

Basically, it provides the equity. It can be strengthened; it can work. We simply need to make it work before we go home.

Mr. PALLONE. One of the things I was looking at in that article that talks about the Nevada experience that I quoted before, it is interesting, I just noticed that Nevada is the only State that has gone this route of trying to get to buy private insurance. It mentioned there are 14 States, including my own State of New Jersey that have programs to help older people obtain prescription medicines, but in every one of those cases the State is the insurer. The State is running the program. Just like Medicare, essentially. Obviously, Nevada's proposal does not work, so why would we want to emulate that when the other 14 States are doing the opposite?

The other thing the gentleman pointed out, which I think is real important, is we actually have some statistics about the HMOs that are quitting Medicare. And, of course, we make the same argument as Democrats. Right now, the HMOs, which is a form of private insurance that a lot of seniors have relied on to get their prescription drug coverage, they are pulling out all over the place. This study that came out, I guess within the last couple of weeks, said that in the last 2 years, HMOs have pulled out of more than 400 counties and at least 33 States, directly affecting 734,000 Medicare beneficiaries.

And they say that as of July 1, or I guess it is July 3, which was the deadline when they had to notify if they wanted to get out by January 1 of 2001, we have Cigna, which I think the gentleman mentioned, Cigna Corporation is ending coverage for 104,000 Medicare beneficiaries, including those in my State. They are dropping 4,800 in northern New Jersey alone, not just the whole State. And Aetna, with 676,000 Medicare beneficiaries, said it would pull out of some markets also. And we have to, I guess, get more information about that. So we are getting hundreds of thousands of seniors that were relying on HMOs to provide their drug coverage that are now canceling.

One of the things I hear from the Republicans is, they say, well, we want to give seniors choice. That is what we want to let them go out and buy private insurance because they will have choice. But even for seniors who are in HMOs now, or who have employer plans that they are getting it through after they retire, we provide under other Democratic proposal for the majority of the prescription drug costs for those plans. It is anything from like 51 percent to 70 percent, depending, that we are going to be paying for by the Federal Government under our proposal.

So I would argue they will have more choice. Because the bottom line is they will have no choice with the Republican plan, because no insurance company will provide it. With us, if they want to stay in their HMO or if they want to stay in their employer plan,

they are more likely to offer it because we are going to be paying anywhere from 50 percent to two-thirds of the cost. So to argue that somehow we are not providing choice, we are providing choices, lots of choices, in addition to the fact that they can just stay in their regular Medicare and get the prescription drug plan.

So I am more and more convinced every day that the Republicans are just talking, going back to that original pollster memo. They are not really serious; they are just talking about it. And that is basically it.

I wanted to thank the gentleman for joining me. This is certainly not the last our colleagues will hear from us. We tried last week to put our prescription description drug plan on the marriage penalty, and we are going to try every maneuver we can to get it up here and voted on before this session is completed.

DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

The conferees agree that for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119) and by the Budget Enforcement Act of 1990 (Public Law 101-508), the term program, project, and activity for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2001, the accompanying House and Senate Committee reports, the conference report and accompanying joint explanatory statement of the managers of the Committee of Conference, the related classified annexes and reports, and the P-1 and R-1 budget justification documents as subsequently modified by Congressional action. The following exception to the above definition shall apply:

For the Military Personnel and the Operation and Maintenance accounts, the term "program, project, and activity" is defined as the appropriations accounts contained in the Department of Defense Appropriations Act. ITEMS ADDRESSED IN SUPPLEMENTAL ACTS

The recently passed Military Construction Appropriations Act, 2001 (Public Law 106-246), included the Emergency Supplemental Act, 2000 for the Department of Defense. This Supplemental addressed shortfalls in military personnel, recruiting, advertising, and retention by providing a total of \$134,400,000 in the Military Personnel accounts, and \$373,000,000 in the Operation and Maintenance accounts. In this Act, the conferees have agreed to include a total of \$50,000,000 for "Military Personnel, Navy", also designated as emergency supplemental appropriations in Title IX of this Act.

PERSONNEL UNDEREXECUTION SAVINGS

The conferees recommended a total reduction of \$243,800,000 to the Active Military Personnel accounts due to lower than budgeted fiscal year 2000 end strengths, and differences in the actual grade mix of officers and enlisted recommended in the budget request. The General Accounting Office estimates that the active components will have approximately 3,500 fewer personnel on board to begin fiscal year 2001, and as a result, the fiscal year 2001 pay and allowances requirements for personnel are incorrect and the budgets overstated.

