

1. Name the caparisoned horse for the funeral of President John F. Kennedy.

*Answer—Black Jack.*

2. How many POWs are buried in Arlington National Cemetery?

*Answer—Three (2 Italian and 1 German).*

3. What is a cenotaph?

*Answer—A headstone erected in memory of someone whose remains are not recoverable.*

The purpose of learning all of these facts about the cemetery is for the sentinel to be able to answer questions during the frequent visitor tours of their quarters below the amphitheater, Taylor said. Also, the sentinels are often stopped on their way to their cars by the tourists and asked about locations of burial sites of famous individuals.

The Knowledge Book also contains the mission statement of the sentinel, the "guard of honor" for the Tomb of the Unknowns. The sentinel is to be responsible "for maintaining the highest standards and traditions of the U.S. Army and this nation while keeping a constant vigil at this national shrine." The sentinels' "special duty is to prevent any desecration or disrespect directed toward The Tomb of the Unknowns."

Sentinels are tested periodically throughout their training, according to Master Sgt. Richard K. Cline, sergeant of the guard for the sentinels. Oral exams are administered at the three-, six-, nine-, and 12-week intervals. Cline said a timed performance exam accompanies these tests. Sentinels must take the test administrator to the headstones of persons named by the administrator and give biographical sketches on the notables within the time allotted.

In order to "graduate" and qualify to wear the Tomb Badge, sentinels must take and pass a written exam, pass a uniform inspection, and demonstrate proficiency in the time-honored ritual of maintaining the guard sentinel, referred to simply as "the walk."

Taylor said that he had to learn how to eliminate any bounce whatsoever in his walk, which translates to a technique of rolling the feet in a particular manner. His trainer told him the walk should make people think of the way a ghost might move, drifting along smoothly with no up and down movement.

In addition, the sentinel's arms must not bend at the elbows during the walk, but instead swing in a straight line like a pendulum on a grandfather clock. The eyes must stay focused straight ahead, ignoring the crowds of tourists, which can number up to 2,000 at a single changing of the guard ceremony during the summer months, Cline said.

Taylor said it irritates him when soldiers outside The Old Guard tell him he has "easy duty" because all he does is "walk back and forth." He says they have no idea of the intensive training involved, the performance standard required in all weather conditions, and the level of commitment sentinels have to their job.

"This is probably the greatest honor I ever will have," he said.

Taylor said he has performed his sentinel duty under all types of weather conditions. Snow, sleet, rain, heat, or even thunderstorms do not deter the sentinels from guarding The Tomb of the Unknowns.

A poem submitted by a visitor (known only as Simon) to The Tomb of the Unknowns in 1971 has since been adopted as "The Sentinel's Creed."

"My dedication to this sacred duty is total and wholehearted. In the responsibility bestowed on me never will I falter, and with dignity and perseverance my standard will remain perfection. Through the years of diligence and praise and the discomfort of the element, I will walk my tour in humble rever-

ence to the best of my ability. It is he who commands the respect I protect his bravery that made us so proud. Surrounded by well-meaning crowds by day, alone in the thoughtful peace of night this soldier will in honored glory rest under my eternal vigilance."

Sentinels are on duty for 24 hours, then off for 24 hours. During the winter months, sentinels perform two of three hour-long walks each 24-hour period and two hour-long night shifts. During the summer months, sentinels perform six or seven 30-minute walks, and two night shifts.

Cline said the walks are shortened to 30 minutes during the summer months to accommodate the large number of tourists visiting the MDW area. Shorter walks result in more changing-of-the-guard ceremonies, which are a popular tourist attraction at the cemetery.

Taylor said he has had many memorable moments as a sentinel. Two moments, one very public and one very private, stand out in particular.

In 1997, he was selected as the presidential wreath bearer for President Bill Clinton during the Veterans Day Ceremony at The Tomb of the Unknowns. Taylor admits he was nervous, but once the National Anthem started playing, he said, "I felt like a giant out there."

The private moment occurred during one of his early morning walks. The only visitor at the cemetery at that hour was a man wearing uniform items from the Vietnam War era. Taylor said the man stood at attention at the end of the plaza near the guard booth, saluting him. The man watched him for the entire hour and appeared to be very emotional, watching him perform his duty.

