

engineers who worked on the project. I am happy they had the opportunity to go to Florida to witness the launch. I know it was an event they will always remember.

CONGRATULATING THE CHANDRA
TEAM AT MARSHALL SPACE
FLIGHT CENTER

HON. ROBERT E. (BUD) CRAMER, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 1999

Mr. CRAMER. Mr. Speaker, today I rise to congratulate the Chandra team at Marshall Space Flight Center for their role in the successful launch of NASA's Chandra X-ray Observatory. When Chandra reaches its planned orbit in about three weeks, and first turns its instruments to the far reaches of space, NASA will have opened a new and exciting chapter in space exploration and space science. From this chapter, America will reap new and exciting educational, intellectual, and quality-of-life benefits that are critical to our Nation's future.

Chandra is 20 times more sensitive than any previous X-ray telescope, and together with NASA's other Great Observatories already in orbit—the Hubble Telescope for studying objects in space using visible light, and the Compton Gamma Ray Observatory for detecting mysterious gamma rays—this X-ray observatory will give us the most complete picture ever of our universe.

At the heart of Chandra are eight of the largest and smoothest mirrors of their kind ever created. Together, the assembled mirrors weigh more than a ton, and if the State of Colorado were polished to the same degree of smoothness that went into the manufacture of these mirrors, Pike's Peak would stand less than one inch tall. High-resolution cameras and other sensors complete the suite of hardware aboard the observatory, critical components of which have been exhaustively tested at Marshall Space Flight Center by the talented people of North Alabama. The technology and manufacturing expertise that went into constructing these instruments is no less riveting than the scientific observations that Chandra will make.

Just in building, launching, and operating the Chandra X-ray Observatory, we have added much to our store of knowledge about optics, engineering and design. What science will we learn when Chandra begins to open its X-ray eyes to space? Scientists stand to make fundamental advances in our understanding of many of the most puzzling features of the universe: black holes and quasars, the identity of "dark matter," and the very age of the universe itself. By looking deep into the hottest, most violent parts of the cosmos—providing us with a laboratory that could never be reproduced here on Earth—Chandra will reveal an entire new level of detail in the far reaches of space, and will take our minds where our feet may never have a chance to tread.

Mr. Speaker, I share pride in Chandra's launch and the excitement of discoveries yet to come with my friends and neighbors in North Alabama, with NASA, and with my colleagues in the House.

IN HONOR OF MR. JESSE LIM

HON. XAVIER BECERRA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 1999

Mr. BECERRA. Mr. Speaker, it is with the utmost pleasure and privilege that I rise today to recognize a wonderful American, Mr. Jesse Lim, for his inspiration as a dedicated father and grandfather, hard-working businessman, and a model citizen of our great nation.

The third son in a family with seven children, he was born and raised in Toisan, China in 1921. He was fortunate to attend school in China. Jesse came to the United States in 1938, unable to speak a word of English. After being detained at Angel Island he joined his father and brother in Tucson, Arizona. Through hard work and determination and with the help of a wonderful teacher, Miss Marshall, Jesse was able to master the English language.

He met Mary Parker Lee in Tucson. They fell in love but delayed marriage because he was drafted into the United States Army during World War II. He rose to the rank of Sergeant. After the war, Jesse and Mary wed in 1946. They have three daughters: Jessica, Jennifer, and Janet.

Jesse and Mary so valued education that they made sure their children studied hard. They all did well in school, and all three attended Universities: Occidental College, the University of Arizona, and the University of California at Los Angeles.

Jesse and Mary had to work hard to provide for their family. Though Jesse was an educated man, he was also of Chinese heritage. Like so many in this country, he faced discrimination. There were few avenues a smart, handsome man could pursue, but with his beautiful and business-savvy wife, they built up a number of small businesses, most of them "mon and pop" grocery stores. Their first store was in Tucson, and they had several others after the family moved to Los Angeles, California.

As food is very important to Chinese families, Jesse and Mary made sure their family would never go hungry. By owning grocery stores, there would always be plenty to eat. To make ends meet, the Lim family at times live in the store. As the daughters grew older, they also worked in the store—cashiering, stocking shelves, and slicing bologna and cheese . . . learning the value of hard work.

But Jesse and Mary didn't just work all the time—although it was usually 364 days a year (the store was closed on Christmas). They made sure the family had some fun too. Every Sunday, they would go to Westlake Park, later re-named MacArthur Park or the Merry-Go-Round. They would eat homemade tuna sandwiches made with mayonnaise and sweet pickle relish. But they could never go to Griffith Park because the family car couldn't get up the hill. They would also get together with relatives where the adults would play mah jongh while the kids would watch TV. When the kids got old enough to drive, they would go bowling or do other recreational activities.

Jesse and Mary kept on working. In addition to grocery stores, they once owned a motel in Pasadena, California. They also owned a small restaurant/coffee shop in both Beverly Hills and the City of Orange.