Force Structure Changes

The conferees recommend a total of \$160,000,000 in the Military Personnel and Operation and Maintenance accounts for force structure that was not included in the budget request, as follows:

ADDITIONAL READINESS FUNDING TO ADDRESS SERVICE SHORTFALLS

The conferees note that, in addition to the funding recommended in title II of this Act, the conference agreement includes additional fiscal year 2000 emergency supplemental appropriations in title IX, reflecting critical readiness shortfalls identified by the Chiefs of the Military Departments and addressed by the House during its consideration of H.R. 1398 (Emergency Supplemental Appropriations for fiscal year 2000). These emergency appropriations include \$529,000,000 in the services' Operation and Maintenance accounts, including \$234,000,000 for depot maintenance, \$250,000,000 for real property maintenance, and \$45,000,000 for readiness spares kits.

OVERSEAS CONTINGENCY OPERATIONS TRANSFER FUND

The conferees direct the Secretary of Defense to provide the Appropriations Committees and the General Accounting Office reports identifying contingency related expenses no later than 30 days after the end of each month for which contingency costs are incurred.

BIOMETRICS INFORMATION ASSURANCE

The Conferees include in this Title of the bill \$7,000,000 for Army, \$3,000,000 for Navy, and \$3,000,000 for Air Force, and include \$12,000,000 in Title III of the bill for Army, all to support the efforts of Army as Executive Agent to lead, consolidate, and coordinate all biometrics information assurance programs of the Department of Defense (DoD), pursuant to the June 12, 2000 United States Army Report on the Biometrics Project (Report) prepared at the request of the Committees on Appropriations, and direct that the near-term and long-term implementation plan defined in the Report be implemented.

Recognizing the concerns expressed in the Report and elsewhere regarding social and legal issues associated with the uses of biometrics in the Government and private sectors, the Conferees support a comprehensive, in-depth legal and social assessment of the issues associated with the current and near-term uses of biometrics in the United States, to include plans for long-term monitoring of human biometrics uses, which are expected to increase substantially, and further recommend that this assessment be initiated as soon as practicable, pursuant to the Report.

To reduce lease costs and to support operating capability of the Biometrics Fusion Center by Fiscal Year (FY) 2004, the Conference recommended that the funds appropriated for this program in FY 2000 be made available immediately to develop specifications and requirements, not later than June 30, 2001, for the acquisition, via lease, of space suitable for the Biometrics Fusion Center Final Operating Capability in accordance with the Report.

INTEGRATED TRAINING AREA MANAGEMENT

The conferees understand that commanders are consistently reporting reduced ITAM funding as a training readiness issue in the Monthly Readiness Report. Therefore, the conferees recommend an increase of \$5,100,000 for ITAM and direct the Army to realign additional resources in order to fully fund the ITAM program.

TACTICAL MISSILE MAINTENANCE

Of the amount provided for Operation and Maintenance, Army, specifically depot maintenance, the conferees direct that \$48,300,000 be applied to Army Tactical Missile Depot Maintenance requirements, to include ground support equipment, at its organic public depots.

REAL PROPERTY MAINTENANCE

The conferees observe that the Army has reallocated \$1,100,000,000 of its operational training funds during fiscal years 1997 through 1999, and failed to meet tank mile training goals by an average of 20 percent. The Army cites that training resources were moved to other operation and maintenance programs such as real property maintenance. The conferees have provided significant real property maintenance and Quality of Life Enhancement resources to the Army for fiscal year 2001, and expects the service to execute the training plan and budget proposed in the budget request. The conferees direct the Army to allocate real property maintenance resources, by major command, at levels not less than those provided in Senate Report 106-298.

UNDERUTILIZED PLANT CAPACITY

The conferees are aware that the Office of the Secretary of Defense has directed the Army to study the scale and capacity of the arsenals and ammunition plants, in an effort to mitigate the need for further cash sub-

sidies. The Army shall provide this report to the Appropriations Committees no later than September 15, 2000.

INDUSTRIAL PREPAREDNESS

The conferees do not agree to reductions as proposed in the House and Senate versions of the bill to the Industrial Preparedness sub-activity group in Operation and Maintenance, Army.

AIR BATTLE CAPTAIN

The conferees direct to the Secretary of the Army to submit to the Appropriations Committees a detailed recruitment plan, specifically addressing the Air Battle Captain program, within sixty days of enactment of the conference report.

ENHANCED SKILLS TRAINING PROGRAM

The conferees understand that the Army has decided to terminate the Enhanced Skills Training Program (ESTP) for students at Historically Black colleges and Universities (HBCU) and to replace it with a distance learning program. Because of the historic role that HBCU's have played in integrating the Army, the conferees direct the Army to maintain through fiscal year 2001 the ESTP as configured during fiscal year 2000. To better understand the benefits of ESTP, the conferees directs the Army to provide a report to the congressional defense committees not later than October 1, 2000, on its long term plans for its partnership with HBCU's in preparing students for the Army.

