

resume which covered six pages—he did indeed need that much room just to get everything in—and being truly impressed with the multitude of official reports and publications Jack produced—extraordinary diversity that made him a perfect candidate to head up the Committee's investigations and oversight activities. Also, he has a wide range of teaching experience at the graduate and undergraduate levels.

While carrying out his heavy congressional workload, Jack has also been actively involved in his community as a PTA treasurer, and a member of the Victorian Lyric Opera Company, and has supported his daughters' athletic activities. Jack has such a breadth of experience that the label "Jack-of-all-trades" aptly applies.

I join with Jack's many friends in wishing him, his lovely wife Heidi Hartman, and daughters Katharine, Laura and Jessica, all the best. Jack, Godspeed and success in your career pursuits.

1999 PENROSE CITIZEN OF THE
YEAR, GARY SCHENCK

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. McINNIS. Mr. Speaker, I would like to take a moment to recognize the 1999 Penrose Citizen of the Year, Mr. Gary Schenck.

Gary received this honor from the Penrose Chamber of Commerce because of the manage things he has done to improve his community. He always presents a very positive picture of Penrose. He volunteered hundreds of hours at the Chamber of Commerce since 1996. He is also very active with the Penrose Community Library and the Fremont Contractors Association. In addition, he has assisted in fund raising for the Penrose Volunteer Fire Department. Gary has recently held free classes for senior citizens who want to learn about the Internet.

It is with this, Mr. Speaker, that I offer this tribute of thanks and congratulations to Mr. Gary Schenck. The community of Penrose is better because of him.

ANDY PAPPAS, ONE OF
ALTOONA'S GREATEST ASSETS

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. SHUSTER. Mr. Speaker, it is with deep sadness that I rise today to pay tribute to a dear friend and fellow public servant, Mr. Andronic Pappas. Andy passed away last Friday at the Memorial Sloan Kettering Cancer Center in New York City, following a brief illness.

Andy was born in Altoona, PA, and to the betterment of central Pennsylvania he never left. Instead, Andy through his love of his hometown community made Altoona a better place to live, work, and raise a family. He graduated from Altoona High School, served his country during the Korean conflict, and later served as mayor and elected councilman

of Altoona, but this is only the beginning of Andy's contribution to our community. He went on to serve as Democratic Committee Chairman, Chairman of the Altoona City Authority, Regional Director for the State Department of Commerce, President of the Blairmont Country Club, President of the Blair County Arts Foundation, and President of the Wehwood PTA, to name a few. In his spare time he managed to earn a bachelor of arts degree from Penn State University, dabble in local theater, radio, and television at the same time building a highly successful real estate company.

Andy and I have worked hand-in-hand on numerous projects throughout the Blair County area and I had come to rely on his insight and council regarding local interests. His dedication to the community has raised the bar on what it means to serve the public. His life long commitment to Altoona will not soon be forgotten.

Anyone who knew Andy, knew of his great love for his family, his wife Jographia, his two daughters Elena and Zoe, and his two grandsons Michael and Stephen James. Mr. Speaker, I will close by paying tribute to the life of Mr. Andy Pappas, my friend, may he rest in peace.

TRIBUTE TO DEXTER MCCLEON

HON. CHARLES W. "CHIP" PICKERING

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. PICKERING. Mr. Speaker, I rise today to recognize Dexter McCleon of Meridian, MS. Dexter was an integral part of the St. Louis Rams' road to victory in the 2000 Super Bowl.

While at the Meridian High School, Dexter earned consensus All-American honors and was selected as the Super Prep Dixie Player of the Year. Like so many of the great athletes in Mississippi, Dexter showed athletic prowess on both the football field and the baseball diamond. He amassed over 1,500 yards passing and more than 500 yards passing while maintaining a batting average of .395 with 11 home runs and 56 runs batted in.

Dexter's persistence and determination led him to the St. Louis Rams as the 40th selection of the 1997 draft. Dexter has quickly become a cornerstone of one of the NFL's most feared defensive backfields. As one of the league's great emerging cover corners, Dexter's 1999 statistics read like those of many NFL Hall of Fame inductees.

Dexter's hard work and dedication to purpose reflect Mississippi's record as one of the premier proving grounds for high school athletes. By continuing this dedication and work ethic throughout his life, this young man will succeed in all of his future endeavors.

I want to commend Dexter on his work as one of the emerging professional football stars from the State of Mississippi. I would also like to commend Dexter for being a worthy ambassador for our great State. It is my distinct pleasure to be able to congratulate Dexter on his Super Bowl victory.

