(4) the City now receives almost no benefit from the bascule gates because the City does not require the additional water provided by the bascule gates for its municipal water supply;

(5) the City has repaid more than \$1,200,000 to the United States for the construction of the bascule gates, and has been working for several years to reach an agreement with the Bureau of Reclamation to alter its repayment contract;

(6) the City has a longstanding commitment to improving the water quality and recreation value of the reservoir and has been working with the United States Geological Survey, the North Dakota Department of Game and Fish, and the North Dakota Department of Health to improve water quality; and