OPEN BURN/OPEN DISPOSAL PRACTICES

The conferees are aware of public concern regarding possible health risks to civilian populations associated with the open burning/open detonation (OB/OD) of munitions and equipment at Army depots at various locations in the U.S. Most of these risks are believed to be associated with airborne gases, particles and other contaminants car-

ried downwind of the burn/detonation sites. The Army is directed to study potential alternative closed disposal technologies that do not release into the atmosphere and to report to Congress no later than September 30, 2001 on the possibility of phasing out OB/OD in favor of closed disposal methods. The report should include a review of technologies currently in existence and under development and assess the cost and feasibility of constructing facilities employing those technologies.

MEDIUM GENERAL PURPOSE TENTS

The conferees direct that \$14,000,000 of the funds provided for Operation and Maintenance, Army be made available only for the purpose of meeting prospective requirements for modular general purpose tents (MGPT) associated with wartime and other mobilizations as described in the report accompanying the House-passed Department of Defense Appropriations bill for fiscal year 2001. The conferees also note that the Department has refused to fully obligate previously appropriated funds for the program, citing a lack of firm direction from the Congress. The conferees therefore believe it necessary to clarify their strong support for the MGPT program, and direct the Secretary of the Army to expend the full amount of Operation and Maintenance, Army funds designated for MGPT in the fiscal year 2000 Department of Defense Conference Report without further delay.

TACONY WAREHOUSE SITE

The conferees direct that of the funds provided in Operation and Maintenance, Army, \$5,000,000 shall be available only to demolish the Army's Tacony Warehouse depot site owned by Fort Dix in Philadelphia, Pennsylvania.

ENHANCED SAFETY IN DEPARTMENT OF DEFENSE
INDUSTRIAL FACILITIES

Public Law 106-79 directed the Department to initiate programs that improved safety practices at DOD facilities. The conferees again urge the Department to undertake measures to improve the safety of work conditions at DOD industrial facilities. No later than December 1, 2000, the Secretary of Defense shall submit to the congressional defense committees a report regarding the feasibility of establishing pilot programs at maintenance depots and public shipyards to improve worker safety. The report shall include proposals, to include any requisite legislative language, for employing gain sharing incentives for the procurement of professional safety services.

FALLON NAS GREENBELT

The conferees understand that the navy has conducted studies to determine the feasi-

bility of restoring current and previously irrigated lands around the perimeter ("Greenbelt") of Fallon Naval Air Station, Nevada, to its natural ecological condition. Further, the conferees understand that the Commander, NAS Fallon, has consulted with the Army Corps of Engineers concerning their expertise in similar efforts. The conferees direct, as the Secretary of the Navy strives to eliminate the need for irrigation to the "Greenbelt", consistent with aircrew safety and the direction provided in Public Law 101-618, that the Navy continue to cooperate with the Army Corps of Engineers to study the most expedient methods to achieve this non-agricultural, non-irrigated state in the "Greenbelt" lands. The conferees direct that of the funds available to the Department of the Navy under the heading Operation and Maintenance, Navy, \$100,000 shall be available to expedite the study described above.

CENTER OF EXCELLENCE FOR DISASTER
MANAGEMENT AND HUMANITARIAN ASSISTANCE

The conferees recommend \$5,000,000 for the Center for Excellence for Disaster Management and Humanitarian Assistance. Within these funds, \$960,000 is to fund the Casualty Care Research Center. The Committee expects the Centers to work collaboratively to provide disaster response services in domestic, international, military and civilian settings.

RESTORATION OF USS TURNER JOY

The conferees direct the Navy to cooperate with the Bremerton Naval Memorial and Historic Ships Association in the repair of the USS Turner Joy. Of the funds available for Operation and Maintenance, Navy, \$750,000 shall be available for the maintenance and repair of the USS Turner Joy.

NEW ENERGY SAVING TECHNOLOGY

The conferees are aware of the unique energy savings and anticorrosion properties of Ambient Temperature Cure (ATC) Glass coatings for air-conditioning systems. The conference agreement includes \$500,000 in Operation and Maintenance, Air Force funding for the 6th Civil Engineering Squadron located at MacDill Air Force Base, Florida, for an energy demonstration of ATC glass coating technology as a follow-on to its initial testing of this technology on air conditioning systems. Accordingly, the conferees direct the Air Force to conduct a before and after test and evaluation of energy savings of ATC glass coated air conditioning systems, at MacDill Air Force Base, over a three-month period. The evaluation shall measure and document energy consumption and provide comment regarding effectiveness on existing air-conditioning units of varying ages and levels of corrosion. The Secretary of the Air Force shall provide the results of this testing to the House and Senate Committees on Appropriations not later than April 1, 2001.

