

"The Politics of Genocide." India also has killed more than 200,000 Christians in Nagaland since 1947, more than 70,000 Kashmiri Muslims since 1988 and tens of thousands of other minorities. Amnesty International reports that thousands of political prisoners are being held without charge or trial in "the world's largest democracy."

India is hostile to the United States. It votes against America at the United Nations more often than any country except Cuba.

In May 1999, the Indian Express reported that Indian Defense Minister George Fernandes led a meeting with Cuba, China, Iraq, Serbia, Russia and Libya to construct a security alliance "to stop the U.S."

India openly supported the Soviet Union's invasion of Afghanistan. Its nuclear weapons test started the nuclear arms race in South Asia. It refuses to allow the Sikhs, Kashmiris, Christians and other minority nations seeking their freedom to decide their political future in a free and fair vote, the democratic way.

America must not accept this kind of brutality and tyranny from a government that claims to be democratic. We must cut off aid and trade to India and support a free and fair plebiscite to ensure human rights and self-determination for Khalistan, Christian Nagalim, Kashmir and all the minority nations and peoples living under Indian rule.

TRIBUTE TO DOCTOR JACK KILBY

HON. RICHARD K. ARMEY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 18, 2000

Mr. ARMEY. Mr. Speaker, today I rise to honor a distinguished American and someone who I am proud to say resides in the 26th District of the great state of Texas, Dr. Jack Kilby. Just a few days ago Dr. Kilby was awarded the Nobel Prize in Physics for his part in the invention and development of the integrated circuit.

Dr. Kilby's invention of the monolithic integrated circuit—the microchip—some 30 years ago laid the conceptual and technical foundation for the entire field of modern microelectronics. It was this breakthrough that made possible the sophisticated high-speed computers and large-capacity semiconductor memories of today's information age.

Dr. Kilby grew up in Great Bend, Kansas. In 1958, he joined Texas Instruments in Dallas. During the summer of that year working with borrowed and improvised equipment, he conceived and built the first electronic circuit in which all of the components were fabricated in a single piece of semiconductor material half the size of a paper clip. The successful laboratory demonstration of that first simple microchip on September 12, 1958, made history.

Jack Kilby went on to pioneer military, industrial, and commercial applications of microchip technology. He is the recipient of two of the nation's most prestigious honors in science and engineering; in 1970 he received the National Medal of Science, and in 1982 he was inducted into the National Inventors Hall of Fame, taking his place alongside Henry Ford, Thomas Edison, and the Wright Brothers in the annals of American innovation.

Mr. Speaker, the microchip is one of the most important inventions of the Information Age—indeed, it's one of the most important in-

ventions in mankind's long history. Jack Kilby deserves our recognition and our thanks.

WINGS OF KINDNESS

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 19, 2000

Mr. HALL of Texas. Mr. Speaker, I have waited almost a year to place this story in the CONGRESSIONAL RECORD. Let's call it an early Christmas story—about the simple but powerful gift of kindness, in this case bestowed by two pilots on a young boy on Christmas Eve. Art Hendon of Terrell, TX, shared this with me in December of last year, and I am honored to share it with my colleagues today.

Sometimes the most important gifts are given unwittingly. I set about checking the instruments in preparation for my last flight of the day, a short hop from Atlanta to Macon, GA. It was 7:30 P.M. Christmas Eve, but instead of forking into Mom's turkey dinner, I was busy getting other people home to their families.

Above the low buzz of talking passengers, I heard a rustle behind me. I looked over my shoulder. Just outside the cockpit doorway was a fresh-faced boy of about nine gazing intently at the flight deck. At my glance he started to turn away.

"Hold up," I called. "Come on in here." I had been about his age when I first saw a flight panel lit up like a Christmas tree and I could hardly wait to get my pilot's wings. But now that I was 24 and first officer at a commuter airline, I wondered if I'd made the right choice. Here I was spending my first Christmas Eve away from home, and what was I accomplishing? How was I making my mark in the world, let alone doing God's work, just hauling people from city to city?

The boy stepped cautiously into the cockpit. "My name's Chad," I said, sticking out my hand. With a shy smile he put his hand in mine. "I'm Sam." He turned to the empty seat beside me. "Is that for the captain?"

"It sure is and that's where Captain Jim sits." I patted the worn fabric. "Would you like to try it out?"

Sam blinked at me from under this ball cap. "I don't know . . . I mean . . . well, sure if it's okay." I lowered the seat so he could slide into it.

The captain loved to give demonstrations of the plane's gadgets to kids, but what would he think about one sitting in his seat? Well, it's Christmas, I thought.

I glanced out at the luggage carts being wheeled toward the plane, thinking of the gifts I wouldn't be able to give in person to my parents and friends the next day. Sam told me he and his family had flown in from Memphis.

I checked my watch. The captain would be in any minute, but Sam looked so thrilled, I didn't want to cut short his fun. I gave the instrument panel another once-over, telling Sam what each button and lever did.

Finally Captain Jim clambered aboard. "Howdy, partner." He gave Sam a broad grin. "You know, son," he drawled, "I don't mind you staying with us for a while if you'll switch with me." Sam let the captain take his place and I made introductions.

