

HONORING ALAN KARCHER, ARCHITECT OF NEW JERSEY'S LEGISLATURE

**HON. RUSH D. HOLT**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 3, 1999*

Mr. HOLT. Mr. Speaker, I rise today to direct the attention of my colleagues to the accomplishments of Central New Jersey's Alan Karcher, who died on Monday, July 26 at the age of 56.

Mr. Karcher, a dedicated member of the Democratic Party, represented the city of New Brunswick and the rest of the 19th Legislative District in the New Jersey Assembly for seventeen years.

His years of service had a lasting impact on the politics of my state. As Lou Rainone, a friend, aide, and law partner to Mr. Karcher, has said, Mr. Karcher was "the architect of the modern legislature in New Jersey. He made the Legislature an equal branch of government with the Governor's administration."

Governor Christine Todd Whitman agrees. On Tuesday, she ordered state government flags flown at half-staff for the remainder of the week, and remarked that Mr. Karcher "was a worthy and capable adversary who truly embodied the spirit of the loyal opposition."

Mr. Karcher began his remarkable political career early in life. In 1966, while still a student at Rutgers University Law School, Mr. Karcher served as Secretary to the President of the New Jersey Senate. After several more years of staff service to the legislature, Mr. Karcher was elected to office himself in 1973. Mr. Karcher went on to become Majority Leader in 1980 and Speaker of the Assembly in 1981.

A political upset in 1985 brought the Republicans a majority in the assembly and removed Mr. Karcher from the Speaker's chair. Yet Mr. Karcher continued to serve in New Jersey politics, campaigning unsuccessfully for the Democratic Governor's nomination in 1989 and serving in the Democratic National Convention in 1984 and 1988. Mr. Karcher retired from the New Jersey Assembly in 1990.

Mr. Karcher's service to his state and country did not end there. In 1990, Mr. Karcher accepted an appointment as a fellow in residence at the Institute of Politics at Harvard University's John F. Kennedy School of Government. He wrote two books on political issues and helped found the successful Sayreville law practice of Karcher & Rainone. In 1987, he served as an appellate counsel for Mary Beth Whitehead-Gould in the historic "Baby M" surrogate-mother case which was successfully argued before the New Jersey Supreme Court.

After retiring to Princeton, New Jersey several years ago, Mr. Karcher's last great accomplishment was to rebuild the Democratic party of Mercer County, where in 1998 he helped to bring about my own upset victory against a favored incumbent.

Mr. Speaker, Alan Karcher's life was a model of public service, commitment, and political integrity. He stands as an example to us all, regardless of party and persuasion. I hope that my colleagues in the House will join me and other Central New Jerseyans in extending our gratitude and condolences to Mr. Karcher's friends and family.

HONORING DR. JOE TARON

**HON. WES WATKINS**

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 3, 1999*

Mr. WATKINS. Mr. Speaker, I rise today to honor Dr. Joe Taron, a faithful servant of the people of Pottawatomie County, in the Third Congressional District of the Great State of Oklahoma. Dr. Joe has committed his life to improving the quality of life of the people around him, and his accomplishments over the years are considerable.

For 23 years Dr. Joe's vision, hard work, perseverance and leadership have been the inspiration of the effort to build the Wes Watkins Reservoir near McCloud, Oklahoma, to provide a permanent new water source to the citizens of Pottawatomie County. On Monday, August 9, the lake will be officially dedicated, providing not only a valuable new source of drinking water to the cities of Shawnee and Tecumseh, but also providing the citizens of Pottawatomie County and the people of central Oklahoma with a great recreational resource for swimming, boating and fishing.

I am proud to call Dr. Joe my friend. He is a wonderful "role model" for our children and grandchildren, and our country is a better place because of his work to help those around him. Mr. Speaker, I rise today to honor Dr. Joe Taron for his outstanding commitment to his community, state and country. I urge my colleagues to join me in wishing Dr. Joe many more years of continued joy and happiness.

THE ANTHRAX ISSUE IN THE  
DEPARTMENT OF DEFENSE

**HON. WALTER B. JONES**

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 3, 1999*

Mr. JONES of North Carolina. Mr. Speaker, earlier today, a number of my colleagues joined me in a press conference to discuss an issue that I believe may jeopardize the readiness of our military—the Department of Defense Anthrax Vaccination Immunization Program.

Mr. GILMAN, Mr. BURTON, Mr. FILNER, Mr. METCALF, and Mr. HAYES all joined me to express our shared concerns over the mandatory anthrax vaccination program.

I wanted to take a few moments to share some of my thoughts on the press conference and the anthrax issue as a whole.

In March of this year, I met with a number of reservists from Seymour Johnson Air Force Base in the Third District of North Carolina, which I am proud to represent, to hear their concerns about the mandatory anthrax vaccination program.

After listening to their concerns, I contacted Secretary Cohen and requested the program be halted until the questions surrounding the program could be answered.

The Department denied my request. It also failed to address my concerns.

Mr. Speaker, all branches of the military are currently experiencing great difficulty in recruiting and retaining quality military personnel.