CONTAMINANT AIR PROCESSING SYSTEM

The conferees commend the Secretary of the Air Force for standardizing mission-critical equipment that allows Air Force personnel to be effectively processed after contact with biological, chemical and nuclear agents. The conferees encourage the Secretary to use existing funds to continue implementation of standardized contaminant air processing systems (CAPS) throughout Air Force installations.

The conferees recommend a total of \$5,000,000 for personnel and operation and maintenance costs to support Air National Guard C-130 operational support aircraft and those stand-alone aircraft currently utilized by selected States.

OVERSEAS CONTINGENCY OPERATIONS TRANSFER FUND

The conferees agree to provide \$3,938,777,000 for the Overseas Contingency Operations Transfer Fund. This amount provides for continuing operations in and around Bosnia, Kosovo and Southwest Asia adjusted for unanticipated changes in the number of troops supporting these operations.

The conferees included a general provision which reduces the available funding for overseas contingency operations. The conferees recognize that current levels of deployed forces committed to peacekeeping operations may be reduced during fiscal year 2001. To ensure that current operations are uninterrupted if force levels and commitments are unchanged, the conference agreement provides sufficient emergency funding for overseas contingencies.

UNITED STATES COURT OF APPEALS FOR THE ARMED FORCES

The conference agreement provides \$8,574,000 for the United States Court of Appeals for the Armed Forces.

ENVIRONMENTAL RESTORATION, ARMY

The conference agreement provides \$389,932,000 for Environmental Restoration, Army.

ENVIRONMENTAL RESTORATION, NAVY

The conference agreement provides \$294,038,000 for Environmental Restoration, Navy.

ENVIRONMENTAL RESTORATION, AIR FORCE

The conference agreement provides \$376,300,000 for Environmental Restoration, Air Force.

FORMER SOVIET UNION THREAT REDUCTION

The conference agreement provides \$443,400,000 for the Former Soviet Union Threat Reduction program.

ENVIRONMENTAL RESTORATION, FORMERLY USED DEFENSE SITES

The conference agreement provides \$231,499,000 for Environmental Restoration, Formerly Used Defense Sites.

The conference agreement provides \$55,900,000 for Overseas Humanitarian, Disaster, and Civic Aid.

FOREIGN MILITARY SALES

In 1999, the Department of Defense signed a multi-year contract for the E-2C program. The E-2C multi-year contract assumed a total E-2C purchase which included both Department of the Navy and international aircraft deliveries in future years. The negotiated price for the Navy aircraft reflected the assumption that the international sales would be successfully completed in the future years. This process raises serious concerns that the Department of Defense might negotiate future multi-year contracts with sales prices that presume Congressional approval of potential international sales in future years. Such a practice is unacceptable and would violate the intent and spirit of the Foreign Military Sales notification and approval process.

The conferees direct that any future multi-year contracts shall reflect pricing which assumes only the U.S. military procurement quantities. The Department of Defense is expressly prohibited from negotiating any multi-year contracts which include quantities and pricing that reflect foreign military sales yet to be approved by the Congress.

INFORMATION ASSURANCE

The House recommended a net increase of \$150,000,000 over the President's budget for selected information assurance and computer network security programs. The conferees endorse the high priority given this effort by the House and recommended a net increase of over \$150,000,000 for specific information assurance initiatives, to include:

\$35,000,000 to purchase hardware and software applications to monitor computer networks for suspicious activity;

\$19,000,000 for new digital secure phones to replace the outdated STU-III;

\$18,600,000 to accelerate the DOD's Public Key Infrastructure (PKI) program;

\$16,400,000 for information security awareness, education and training;

\$15,000,000 for the Information Security Scholarship Program;

\$10,000,000 to ensure security capabilities are built into new cell phones, rather than retrofitting them later at a significantly higher cost;

\$10,000,000 for information operations vulnerability analysis;

\$5,000,000 to examine the use of information operations against certain critical target sets;

\$5,000,000 for the Institute for Defense Computer Security and Information Protection;

\$3,000,000 for additional basic (6.1) research into information assurance; and

\$26,000,000 for USARPAC C4I and Information Assurance.

The conferees expect the Department to execute these funds in a coordinated manner, and where possible, to make use of existing institutions and training programs to ensure the maximum benefit from these resources. The conferees understand that even these investments will be of limited value if the software used by the Department has been designed with intentional weaknesses to permit future unauthorized access. The conferees expect the Department to carefully consider the origin of all software used in developing or upgrading information technology or national security systems.

