

and discussions with the government of Egypt. Unilateral actions will only harm relationships important to the American national interest.

In summary, Egypt has played and continues to play a key role in ensuring the success of the Middle East Peace Process. Equally important, Egypt has proven to be a staunch ally, willing to face danger to protect our shared interest in the region and to support us as our armed forces contribute to global stability. As such, I am supportive of the Committee's amendment to reinstall the earmark for assistance to Egypt.●

INTERSTATE TRANSPORTATION AND FLOW OF SOLID WASTE

● Mr. LEVIN. Mr. President, I ask that the text of a letter from the Governors of Michigan, Ohio, New Jersey, Indiana, and Pennsylvania, to the Chairman of the House Commerce Committee be printed in the RECORD.

The Governors correctly urge the House Commerce Committee to swiftly move forward on comprehensive legislation to provide states and local governments with the authority to regulate the interstate transportation and flow of solid waste.

Mr. President, the Senate has repeatedly passed such legislation and it is my hope that we will do so again before the end of this year. The majority leadership in the House has certainly given the impression that this important matter is not a priority item, despite the pleas for help from state and local governments around the country who are besieged by out-of-state waste or find their local waste management investments becoming increasingly uneconomical. I join with the Governors in urging the House Commerce Committee and the Congress to quickly pass legislation to provide more control over solid waste planning decisions to state and local governments.

The letter follows:

JULY 9, 1997.

Hon. THOMAS J. BLILEY, Jr.,
Chairman, The House Commerce Committee,
Rayburn House Office Building, Washington,
DC.

DEAR CHAIRMAN BLILEY: We are writing to urge you to move a comprehensive interstate waste and flow control bill this year. In recent conversations with Governor Voinovich, you encouraged our five states to reach an agreement on interstate waste provisions in order to move comprehensive legislation that will help both importing and exporting states.

We strongly believe that the lack of federal interstate waste and flow control legislation undermines states' abilities to implement environmentally sound waste disposal plans and to protect our own natural resources. Without federal authority to place reasonable limits on the amount of out-of-state wastes, states like Ohio, Pennsylvania, Indiana and Michigan have become dumping grounds for trash from other states. Without flow control, states like New Jersey are limited in their ability to manage effectively the disposal of municipal solid waste within their own borders, and would face an enormous financial liability.

In Pennsylvania, Indiana, Michigan and Ohio, where out-of-state waste imports are continuously and unreasonably high, citizens repeatedly ask why they should recycle in order to conserve disposal space for other states' waste. New Jersey has taken aggressive steps to try to manage all of its trash within its borders by the year 2000. New Jersey communities have acted responsibly to build disposal facilities to help meet that goal. However, if Congress fails to protect existing flow control authorities, repayment of the outstanding \$1.6 billion investment will be jeopardized.

We are deeply concerned that our efforts to make responsible decisions have been undermined by federal courts, have put potentially large financial burdens on our communities and have encouraged exporting states to pass their trash problems onto the backs of others. Our citizens are making sacrifices and they need assurances that we have the tools necessary to manage our own waste and limit imports from other states so that we have the space to handle our own garbage.

You have asked our five states to try to work through regional differences on interstate waste provisions that would allow an interstate waste and flow control bill to move forward. Last year, importing states and New Jersey were able to quickly reach a consensus on interstate waste provisions, provided that New Jersey receives flow control authority. We respectfully resubmit that agreement and urge prompt consideration by your committee and the House.

We support this package as a fair and reasonable compromise between importing and exporting states. It provides the ability for importing states to reduce the current amount of out-of-state waste and limit future interstate waste flows. States also would be able to place reasonable restrictions on construction and demolition debris. In addition, it gives local communities the ability to decide whether or not they want to accept other states' trash. And, communities would have reasonable ability to implement flow control authorities. While this package does not include everything that we would like, we believe it is a fair package that we can support without amendments.

Unfortunately, efforts to place reasonable restrictions on out-of-state waste shipment have been perceived by some as an attempt to ban all out-of-state trash. On the contrary, importing states—like Michigan, Indiana, Ohio and Pennsylvania—are not asking for outright authority to prohibit all out-of-state waste, nor are we seeking to prohibit waste from any one state. We are asking for reasonable tools that will enable state and local governments to act responsibly to manage their own waste and limit unreasonable waste imports from other states. Such measures would give substantial authority to limit imports and plan facilities around our own states' needs.

Effective legislation is supported throughout the country. Twenty-four governors and the Western Governors' Association previously have written to you and the House leadership urging passage of effective legislation.