Since the announcement of the mandatory vaccination program in 1997, growing num-

bers of military personnel—particularly Guard and Reservists—are choosing to resign rather than take what may be an unsafe anthrax vaccine.

Now, military personnel across the country are struggling with their options: take the vaccine or leave the service.

Unfortunately, too many are choosing the latter.

At Travis Air Force Base alone, 32 pilots in the 301st Airlift Squadron have resigned or are planning to do so because of the anthrax vaccine.

That is more than a fifty percent attrition rate.

The Air Force estimates it costs \$6 million to train each pilot.

If this figure holds true, the United States is losing over \$190 million dollars worth of training and over 450 years worth of combined experience in the cockpit!

These statistics are not isolated to one unit or one base.

A recent Baltimore Sun article reported that as many as 25 F-16 pilots of 35 pilots in the 122nd Fighter Wing of the Indiana National Guard might refuse the vaccination. This could effectively ground the squadron.

At least one-third of the F-16 pilots in the Wisconsin National Guard's 115th Fighter Wing is expected to refuse the vaccinations.

Another Air National Guard unit in Connecticut reportedly lost one-third of their pilots for the same reason.

The active duty force is also plagued by this problem.

Fourteen Marines in Hawaii and at least a dozen in California have refused the vaccine and are awaiting likely court-martials and dishonorable discharges.

Other reports indicate that even the Department of Defense estimates several hundred active personnel have refused the vaccine and are awaiting disciplinary action.

In a time when all branches of our military are faced with severe challenges in recruiting and retaining quality military personnel, we should be looking for ways to recruit and retain these men and women, not drive them away.

For this reason, Mr. GILMAN and I each introduced separate pieces of legislation to address the problem.

My legislation, H.R. 2543, the American Military Health Protection Act, would make the current Department of Defense Anthrax Vaccination Immunization Program voluntary for all members of the Uniformed Services until either: (1) The Food and Drug Administration has approved a new anthrax vaccination for humans; or (2) the Food and Drug Administration has approved a new, reduced shot course for the anthrax vaccination for humans.

Mr. GILMAN's legislation, H.R. 2548, stops the vaccination program until the National Institutes of Health has completed additional studies.

However, today's press conference was not about pushing a single bill. Instead, we were there today because despite our respective differences, there is solidarity in our goals.

Each of the men and women at the press conference represented differing views on how to best deal with the anthrax vaccination program.

Yet, we all agreed on one point: The mandatory anthrax program must be changed!

For that reason, today Mr. GILMAN and I were able to announce our joint efforts to secure a hearing in the Armed Services Committee on our respective legislative proposals.

If our American men and women are willing to risk their lives to defend this great nation, the least we can do is ensure their questions of safety have been adequately answered before requiring them to take it.

It is important to respond to this issue before a small readiness problem affects the entire force.

I am hopeful that all of our colleagues will join us in working to achieve that goal.

## TOBACCO AND U.S. INTELLIGENCE ISSUES

### HON. BERNARD SANDERS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 3, 1999*

Mr. SANDERS. Mr. Speaker, I submit for printing in the RECORD statements by high school students from my home State of Vermont, who were speaking at my recent town meeting on issues facing young people today. I believe that the views of these young persons will benefit my colleagues.

#### TOBACCO

(On behalf of Sara Sinclair)

Sara Sinclair: Hi. My name is Sara Sinclair.

I'm here to talk about an issue that in many ways relates to nationwide health care, and in many ways would make it more feasible, and that is tobacco control.

Right now in the state of Vermont, 36 percent of our peers are addicted to nicotine, which is the active drug in tobacco. 2,000 of us become addicted to it every year, and roughly 12,000 of us, alive and in high school now, will die because of tobacco use. And personally, that scares me a whole bunch.

I remember when I was in elementary school—I will be graduating next year; I am a junior this year—and we were the Smoke Free Class of 2000. In elementary school, we had all these wonderful programs, and everyone said, "Okay, I'm not going to smoke, I'm not going to smoke." And as time wore on, we got into high school, and the program sort of fell away. And now I look at my peers, and I see a huge number of them addicted to tobacco. Their skin is becoming wrinkled. They get shaky when they don't have their cigarette. They have this strong need for it.

And it's very frightening for me to see my peers addicted to that so early, and to know that they will probably suffer long-term effects from their tobacco use now. I have a ten-year-old sister right now who says, "I'm not going to smoke, I'm not going to smoke." And I hope she will be able to hold true to that. But I fear that, even if she does, that many of her peers won't.

I think that the government needs to take strong steps to prevent tobacco use in children and in teens, because it is a very serious issue. And even though people say, sometimes, "Oh, teens are going to do whatever they want no matter what," there are effective programs out there. I believe, in the state of Massachusetts, the smoking rate amongst pregnant mothers was cut in half by one particular program. And I believe that there are effective programs out there that need to be organized by our government. Luckily, our state government here in Vermont has taken steps in that direction,

but we need it on a nationwide level, we need it to be comprehensive, it needs to start before a child is in school, in their preschool, on television, in the newspapers, and it needs to continue right up through adulthood.