TELECOMMUNICATIONS INFRASTRUCTURE UPGRADES

The conferees believe that additional cost savings could be realized if DOD tenant agencies would include their telecommunications infrastructure upgrades with those of the parent installation and thus achieve the benefits of economies of scale. The conferees therefore direct DOD agencies that are located on Army, Navy and Air Force installations to coordinate their infrastructure upgrades with those of the installation where they reside.

FORWARD LOOKING INFRARED DEVICES

The Horizontal Technology Integration second generation forward looking infrared (FLIR) is being fielded on the M1A2 Abrams tank system enhancement program, M2A3 Bradley Fighting Vehicle, and the long range advanced scout surveillance system. It met the original Apache helicopter FLIR requirements for the proposed upgrade to the AH-64 Apache target acquisition designation sight/pilot night vision system, which the Army

subsequently changed. The conferees are concerned that the change in requirements may not result in a significant increase in performance that would outweigh the advantages of commonality between air and land systems in areas such as unit cost, improved logistics support, and life cycle cost savings. The conferees direct the Army to perform a cost-benefit analysis, using the original and revised aviation FLIR requirements, which compares the Horizontal Technology Inte-

gration second generation FLIR and the proposed aviation FLIR upgrade. The conferees further direct that none of the funds in this Act may be obligated for an Apache FLIR upgrade that is not common with the FLIR for ground systems unless the Secretary of the Army submits a report to the congressional defense committees which justifies a requirement for a unique FLIR for airborne applications and demonstrates that it is affordable compared to a common system.

COMBAT SEARCH AND RESCUE AIRCRAFT

The conferees note that the Air Force has decided to consider several different aircraft for its combat search and rescue mission, including such existing products as the EH-101 helicopter. The conferees understand that the Navy may be considering alternative to either extend the life of or replace the existing MH-53E helicopters used in the Vertical Onboard Delivery and the dedicated Airborne Mine countermeasures missions. The conferees believe that any such analysis should follow a similar competitive process as used by the Air Force, to ensure that the Navy takes advantage of all existing operational designs to obtain the best rotorcrafts available for those missions.

SLQ-32 Electronic Warfare System

The conferees direct the Department of the Navy to provide a report within 120 days which outlines the Navy's assessment of the operational readiness status of the AN/SLQ-32(V) electronic warfare system. The report should include an analysis of the SLQ-32 to meet current threats, together with plans and funding requirements to structure a program which insures the tactical viability of the AN/SLQ-32(V) until it is no longer the primary, shipboard EW system.

RC-135 RIVET JOINT Theater Airborne Warning System (TAWS)

The conferees direct that all of the funds provided for the Theater Airborne Warning System (TAWS) in the Department of Defense Appropriations Act, 2000, may be obligated to purchase sensors and modify COBRA BALL or RIVET JOINT aircraft, whichever is in the best interests of National Security and at the discretion of the Secretary of the Air Force. The conferees further direct that the Future Years Defense Program should fully fund the completion of the TAWS modifications and the fielding of TAWS on whichever aircraft the Secretary determines will be modified with the fiscal year 2000 funds.

Advanced Targeting Pods

The Air Force requested \$34,921,000 for the Advanced Targeting Pod program. The conferees agree to provide this amount subject to the reporting requirements directed by the House. The conferees direct that of the quantity of Advanced Targeting Pods procured with fiscal year 2001 appropriations, no less than 15 pods shall be assigned on a permanent basis to Air National Guard units deployed to Desert Storm which have otherwise not been upgraded to perform the SEAD mission. The conferees further direct the Air Force to implement its proposal to upgrade such units with F-16 Block 30 or better aircraft no later than fiscal year 2003.

JOINT STRIKE FIGHTER

The conferees have provided a total of \$688,650,000 to continue JSF development, allocated between the demonstration/validation effort and the engineering and manufacturing development program. The reduction to the total budget request reflects the acknowledged delay of at least three months in moving the program into the EMD phase. The conferees direct that all flight testing should be completed and fully evaluated prior to the selection of a JSF EMD design. The conferees direct that DoD conduct a complete flight test program for the JSF prototypes and perform a full evaluation of all flight test results as part of the EMD proposal review.

The conferees' recommendation includes an increase of \$225,000,000 to pay for the industry costs of extending the JSF demonstration/validation effort. The conferees commend DoD for its efforts to maintain financial parity between the JSF airframe competitors. However, the conferees are opposed to DoD plans to require industry to make additional unreimbursed investments in the JSF development program. The conferees direct that the added funds shall only be available to pay each team for the costs of fully executing the demonstration/validation phase and completing all planned and necessary testing.

The conferees endorse the DoD decision to proceed with the original acquisition strategy of selecting a single design, and associated industry team, to develop the Joint Strike Fighter. The conferees continue to believe that industrial base concerns can best be addressed after the source selection decision.

