. The Commission shall be composed of 16 members including individuals drawn from State and local governments, industry, academic and technical institutions, and public interest organizations involved with ocean and coastal activities. Members shall be appointed for the life of the Commission as follows:

(A) 4 shall be appointed by the President of the United States.

(B) 4 shall be appointed by the President chosen from a list of 8 proposed members submitted by the Majority Leader of the Senate in consultation with the Chairman of the Senate Committee on Commerce, Science, and Transportation.

(C) 4 shall be appointed by the President chosen from a list of 8 proposed members submitted by the Speaker of the House of Representatives in consultation with the Chairman of the House Committee on Resources.

(D) 2 shall be appointed by the President chosen from a list of 4 proposed members submitted by the Minority Leader of the Senate in consultation with the Ranking Member of the Senate Committee on Commerce, Science, and Transportation.

(E) 2 shall be appointed by the President chosen from a list of 4 proposed members submitted by the Minority Leader of the House in consultation with the Ranking Member of the House Committee on Resources.

(2) **FIRST MEETING.**—The Commission shall hold its first meeting within 30 days after it is established.

(3) **CHAIRMAN.**—The President shall select a Chairman from among such 16 members. Before selecting the Chairman, the President is requested to consult with the Majority and Minority Leaders of the Senate, the Speaker of the House of Representatives, and the Minority Leader of the House of Representatives.

(4) **ADVISORY MEMBERS.**—In addition, the Commission shall have 4 Members of Congress, who shall serve as advisory members. One of the advisory members shall be appointed by the Speaker of the House of Representatives. One of the advisory members shall be appointed by the minority leader of the House of Representatives. One of the advisory members shall be appointed by the majority leader of the Senate. One of the advisory members shall be appointed by the minority leader of the Senate. The advisory members shall not participate, except in an advisory capacity, in the formulation of the findings and recommendations of the Commission.

(b) **FINDINGS AND RECOMMENDATIONS.**—The Commission shall report to the President and the Congress on a comprehensive national ocean and coastal policy to carry out the purpose and objectives of this Act. In developing the findings and recommendations of the report, the Commission shall—

(1) review and suggest any necessary modifications to United States laws, regulations, and practices necessary to define and implement such policy, consistent with the obligations of the United States under international law;

(2) assess the condition and adequacy of investment in existing and planned facilities and equipment associated with ocean and coastal activities including human resources, vessels, computers, satellites, and other appropriate technologies and platforms;

(3) review existing and planned ocean and coastal activities of Federal agencies and departments, assess the contribution of such activities to development of an integrated

long-range program for oceanography, ocean and coastal resource management, and protection of the marine environment, and identify any such activities in need of reform to improve efficiency and effectiveness;

(4) examine and suggest mechanisms to address the interrelationships among ocean and coastal activities, the legal and regulatory framework in which they occur, and their inter-connected and cumulative effects on the marine environment, ocean and coastal resources, and marine productivity and biodiversity;

(5) review the known and anticipated demands for ocean and coastal resources, including an examination of opportunities and limitations with respect to the use of ocean and coastal resources within the exclusive economic zone, projected impacts in coastal areas, and the adequacy of existing efforts to manage such use and minimize user conflicts;

(6) evaluate relationships among Federal, State, and local governments and the private sector for planning and carrying out ocean and coastal activities and address the most appropriate division of responsibility for such activities;

(7) identify opportunities for the development of or investment in new products, technologies, or markets that could contribute to the objectives of this Act;

(8) consider the relationship of the ocean and coastal policy of the United States to the United Nations Convention on the Law of the Sea and other international agreements, and actions available to the United States to effect collaborations between the United States and other nations, including the development of cooperative international programs for oceanography, protection of the marine environment, and ocean and coastal resource management; and

(9) engage in any other preparatory work deemed necessary to carry out the duties of the Commission pursuant to this Act.

(c) **DUTIES OF CHAIRMAN.**—In carrying out the provisions of this subsection, the Chairman of the Commission shall be responsible for—

(1) the assignment of duties and responsibilities among staff personnel and their continuing supervision; and

(2) the use and expenditures of funds available to the Commission.