Jesse and Mary were very loving parents. Jesse taught the kids how to swim and how to drive. But he couldn't teach Mary either one. She had to take private driving lessons before she could chauffeur the kids around.

Jesse and Mary were devoted grandparents as well. They were "Gung-Gung and Poh-Poh" to William, Ralph, Jesse, and Erin.

Jesse and Mary were also very conscious of helping the community. They loved the Lim Family Association. They made sure their kids, and later the grandkids, would go to the annual Chinese New Year banquet in Los Angeles, Chinatown and become part of the Association activities. Jesse led the campaign to raise funds which resulted in the Lim Family Association buying its own building in Los Angeles. Jesse served as the President of the Association while Mary served as English Secretary.

Jesse is admired by his friends and family, especially his fellow Lims. Jesse likes to talk, and he is fluent in Toisanese, Cantonese, and English. He is also a very funny guy. He has always been in high demand to serve as emcee on various occasions—birthdays, weddings, baby parties. At most Chinese banquets, everyone talks, and no one listens to the emcee, but Jesse could command the room. When Jesse talked, people listened. You could hear a pin drop. With a quick wit and a vibrant personality, he became known as the Chinese "Bob Hope." Unfortunately, his daughters couldn't always understand the intricacy of his jokes in Chinese, but the audiences always roared with laughter.

As Jesse and Mary grew older, they became active in senior citizens organizations, both in California and later in Tucson. Jesse, always the handyman, would buy things at the thrift store, fix them up, and give them to the senior centers.

One of the things Jesse is most well known for is his sense of duty and responsibility. When he married Mary, he became the man of the family, because Mary's brother Jimmy had died in service to our country during WW II. He became the father to Mary's sisters May, Ruth, Margaret, and Elsie. After his brother Roy passed away, and his sister Sophie's husband passed away, he became the patriarch of the family. He is "Uncle Jesse" to many, both blood relative or not.

After 49 years of marriage, Jesse had to say farewell to his beloved Mary on May 21, 1995. But with the support of his family and friends, he has survived.

On Saturday, July 31, 1999, there will be a dinner in Tucson, Arizona to pay tribute to Jesse and to celebrate his life. A large delegation from the Lim Family Association in Los Angeles will be among the crowd of 150.

It is with great pride that I ask my colleagues to join me today in saluting this exceptional human being.

RUSSIA'S LEADERS SHOULD
EMBRACE AND ENCOURAGE
FREEDOM OF THE PRESS

HON. PETER DEUTSCH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 1999

Mr. DEUTSCH. Mr. Speaker, as Russia prepares for Parliamentary and Presidential elections, there are alarming signals that the

Kremlin is cracking down on privately owned news outlets who have been critical of government policies. In particular, I understand that the independent and highly regarded television station, NTV, has been pressured by officials who are displeased with its news coverage of the Kremlin. There are reports that the owners and reporters of NTV and other news organizations have been harassed, and that government agencies have threatened to deny operating licenses to these organizations, have attacked private media companies through state-owned media, and have issued veiled threats to nationalize NTV and other private media outlets.

Such activities undermine Russia's free and democratic nature. I find particularly disturbing reports that Yeltsin Administration head Alexander Voloshin has asked his staff to find any grounds possible by which to initiate criminal action against owners of private media enterprises. The most notable example is Mr. Voloshin's order to the Director of the Tax Police Federal Service to carry out inspections of the editorial offices of media outlets owned by Media Most, the largest privately owned media company in Russia, headed by Vladimir Goussinsky. The fact that Mr. Goussinsky has consistently submitted tax returns and paid all taxes required by current law since 1992 was apparently insufficient in stopping these egregious searches.

Free press may also be threatened on another front. In July, 1999, the government established a new Ministry for Publishing, TV and Radio with the task, according to Prime Minister Stepashin, of "consolidating" the government's "ideological work." This new ministry will have vast powers to oversee and control news content and other aspects of Russian media, including publishing, licensing regulations, advertising, satellite broadcasting, and press distribution. Mr. Speaker, I am extremely concerned about the possible effects that this new Ministry's policies might have on private and independent media outlets.

Whoever controls the media in Russia may well influence the outcome of the upcoming presidential elections. It is generally accepted that favorable television coverage of President Boris Yeltsin's re-election campaign made possible his ultimate success at the polls. In a democratic society, the diversity of opinion and variety of information that is fostered by a free and independent press is an important part of the political process. The subversion of independent media, especially at this critical juncture in the Russian political process, is disturbing.

If Russia's nascent democratic system is to succeed, freedom of the press must be preserved. I call on President Yeltsin and Prime Minister Stepashin to ensure that attacks on privately owned media are curtailed, and to publicly reinforce the government's favorable opinion toward freedom of the press in Russia.