To ensure that Congress is kept apprised of the status of the JSF program, the conferees direct that the Secretary of Defense provide a report on the status of the JSF program with the submission of the Fiscal Year 2002 Defense Budget Request.

The report should provide an overview of the status and results of the JSF technical development and flight test program. Based on the results achieved prior to the budget submission, the report should provide a detailed schedule for completion of the dem/val phase as well an updated plan for the EMD program. Finally, the report should provide current estimates for the cost to complete the JSF dem/val and EMD phases as well as a re-validated estimate of the JSF unit flyaway and total production program cost.

ARTILLERY SYSTEMS – DEMONSTRATION/VALIDATION

The Conferees direct that 50 percent of the fiscal year 2001 funding for Crusader not be obligated or expended until 30 days after the Secretary of Defense submits to the congressional defense committees a comprehensive Analysis of Alternatives (AOA) on Crusader. The AOA is to include an analysis of Crusader and the Future Combat System (FCS) in the objective force.

ENHANCED SKILLS TRAINING PROGRAM

The conferees understand that the Army has decided to terminate the Enhanced Skills Training Program (ESTP) for students at Historically Black Colleges and Universities (HBCU) and to replace it with a distance learning program. Because of the historic role that HBCU's have played in integrating the Army, the conferees direct the Army to maintain through fiscal year 2001 the ESTP as configured during fiscal year 2000. To better understand the benefits of ESTP, the conferees direct the Army to provide a report to the congressional defense committees not later than October 1, 2000, on its long term plans for its partnership with HBCU's in preparing students for the Army.

Network Centric Warfare (NCW)

The conferees agree to provide a total of \$7,000,000 for NCW and a Naval Fires Network Demonstration. The conferees agree that these funds should be used to continue development of the Naval Fires Network Demonstrator, test the tactical dissemination of intelligence for Time Critical Strike capabilities, and refine the NCW concept of operations. The conferees are pleased with the progress the Navy has made in advancing NCW from theory to substance and supports the NCW development and implementation plan through the proposed Executive Integrated Process Team (EIPT) and working group structure.

Navy Information Technology Center

The Conferees have provided \$6,000,000 in Operation and Maintenance, Navy and \$9,000,000 in Research, Development, Test and Evaluation, Navy only for continuing the human resource enterprise strategy in accordance with Section 8147 of the 1999 Defense Appropriations Act including operational support costs and equipment needs at the Navy Program Executive Office for Information Technology's (PEO/IT) ITC and the completion of Navy and Naval Reserve manpower and personnel central design activity consolidations.

INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE (ISR) BATTLE MANAGEMENT

The conferees are aware that the Air Force desires to initiate a program called the Intelligence, Surveillance, and Reconnaissance (ISR) Battle Management. The ISR Battle Management is an effort to extend required ISR command and control functions now resident in the Distributed Common Ground System to the Air Operations Center. This program was not identified in the fiscal year 2001 budget request. However, the conferees believe this effort should be initiated and the House and Senate Committees on Appropriations would expeditiously consider a reprogramming request of up to \$7,500,000 for this effort.

DISCOVERER II

After careful consideration, the conferees direct that the Discoverer II program be terminated.

To move forward in a more cost-effective manner, the conferees have provided \$30,000,000 to the National Reconnaissance Office to undertake steps to further develop and mature low cost electronically scanned array radar technologies for space applications. The conferees further directed the continued participation of the Defense Advanced Research Projects Agency in these efforts.

The Director of the National Reconnaissance Office, in consultation with the Director of the Defense Advanced Research Projects Agency, shall submit a program plan for the development, testing and application of technologies funded under this revised initiative. The conferees direct that none of the funds provided may be used to develop a stand-alone satellite demonstrator.

JOINT EJECTION SEAT PROGRAM

The conferees are concerned about the Defense Department's management of the Joint Ejection Seat Program, including the failure to complete a memorandum of agreement between the Navy and the Air Force concerning operation of the joint program. The conferees have deleted all funds for DoD's separate program to develop the K-36 seat. The conferees have provided a total of \$20,689,000 only for the Joint Ejection Seat Program. The conferees direct that the Department of Defense conduct a full and open competition among any and all candidate seats under this program, with no arbitrary restrictions applied by DoD to limit the competition.