We began previewing the startup checklist. I kept thinking the captain would send Sam away, but the boy was still peering over my shoulder when the ramp agent radioed to ask if we were ready to turn on the first engine in start sequence, number four. I relayed the question to the captain, who was studying the weather reports.

"I'm still going over these," he said. "You guys go ahead and start it."

"Okay, starting . . ." I said, positioning the switches. Then I did a double take. "Did you say you guys?"

"Yeah, go ahead."

I looked over at the captain, and back at the flight panel. "Right." I flicked on the plane's flashing red beacon to signal the start. Then I turned to my new assistant.

"You ever start an airplane before, Sam?"

Eyes wide, he shook his head. Following my instructions, Sam carefully turned a knob on the overhead console that switched on the igniters. Then he pressed a button as big as his hand to start the engine. Finally, with both hands he slid forward a lever to introduce the fuel. The engine hummed to life.

Sam slowly let go of the lever and stepped back, awestruck. He'd gotten to start an airplane, an honest-to-goodness airliner. I'm not sure if I'd have believed it myself at his age. I thanked Sam for helping us out.

"No, thank you, sir," Sam said. "This was really great!"

As he backed out of the doorway into the cabin, the plane resonated with the sound of the engine he'd started. "You have a merry Christmas, son, you hear?" the captain said.

Sam looked like he was about to cry with happiness. "I will, sir, I will. Thank you!" With one last look at the flight deck he turned and walked down the aisle. We started up the other engines, took off, and arrived in Macon about 40 minutes later. Early Christmas morning, as we settled into the cockpit for the trip back to Atlanta, one of the gate agents ducked in. "Hey, guys, some kid's mother came by this morning. She wanted to make sure I thanked you for showing her son around last night. Said he couldn't stop talking about the cockpit. She left this for you."

The gate agent set a red tin on the center console.

"Well, I'll be," the captain said. He bit into one of the chocolate chip cookies from the tin. Then he unfolded the note taped to its cover and read it silently. He sighed deeply and turned to me, "Boy's got cancer," he said, and read the note aloud:

Dear Sirs, Thank you for allowing Sam to watch you work on Christmas Eve night. Sam has cancer and has been undergoing chemotherapy in Memphis. This is the first time he has been home since the treatment began. We drove Sam up to the hospital, but since he loves airplanes, we decided to fly him back home. I am not sure if he will ever get to fly again. His doctor has said that Sam may have only a few months left. Sam has always dreamed of becoming an airline pilot. The flight we took from Memphis to Atlanta was exhilarating for him. He wasn't sure flying on one of your "little" airplanes would be as much fun, but you two gentlemen gave him the greatest Christmas gift imaginable. For a few short minutes his dream came true, thanks to you.

I looked out at the runway gleaming before us in the sun. When I turned back to Jim, he was still staring at the note. A flight attendant came in and said the passengers were ready for departure. She stowed the cookies away and we went through the checklist. Then Captain Jim cleared his throat and called out, "Starting number four."

I'd wanted to be home with my loved ones, exchanging gifts for the holidays. But that little boy showed me that sometimes the most important gifts we give are given unwittingly and the most precious ones we get come from strangers. I can serve God's purpose no matter where I am, as long as I let the spirit that moved me that night guide me always.

MIAMI RACES FOR THE CURE

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 19, 2000

Ms. ROS-LEHTINEN. Mr. Speaker, last Saturday, members of the South Florida community came together in an effort to eradicate breast cancer. Nearly 5,000 people participated in the Komen Miami/Ft. Lauderdale Race for the Cure.

Before the race, Nancy Brinker, founder of the Susan G. Komen Breast Cancer Foundation, delighted the crowd with her compassionate words and Soraya, the well-known Latin American singer, who underwent a mastectomy several weeks ago, translated Nancy's message of hope and inspiration into Spanish before walking the course. This year's race was dedicated to Patti Walsh, a Race for the Cure volunteer who lost her battle with breast cancer in August. Today I salute the family and friends who supported her. Twenty-five percent of the dollars raised at last Saturday's event will benefit the National Grants Program for breast cancer research. And, 70% will be used to award grants within the South Florida community by promoting breast cancer research, education, screening and treatment.

I would especially like to congratulate Helen Duncan, my congressional constituent, and Race for the Cure volunteer who organized this magnificent South Florida event.

I commend Jane Torres, President of the Breast Cancer Coalition and a yearly participant in this event who devotes herself daily to eradicating breast cancer.

And I thank the hundreds of South Florida families whose lives may have been touched by breast cancer, and who helped make this event possible.

IN HONOR OF TIM GAUNA

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 19, 2000

Mr. FROST. Mr. Speaker, I rise in sadness today to honor the memory of Information Systems Technician Seaman Timothy Gauna, a constituent of mine from Rice, Texas, who is among the missing sailors from the attack on the U.S.S. *Cole*.