HONORING MRS. MARILYN LANCE,
NEW YORK STATE TEACHER OF
THE YEAR

HON. JOHN E. SWEENEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. SWEENEY. Mr. Speaker, I rise today to honor New York State's Teacher of the Year, Mrs. Marilyn Lance of East Greenbush, New York. Mrs. Lance surpassed nearly sixty other candidates to win the highly coveted award, which is affiliated with the national Teacher of the Year program. Mrs. Lance is the first Capitol Region teacher to win the award in twenty four years.

Marilyn Lance has dedicated the last 27 years to upholding the hopes and dreams of hundreds of children in the Averill Park Central School District. Optimism and positive vibes permeate from her classroom. She believes every child can achieve and provide the spark required to ignite their creativity, imagination and interest. Children embrace her caring demeanor and rise to meet her high academic standards.

Mrs. Lance brings a special set of skills into her class of first and second graders. She never asks a child to do something they can't do and has a knack for bringing out the best in every student.

Student success is her top priority. Her reward is seeing students grow and learn. She truly cares about each and every student. Mrs. Lance meets their needs at every level: educational, emotional, and spiritual. Children in her class are treated with respect and learn the value of kindness and decency. I commend her efforts to provide a rich, intellectually stimulating environment in which children learn the vital skills required to be successful in our society.

Mr. Speaker, please join me in congratulating Marilyn Lance on her selection as New York State Teacher of the Year. Also, please join me in wishing her the very best of luck in the upcoming National Teacher of the Year competition.

JOHN PORTER WINNER OF THE
WAYNE N. ASPINALL WATER
LEADER OF THE YEAR AWARD

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. McINNIS. Mr. Speaker, I would like to take a moment to recognize the winner of the 2000 Wayne N. Aspinall Water Leader of the Year Award, Mr. John Porter.

Water is a very important issue to the State of Colorado. Coloradans have to be very sensitive to issues dealing with water and water rights, to ensure that those rights are protected. This award represents a person who has dealt with water issues to the best of his ability to ensure the best interests of Colorado water.

John Porter has been the General Manager of the Dolores Water Conservancy District since 1982. As a result of John's management of the District and the Project, the Dolores Project is one of the most efficient water

projects in the Upper Colorado Region. From developing programs to save water for irrigators, to developing trust between competing interests, John has always had a positive outlook and a willingness to discuss the issues, no matter how difficult.

John Porter has devoted his life to water interests, first as a farmer, and for the last eighteen years as Manager of the Dolores Water Conservancy District. John's commitment to the beneficial use and conservation of Colorado's water resources has garnered him a well deserved reputation as a "water leader" in the State of Colorado.

It is with this, Mr. Speaker, that I would like to offer this tribute in honor of Mr. John Porter. He is most deserving of the honor of the Wayne N. Aspinall Water Leader of the Year.

TRIBUTE TO CARETAKERS OF THE ENVIRONMENT INTERNATIONAL

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. PORTER. Mr. Speaker, I can think of no better way to safeguard the world's natural resources than to arm today's youth with the tools necessary to preserve our precious environment.

That's exactly the mission of Caretakers of the Environment International, a Pied Piper of sorts that leads youth along with a path of environmental awareness and activism. Young people from around the world answer the call of this nonprofit organization. They are taught the scientific lessons and practical skills to become environmental leaders.

A hallmark of the organization's activities each year is its annual conference where the host country becomes a laboratory to explore the conference theme. Past conferences have probed such environmental themes as the "Arctic and the Environment," "Development and Research in Environmental Education," and "Tourism and the Environment." Costa Rica's tropical ecosystems were the backdrop last year for the 13th annual conference where 122 highly motivated students and teachers learned through workshops, field trips and social activities. Delegates visited rainforests, volcanoes and Pacific Ocean beaches to learn about biodiversity from expert guides.

This year marks the 10th anniversary of Caretakers of the Environment-USA, an American affiliate of the international group. Caretakers/USA reaches out to high school students and teachers—with diverse interests and abilities—and involves them in community action that develops a spirit of national and international cooperation for environmental problem solving.

Undoubtedly, Caretakers' efforts to improve science education encourage young people to pursue environmental careers that will help protect the world's environment. Mr. Speaker, I applaud the activities of Caretakers of the Environment and hope that my colleagues will join me in supporting its efforts.

THE MUD DUMP PERMANENT CLOSURE AND REMEDIATION ACT OF 2000

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, February 14, 2000

Mr. SMITH of New Jersey. Mr. Speaker, today I am introducing legislation to protect New Jersey's oceans and beaches from continued ocean dumping of harmful substances.