The conferees direct that no contract award for the joint ejection seat program using funds provided in fiscal year 2000 be made until 30 days after the Secretary of Defense submits a program plan for the Joint Ejection Seat Program as required by the Department of Defense Appropriations Act, 2000. This program plan should address all specific applications for the ejection seat or ejection seat technology developed under the JESP. Further, the report should specifically address the cost and commonality benefits of using any JESP-developed seat in the Joint Strike Fighter (JSF). None of the funds appropriated in fiscal years 2000 or 2001 may be obligated until the Secretaries of the Navy and Air Force certify to the congressional defense committees that a joint program office is in place to manage the program in a manner which fairly meets both services' requirements. The conferees reiterate that the objective of the Joint Ejection Seat Program is to completely qualify at least two modern and safe ejection seats for potential use in existing and future tactical aircraft.

LIFE SUPPORT SYSTEMS

The conferees have provided an increase of \$4,000,000 only for the ACES II ejection seat. These funds are provided only to complete development and testing on discrete modifications of existing ACES II seats to provide digital sequencing capability and to accommodate higher weight individuals. It is not the conferees' intent to fund any activity in this program that would give an unfair advantage to a bidder for the Joint Ejection Seat program.

FOCUS PROGRAM

The conferees support the semiconductor Focus Center Program in university research as it moves into full-scale operation. The conferees urge the Department to include funding for this program as it is currently planned in the POM so that the Department may gain the benefits of this highly leveraged long-term research.

INFORMATION TECHNOLOGY CENTER

The conferees have provided \$20,000,000 only for the Joint Information Technology Center Initiative. These funds shall be available only to establish two, Pacific-based Information Technology Centers (ITC's). These centers allow DoD to integrate and implement the many successful logistics and personnel initiatives underway throughout the Department of Defense. The centers will process the wide range and volume of information essential to the day-to-day operations of our military personnel and defense civilians. The centers will allow DoD to eliminate legacy systems and to upgrade to more capable and more flexible information technology tools. The conferees direct that the Secretary of Defense provide a report to the congressional defense committees no later than May 1, 2001, which outlines DoD's plan for proceeding with the establishment of these centers.

COMMERCIAL MAPPING AND VISUALIZATION TOOLKIT

The conferees agree to provide a total of \$6,000,000 over the request for the National Imagery and Mapping Agency (NIMA) Commercial Mapping and Visualization Toolkit. Of these funds \$3,000,000 is for upgrades and \$3,000,000 is for visualization and bomb blast for force protection. The conferees anticipate that NIMA will pursue all avenues of fair and open competition for the acquisition of the Commercial Mapping and Visualization Toolkit.

NIMA OMNIBUS CONTRACT PROGRAM

The National Imagery and Mapping Agency (NIMA) has been required to begin using Architectural and Engineering contracting procedures for all production contracts. This has led to the development of the "Omnibus Contract" program, allowing NIMA to replace 67 individual production contracts with one contract vehicle for all geospatial information and imagery intelligence requirements. The conferees agree that the omnibus contract program is a special congressional interest item.

The conferees understand that NIMA plans to continue efforts for the Shuttle Radar Topography data reduction program and the Feature Foundation DATA program. The conferees strongly support NIMA's efforts to fully fund these important projects in fiscal year 2001 and beyond.

DEFENSE WORKING CAPITAL FUNDS

The conferees agree to provide \$916,276,000 for the Defense Working Capital Fund.

NATIONAL DEFENSE SEALIFT AND AIRLIFT FUNDS

The appropriation for the 'National Defense Sealift Fund' provides funds for the lease, operation, and supply of prepositioning ships; operation of the Ready Reserve Force; acquisition of large medium speed roll-on/roll-off ships for the Military Sealift Command; and acquisition of ships for the Ready Reserve Force. The budget includes \$258,000,000 for Ready Reserve Force and \$130,158,000 for acquisition activities in fiscal year 2001.

The conferees have agreed to an expansion of this account to recognize the fact that sea and air mobility are essential ingredients in the Department of Defense's force projection capability. Thus, the conferees have recommended renaming this account to create the 'National Defense Mobility Fund' account. This new account will incorporate the existing 'National Defense Sealift Fund' account and establish the 'National Defense Airlift Fund' account.

In addition to providing an increase of \$12,500,000 to the budget request amount for the 'National Defense Sealift Fund' the conference recommendation also provides an increase of \$2,840,923,000 for the 'National Defense Airlift Fund.' This recommendation includes \$2,428,723,000 for the acquisition of 12 C-17 aircraft and advance procurement for the fiscal year 2002 purchase of 15 DC-17 aircraft. Further, the increase includes \$412,200,000 for the interim contractor support of the existing C-17 fleet. The conferees have directed that the C-17 procurement and fleet support programs continue without any interruption during fiscal year 2001. The conferees have included appropriate legislative authority to permit the transfer of these funds for the continuation of C-17 acquisition and support.

