

Navy nominations beginning David R. Allison, and ending Steve R. Wilkinson, which nominations were received by the Senate and appeared in the Congressional Record of February 7, 2000.

Navy nominations beginning Raquel C. Bono, and ending Mil A. Yi, which nominations were received by the Senate and appeared in the Congressional Record of February 8, 2000.

Navy nomination of Rabon E. Cooke, which was received by the Senate and appeared in the Congressional Record of February 9, 2000.

Navy nomination of Amy J. Potts, which was received by the Senate and appeared in the Congressional Record of February 9, 2000.

STATEMENT ON THE NOMINATION OF SYLVIA V. BACA

Mr. DOMENICI. Mr. President, I am very pleased today that the Senate has confirmed New Mexican Sylvia Baca for Assistant Secretary of the Interior for Land and Minerals Management. I have been working hard to see this day, and I am glad the Senate has finally confirmed this worthy individual.

Ms. Baca is a native New Mexican who has worked for the Department of Interior for over four years, and has been Acting Assistant Secretary since November of 1998. Since January of 1995, she served as Deputy Assistant Secretary for Land and Minerals Management.

Assistant Secretary for Land and Minerals Management has direct supervisory responsibility for three principal bureaus of the Department of the Interior: The Bureau of Land Management, the Minerals Management Service, and the Office of Surface Mining Reclamation and Enforcement. In 1997, she served as Acting Director for the Bureau of Land Management. In such capacity, she was responsible for direct management of 10,000 employees, a budget of \$1.2 billion, and the maintenance of 270 million acres of public lands and 570 million acres of subsurface minerals.

Ms. Baca previously served the state of New Mexico with distinction as a Senior Fiscal Analyst for the state Legislative Finance Committee for five years. Ms. Baca served as Director of Finance and Management for the City of Albuquerque immediately before leaving for Washington, D.C. Some of you may know that I served as what was then the equivalent of Mayor of Albuquerque, New Mexico's largest city. I can assert that administering the operating budget and administering city employees is a big job.

Sylvia Baca has a tremendous tie to the land. Sylvia, whose New Mexico ranching family history dates back to Spanish colonial times, is one of the many distinguished New Mexicans who have served the Interior Department. I am sure she will continue to work with distinction and serve well managing our federal public lands. Based upon her experience and commitment, I trust she will do a good job for the people of the United States. She has demonstrated that she has the administrative skills and experience needed to do this job well.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now return to legislative session.

NATIONAL SUSTAINABLE FUELS AND CHEMICALS ACT OF 1999

Mr. CRAPO. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar No. 310, S. 935.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill by title. The senior assistant bill clerk read as follows:

A bill (S. 935) to amend the National Agricultural Research, Extension, and Teaching Policy Act of 1977 to authorize research to promote the conversion of biomass into biobased industrial products, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture, Nutrition, and Forestry, with an amendment to strike all after enacting clause and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Sustainable Fuels and Chemicals Act of 1999".

SEC. 2. FINDINGS.

Congress finds that—

(1) conversion of biomass into biobased industrial products offers outstanding potential for benefit to the national interest through improved strategic security and balance of payments, healthier rural economies, improved environmental quality, near-zero net greenhouse gas emissions, technology export, and sustainable resource supply;

(2)(A) biomass is widely available at prices that are competitive with low cost petroleum; and

(B) the key technical challenges to be overcome in order for biobased industrial products to be cost competitive are finding new technology and reducing the cost of technology for converting biomass into desired biobased industrial products;

(3) biobased fuels, such as ethanol, have the clear potential to be sustainable, low cost, and high performance fuels that are compatible with both current and future transportation systems and provide near zero net greenhouse gas emissions;

(4) biobased chemicals—

(A) can provide functional replacements for essentially all organic chemicals that are currently derived from petroleum; and

(B) have the clear potential for environmentally benign product life cycles;

(5) biobased power can provide environmental benefits, promote rural economic development, and diversify energy resource options;

(6) many biomass feedstocks suitable for industrial processing show the clear potential for sustainable production, in some cases resulting in improved soil fertility and carbon sequestration;