DISTRICT OF COLUMBIA
APPROPRIATIONS ACT, 2000

SPEECH OF

HON. HENRY BONILLA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 27, 1999

The House in Committee of the Whole House on the State of the Union had under

consideration the bill (H.R. 2587) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against revenues of said District for the fiscal year ending September 30, 2000, and for other purposes.

Mr. BONILLA. Mr. Chairman, I rise in strong support of the fiscal year 2000 District of Columbia Appropriations Bill. This legislation is a well crafted bill that supports initiatives which reduce crime as well as promote educational opportunities for District residents. The bill makes these significant improvements at a cost to federal taxpayers \$230.6 million less than last year's bill. In addition, the bill continues current prohibitions on the use of these federal funds for abortions and needle exchanges.

I opposed several amendments which restrict the use of local funds or write local law. While these amendments are well intentioned and would be appropriately considered by this Congress in regard to federal law or the use of federal funds, Congress should not write local laws. We Texans don't want Congress making our local laws, and I respect the right of the City of Washington to decide their local laws, whether we agree with them or not. One of the foundations of our liberty is our federal system which divides responsibility between federal, state and local authorities. I believe we must respect constitutional divisions and focus on federal responsibilities. The fact that I object to these local decisions is not the issue.

INTRODUCTION OF THE FEDERAL
RAILROAD SAFETY ENHANCEMENT ACT

HON. RONNIE SHOWS

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 1999

Mr. SHOWS. Mr. Speaker, today I am introducing the Federal Railroad Safety Enhancement Act of 1999. This bill is unique in two ways: it is premised on zero tolerance for railroad accidents and injuries, and it is supported by all of rail labor.

Railway accidents have caused people in my district to suffer tragically. Several approaches to rail safety will be considered and it is important that the voices of all concerned parties be heard. The Federal Railroad Safety Enhancement Act is an approach that has been crafted by a coordinated effort of the many unions representing railway workers. We must pay heed to the workers who operate and maintain our rail system, just as we must pay heed to rail management and federal authorities that oversee our railways. We must keep an open mind as we examine all proposals so that we can pass legislation that best address this urgent matter.

Mr. Speaker, over the past few years, the railroad industry has achieved a reduction in the number of fatalities and in the number of certain types of accidents, such as collisions and grad-crossing accidents. But the number of derailments and employee fatalities has remained almost unchanged, and some key safety issues have not been adequately addressed.

For example, it is clear that in rail transportation, as in other modes of transportation,

tired workers with insufficient rest present serious safety and health problems that must be addressed. While some individual rail unions continue to evaluate this issue in craft-specific needs, we do know with respect to hours of service and fatigue management that there are a number of loopholes in current regulations that must be closed, and updates that must be made, to the current regime.

Mr. Speaker, whether it is these issues or others such as certification, van crew safety, passenger safety service standards, etc., the fact of the matter is that current rail laws do not adequately address rail safety.

The bill I am introducing today is one approach that would go a long way in achieving new levels of safety in the rail industry. We must carefully consider all approaches to rail safety, but if the "Federal Railroad Safety Enhancement Act of 1999" is the most we can do at this time to reach that goal, then it is the very least we must do.

Mr. Speaker, I urge members to join in support of this important piece of legislation.

INTRODUCTION OF THE SPOKANE
TRIBE SETTLEMENT ACT

HON. GEORGE R. NETHERCUTT, JR.

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 30, 1999

Mr. NETHERCUTT. Mr. Speaker, I am pleased to introduce The Spokane Tribe of Indians of the Spokane Reservation Grand Coulee Dam Equitable Compensation Act. This legislation will provide for a settlement of the claims of the Spokane Tribe of Indians resulting from its contribution to the production of hydropower by the Grand Coulee Dam. Similar settlement legislation was enacted in 1994 to compensate the neighboring Confederated Colville Tribes. That Act, P.L. 103-436, provided for a \$53 million lump sum payment for past damages and roughly \$15 million annually from the ongoing proceeds from the sale of hydropower by the Bonneville Power Administration to the Colville Tribes. The Spokane Settlement Act, which I am introducing today, provides for a settlement of the Spokane Tribe of Indians claims directly proportional to the settlement afforded the Colville Tribes based upon the percentage of lands appropriated from the respective tribes for the Grand Coulee Project, or approximately 39.4 percent of the past and future compensation awarded the Colville Tribes.

Although the Department of the Interior and other federal officials were well aware of the flooding of Indian trust lands and other severe impacts the Grand Coulee Project would have on the fishery and other critical resources of the Spokane and Colville Tribes, no mention was made of these impacts or the need to compensate the Tribes in either the 1933 or 1935 authorizations. Federal interdepartmental and interoffice correspondence from September 1933 through October 1934 demonstrate the government knew the Colville and Spokane Tribes should be compensated for the flooding of their lands, destruction of their fishery and other resources, destruction of their property and annual compensation from power production for the use of the Tribes' land and water resources contributing to power production.
