### VALLES CALDERA PRESERVATION ACT

The Senate proceeded to consider the bill (S. 1892) to authorize the acquisition of the Valles Caldera, to provide for an effective land and wildlife management program for this resource within the Department of Agriculture, and for other purposes, which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

#### TITLE I—VALLES CALDERA NATIONAL PRESERVE AND TRUST

##### SEC. 101. SHORT TITLE.

This title may be cited as the “Valles Caldera Preservation Act”.

##### SEC. 102. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) the Baca ranch comprises most of the Valles Caldera in central New Mexico, and constitutes a unique land mass, with significant scientific, cultural, historic, recreational, ecological, wildlife, fisheries, and productive values;

(2) the Valles Caldera is a large resurgent lava dome with potential geothermal activity;

(3) the land comprising the Baca ranch was originally granted to the heirs of Don Luis Maria Cabeza de Vaca in 1860;

(4) historical evidence, in the form of old logging camps and other artifacts, and the

history of territorial New Mexico indicate the importance of this land over many generations for domesticated livestock production and timber supply;

(5) the careful husbandry of the Baca ranch by the current owners, including selective timbering, limited grazing and hunting, and the use of prescribed fire, have preserved a mix of healthy range and timber land with significant species diversity, thereby serving as a model for sustainable land development and use;

(6) the Baca ranch's natural beauty and abundant resources, and its proximity to large municipal populations, could provide numerous recreational opportunities for hiking, fishing, camping, cross-country skiing, and hunting;

(7) the Forest Service documented the scenic and natural values of the Baca ranch in its 1993 study entitled "Report on the Study of the Baca Location No. 1, Santa Fe National Forest, New Mexico", as directed by Public Law 101-556;

(8) the Baca ranch can be protected for current and future generations by continued operation as a working ranch under a unique management regime which would protect the land and resource values of the property and surrounding ecosystem while allowing and providing for the ranch to eventually become financially self-sustaining;

(9) the current owners have indicated that they wish to sell the Baca ranch, creating an opportunity for Federal acquisition and public access and enjoyment of these lands;

(10) certain features on the Baca ranch have historical and religious significance to Native Americans which can be preserved and protected through Federal acquisition of the property;

(11) the unique nature of the Valles Caldera and the potential uses of its resources with different resulting impacts warrants a management regime uniquely capable of developing an operational program for appropriate preservation and development of the land and resources of the Baca ranch in the interest of the public;

(12) an experimental management regime should be provided by the establishment of a Trust capable of using new methods of public land management that may prove to be cost-effective and environmentally sensitive; and

(13) the Secretary may promote more efficient management of the Valles Caldera and the watershed of the Santa Clara Creek through the assignment of purchase rights of such watershed to the Pueblo of Santa Clara.

(b) PURPOSES.—The purposes of this title are—

(1) to authorize Federal acquisition of the Baca ranch;

(2) to protect and preserve for future generations the scientific, scenic, historic, and natural values of the Baca ranch, including rivers and ecosystems and archaeological, geological, and cultural resources;

(3) to provide opportunities for public recreation;

(4) to establish a demonstration area for an experimental management regime adapted to this unique property which incorporates elements of public and private administration in order to promote long term financial sustainability consistent with the other purposes enumerated in this subsection; and

(5) to provide for sustained yield management of Baca ranch for timber production and domesticated livestock grazing insofar as is consistent with the other purposes stated herein.

**TITLE II—FEDERAL LAND TRANSACTION FACILITATION**

**SEC. 201. SHORT TITLE.**

This title may be cited as the “Federal Land Transaction Facilitation Act”.

**SEC. 202. FINDINGS.**

Congress finds that—

(1) the Bureau of Land Management has authority under the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) to sell land identified for disposal under its land use planning;

(2) the Bureau of Land Management has authority under that Act to exchange Federal land for non-Federal land if the exchange would be in the public interest;

(3) through land use planning under that Act, the Bureau of Land Management has identified certain tracts of public land for disposal;

(4) the Federal land management agencies of the Departments of the Interior and Agriculture have authority under existing law to acquire land consistent with the mission of each agency;

(5) the sale or exchange of land identified for disposal and the acquisition of certain non-Federal land from willing landowners would—

(A) allow for the reconfiguration of land ownership patterns to better facilitate resource management;

(B) contribute to administrative efficiency within Federal land management units; and

(C) allow for increased effectiveness of the allocation of fiscal and human resources within the Federal land management agencies;

(6) a more expeditious process for disposal and acquisition of land, established to facilitate a more effective configuration of land ownership patterns, would benefit the public interest;

(7) many private individuals own land within the boundaries of Federal land management units and desire to sell the land to the Federal Government;

(8) such land lies within national parks, national monuments, national wildlife refuges, national forests, and other areas designated for special management;

(9) Federal land management agencies are facing increased workloads from rapidly growing public demand for the use of public land, making it difficult for Federal managers to address problems created by the existence of inholdings in many areas;

(10) in many cases, inholders and the Federal Government would mutually benefit

from Federal acquisition of the land on a priority basis;

(11) proceeds generated from the disposal of public land may be properly dedicated to the acquisition of inholdings and other land that will improve the resource management ability of the Federal land management agencies and adjoining landowners;

(12) using proceeds generated from the disposal of public land to purchase inholdings and other such land from willing sellers would enhance the ability of the Federal land management agencies to—

(A) work cooperatively with private landowners and State and local governments; and

(B) promote consolidation of the ownership of public and private land in a manner that would allow for better overall resource management;

(13) in certain locations, the sale of public land that has been identified for disposal is the best way for the public to receive fair market value for the land; and

(14) to allow for the least disruption of existing land and resource management programs, the Bureau of Land Management may use non-Federal entities to prepare appraisal documents for agency review and approval consistent with applicable provisions of the Uniform Standards for Federal Land Acquisition.