Just a few miles off the coast of Sandy Hook lies an area that—after years of protracted debate and political maneuvering—was appropriately designated as the Historic Area Remediation Site (HARS). The designation was made to protect the site from the future dumping of toxic dredged mud. It was July, 1996 when vice President Gore Triumphantly announced that the dumping would stop and the site—affectionately called the old Mud Dump—would be cleaned up with clean dredge material.

Unfortunately, we now know that the 1996 announcement was not an iron clad commitment to end ocean dumping of toxic sludge. In a betrayal of our trust, the Clinton Administration's Army Corps of engineers has approved permits allowing Castle Astoria Terminals, Inc., and Brooklyn Marine Terminals, to dump dredge materials that actually contain higher levels of contamination (including toxic PAHs and PCBs) than the stuff already in the Mud Dump.

Mr. Speaker, common sense dictates that you cannot clean up something by capping it with a substance dirtier than the original mess. Unfortunately, the "category 1" standards in use by the Army Corps and the Environmental Protection Agency (EPA) are so insufficient that using the dredged mud from the Castle Astoria and Brooklyn Marine Terminals to remediate the HRS is like trying to clean an oil spill by pouring nuclear waste on top of it. It will only make a bad situation even worse.

Fortunately, the interests of keeping New Jersey's and New York's ports open, and protecting the environment and New Jersey's multi-billion dollar tourist industry, are not mutually exclusive. The people of New Jersey and New York need both the shipping and tourist industries to be healthy if our high standard of living is to be preserved. There are new ways to treat and decontaminate dredged materials so they are truly clean and pose no threat to the environment. New Jersey has been very proactive in trying to find creative ways of disposing of dredged materials so we can avoid the need to dump at sea. For example, dredged materials have been used in Elizabeth to cap a brownfields site and turn a deserted eyesore into a productive, job creating waterfront mall.

The problem, however, is that the State of New York has done virtually nothing to look beyond ocean dumping for its dredging needs. Every objective, outside observer of the ocean dumping fight admits that New York is not pulling its own weight. And the bottom line is that as long as New York can easily and cheaply use the Jersey Shore as a dumping ground for its dredged soil, New York will never have any incentive to look for real alternatives.

I mean to change that. Under the legislation I am introducing today, an immediate ban will

be placed on any existing ocean dumping permits at the Mud Dump to be issued by the Army Corps until new remediation standards are in place.

The bill also requires the EPA, within 90 days of enactment, to formulate a new set of remediation standards. These remediation standards were promised to New Jerseyans in 1996, but four years later, they have still to be issued. We have waited long enough for these standards to be promulgated. It is time for the EPA to act to protect the health of our oceans and beaches.

In addition, my legislation sets forth basic principles that the EPA must follow when developing and proposing new remediation material standards.

First, the actual level of contaminants (including PAHs and PCBs) in the remediation material must be significantly lower than the Mud Dump pollutants it is to be used to cover. Sadly, under the current and deeply flawed EPA "Category 1 standards," pollutant levels in proposed dredge spoils can actually exceed by many orders of magnitude the levels found in the material at the Mud Dump.

Second, the remediation material used at the Mud Dump must actually reduce pollution levels there.

Third, the remediation material must be shown to reduce the harmful impacts on the environment and marine life caused by the toxins found in the Mud Dump. It bears noting that the reason the HARS was created was not to provide the Port Authority of New York and New Jersey with an unlimited dumping ground. The HARS was created to remediate and clean up the toxins on the ocean floor and prevent harmful bioaccumulation of toxins in the seafood we eat.

Fourth, the new remediation standards must meet 'sunshine laws' that provide opportunities for a public notice and a public comment period. This provision is needed because the Army Corps issued the Brooklyn Marine Terminals permit without providing adequate public notice for comment. On January 24th, 2000, the Army Corps recognized its failure to provide adequate public comment and held a public meeting in New Jersey.

Fifth, the goal of the new remediation standards is to eventually clean up the Mud Dump to reflect a contamination level that is substantially equivalent to the level found naturally in the ocean. Given the amount of debate over what the EPA defines as "clean," it is important to set clear and common sense goals of what the word "clean" really means—restoring the oceans to their natural state. Only when consumers of seafood are reassured that the fish they eat are free from pollutants will the damage from ocean dumping be fully remediated.

Lastly, the bill would permanently close the Mud Dump as soon as it is fully remediated and capped with a clean layer of sand and silt that prevents existing pollution at the bottom of the ocean from finding its way into our food chain. If the economy of New York and New Jersey are to remain vibrant and healthy, we need to continue exploring alternative dredge disposal methods now. The costs of inaction greatly outweigh the additional costs of alternative disposal methods when one factors in the \$14.8 billion tourist and commercial fishing industry in New Jersey that will be seriously harmed if ocean dumping continues unabated.