"It was a real moving experience for me," Taylor said.

He said he changed his uniform after his tour, then went back up to the amphitheater to try to find the man so that he could speak with him, but he was already gone.

While assigned to Hotel Company, Taylor held five positions at The Tomb of the Unknowns. He was a sentinel, an assistant relief commander, a relief commander, an assistant sergeant of the guard and a trainer.

One of the sentinels he trained, William Q. Hanna, returned for Taylor's last walk. Hanna completed his enlistment in the Army in December. He said he served with Taylor for more than two years, and wanted to be present for his "special moment."

Hanna explained that the last walk is a "rite of passage" and an extremely emotional event for a sentinel as he pays his final respects to The Tomb of the Unknowns.

"I could hardly get through mine," he recalled.

At 10:45 a.m., Taylor asked Hanna to drive to the Visitors Center to pick up his family and bring them back to the amphitheater. His mother, Sandra S. Taylor of Knoxville, Tenn., had driven 10 hours through the ice storm so that she could be there for his last walk. His father, James L. Taylor, and stepmother, Linda Taylor, of Middlesboro, Ky., had spent nine hours on the road as well.

While waiting for his final hour-long walk as a sentinel, Taylor made adjustments to his uniform. He pulled the brim of his Dress Blues service cap down and adjusted it over his eyes, checking his reflection in the mirror. Pfc. Daniel Baccus took a large piece of masking tape and blotted up any stray lint on Taylor's raincoat. Taylor then went to the water fountain and ran water over his white gloves and rubbed them together. The water provides a better grip on the wooden stock of the M-14 rifle.

At 11 a.m., the bells tolled the hour and Taylor made his way down the marble sidewalk to take his place on the plaza for the

last time. Cline inspected his uniform and weapon. The guards were changed, and Taylor spent the next hour guarding the Tomb of the Unknowns.

At noon, the bells tolled the hour again, Taylor walked to the center of the plaza to retrieve four red roses from his fiancée, standing at the base of the steps.

He placed one red rose at the base of each of the three crypts, and the fourth rose at the base of the marble tomb. A bugler played "Taps." Taylor saluted. His last walk as a sentinel at The Tomb of the Unknowns was over.

## HONORING MORRIS KING UDALL, FORMER UNITED STATES REPRESENTATIVE FROM ARIZONA

SPEECH OF

**HON. MARTIN FROST**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, March 4, 1999*

Mr. FROST. Mr. Speaker, I rise to add my voice in commemoration of the remarkable career of Mo Udall.

During my first term in Congress, the great respect that we all had for Mo was demonstrated in an incident that took place in the Rules Committee. We had under consideration the rule on the Alaska National Land Act, the landmark legislation which preserved thousands of acres of pristine wilderness in the state of Alaska.

There were two competing versions of the bill: one that was reported from the Interior Committee and one that was authored by Mo. Mo's bill was defeated in his own committee and the reported bill was supported by interests who sought to drill for oil in the Alaska wilderness, a position Mo vigorously opposed. Mo acknowledged his defeat in committee but still sought the right to offer his bill as a substitute on the floor.

There was a fierce battle over the rule. Everyone knew that Mo had the votes in the House to pass his substitute. Mo's bill was favored by the environmental community and they lobbied furiously to allow the Udall substitute to be considered in the House. However, the opponents of Mo's bill were lobbying just as hard to deny him the chance to present his substitute once the Alaska Lands bill came to the floor.

The Rules Committee was closely divided on the question of whether or not to specifically make Mo's substitute in order. I was the most junior Member of the committee and would thus vote last on the roll call. When the vote got to me, the vote was tied: everyone in the room assumed that since I was from Texas, an oil producing state, that I would side with the oil industry and against Mo.

However, I held Mo Udall in such high regard as a person and as a legislator, that I voted with him to allow him to offer his substitute on the floor. He was, after all, the Chairman of the Interior Committee and a champion of protecting the wilderness, and there was little doubt in my mind, in spite of my home-state loyalties, that he should be given that opportunity.

Ultimately, the rule passed and when Mo's substitute was voted on, it passed by a vote of 268 to 157. The bill itself, as amended with the Udall substitute, was ultimately passed by an overwhelming vote of 360 to 65.