I also believe that there should be programs out there to help adults, like my father right now, who is addicted to nicotine and struggling with it. He is having an awful time quitting. And there needs to be a program out there to help people like him get rid of his addiction.

Congressman Sanders: Thank you for a very strong presentation.

#### U.S. INTELLIGENCE ISSUES

(On behalf of Bethany Heywood and Laura Freeman)

Bethany Heywood: How would you feel if a total stranger demanded your money and wouldn't tell you what it was being used for, but assured you it wouldn't be misused? Would you trust this person? Of course not. But this is essentially what the CIA does to the American taxpayer, and with their track record, we certainly shouldn't trust them to use our money properly.

Taxpayers don't even know how much money the CIA receives, although a rough estimate is \$3.1 billion per year. In the past, the CIA has used a substantial part of its budget to finance covert operations, many of which we are just finding out about. Details of covert operations aren't declassified until decades after the actual event. Conveniently, by the time a covert operation is disclosed, any public outrage that might have erupted will have been squelched by the time lapse.

Whether they're in the past or not, some of the CIA's actions have been inexcusable: Assassinations, attempted assassinations, massive propaganda efforts to prevent undesirable people from winning foreign elections, operations to topple democratically elected foreign leaders from power, internal spying on American citizens, extensive mind control experiments conducted at universities, prisons and hospitals. The list goes on and on. Are these activities the government should be spending money on?

Although the CIA is prohibited from engaging in assassinations, attempts have been made to assassinate quite a few foreign leaders. Some of the targets have been Castro, DeGaulle, Khadafy, Khomeini and Hussein, just to name a few. One of the CIA's supposed restrictions is that its limited to intelligence operations on foreign soil only. Apparently, the CIA has trouble discerning foreign soil from American soil, because, in the 1970s, 300,000 Americans considered potentially dangerous to national security were indexed in the CIA computer. Citizens considered particularly dangerous were placed under surveillance, with bugs in their phones, microphones in their bedrooms, or warrantless break-ins into their homes.

One way to stop the CIA's activities would be to cut CIA funding so there isn't enough for covert operations. Right now, the president can direct the CIA to undertake a covert operation, and is advised to do so by the National Security Counsel, or NSC. Members of the NSC are appointed by the president. This does not represent a diversity of people and ideas, because the president is going to pick people who will agree with him. If the members of the NSC were democratically elected, the abuse of power by a small group of like-minded individuals could be stopped.

Another way to make the decision of whether or not to go ahead with the covert operation more democratically decided would be to have congressional oversight. This might be seen by some as too great a threat to CIA authority, but would prevent unethical abuse of power.

The problems with CIA covert operations and abuse of power won't go away overnight, but steps can and should be taken to limit and hopefully eliminate covert operations.

Laura Freeman: I am speaking on the School of the Americas.

Would you willingly arm a murderer? Would you support the education of some of the worst human rights violators in this hemisphere? Would you finance a school which trained its graduates in the most effective ways to interrogate, including torture, blackmail and execution?

Whatever the answer of American citizens, every year, \$20 million go from the taxpayers to a school that does exactly these things. The School of the Americas, or SOA, was started in Panama in 1946. Its original purpose was to train Latin Americans in military techniques, which would allow them to create stable democratic governments in Latin America, as well as repress communist activities and revolutions.

SOA students learn combat skills, military intelligence, commando tactics, sniper training, torture techniques, and psychological warfare. Most of the courses revolve around what they call counterinsurgency, states Father Roy Bourgeois, a priest who has dedicated his time to protesting the SOA.

Who are the insurgents? They are the poor. They are the people in Latin America who call for reform. They are the landless peasants who are hungry. They are healthcare workers, human rights activists, labor organizers. They become the insurgents. How do the graduates of the School of the Americas use their skills? They murder priests and archbishops, missionaries, and, perhaps worst of all, civilians, their own people.

With the advent of the SOA's move to Fort Benning, Georgia, the school has become something we are less and less able to disassociate from. As Father Bourgeois said: "We are talking about a school of assassins right here in our backyard, being supported by our tax money. It's being done in our name."

What can we do to clear our name of this stain? The answer is simple: Close the School of the Americas. We must act to save the lives of people all over Latin America. To quote Salvadorian Archbishop Oscar Romero, "We who have a voice, we have to speak for the voiceless."

## THE INTRODUCTION OF THE OMNIBUS LONG-TERM CARE ACT OF 1999

### HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, August 3, 1999*

Mr. MARKEY. Mr. Speaker, I am pleased to join my good friend PETE STARK today as we introduce a comprehensive long-term care bill. PETE and I have been concerned about the long-term care needs of seniors, near-seniors, and the disabled for quite some time—and PETE has been a real leader on this issue in the Congress. In the remarks Rep. STARK has made for the RECORD, he gives an excellent summary of our bill. We hope that our bill begins to get Congress and the American people focused on the issue of long-term care because doing something about people's long-term care needs will be one of our Nation's biggest challenges in the next century.

This bill contains a number of important provisions. It's got a \$1,000 refundable tax credit for family caregiver expenses. The legislation