(d) **COMPENSATION OF MEMBERS.**—Each member of the Commission who is not an officer or employee of the Federal Government, or whose compensation is not precluded by a State, local, or Native American tribal government position, shall be compensated at a rate equal to the daily equivalent of the annual rate payable for Level IV of the Executive Schedule under section 5315 of title 5, United States Code, for each day (including travel time) during which such member is engaged in the performance of the duties of the Commission. All members of the Commission who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

(e) STAFF.—

(1) The Chairman of the Commission may, without regard to the civil service laws and regulations, appoint and terminate an executive director who is knowledgeable in administrative management and ocean and coastal policy and such other additional personnel as may be necessary to enable the Commission to perform its duties. The employment and termination of an executive director shall be subject to confirmation by a majority of the members of the Commission.

(2) The executive director shall be compensated at a rate not to exceed the rate

payable for Level V of the Executive Schedule under section 5316 of title 5, United States Code. The Chairman may fix the compensation of other personnel without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification of positions and General Schedule pay rates, except that the rate of pay for such personnel may not exceed the rate payable for GS-15, step 7, of the General Schedule under section 5332 of such title.

(3) Upon request of the Chairman of the Commission, after consulting with the head of the Federal agency concerned, the head of any Federal Agency shall detail appropriate personnel of the agency to the Commission to assist the Commission in carrying out its functions under this Act. Federal Government employees detailed to the Commission shall serve without reimbursement from the Commission, and such detailee shall retain the rights, status, and privileges of his or her regular employment without interruption.

(4) The Commission may accept and use the services of volunteers serving without compensation, and to reimburse volunteers for travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code. Except for the purposes of chapter 81 of title 5, United States Code, relating to compensation for work injuries, and chapter 171 of title 28, United States Code, relating to tort claims, a volunteer under this section may not be considered to be an employee of the United States for any purpose.

(5) To the extent that funds are available, and subject to such rules as may be prescribed by the Commission, the executive director of the Commission may procure the temporary and intermittent services of experts and consultants in accordance with section 3109 of title 5, United States Code, but at rates not to exceed the daily rate payable for GS-15, step 7, of the General Schedule under section 5332 of title 5, United States Code.

(f) ADMINISTRATION.—

(1) All meetings of the Commission shall be open to the public, except that a meeting or any portion of it may be closed to the public if it concerns matters or information described in section 552b(c) of title 5, United States Code. Interested persons shall be permitted to appear at open meetings and present oral or written statement on the subject matter of the meeting. The Commission may administer oaths or affirmations to any person appearing before it.

(2) All open meetings of the Commission shall be preceded by timely public notice in the Federal Register of the time, place, and subject of the meeting.

(3) Minutes of each meeting shall be kept and shall contain a record of the people present, a description of the discussion that occurred, and copies of all statements filed. Subject to section 552 of title 5, United States Code, the minutes and records of all meetings and other documents that were made available to or prepared for the Commission shall be available for public inspection and copying at a single location in the offices of the Commission.

(4) The Federal Advisory Committee Act (5 U.S.C. App.) does not apply to the Commission.

(g) COOPERATION WITH OTHER FEDERAL ENTITIES.—

(1) The Commission is authorized to secure directly from any Federal agency or department any information it deems necessary to carry out its functions under this Act. Each such agency or department is authorized to cooperate with the Commission and, to the extent permitted by law, to furnish such in-

formation to the Commission, upon the request of the Chairman of the Commission.

(2) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(3) The General Services Administration shall provide to the Commission on a reimbursable basis the administrative support services that the Commission may request.

(4) The Commission may enter into contracts with Federal and State agencies, private firms, institutions, and individuals to assist the Commission in carrying out its duties. The Commission may purchase and contract without regard to section 303 of the Federal Property and Administration Services Act of 1949 (41 U.S.C. 253), section 18 of the Office of Federal Procurement Policy Act (41 U.S.C. 416), and section 8 of the Small Business Act (15 U.S.C. 637), pertaining to competition and publication requirements, and may arrange for printing without regard to the provisions of title 44, United States Code. The contracting authority of the Commission under this Act is effective only to the extent that appropriations are available for contracting purposes.

