Mr. KOHL (for Mr. BAUCUS) proposed an amendment to the bill, S. 1233, supra as follows:

On page 76, between lines 6 and 7, insert the following:

SEC. . The Senate finds that—

(1) agricultural producers in the United States compete effectively when world markets are not distorted by government intervention;

(2) the elimination of barriers to competition in world markets for agricultural commodities is in the interest of producers and consumers in the United States;

(3) the United States must provide leadership on the opening of the agricultural markets in upcoming multilateral World Trade Organization negotiations;

(4) countries that import agricultural commodities are more likely to liberalize practices if they are confident that their trading partners will not curtail the availability of agricultural commodities on world markets for foreign policy purposes; and

(5) a multilateral commitment to use the open market, rather than government intervention, to guarantee food security would advance the interests of the farm community of the United States.

(b) It is the sense of the Senate that members of the World Trade Organization should undertake multilateral negotiations to eliminate policies and programs that distort world markets for agricultural commodities.

ADDITIONAL STATEMENTS

OCCUPATIONAL AND ENVIRONMENTAL HEALTH AND SAFETY WEEK

• **MR. SARBANES.** Mr. President, during the week of August 30—September 3 we will celebrate Occupational and Environmental Health and Safety Week. As a strong and vigorous supporter of Federal initiatives to strengthen our safety and environmental laws and protect our workers and citizens, I am pleased to take this opportunity to draw my colleagues' attention to this important occasion and to take a few moments to reflect on and bring greater awareness of workplace and community health and safety issues to the public.

Occupational and Environmental Health and Safety Week is sponsored by the American Industrial Hygiene Association. This is the first annual celebration of this event and the goal is to highlight workplace and community health issues. This year's theme, "Protecting Your Future . . . Today," shows the far-reaching nature of occupational and environmental safety's impact on the public.

One of the major issues concerning workplace safety is Ergonomics. Ergonomics is the science of fitting the job to the worker. It is the solution to a host of physical problems brought about by over-exertion or repetitive stress. More than 650,000 Americans suffer serious injuries and illnesses due to work-related musculoskeletal dis-

orders each year, accounting for more than 34 percent of all lost-workday injuries and illnesses, and costing employers \$15–20 billion annually in direct workers' compensation costs.

There is sound scientific evidence linking musculoskeletal disorders (MSDs) to work. Last summer, the National Academy of Sciences (NAS) found "compelling evidence" that workplace modifications can reduce the risk of injury. A 1997 review of 600 studies by the National Institute of Occupational Safety and Health drew similar conclusions. For the average worker, the back takes the brunt of the injuries. About 4 out of 10 injuries involve strains and sprains, most of them back-related. The Department of Labor recently reported that injuries and illnesses for construction laborers, carpenters, welders and cutters increased by a total of 8,000 cases. Additionally, truck drivers suffer more than their share of injuries, including approximately 145,000 work-related injuries or illnesses each year.

Although many injuries occur in the workplace, our concern does not end there. OEHS Week's second important emphasis is safety in the community and home. Protecting and improving our environment, our parks and wildlife refuges, and natural resources have been among my highest priorities since I was first elected to the Congress. I have fought for, and helped enact, every major piece of legislation to enhance environmental quality—the Clean Water Act, the Clean Air Act, the Endangered Species Act, and Superfund, to name a few. OEHS Week is designed to heighten awareness about several vital community health concerns including carbon monoxide poisoning, indoor air quality, and noise exposure.

In my view, a clean environment is a legacy we leave for future generations. After all, our natural resources—our farmlands and forests, water, air, and our wildlife—are the foundation of our country's present and future well-being and quality of life. We are making progress in the effort to clean up the Chesapeake Bay—our nation's largest and most productive estuary. But much more work needs to be done to revitalize this national treasure and I have introduced legislation to amend the Federal Water Pollution Act to assist in the restoration of the Chesapeake Bay. Additionally, I have introduced a bill to implement pilot projects in Maryland, Virginia, and North Carolina to address problems associated with toxic microorganisms in tidal and non-tidal wetlands and waters.

As we approach over 100 years of celebrating Labor Day, it is appropriate that we focus our attention on the safety of workers while in a workplace environment and on their safety and environmental concerns while away from the job site. This 1st annual Occupational and Environmental Health and Safety Week truly represents a