Tim Gauna was 21 years old and a 1997 graduate of Ennis High School. He was one of five children in a close family. Teachers said he was a quiet student who excelled in baseball and art. He joined the Navy 18 months ago with a dream shared by many recruits, to earn financial assistance to attend college. He wanted to learn about computers, then use the knowledge while attending the University of Texas at Austin. He would have been the first in his family to go to college.

Before sailing into harm's way, Tim let his mom know that he was headed into dangerous waters, but that he would be okay. Like all the sailors aboard the U.S.S. *Cole*, Tim Gauna was serving his country bravely and honorably when this vicious attack took place. I join the Gauna family, and all the families of the missing sailors, in hoping that they will soon be accounted for.

After the attack, I flew down to North Texas to visit Seaman Gauna's family. There, I spoke with a mother who is proud of her son's courage and patriotism. She described her son as having an open and friendly nature, and sharing the family's strong belief in their faith. And I talked to various family members who admire Tim's dedication to America.

I do not know all the sailors on the U.S.S. *Cole*, Mr. Speaker, but I know the family of Seaman Gauna. They—like all of the U.S.S. *Cole*'s sailors and their families—have America's gratitude, and our prayers.

IN TRIBUTE TO ELIE DULAY

HON. ELTON GALLEGLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 19, 2000

Mr. GALLEGLY. Mr. Speaker, I rise to pay tribute to Elie Dulay, who will retire next week after 28 years of service to the City of Simi Valley, California, my hometown.

Elie was a clerk with the city when I was elected to the City Council. I can think of few people who were more helpful, energetic or pleasurable to work with than Elie during my entire tenure as a Councilman and Mayor.

It is of no surprise to me that Elie rose through ranks and will retire as an administrative secretary. Aside from being an exceptionally competent employee, she is the personification of a people person. Elie approaches life and her work with a smile. Problems disappear in her capable hands, and her positive attitude is contagious among her coworkers.

Elie's husband, Art, is also retiring, but they will remain busy. The two are accomplished dancers. Elie is also a wonderful cook, with a specialty in Asian food. They have three grown children, two of which work for the Simi Valley Police Department—one as an officer and one as a records technician. Elie and Art also have six grandchildren, ranging in age from 1 year to 16 years old, and look forward to spending even more time as doting grandparents.

Mr. Speaker, if there is an ideal government employee, Elie is it. I know my colleagues will join me in thanking her for her years of service and wish her all the best in her retirement.

WHISTLEBLOWER PROTECTIONS

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 19, 2000

Mrs. MORELLA. Mr. Speaker, today, I introduced legislation in Congress amending the Whistleblower Protection Act (WPA) to restore protections for federal employees who risk their jobs by disclosing waste, fraud, abuse or violations of law they witness on the job. This legislation is critical to restore the flow of information to Congress and the public about wrongdoing within the government. It is necessary because the original congressional intent has been partially nullified by certain judicial decisions.

In 1989, Congress unanimously passed the Whistleblower Protection Act (WPA) and strengthened it in 1994. The new bill closes ju-

dicially created loopholes that have made the law useless in most circumstances. Recent decisions by the Court of Appeals for the Federal Circuit have denied protection for disclosures made as part of an employee's job duties or within the chain of command. The bill restores coverage in over 90 percent of the situations where it counts most for federal workers to have free speech rights—when they defend the public on the job.

The bill also makes permanent a free speech shield known as the "anti-gag statute" that Congress has passed annually for the last 13 years. It outlaws nondisclosure rules, agreements and other forms of gag orders that would cancel rights in the Whistleblower Protection Act and other good government statutes. In particular, it upholds the supremacy of a long-established law that workers have a right to notice that information is classified as secret for national security interests, before they can be held liable for releasing it. The necessity for the bill was increased last week by passage of a little noticed provision in the Intelligence Authorization Act for 2001. That provision functionally could make whistleblowers liable for criminal prosecution, based on speculation that unmarked information were classified.

We must reaffirm our support for whistleblowers. We made a serious commitment to federal workers in 1989 and Congress must ensure those protections stay in place. Congress must demonstrate once again its support for federal workers who risk everything to defend the public against fraud, waste, and abuse.

TRIBUTE TO STEPHEN E. PETERSEN

HON. JAMES E. CLYBURN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 19, 2000

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to Stephen E. Petersen, founder of the Annual Petersen Invitational Golf Tournament. The tournaments have been held on some of the finest and challenging golf courses along the Atlantic Coast from Myrtle Beach to Charleston, South Carolina.

The purpose of the tournaments are to promote comradery, good food, fellowship, and hospitality among friends. The tournaments also provide an opportunity for participants to engage in the finer points of competitive golf. Throughout the years, more than six hundred friends and colleagues have participated in this event.

Stephen has unselfishly invested his inspiration, time, sweat, and funds in order to make these events successful. His love for people and passion for the game of golf together, distinguish him. They explain his sense of kinship with all those who know him. Stephen's efforts have been highly successful in enriching lives and providing enjoyment to all who have participated in his tournaments.

Many have fond memories which will remain with them for the rest of their lives. Many more gained insight and appreciation for what great golf tournaments are really all about.

I, and the many friends, colleagues, and participants of these golfing events wish to extend our sincere appreciation, admiration, and