Thank you for your personal consideration of our agreement. We urge you to move forward with comprehensive interstate waste and flow control legislation this year.

Sincerely,

GEORGE V. VOINOVICH,
Governor of Ohio.

JOHN ENGLER,
Governor of Michigan.

TOM RIDGE,
Governor of Pennsylvania.

CHRISTINE TODD WHITMAN,
Governor of New Jersey.

FRANK O'BANNON,
Governor of Indiana.●

GENETIC DISCRIMINATION

● Mr. FRIST. Mr. President, I rise today to address a critical issue that we, as a nation, must face—the fear of discrimination in health insurance practices based on our increasing ability to gather genetic information about ourselves and our families.

The tremendous advances in genetics research spawned by the Human Genome project are opening the door to a greater understanding of the underlying causes of human disease. The revolution in genetics is giving hope to millions of Americans that we will see eventual treatments, and ultimately cures, for some of the most devastating genetic diseases. Yet, our ability to predict what diseases individuals may be at risk for in the future has caused great concern that this powerful information—the information we all carry in our genes—may be used against us.

I am deeply troubled when I hear from the Tennessee Breast Cancer Coalition that genetic counselors are facing women every day who are afraid of the consequences of genetic testing. Women are avoiding genetic testing due to concerns about loss of health insurance coverage for themselves or their families—even though a genetic test might reveal that a woman is not at high risk and therefore allow her to make more informed health care choices.

As a physician and researcher, I am particularly concerned that the fear of discrimination will prevent individuals from participating in research studies or taking advantage of new genetic technologies to improve their medical care.

Scientific advances hold the promise of higher quality medical care, yet only Federal legislation can reassure the public that learning this information is safe. I was encouraged by President Clinton's recent press conference on genetic discrimination, July 14, 1997 which assisted in elevating this issue to the public's attention. While I am currently not a cosponsor of any specific legislative proposal, I am committed to developing a bipartisan legislative solution. I look forward to working with Senator JEFFORDS and my fellow colleagues on the Senate Labor and Human Resources Committee—as well as Senators MACK, SNOWE, DOMENICI, and the many other Members who have been dedicated to this issue.

In my role as chairman of the Subcommittee on Public Health and Safety, I strongly support the intent of legislation which would prohibit discrimination in health insurance against healthy individuals and their families based on their genetic information. We all carry genetic mutations that may place us at risk for future disease—therefore we are all at risk for discrimination. If I receive a genetic test which shows I am at risk for cancer, diabetes, or heart disease, should this

predictive information be used against me or my family? Particularly when I am currently healthy and, in fact, may never develop the illness? I think the American public has answered quite clearly, "no."

As a physician I believe in preventive medicine to avert illness for patients. Similarly, as a policymaker, I believe in "preventive legislation" in this case—to avert widespread discrimination by stepping in now—before genetic information is used in certain health insurance practices and before genetic technologies are used in routine medical practice.

Finally, I believe that, in order to fully address genetic discrimination, we must tackle comprehensive legislation on the confidentiality of medical records—legislation that encompasses all of our health information. We must examine who should have access to sensitive health information and to whom it should be disclosed. As this important debate continues in the 105th Congress, I am committed to ensuring that we craft legislation that protects patient confidentiality, fosters medical research, and maintains a dynamic health care system.

Only with these measures can we ensure that knowledge about our genetic heritage will be used to improve our health—and not force us to hide in fear that this information will cause us harm.

I encourage my Senate colleagues to join me in examining these issues and moving forward in the coming months on these critical pieces of legislation. ●

TRIBUTE TO CAPT. FREDRIC G. LEEDER, USN—PUBLIC AFFAIRS OFFICER

● Mr. GLENN. Mr. President, I rise today to commend Capt. Frederic G. Leeder, USN, upon his retirement from the United States Navy, after 28 years of distinguished and dedicated service to our nation.

Captain Leeder is a native son of Ohio and graduated from Ohio State University with a degree in journalism. Following his graduation from college, Captain Leeder was commissioned as an Ensign. After his graduation from the officers' program at the Defense Department's Information School, he then assumed a variety of public-affairs assignments overseas and state-side. His tours of duty included a North Atlantic Treaty Organization staff assignment and four joint-service assignments.