(7)(A) grain processing mills are biorefineries that produce a diversity of useful food, chemical, feed, and fuel products; and

(B) technologies that result in further diversification of the range of value-added biobased industrial products can meet a key need for the grain processing industry;

(8)(A) cellulosic feedstocks are attractive because of their low cost and widespread availability; and

(B) research resulting in cost-effective technology to overcome the recalcitrance of cellu-

losic biomass would allow biorefineries to produce fuels and bulk chemicals on a very large scale, with a commensurately large realization of the benefit described in paragraph (1);

(9) research into the fundamentals to understand important mechanisms of biomass conversion can be expected to accelerate the application and advancement of biomass processing technology by—

(A) increasing the confidence and speed with which new technologies can be scaled up; and

(B) giving rise to processing innovations based on new knowledge;

(10) the added utility of biobased industrial products developed through improvements in processing technology would encourage the design of feedstocks that would meet future needs more effectively;

(11) the creation of value-added biobased industrial products would create new jobs in construction, manufacturing, and distribution, as well as new higher-valued exports of products and technology;

(12)(A) because of the relatively short-term time horizon characteristic of private sector investments, and because many benefits of biomass processing are in the national interest, it is appropriate for the Federal Government to provide precommercial investment in fundamental research and research-driven innovation in the biomass processing area; and

(B) such an investment would provide a valuable complement to ongoing and past governmental support in the biomass processing area; and

(13) several prominent studies, including studies by the President's Council of Advisors on Science and Technology and the National Research Council—

(A) support the potential for large research-driven advances in technologies for production of biobased industrial products as well as associated benefits; and

(B) document the need for a focused, integrated, and innovation-driven research effort to provide the appropriate progress in a timely manner.

SEC. 3. CONVERSION OF BIOMASS INTO BIOBASED INDUSTRIAL PRODUCTS.

The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.) is amended by adding at the end the following:

"Subtitle N—Conversion of Biomass Into Biobased Industrial Products

"SEC. 1490. DEFINITIONS.

"In this subtitle:

"(1) ADVISORY COMMITTEE.—The term 'Advisory Committee' means the Sustainable Fuels and Chemicals Technical Advisory Committee established by section 1490C.

"(2) BIOBASED INDUSTRIAL PRODUCT.—The term 'biobased industrial product' means any power, fuel, feed, chemical product, or other consumer good derived from biomass.

"(3) BIOMASS.—The term 'biomass' means any organic matter that is available on a renewable or recurring basis (excluding old growth timber), including dedicated energy crops and trees, wood and wood residues, plants (including aquatic plants), grasses, agricultural crops, residues, fibers, and animal wastes and other waste materials.

"(4) BOARD.—The term 'Board' means the Sustainable Fuels and Chemicals Board established by section 1490B.

"(5) INITIATIVE.—The term 'Initiative' means the Sustainable Fuels and Chemicals Research Initiative established under section 1490D.

"(6) POINT OF CONTACT.—The term 'point of contact' means a point of contact designated under section 1490A(d).

"(7) PROCESSING.—The term 'processing' means the derivation of biobased industrial products from biomass, including—

"(A) feedstock production;

"(B) harvest and handling;

“(C) pretreatment or thermochemical processing;

“(D) fermentation;

“(E) catalytic processing;

“(F) product recovery; and

“(G) coproduct production.

“SEC. 1490A. COOPERATION AND COORDINATION IN SUSTAINABLE FUELS AND CHEMICALS RESEARCH.

“(a) *IN GENERAL.*—The Secretary of Agriculture and the Secretary of Energy shall cooperate with respect to, and coordinate, policies and procedures that promote research and development leading to the production of biobased industrial products.

“(b) *PURPOSE.*—The purpose of the cooperation and coordination shall be to—

“(1) understand the key mechanisms underlying the recalcitrance of biomass for conversion into biobased industrial products;

“(2) develop new and cost-effective technologies that would result in large-scale commercial production of low cost and sustainable biobased industrial products;

“(3) ensure that biobased industrial products are developed in a manner that enhances their economic, energy security, and environmental benefits; and

“(4) promote the development and use of agricultural and energy crops for conversion into biobased industrial products.