(h) REPORT.—The Commission shall submit to the President, via the Council, and to the Congress not later than 18 months after the establishment of the Commission, a final report of its findings and recommendations. The Commission shall cease to exist 30 days after it has submitted its final report.

(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to support the activities of the Commission a total of up to \$6,000,000 for fiscal years 1998 and 1999. Any sums appropriated shall remain available without fiscal year limitation until the Commission ceases to exist.

SEC. 7. REPORT AND BUDGET COORDINATION.

(a) BIENNIAL REPORT.—Beginning in January, 1999, the President shall transmit to the Congress biennially a report, which shall include—

(1) a comprehensive description of the ocean and coastal activities (and budgets) and related accomplishments of all agencies and departments of the United States during the preceding two fiscal years; and

(2) an evaluation of such activities (and budgets) and accomplishments in terms of the purpose and objectives of this Act. Reports made under this section shall contain such recommendations for legislation as the President may consider necessary or desirable.

(b) BUDGET COORDINATION.—

(1) Each year the President shall provide general guidance to each Federal agency or department involved in ocean or coastal activities with respect to the preparation of requests for appropriations.

(2) Each agency or department involved in such activities shall include with its annual request for appropriations a report which—

(A) identifies significant elements of the proposed agency or department budget relating to ocean and coastal activities; and

(B) specifies how each such element contributes to the implementation of a national ocean and coastal policy.

SEC. 8. REPEAL OF 1966 STATUTE.

The Marine Resources and Engineering Development Act of 1966 (33 U.S.C. 1101 et seq.) is repealed.

AMENDING TITLE 49, UNITED STATES CODE, REGARDING THE NATIONAL TRANSPORTATION SAFETY BOARD

Mr. NICKLES. Mr. President, I ask unanimous consent that the Senate

proceed to the immediate consideration of H.R. 2476, which was received from the House.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

A bill (H.R. 2476) to amend title 49, United States Code, to require the National Transportation Safety Board and individual foreign air carriers to address the needs of families of passengers involved in aircraft accidents involving foreign air carriers.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MCCAIN. Mr. President, I am pleased that the Senate has turned to H.R. 2476, the Foreign Air Carrier Family Support Act. I urge its immediate adoption. H.R. 2476 is virtually identical to legislation that I introduced earlier in the year, and that the Commerce Committee approved in September. I commend my committee colleagues—especially Senators GORTON, HOLLINGS, and FORD—for working with me on this issue. In particular, I want to recognize Representative UNDERWOOD, who spearheaded this effort in the House.

It was the tragic crash of Korean Air Flight 801 in Guam that brought the need for this legislation into focus. The bill would require a foreign air carrier that wants permission to operate in the United States to develop a family assistance plan, in the event of an accident on U.S. soil.

Specifically, the foreign air carrier would be required to provide the Secretary of Transportation and the chairman of the National Transportation Safety Board [NTSB] with a plan for addressing the needs of the families of passengers involved in an aircraft accident that involves an aircraft under the control of that foreign air carrier, and that involves a significant loss of life. The Secretary could not grant permission for the foreign air carrier to operate in the United States unless the Secretary had received a sufficient family assistance plan.

The requisite family assistance plan would include a reliable, staffed toll-free number for the passengers' families, and a process for expedient family notification prior to public notice of the passengers' identities. An NTSB employee would serve as director of family support services, with the assistance of an independent nonprofit organization with experience in disasters and post-trauma communication with families. The foreign air carrier would provide these family liaisons with updated passenger lists following the crash. The legislation would require that the carrier consult and coordinate with the families on the disposition of remains and personal effects.

The legislation would build on the family assistance provisions that Congress enacted last year as part of the Federal Aviation Reauthorization Act