I can honestly say that had it been any other Member of Congress who had asked to have this far-reaching version of the Alaska Lands bill made in order that, as a freshman, I probably would not have gone against an important industry in my home state.

However, there was no way in good conscience that I could have denied Mo his day in court and his vote on the floor of the House. He was that good a man; that good a legislator. Mo had the moral authority to command fair treatment. And that, Mr. Speaker, is what made him a great legislator.

I am honored to have known him and more honored still to have served with him in this House. His legacy will live on for many generations of Americans both in the crown jewels of our national park system in Alaska and here in the House of Representatives.

#### LEHIGH VALLEY HEROES

### HON. PATRICK J. TOOMEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, March 10, 1999*

Mr. TOOMEY. Mr. Speaker, today I would like to deliver a Report from Pennsylvania's 15th District.

So many good things are happening in Pennsylvania's Lehigh Valley. There are scores of good people doing amazing things that make our communities better places to live and I would like to share their stories with my colleagues and the American people. These good people should be recognized, lifted up and known as Lehigh Valley Heroes.

I my book, Lehigh Valley Heroes are individuals who reach out and lend a helping hand to others. Today's I'd like to recognize all the individuals involved with Lehigh Valley's Summerbridge after-school-tutoring program in Bethlehem, Pennsylvania.

The Summerbridge Program tutors and mentors young children from inner city schools. These young children may be the first-member in their family who has an opportunity to go to college. These volunteers help young students with their homework and take them on field trips. Additionally, the primary goal is to help ensure they are on a path for college.

Mr. Speaker I'd like to recognize all of the tutors at the Summerbridge Program for making a difference. By helping young students learn, these heroes are making our community a better place to live.

#### LEHIGH VALLEY TUTORS

Jen Auman, Matthew Schultz, Sarah Noblitt, Kelly Cannon, Michelle Hoffman, Chris Balassano, Harry Foley, Michelle Anderson, Daniel Surria, Jessica Rappa, Maria Calafati, Natalie Paraska, Danny Pichardo, Rebecca Kross, Dave Yuan, Payal Shah, Steph Katsaros, Rich Taylor, Brian Brunner, and Kristin Vasquez.

Tami Votral, Brooke Kraus, Sunil Samtani, Michelle Williamson, Kelly Schaeffer, Albert Kelly, Brandi Gilmore, Darren McGill, Lori Wehr, John Fritzky, Steph Kilgge, Dorene Brill, Terri Ertle, Cheyenne DeMulder, Allison Sheniak, Mays Nimeh, Elizabeth Hohenstein, Jaime Silfies, Jarred Weaver, and Nicole Oertman.

Jason Erk, Suzanne Mlynarczyk, Nicky Rothdeutsch, Emily Deck, Nicky Krupa, Brandi

Christine, Melissa Hummel, Claudi Reycraft, Chris Verdier, Capri Thornton, Brandi Schultz, Vanessa Boyer, Steph Ropel, Brandi Gilmore, Alicia Giasi, Jessica Almond, David Rodriguez, Sunil Samtani, Molly Shank, and Justin Christein.

Marisol Ocasio, Shawna Hasford, Kori Newman, John Fritzky, Mandy Burkhardt, Stacey Barron, Steve Weiss, Corrine Reph, Tabitha Hymans, Diana Rodebaugh, Autumn Rainere, Maria Baingbridge, A.J. Bradley, Jeannot Gangwisch, Asad Nawaz, Megan Markulies, Amber Zettlemoyer, Robyn Christine, Sarah Clautier, and Sarah Eitzen.

Kari Druckenmiller, Amy Simonka, Steph Miller, Jacquin Pierce, Steve Schenk, Dana Popkave, Becky Balog, Crystal Leidy, Christine Tessier, Vanessa Vanderberg, Jodi Glenn, Jen Yamerik, and Holda Adams.

#### PLANTING TREES TO REDUCE GLOBAL WARMING

### HON. CHARLES W. "CHIP" PICKERING

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, March 10, 1999*

Mr. PICKERING. Mr. Speaker, I would like to request that the following be included in the Extension of Remarks. It is a op-ed written by a Mr. Chester Thigpen, a constituent of mine from Montrose, Mississippi, that appeared in the Clarion-Ledger on February 27, 1999.