“(c) *AREAS.*—In carrying out this subtitle, the Secretary of Agriculture and the Secretary of Energy, in consultation with heads of appropriate departments and agencies, shall promote research and development to—

“(1) advance the availability and widespread use of energy efficient, economically competitive, and environmentally sound biobased industrial products in a manner that is consistent with the goals of the United States relating to sustainable and secure supplies of food, chemicals, and fuel;

“(2) ensure full consideration of Federal land and land management programs as potential feedstock resources for biobased industrial products; and

“(3) assess the environmental, economic, and social impact of production of biobased industrial products from biomass on a large scale.

“(d) *POINTS OF CONTACT.*—

“(1) *IN GENERAL.*—To coordinate research and development programs and activities relating to biobased industrial products that are carried out by their respective Departments—

“(A) the Secretary of Agriculture shall designate, as the point of contact for the Department of Agriculture, an officer of the Department of Agriculture appointed by the President to a position in the Department before the date of the designation, by and with the advice and consent of the Senate; and

“(B) the Secretary of Energy shall designate, as the point of contact for the Department of Energy, an officer of the Department of Energy appointed by the President to a position in the Department before the date of the designation, by and with the advice and consent of the Senate.

“(2) *DUTIES.*—The points of contact shall jointly—

“(A) assist in arranging interlaboratory and site-specific supplemental agreements for research, development, and demonstration projects relating to biobased industrial products;

“(B) serve as cochairpersons of the Board;

“(C) administer the Initiative; and

“(D) respond in writing to each recommendation of the Advisory Committee made under section 1490C(c)(2).

“SEC. 1490B. SUSTAINABLE FUELS AND CHEMICALS BOARD.

“(a) *ESTABLISHMENT.*—There is established the Sustainable Fuels and Chemicals Board to coordinate programs within and among departments and agencies of the Federal Government for the purpose of promoting the use of biobased industrial products by—

“(1) maximizing the benefits deriving from Federal grants and assistance; and

“(2) bringing coherence to Federal strategic planning.

“(b) *MEMBERSHIP.*—The Board shall consist of:

“(1) The point of contact of the Department of Agriculture designated under section 1490A(d)(1)(A), who shall serve as cochairperson of the Board.

“(2) The point of contact of the Department of Energy designated under section 1490A(d)(1)(B), who shall serve as cochairperson of the Board.

“(3) A senior officer of each of the following agencies who is appointed by the head of the agency and who has a rank that is equivalent to the points of contact:

“(A) The Department of the Interior.

“(B) The Environmental Protection Agency.

“(C) The National Science Foundation.

“(D) The Office of Science and Technology Policy.

“(4) At the option of the Secretary of Agriculture and the Secretary of Energy, other members appointed by the Secretaries (after consultation with members described in paragraphs (1) through (3)).

“(c) *DUTIES.*—The Board shall—

“(1) coordinate research, development, and demonstration activities relating to biobased industrial products—

“(A) between the Department of Agriculture and the Department of Energy; and

“(B) with other departments and agencies of the Federal Government; and

“(2) provide recommendations to the points of contact concerning administration of this subtitle.

“(d) *FUNDING.*—Each agency represented on the Board is encouraged to provide funds for any purpose under this subtitle.

“(e) *MEETINGS.*—The Board shall meet at least quarterly to enable the Board to carry out the duties of the Board under subsection (c).

“SEC. 1490C. SUSTAINABLE FUELS AND CHEMICALS TECHNICAL ADVISORY COMMITTEE.

“(a) *ESTABLISHMENT.*—There is established the Sustainable Fuels and Chemicals Technical Advisory Committee to—

“(1) advise the Secretary of Agriculture, the Secretary of Energy, and the points of contact concerning—

“(A) the technical focus and direction of requests for proposals issued under the Initiative; and

“(B) procedures for reviewing and evaluating the proposals;

“(2) facilitate consultations and partnerships among Federal and State agencies, agricultural producers, industry, consumers, the research community, and other interested groups to carry out program activities relating to the Initiative; and

“(3) evaluate and perform strategic planning on program activities relating to the Initiative.

