

may well be innocent law-biding citizens. The bill threatens states with the partial loss of their drug control grants if they do not test individuals accused of rape for HIV. These individuals have not been convicted of a crime therefore it is not right to subject them to a mandatory health test. This action is a violation of these individuals' due process rights that are afforded to them during a search and seizure.

This bill violates the privacy of United States citizens. The law requires states to provide health information of individuals' accused—not convicted—of rape to court officials and to the prosecutor. This information is private medical documentation that this law encourages States to make public. The release of this information to the public could adversely affect innocent law biding individuals who are found not guilty. With the public misconceptions and lack of understanding surrounding the HIV virus, these individuals could experience job discrimination and social exclusion if these records become public.

Moreover, this legislation unfairly targets individuals with HIV and gives the implication that having HIV as being a crime rather than a medical condition. It is time that this Congress began treating diseases such as HIV as a medical condition and not a crime.

It is disgraceful that the majority has decided to put such a controversial bill on the suspension calendar. This bill has not had a hearing or a mark-up in committee and it only has eleven Republican cosponsors. This is another example of the Majority trying to score election year points rather than passing thoughtful legislation that improves the health and respects the rights of all United States citizens.

Mrs. FOWLER. Mr. Speaker, today I rise in support of H.R. 3088. I believe that we in Congress must do everything possible to insure the emotional, mental and physical health of the victims of violent crime.

In recent years Congress has worked very hard to elevate the status of the victim in the criminal court process—by recognizing the need for victims' rights and writing those rights into law.

Now we have the opportunity to expand upon doing the right thing for the victims of violent crime. HIV testing of those charged with violent crimes is a step in the right direction. The second step—making it legal to tell the victims the medical test results—is essential for their emotional, mental and physical health. And, of course, timeliness of testing and notification of the victim is of the essence.

We will never be able to undo the harm that has been done to the victim, but we can take steps to control its long-term effects. I urge my colleagues on both sides of the aisle to take a stand on victims' rights. Vote yes on H.R. 3088.

Mr. Speaker, I yield back the balance of my time.
