AMENDMENTS SUBMITTED

COAST GUARD AUTHORIZATION ACT OF 1999

ABRAHAM (AND OTHERS) AMENDMENT NO. 2882

(Ordered referred to the Committee on Commerce, Science, and Transportation)

Mr. ABRAHAM (for himself, Mr. FEINGOLD, Mr. LUGAR, Mr. DEWINE, Mr. SANTORUM, Mr. WELLSTONE, Mr. KOHL, Mr. VOINOVICH, Mr. GRAMS, Mr. LEVIN, and Mr. BAYH) submitted an amendment intended to be proposed by them to the bill (S. 1089) to authorize appropriations for fiscal years 2000 and 2001 for the United States Coast Guard, and for other purposes; as follows:

On page 4, beginning on line 8, strike "\$350,326,000" and all that follows through page 4, line 12, and insert the following: "\$488,326,000, to remain available until expended, of which—

"(A) \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990; and

"(B) \$128,000,000 shall be available for construction or acquisition of a replacement vessel for the Coast guard icebreaker MACKINAW."

• Mr. ABRAHAM. Mr. President, I rise today, along with several of my fellow Great Lakes Senators, to introduce an amendment to Senate Bill 1089, the Coast Guard Authorization Act. I want to thank Senators DEWINE, FEINGOLD, GRAMS, KOHL, LUGAR, SANTORUM, VOINOVICH, and WELLSTONE for their support and commitment to the continued presence of a suitable and reli-

able heavy icebreaking capability on the Great Lakes. The purpose of our amendment is to authorize adequate funding to replace the current Great Lakes icebreaker, the *Mackinaw*, which is scheduled for decommissioning in 2006.

Mr. President, heavy icebreaking on the Great Lakes is vital to the region's industry. Each year, almost 200 million tons of cargo travel across the Great Lakes, including 70 percent of U.S. steel. Transportation of U.S. steel alone directly affects 108,000 jobs, and indirectly affects 400,000.

Shipping on the Great Lakes faces a unique challenge because the season begins and ends in ice. Windrows, slabs of broken ice piled atop each other by the wind, can reach 15 feet in thickness. The *Mackinaw*, with 12,000 horsepower packed into her 290-foot-long hull has kept commerce moving even under the most trying conditions since 1944. The presence of the *Mackinaw* improves shipping efficiency, reliability, and competition. Further, shipping provides a more environmentally sound alternative to surface transportation, because maritime shipments use less fuel and produce fewer emissions than rail and truck alternatives.

Mr. President, after over 55 years of service, the *Mackinaw's* productive life is nearing an end. The Coast Guard has committed to keeping the cutter in service until 2006, when it hopes to have a replacement vessel operating. To meet this important deadline, funds to construct a multi-purpose heavy icebreaker must be included in the fiscal year 2001 budget, which is why I have joined with the aforementioned Great Lakes Senators in seeking authorization. In addition, I and several other Senators have sent various letters requesting appropriations for the *Mackinaw*, as well as an assumption within the fiscal year 2001 budget resolution for this funding.

The construction of a multi-purpose vessel designed to perform icebreaking operations will bring the cutter's mission profile in line with Coast Guard employment standards while improving the efficiency of the Great Lakes fleet performance. Extensive studies and modeling validate the feasibility of a multi-purpose design. Additionally, the multi-mission design is less than 4 percent more expensive than a single-purpose design, and provides a more robust Great Lakes fleet by increasing the number of available operational days by 38 percent.

Without a heavy icebreaker, the Great Lakes shipping season could be shortened by as much as 10 weeks, causing a host of problems for which there are few solutions and none of which are in the region's best interests. We must appropriate these funds this year, and to do that we should make sure that the authorization bill provides for this important one-time expense so that there will be no doubt as to the intent of Congress on this important project.