“(b) *MEMBERSHIP.*—The Committee shall consist of the following members appointed by the points of contact:

“(1) An individual affiliated with the biobased industrial products industry.

“(2) An individual affiliated with a college or university who has expertise in biobased industrial products.

“(3) 2 prominent engineers or scientists from government or academia who have expertise in biobased industrial products.

“(4) An individual affiliated with a commodity trade association.

“(5) An individual affiliated with an environmental or conservation organization.

“(6) An individual associated with State government who has expertise in biobased industrial products.

“(7) At the option of the points of contact, other members.

“(c) *DUTIES.*—The Advisory Committee shall—

“(1) advise the points of contact with respect to the Initiative; and

“(2) evaluate whether, and make recommendations in writing to the Board to ensure that—

“(A) funds authorized for the Initiative are distributed and used in a manner that is consistent with the goals of the Initiative;

“(B) the points of contact are funding proposals under this subtitle that are selected on the basis of merit, as determined by an independent panel of scientific and technical peers; and

“(C) activities under this subtitle are carried out in accordance with this subtitle.

“(d) *MEETINGS.*—The Advisory Committee shall meet at least quarterly to enable the Advisory Committee to carry out the duties of the Advisory Committee under subsection (c).

“SEC. 1490D. SUSTAINABLE FUELS AND CHEMICALS RESEARCH INITIATIVE.

“(a) *IN GENERAL.*—The Secretary of Agriculture and the Secretary of Energy, acting through their respective points of contact and in consultation with the Board, shall establish and carry out a Sustainable Fuels and Chemicals Research Initiative under which competitively-awarded grants, contracts, and financial assistance are provided to, or entered into with, eligible entities to carry out research on biobased industrial products.

“(b) *PURPOSES.*—The purposes of grants, contracts, and assistance under this section shall be to—

“(1) stimulate collaborative activities by a diverse range of experts in all aspects of biomass processing for the purpose of conducting fundamental and innovation-targeted research and technology development;

“(2) enhance creative and imaginative approaches toward biomass processing that will serve to develop the next generation of advanced technologies making possible low cost and sustainable biobased industrial products;

“(3) strengthen the intellectual resources of the United States through the training and education of future scientists, engineers, managers, and business leaders in the field of biomass processing; and

“(4) promote integrated research partnerships among colleges, universities, national laboratories, Federal and State research agencies, and the private sector as the best means of overcoming technical challenges that span multiple research and engineering disciplines and of gaining better leverage from limited Federal research funds.

“(c) *ELIGIBLE ENTITIES.*—

“(1) *IN GENERAL.*—To be eligible for a grant, contract, or assistance under this section, an applicant shall be—

“(A) a college or university;

“(B) a national laboratory;

“(C) a Federal research agency;

“(D) a State research agency;

“(E) a private sector entity;

“(F) a nonprofit organization; or

“(G) a consortium of 2 or more entities described in subparagraphs (A) through (E).

“(2) *ADMINISTRATION.*—After consultation with the Board, the points of contact, on behalf of the Board, shall—

“(A) publish annually 1 or more joint requests for proposals for grants, contracts, and assistance under this section;

“(B) establish a priority in grants, contracts, and assistance under this section for research that—

“(i) demonstrates potential for significant advances in biomass processing;

“(ii) demonstrates potential to substantially impact scale-sensitive national objectives such as sustainable resource supply, reduced greenhouse gas emissions, healthier rural economies, and improved strategic security and trade balances; and

“(iii) would improve knowledge of important biomass processing systems that demonstrate potential for commercial applications;

“(C) require that grants, contracts, and assistance under this section be awarded competitively, on the basis of merit, after the establishment of procedures that provide for scientific peer review by an independent panel of scientific and technical peers; and

“(D) give preference to applications that—

“(i) involve a consortia of experts from multiple institutions; and

“(ii) encourage the integration of disciplines and application of the best technical resources.

