

leadership style, political savvy, and unending energy. The ultimate Naval officer, Commander Wilson is a visionary thinker who has the innate ability to implement these visions. Commander Wilson is the consummate professional and nursing has never had a better ambassador nor patients a more devoted advocate.

Commander Wilson forged strong alliances and affiliations with staff from a myriad of Congressional offices, committees, and federal and civilian agencies that fostered a cohesive approach to legislative proposals. She worked closely with staff members on the Appropriations Subcommittees on Defense and Labor, Health and Human Services and Education in support of military health issues and national nursing and health care agendas.

As an advocate of Tri-Service nursing and military health issues, Commander Wilson championed independent practice for nurse anesthetists, the continuation of the Bachelor of Science degree as the minimum level of education for entry into military nursing practice, continued funding for a graduate school of nursing at the Uniformed Services University of the Health Sciences, and the Tri-Service Nursing Research Program. She was instrumental in securing appropriations language for a wide variety of health care initiatives including telemedicine, advanced medical technologies, and distance learning.

More than fifty years ago, as I was recovering in a military hospital, I began a unique relationship with military nurses. Commander Wilson embodies what I know military nurses to be—strong, dedicated professional leaders stepping to the forefront to serve our country and committed to caring for our Sailors, Marines, Airmen, Soldiers, and their family members during peacetime and at war.

Commander Wilson is an officer of whom the military and our nation can and should be justifiably proud: a unique combination of talent and devotion to duty. I want to personally acknowledge my sincere appreciation to Commander Wilson for her exemplary months of service, and to bid her a fond aloha and heartfelt mahalo.●

REPORT OF THE VETO MESSAGE ON (H.R. 4733), "ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT, 2001"—MESSAGE FROM THE PRESIDENT—PM 132

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Appropriations.

To the House of Representatives:

I am returning herewith without my approval, H.R. 4733, the "Energy and Water Development Appropriations Act, 2001." The bill contains an unacceptable rider regarding the Army

Corps of Engineers' master operating manual for the Missouri River. In addition, it fails to provide funding for the California-Bay Delta initiative and includes nearly \$700 million for over 300 unrequested projects.

Section 103 would prevent the Army Corps of Engineers from revising the operating manual for the Missouri River that is 40 years old and needs to be updated based on the most recent scientific information. In its current form, the manual simply does not provide an appropriate balance among the competing interests, both commercial and recreational, of the many people who seek to use this great American river. The bill would also undermine implementation of the Endangered Species Act by preventing the Corps of Engineers from funding reasonable and much-needed changes to the operating manual for the Missouri River. The Corps and the U.S. Fish and Wildlife Service are entering a critical phase in their Section 7 consultation on the effects of reservoir project operations. This provision could prevent the Corps from carrying out a necessary element of any reasonable and prudent alternative to avoid jeopardizing the continued existence of the endangered least tern and pallid sturgeon, and the threatened piping plover.

In addition to the objectionable restriction placed upon the Corps of Engineers, the bill fails to provide funding for the California-Bay Delta initiative. This decision could significantly hamper ongoing Federal and State efforts to restore this ecosystem, protect the drinking water of 22 million Californians, and enhance water supply and reliability for over 7 million acres of highly productive farmland and growing urban areas across California. The \$60 million budget request, all of which would be used to support activities that can be carried out using existing authorities, is the minimum necessary to ensure adequate Federal participation in these initiatives, which are essential to reducing existing conflicts among water users in California. This funding should be provided without legislative restrictions undermining key environmental statutes or disrupting the balanced approach to meeting the needs of water users and the environment that has been carefully developed through almost 6 years of work with the State of California and interested stakeholders.

The bill also fails to provide sufficient funding necessary to restore endangered salmon in the Pacific Northwest, which would interfere with the Corps of Engineers' ability to comply with the Endangered Species Act, and provides no funds to start the new construction project requested for the Florida Everglades. The bill also fails to fund the Challenge 21 program for environmentally friendly flood damage reduction projects, the program to modernize Corps recreation facilities, and construction of an emergency outlet at Devil's Lake. In addition, it does

not fully support efforts to research and develop nonpolluting, domestic sources of energy through solar and renewable technologies that are vital to America's energy security.

Finally, the bill provides nearly \$700 million for over 300 unrequested projects, including: nearly 80 unrequested projects totaling more than \$330 million for the Department of Energy; nearly 240 unrequested projects totaling over \$300 million for the Corps of Engineers; and, more than 10 unrequested projects totaling in excess of 10 million for the Bureau of Reclamation. For example, more than 80 unrequested Corps of Engineers construction projects included in the bill would have a long-term cost of nearly \$2.7 billion. These unrequested projects and earmarks come at the expense of other initiatives important to tax-paying Americans.

The American people deserve Government spending based upon a balanced approach that maintains fiscal discipline, eliminates the national debt, extends the solvency of Social Security and Medicare, provides for an appropriately sized tax cut, establishes a new voluntary Medicare prescription drug benefit in the context of broader reforms, expands health care coverage to more families, and funds critical investments for our future. I urge the Congress to work expeditiously to develop a bill that addresses the needs of the Nation.

WILLIAM J. CLINTON.
THE WHITE HOUSE, October 7, 2000.