The conferees direct that the Department of Defense budget for all future C-17 procurement and support costs within the National Defense Airlift Fund. The conferees direct that future budget documents for the NDAF should conform to the requirements for other DoD procurement accounts including the content and format of budget exhibits, reprogramming thresholds among procurement, advanced procurement, and interim contractor support line items, application of the procurement full funding policy, and Congressional notification for changes in quantity.

THE DOD/DVA DISTANCE LEARNING PILOT PROJECT

The conferees are pleased with the progress report on the DoD/DVA Distance Learning pilot project to transition clinical nurse specialists to the role of nurse practitioners. It is noted that 27 students graduated from the first virtual advanced program and 35 new students have been admitted for the second class of distance learning. The conferees encourage further refinement of this program as requirements develop.

PEER REVIEWED MEDICAL RESEARCH PROGRAM

The conferees have provided \$50,000,000 for a Peer Reviewed Medical Research Program. The conferees direct the Secretary of Defense, in conjunction with the service Surgeons General, to establish a process to select medical research projects of clear scientific merit and direct relevance to military health.

Such projects could include: acute lung injury research, arthropod transmitted infectious diseases, biological hazard detection system/bio-sensor microchip, CAT scan technology for lung cancer, childhood asthma, Dengue fever vaccine, digital mammography imaging, freeze dried platelets, Fungi Free (a topical anti-fungal agent effective in mitigating onychomycosis), Gulf War illness research, health system information technology, health care informatics, human imaging institute/magnetoencephalography laboratory, medical surgery technology, medical records management, microsurgery and robotic surgery research, molecular biology for cancer research, neural mechanisms of chronic fatigue syndrome, obesity related disease prevention especially for minorities, Padgett's disease, quantum optics, remote emergency medicine ultrasound, smoking cessation, social work research, tissue regeneration for combat casualty care, Venus 3-D technology program, and vitamin D research.

The conferees direct the Department to provide a report to the Congressional Defense Committees by March 1, 2001, on the status of this Peer Reviewed Medical Research Program, to include the corresponding funds provided in previous fiscal years.

ADDITIONAL DEFENSE HEALTH PROGRAM FUNDING TO ADDRESS SHORTFALLS

In addition to recommending sizable funding increases for the Defense Health Program for fiscal year 2001 over current year levels, the conferees note that the recently enacted Emergency Supplemental Appropriations Act for fiscal year 2000 (Public Law 106-246) included over \$1.3 billion to address other critical shortfalls confronting the military health care system. Of this amount, \$615,600,000 was provided explicitly to finance existing contract claims for fiscal years 1998-2000 against the Department's TRICARE managed care system. An additional \$695,900,000 was provided in section 107 of P.L. 106-246 to address other known DHP funding difficulties. The conferees express their intent that the section 107 funds be used by the Secretary of Defense and the service Surgeons General, in conjunction with the funds provided in this conference agreement, to meet the most critical of the remaining outstanding DHP funding needs. These may include financing additional TRICARE contract claims (such as those forecast for fiscal year 2001), unfunded requirement associated with the operations of military treatment facilities, and other needs as identified by the Secretary of Defense and the service Surgeons General.

The conferees further note that in this conference agreement, they have with one exception deferred action on explicitly providing funds for any proposed expansion or modification of the medical benefit for service members and military retirees which would require changes in existing law through the congressional authorization process. The conference agreement does provide funding for an improved pharmacy benefit for military retirees, including those over 65, in recognition of the fact that both the House and Senate-passed versions of the fiscal year 2001 National Defense Authorization Act each provide for this initiative, albeit in differing fashions. The conferees have been advised by both the Secretary of Defense and the Office of Management and Budget that the potential fiscal year 2001 costs of this improved benefit, which was not requested in the President's budget, could be \$200,000,000. The conferees recommend addressing this by providing a fiscal year 2001 appropriation of \$100,000 for an improved pharmacy benefit in the Defense Health Program appropriation. Title IX of the conference agreement provides an additional \$100,000,000 in contingent emergency appropriations, subject to release only if the President submits a budget request pursuant to existing law. The conferees believe this approach strikes the necessary balance needed to ensure that, if authorized, adequate funding has been made available for this important initiative.

The conferees agree to provide \$15,026,000 for T-AGOS support. The conferees are aware that changing drug trafficking patterns in the Transit Zone have altered the original operational concept of using T-AGOS ships to detect and monitor aircraft and ships smuggling illegal drugs into the United States and that other methods exist to accomplish this mission. The conferees direct the Department to analyze the operational effectiveness of the currently configured T-AGOS ships to determine if their contribution to the counter-drug mission is the most effective and cost efficient method to accomplish transit zone surveillance and to provide a summary of suggested alternative platforms or assets and their associated costs. The Department is directed to report

their findings to the defense committees no later than March 30, 2001.