Mr. Chester Thigpen has worked his entire life as a tree farmer to provide for his family—his wife and four children.

Mr. Thigpen's first day's work, in 1918, yielded him 35 cents but, today he is a successful tree farmer. He has been a tree farmer for over forty years and is living the American dream.

In his editorial, he raises some valuable points that members should bear in mind and I encourage them to read this editorial.

[From the Montrose Clarion-Ledger, Feb. 27, 1999]

#### PLANTING TREES MAY HELP REDUCE GLOBAL WARMING

(By Chester A. Thigpen)

I hope that I can be forgiven for feeling like a bystander in the national debate on global warming. As I try to sift through the news coming out of Washington, the problem seems to pose a high environmental as well as economic danger.

Yet something can be done about it, if President Clinton and Congress will mobilize Americans in a campaign to plant trees everywhere they will grow, especially on millions of acres of marginal farmland.

As a farmer in Mississippi, I know something about the value of trees. Stands of loblolly pine on my 650-acre farm provide shade and prevent erosion, and they soak up huge amounts of carbon dioxide.

There is plenty of reason to believe that a coordinated program to plant trees and properly manage our nation's forests is precisely the way to minimize the greenhouse warming problem, and it can be done without harming American living standards.

Climate change affects us all, yet I'm struck by how little attention is being paid to actually dealing with the problem. Yes, President Clinton has asked Congress for \$105 million to conduct research into how forest can offset greenhouse gas emissions by absorbing carbon dioxide. But convincing proof of nature's role in carbon storage already exists.

Recently, a team of scientists, including experts from Columbia University and Princeton University, determined that more carbon may be stored by forests and other ecosystems in the United States than is released by industrial activities in this country. Scientists believe that one reason global temperatures have not increased as much as expected over the past half century may be that the forested portion of the Western world has grown during that time.

Because young trees take in and store carbon dioxide, they act as nature's "sink" for vast amounts of carbon. It is through photosynthesis that trees and other vegetation generate life-giving oxygen and store carbon for decades in the form of wood.

A nationally coordinated program to plant large numbers of trees and improve the health of the nation's forests could have a major impact. A study by American Forests, the nation's oldest conservation organization, estimated that such a program could offset 20 percent to 40 percent of the estimated 1.5 billion tons of carbon dioxide emitted each year in the U.S.

Why not launch a serious tree planting effort now? Anything that can be done to save forests and plant trees on millions of acres might have more effect on global warming than all the emission regulations combined.

Acre-for-acre, U.S. forests store 20 times more carbon than croplands do. Under the Federal Conservation Reserve Program, an estimated 4 million to 5 million acres of eroded land once used to grow crops have been converted to timberland. But with appropriate incentive to landowners, more than 100 million acres of marginal land considered biologically suitable for trees—an area three times the size of North Carolina—could be reforested.

Planting large numbers of trees would provide many additional benefits—erosion control, protection of drinking water sources and better habitat for wildlife. Moreover, forests provide great economic benefits in valuable wood products.

We should also plant more trees in cities and suburbs. By increasing the amount of shade in residential areas, trees and shrubs reduce the need for air conditioning while storing carbon from automobile exhausts and other fossil-fuel combustion. More trees mean cleaner air, and they provide green space for recreation.

#### THE FORTIETH ANNIVERSARY OF THE TIBETAN UPRISING AGAINST CHINESE SUBJUGATION—TIBETAN NATIONAL DAY 1999

### HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, March 10, 1999*

Mr. LANTOS. Mr. Speaker, today the international human rights community commemorates the fortieth anniversary of the uprising of the Tibetan people against Communist Chinese oppression. On March 10, 1959, the people of this sparsely populated mountain region rose up against a despotic regime intent on destroying its liberty, its culture, and its ancient religious heritage. Inspired by the leadership and courage of His Holiness the Dalai Lama, the Tibetan people stood up and repulsed Chinese efforts to deny them their individuality and their rights. We celebrate Tibetan National Day to pay tribute to their brave crusade.
