### HOUSE CONCURRENT RESOLUTION 109

Whereas, To ensure the prudent use of tax dollars designated for disaster assistance, the federal Flood Disaster Protection Act of 1973 mandates the purchase of flood insurance as a condition of receipt of federal or federally related financial assistance for the acquisition or construction of buildings in Special Flood Hazard Areas (SFHAs); and

Whereas, the Act prohibits federal agencies such as the Federal Housing Administration, the Veterans Administration, the Small Business Administration, and any federally regulated lending institution from making or guaranteeing a loan for a building in an SFHA unless flood insurance has been purchased; additionally, it is standard practice for most mortgage companies to require flood insurance on property in designated flood zones as a condition of a loan; and

Whereas, The Federal Emergency Management Agency (FEMA), the entity responsible for designating and mapping flood risk zones, uses several criteria to establish floodplain classifications, including a community's his-

torical flood and hydrology data, flood control measures, existing and planned development, and topography; and

Whereas, For many communities in Texas, the flood insurance requirement is determined using maps that may have been drawn as far back as the 1970s or early 1980s; these dated flood maps do not accurately reflect changes in population, development, or flood control or storm sewer improvements that a community may have implemented to reduce the risk of flooding; and

Whereas, A glaring example of this problem is the City of Laredo, where residents and business owners are required to purchase flood insurance based on FEMA-designated flood zone maps drawn in 1982; and

Whereas, During the past decade, the City of Laredo has constructed numerous concrete channels to divert flood waters and has made storm sewer improvements to help reduce the risk of flood; these projects have been carried out to accommodate the rapid population growth in the city, which has tripled in size over the last 15 years; and

Whereas, The result of federally mandated flood insurance requirements based on outdated maps has created a windfall for insurance companies, which are collecting millions of dollars in flood insurance from people who no longer live in flood zones: Now, therefore, be it

*Resolved*, That the 75th Legislature of the State of Texas hereby urge the Congress of the United States to request that the Federal Emergency Management Agency update community flood maps every 10 years; and, be it further

*Resolved*, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and president of the senate of the United States Congress, and to all members of the Texas delegation to the congress with the request that it be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

POM-133. A resolution adopted by the Senate of the Legislature of the State of Oregon; to the Committee on Energy and Natural Resources.

### SENATE RESOLUTION 3

Whereas the State of Oregon owns the water resources within the state's rivers, streams and lakes; and

Whereas the State of Oregon has authorized and allowed for the acquisition of the right to the use of water for beneficial purposes and any person may perfect such water right as a vested property right under Oregon law; and

Whereas chapter 228, Oregon Laws 1905, specifically authorized appropriation of water for use in projects authorized under the Federal Reclamation Act of 1902; and

Whereas chapter 5, Oregon Laws 1905, specifically authorized the use of the bed of the Upper Klamath Lake for the storage of water for reclamation and irrigation use and for no other purpose; and

Whereas the Klamath Project was authorized and constructed pursuant to the laws of the states of Oregon and California and the United States; and

Whereas pioneers, settlers, homesteaders and veterans of two world wars, by their industry and commitment, have made the farmland in the Klamath Project enormously productive and a valued part of the economy and culture of the states of Oregon and California; and

Whereas water has been appropriated to beneficial use within the Klamath Project in Oregon and California for irrigation of approximately 230,000 acres; and

Whereas irrigators within the Klamath Project have acquired rights to the use of waters of the Klamath River for irrigation, and these rights are recognized and confirmed in the Klamath River Basin Compact, ratified by the states of Oregon and California and consented to by Act of Congress in 1957; and

Whereas the State of Oregon has the legal authority to quantify and regulate rights to the use of water in Oregon; and

Whereas the State of Oregon has undertaken to adjudicate certain rights to the use of the Klamath River and its tributaries; and

Whereas the United States Court of Appeals has confirmed, over the objection of the United States Department of the Interior, that the State of Oregon has the right and responsibility to determine and administer the rights of claimants to the use of the Klamath River and its tributaries; and

Whereas the United States Department of the Interior has directed and proposes to direct the operation of Klamath Project facilities to allocate water to purposes other than irrigation, including instream purposes and instream uses in California; and

Whereas the Department of the Interior has used and proposes to use the bed of Upper Klamath Lake for the storage of water for purposes other than irrigation, in contravention of the limited authority granted by the State of Oregon; and

Whereas the Department of the Interior purports to have the authority to administratively determine and allocate the water of Oregon and to allocate water away from authorized Klamath Project irrigation uses; and

Whereas the position of the State of Oregon is that the Department of the Interior lacks authority to allocate water or reallocate Klamath Project water supplies and the administration of water must proceed in a manner consistent with Oregon's system for the administration of water rights; and

Whereas the Department of the Interior has failed and refused to address legitimate, fair and fundamental questions concerning its authority and actions; and

Whereas the Department of the Interior has failed and refused to protect the rights of the water users in the Klamath Project vis a vis the thousands of junior users in the Klamath watershed, and has instead proposed only to reallocate water used in the Klamath Project to other users and uses; and

Whereas the actions of the Department of the Interior have resulted in division, distrust and anger; and

Whereas it is desirable and in the interests of the State of Oregon that the rights and interests of the Klamath Project irrigators and Oregon's system for the allocation and administration of water rights be respected; now, therefore,

*Be It Resolved by the Senate of the State of Oregon:*

(1) The President and the Congress of the United States are respectfully urged to:

(a) Act to ensure the protection and respect for the State of Oregon's authority to allocate water and to determine and administer rights to the use of water; and

(b) Ensure that the United States Department of the Interior and other federal agencies do not operate or direct the operation of Klamath Project facilities except in accordance with the State of Oregon's system for the determination and administration of water rights and to ensure, at a minimum, that the priority of rights in the Klamath Project to the use of Klamath River water is enforced and protected.

(2) A copy of this resolution shall be sent to the President of the United States, the Secretary of the United States Department of the Interior, the President of the Senate