“(d) USES OF GRANTS, CONTRACTS, AND ASSISTANCE.—A grant, contract, or assistance under this section shall be used to conduct—

“(1) research on process technology for overcoming the recalcitrance of biomass, including research on key mechanisms, advanced technologies, and demonstration test beds for—

“(A) feedstock pretreatment and hydrolysis of cellulose and hemicellulose, including new technologies for—

“(i) enhanced sugar yields;

“(ii) lower overall chemical use;

“(iii) less costly materials; and

“(iv) cost reduction;

“(B) development of novel organisms and other approaches to substantially lower the cost of cellulase enzymes and enzymatic hydrolysis, including dedicated cellulase production and consolidated bioprocessing strategies; and

“(C) approaches other than enzymatic hydrolysis for overcoming the recalcitrance of cellulosic biomass;

“(2) research on technologies for diversifying the range of products that can be efficiently and cost-competitively produced from biomass, including research on—

“(A) metabolic engineering of biological systems (including the safe use of genetically modified crops) to produce novel products, especially commodity products, or to increase product selectivity and tolerance, with a research priority on the development of biobased products that can compete in performance and cost with fossil-based products;

“(B) catalytic processing to convert intermediates of biomass processing into products of interest;

“(C) separation technologies for cost-effective product recovery and purification;

“(D) approaches other than metabolic engineering and catalytic conversion of intermediates of biomass processing;

“(E) advanced biomass gasification technologies, including coproduction of power and heat as an integrated component of biomass processing, with the possibility of generating excess electricity for sale; and

“(F) related research in advanced turbine and stationary fuel cell technology for production of electricity from biomass; and

“(3) research aimed at ensuring the environmental performance and economic viability of biobased industrial products and their raw material input of biomass when considered as an integrated system, including research on—

“(A) the analysis of, and strategies to enhance, the environmental performance and sustainability of biobased industrial products, including research on—

“(i) accurate measurement and analysis of greenhouse gas emissions, carbon sequestration, and carbon cycling in relation to the life cycle of biobased industrial products and feedstocks with respect to other alternatives;

“(ii) evaluation of current and future biomass resource availability;

“(iii) development and analysis of land management practices and alternative biomass cropping systems that ensure the environmental performance and sustainability of biomass production and harvesting;

“(iv) land, air, water, and biodiversity impacts of large-scale biomass production, processing, and use of biobased industrial products relative to other alternatives; and

“(v) biomass gasification and combustion to produce electricity;

“(B) the analysis of, and strategies to enhance, the economic viability of biobased industrial products, including research on—

“(i) the cost of the required process technology;

“(ii) the impact of coproducts, including power and heat generation, on biobased industrial product price and large-scale economic viability; and

“(iii) interactions between an emergent biomass refining industry and the petrochemical refining infrastructure; and

“(C) the field and laboratory research related to feedstock production with the interrelated goals of enhancing the sustainability, increasing productivity, and decreasing the cost of biomass processing, including research on—

“(i) altering biomass to make biomass easier and less expensive to process;

“(ii) existing and new agricultural and energy crops that provide a sustainable resource for conversion to biobased industrial products while simultaneously serving as a source for coproducts such as food, animal feed, and fiber;

“(iii) improved technologies for harvest, collection, transport, storage, and handling of crop and residue feedstocks; and

“(iv) development of economically viable cropping systems that improve the conservation and restoration of marginal land.

“(e) AUTHORIZATION OF APPROPRIATIONS.—In addition to any other amounts that are authorized to be appropriated, there are authorized to be appropriated to carry out this section \$49,000,000 for each of fiscal years 2000 through 2005.

“SEC. 1490E. ADMINISTRATIVE SUPPORT AND FUNDS.

“(a) IN GENERAL.—To the extent administrative support and funds are not provided by other agencies under subsection (b), the Secretary of Energy shall provide such administrative support and funds of the Department of Energy to the Board and the Advisory Committee as are necessary to enable the Board and the Advisory Committee to carry out this subtitle.

“(b) OTHER AGENCIES.—The Secretary of Agriculture and the heads of the agencies referred to, or appointed under, paragraphs (3) and (4) of section 1490B(a) may, and are encouraged to, provide administrative support and funds of their respective agencies to the Board and the Advisory Committee.

