

largest sources of civilian basic research funding for universities: the National Science Foundation and the National Institutes of Health.

The Nation does not have to choose between a strong economy and a clean environment. The past seven years are proof that we can have both. We have set tough new clean air standards for soot and smog that will prevent up to 15,000 premature deaths a year. We have set new food and drinking water safety standards and have accelerated the pace of cleanups of toxic Superfund sites. We expanded our efforts to protect tens of millions of acres of public and private lands, including Yellowstone National Park, Florida's Everglades, and California's redwoods. Led by the Vice President, the Administration reached an international agreement in Kyoto that calls for cuts in greenhouse gas emissions. My budget significantly expands support for the environment, by establishing dedicated funding and increasing resources for the historic interagency Lands Legacy initiative to preserve the Nation's natural and historic treasures. My budget also supports the Clean Energy initiative to reduce the threat of global warming, and the Greening the Globe initiative to save tropical and other forests around the globe. It provides resources to support farm conservation to upgrade water quality, the Clean Water Action plan to clean up polluted waterways, and climate change technology efforts to increase energy-efficient technologies and renewable energy to strengthen our economy while reducing greenhouse gases.

In the past year, America's leadership was essential to the success of the NATO alliance in halting the ethnic cleansing of Kosovo's ethnic Albanians and containing the risk of wider war at the doorstep of our allies. The United States has played a critical role in the strides made toward lasting peace in Northern Ireland, the Middle East, and Sierra Leone. The United States has worked to detect and counter terrorist threats and continue efforts with Russia and other former Soviet nations to halt the spread of dangerous weapons materials. My budget seeks to build on these efforts, proposing funding to build a democratic society and stronger economy in Kosovo, initiatives to further protect our men and women overseas, and a 2000 emergency supplemental to provide critical assistance to the Government of Colombia in its fight against narcotics traffickers. My budget also proposes funding to promote international family planning, contain the global spread of AIDS, promote debt forgiveness to help people in the world's poorest countries join the global economy, and promote trade by opening global markets.

The Armed Forces of the United States serve as the backbone of our national security strategy. As it did successfully last year in Kosovo, the military must be in a position to protect our national security interests and

guard against the major threats to U.S. security. These include regional dangers, such as cross-border aggression; the proliferation of the technology of weapons of mass destruction; transnational dangers, such as the spread of illegal drugs and terrorism; and, direct attacks on the U.S. homeland from intercontinental ballistic missiles or other weapons of mass destruction. To ensure that the military can fulfill this mission, I made a major commitment last year to maintain our military readiness, which this budget builds upon with additional resources to ensure that the services can meet required training standards, maintain equipment in top condition, recruit and retain quality personnel, and procure sufficient spare parts and other equipment. To help improve the quality of life and strengthen the Department's ability to attract and retain quality individuals, this budget includes a major initiative to reduce servicemembers' out-of-pocket costs for off-base housing. In addition, this budget provides resources for the Department of Defense and other agencies to combat emerging threats, including terrorism and weapons of mass destruction, and to provide for critical infrastructure protection. It provides funds to support counter-narcotics efforts, including a 2000 supplemental to increase assistance to the Government of Colombia in their fight against narcotics traffickers. It also provides additional funding for contingency operations in Southwest Asia, Bosnia, and Kosovo.

BUILDING PROSPERITY FOR THE FUTURE

This is a rare moment in American history. Never before has our Nation enjoyed so much prosperity, at a time when social progress continues to advance and our position as the global leader is secure. Today, we are well prepared to make the choices that will shape our Nation's future for decades to come.

By reversing the earlier trend of fiscal irresponsibility, balancing the budget, and producing a historic surplus, we have restored our national spirit and produced the resources to help opportunity and prosperity reach all corners of this Nation. We have it within our reach today, by making the right choices, to offer the promise of prosperity to generations of Americans to come. If we keep to the path of fiscal discipline, we can build a foundation of prosperity for the Nation's future.

My plan to extend the solvency of Social Security and Medicare allows the United States to become debt-free in the next 13 years, for the first time since 1835. Eliminating the debt will strengthen our economy, devote resources to Social Security, and prepare us to meet the challenges of the aging of America. Through fiscal discipline and wise choices we can extend the life of Social Security to the middle of the century, extend the solvency of Medicare until 2025, and modernize Medicare with a needed prescription drug benefit.

By continuing to maintain discipline, we can provide for the aging of America and for the investments of the future—including education, the environment, research and development, and defense—which are central to our economic growth, health, and national security. By making choices that respect fiscal discipline, we can make room to provide both for a balanced tax cut and for investments that will help this Nation stay strong in the future.

This new century is filled with promise, for we live at a remarkable time. By making wise choices, we have it within our power to extend the same promise and prosperity to generations to come.