And Mr. President, let me just inform my colleagues that this is not simply a Great Lakes issue. The winter Great Lakes maritime commerce dependent upon the availability of a heavy icebreaker is the same maritime commerce that delivers iron ore to steel mills along the Eastern Seaboard and the South, the same maritime commerce that delivers aggregates to the Mid-Atlantic, and the same maritime commerce that delivers agricultural projects throughout the United States and overseas. With that in mind, I ask for the support of all of my colleagues to assure the continued operation of Great Lakes icebreaking through the full funding of the Great Lakes ice breaker in fiscal year 2001.●

● Mr. DEWINE. Mr. President, today I join my good friend from Michigan, Senator ABRAHAM, and the rest of the Great Lakes delegation in sponsoring this very important amendment to provide funds for the construction of a new ice-breaking vessel to replace the *Mackinaw*. Stationed on the Great Lakes, the *Mackinaw* operates during the ice season, which lasts from December 15th through April 15th. My colleagues from the Great Lakes region know the importance of this vessel during those 4 months. Without this boat, regional commerce on the water would be significantly impaired. Approximately 14 million tons of cargo are moved on the Great Lakes during the ice season. This cargo includes iron ore, coal, limestone, cement, and grain. These resources are necessary to our entire country and our economy.

In addition to the economic need for ice-breaking on the Great Lakes, there are national defense implications. The *Mackinaw* was christened in 1944 to meet our nation's wartime need for iron ore. Today, more than 70 percent of our nation's steelmaking capacity is located in the Great Lakes basin. Should our country ever become embroiled in a protracted military crisis, our ability to transit the Lakes during periods of ice cover would be crucial.

Mr. President, the *Mackinaw* is showing signs of its age, and the time has come to replace the vessel. After several years of studying a replacement design, the Coast Guard has concluded that a multi-purpose ice-breaking vessel is the preferred option. Not only will this replacement ship perform ice-breaking services, but it also will maintain floating aids-to-navigation. Compared with the construction of a single-purpose icebreaker, the multi-mission design increases the number of available operational days by 38 percent.

Constructing a multi-purpose ice-breaking vessel is a common-sense solution to address the needs of the Great Lakes. I urge my colleagues to support this amendment.●

NOTICE OF HEARING

SUBCOMMITTEE ON WATER AND POWER

Mr. SMITH of Oregon. Mr. President, I would like to announce for the infor-

mation of the Senate and the public that a legislative hearing has been scheduled before the Subcommittee on Water and Power.

The hearing will take place on Wednesday, March 22, 2000 at 2:30 p.m. in room SD-366 of the Dirksen Senate Office Building in Washington, D.C.

The purpose of this hearing is to receive testimony on the following bills: H.R. 862, To direct the Secretary of the Interior to implement the provisions of an agreement conveying title to a distribution system from the United States to the Clear Creek Community Services District; H.R. 992, to convey the Sly Park Dam and Reservoir to the El Dorado Irrigation District; H.R. 1235, To authorize the Secretary of the Interior to enter into contracts with the Solano County Water Agency, California, to use Solano Project facilities for impounding, storage, and carriage of nonproject water for domestic, municipal, industrial, and other beneficial purposes; S. 2091 and the companion H.R. 3077, To amend the Act that authorized construction of the San Luis Unit of the Central Valley Project, California, to facilitate water transfers in the Central Valley Project; S. 1659, To convey the Lower Yellowstone Irrigation Project, the Savage Unit of the Pick-Sloan Missouri Basin Program, and the Intake Irrigation Project to the appurtenant irrigation districts; and S. 1836, To extend the deadline for commencement of construction of a hydroelectric project in the State of Alabama.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record should send two copies of their testimony to the Subcommittee on Water and Power, Committee on Energy and Natural Resources, United States Senate, 364 Dirksen Senate Office Building, Washington, D.C. 20510-6150.

For further information, please call Trici Heninger, Staff Assistant, or Colleen Deegan, Counsel, at (202) 224-8115.