Most recently, Captain Leeder served as Staff Director for Public Affairs at Headquarters, Defense Logistics Agency (DLA) in Alexandria, Virginia. During his three years at DLA as principal spokesperson, Captain Leeder demonstrated unbounded stamina, keen insight, and exemplary professionalism. Possessing exceptional skill, foresight and composure, Captain Leeder dealt with representatives of the print and electronic media, engaging them on his

terms. In just one example, last fall he competently worked with investigative reporters from a prominent news magazine and a major television network to ensure accuracy and fairness of nationwide reporting on a sensitive issue having significant national security implications. With his intelligent foresight and strong voice of reason, Captain Leeder, advised three different DLA directors, each from a different service I might add, on how to navigate through the often perilous waters of media and community relations.

Captain Leeder succeeded in striking that delicate balance of ensuring the American public's right to know and protecting the public interest throughout his career. An accomplished communicator, he truly has earned the gratitude of thousands of military families that have found comfort and reassurance in his words when loved ones serving on distant seas and shores have been in harm's way. Captain Leeder has served his country for 28 years with valor, loyalty, and integrity, winning the personal and professional respect of all who come in contact with him. Captain Fred Leeder is a master of his craft.

On the occasion of Captain Leeder's retirement from the U.S. Navy, I offer my congratulations and thanks to this esteemed son of the Buckeye state, and wish him well in his future pursuits. ●

TRIBUTE TO ROBERT A. STARR

● Mr. JEFFORDS. Mr. President, I rise today to pay tribute to Robert A. Starr, Chair of the Vermont House Agriculture Committee and true Vermonter. I pay this tribute in recognition of Mr. Starr's unyielding support for the Northeast Dairy Compact, which on August 20, 1997, provides the first over-order payments so desperately needed by Vermont's dairy farmers.

"Bobby", as he is known far and wide throughout Vermont, has given lifelong public service to the Vermont agricultural community. Raised on a dairy farm during and after the Second World War, knowledge of hard times and a capacity for hard-bitten labor were ingrained in Bobby, traits which continue to distinguish the character of our hill farmers. After schooling at Vermont Technical College, Bobby followed the lead of his grandfather and became a member of the Vermont House of Representatives in 1979.

Bobby became a member of the House Agriculture Committee his first year, and has been there ever since. He became Chair in 1987, and has sponsored and provided leadership on a host of initiatives to promote the interests of Vermont agriculture. Bobby has lent his leadership to the variety of Vermont's agricultural pursuits, but it is the dairy industry which has remained at the heart of his vision. Certainly Bobby's upbringing and his strong dairy farm constituency provide the foundation of his knowledge and com-

mitment to the interests of the State's dairy farmers. Yet his vision is broader than just his home district, and indeed has expanded beyond the borders of Vermont to all of New England.

It is this unique expansive vision which spawned the dairy compact. Many of us in this body are intimately familiar with the dairy compact, yet few of us may know that the dairy compact was originally sponsored by Bobby Starr in the Vermont Legislature in 1989.

Few initiatives in my memory have sparked such a vigorous policy debate as the dairy compact. I am proud to have sponsored the compact on behalf of all by colleagues from the New England delegation. Adoption of the compact could not have happened without their hard work here in Congress, and without the years of dedicated work of a veritable army of compact supporters from throughout New England.

In all, the compact reflects the true spirit of commitment to our dairy farmers. The compact's first payment is a tribute to the hard work and the tireless commitment of Bobby Starr. ●

WV AMERICORPS PROJECTS

● Mr. ROCKEFELLER. Mr. President, I rise today to congratulate the West Virginia Americorps Program for their outstanding service and accomplishments. Currently, 500 Americorps members work at nearly 100 sites throughout West Virginia. Americorps programs strive to extend and promote education for children of all socioeconomic backgrounds and to fulfill basic needs, such as, food, shelter, and health care, for West Virginians. By working together with the community, the members of Americorps search for solutions to improve the quality of life and expand opportunities for individuals who are less fortunate.

Helping individuals become more independent and self-sufficient are goals of Americorps. To help people with multiple sclerosis, the West Virginia chapter of the National Multiple Sclerosis Society and Americorps members provide friendly home visits, organize peer support groups, and help them with their daily chores.

The Energy Express Americorps opens new doors and expands the possibilities for children of West Virginia. This 6-week summer learning program provides nutritious meals, a safe learning environment, and positive role models. While developing a strong relationship between students and mentors, the children improve their reading skills. With the support of the community and the involvement and attention of parents and volunteers, children's self esteem is increasing and their reading skills are improving.

Throughout the mountains of West Virginia, homes need constant care and attention. My colleagues know that floods, violent storms, and other uncontrollable factors can cause homes to deteriorate more rapidly. My State is