“SEC. 1490F. REPORTS.

“For each fiscal year that funds are made available to carry out this subtitle, the Secretary of Agriculture and the Secretary of Energy shall jointly transmit to Congress a detailed report on—

“(1) the status and progress of the Initiative, including a certification from the Board that funds authorized for the Initiative are distributed and used in a manner that is consistent with the goals of the Initiative; and

“(2) the general status of cooperation and research efforts carried out by each Secretary with respect to sustainable fuels, chemicals, and electricity derived from biomass, including a certification from the Board that the points of contact are funding proposals that are selected on the basis of merit, as determined by an independent panel of scientific and technical peers.

“SEC. 1490G. AUTHORIZATION OF APPROPRIATIONS FOR ETHANOL RESEARCH PILOT PLANT.

“There are authorized to be appropriated to construct a Department of Agriculture corn-based ethanol research pilot plant a total of \$14,000,000 for fiscal year 2000 and subsequent fiscal years.”

SEC. 4. USE OF CONSERVATION RESERVE LAND FOR RECOVERY OF BIOMASS USED IN ENERGY PRODUCTION.

Section 1232(a)(7) of the Food Security Act of 1985 (16 U.S.C. 3832(a)(7)) is amended—

(1) by striking “except that the Secretary may permit harvesting” and inserting “except that the Secretary—

“(A) may permit—

“(i) harvesting”;

(2) by striking “emergency, and the Secretary may permit limited” and inserting “emergency; and

“(ii) limited”;

(3) by inserting “and” after the semicolon at the end; and

(4) by adding at the end the following:

“(B) shall approve not more than 18 projects under which crops on land subject to the contract may be harvested for recovery of biomass used in energy production if—

“(i) no acreage subject to the contract is harvested more than once every other year;

“(ii) not more than 25 percent of the total acreage enrolled in the program under this subchapter in any crop reporting district (as designated by the Secretary), is harvested in any 1 year;

“(iii) no portion of the crop is used for any commercial purpose other than energy production from biomass;

“(iv) no wetland, or acreage of any type enrolled in a partial field conservation practice (including riparian forest buffers, filter strips, and buffer strips), is harvested;

“(v) the owner or operator agrees to a payment reduction under this section in an amount determined by the Secretary;

“(vi) the owner or operator agrees to commission and submit to the Secretary a study and report, to be conducted and written by a third party approved by the Secretary, on the impact of the biomass production and harvesting on wildlife; and

“(vii) the owner or operator agrees to such other terms and conditions as the Secretary, in consultation with the State technical committee for the State and appropriate conservation and wildlife advocates, may establish to ensure that the production and harvesting of biomass crops minimize disturbance of wildlife habitat and are otherwise consistent with the purposes of the program established under this subchapter, with any biomass harvesting project permitted to harvest at least 50,000 acres per year.”

AMENDMENT NO. 2862

(Purpose: To provide a substitute)

Mr. CRAPO. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. CRAPO], for Mr. MURKOWSKI, proposes an amendment numbered 2862.

(The text of the amendment is printed in today's RECORD under “Amendments Submitted.”)

Mr. LUGAR. Mr. President, I rise to recommend that the Senate pass S. 935.

At a time when American farmers and rural communities are having a difficult time making ends meet, it is appropriate for the Senate to support this initiative that holds great promise for agriculture, strengthens America's energy security and helps clean America's air and water while dramatically reducing greenhouse gas emissions.

Early civilizations relied on plants and trees for all their energy and food needs. With the passage of time and technological advancement, however, an increasing share of the world's energy demands shifted from plants and trees toward fossil fuels. Time and technology march on, and today we witness the beginning of a revolution from non-renewable fossil fuels toward

renewable resources that can help meet the energy demands of a world now numbering six billion people. Ironically, plants and trees are once again being valued as raw material for energy production because they contain an enormous store of energy freely delivered by the sun.

Using nature's renewable raw material for production of needed fuels, chemicals and energy is not a new idea. What is new, however, is a better understanding of chemistry and molecular biology which has led to the development of advanced biotechnologies and processing techniques for efficiently converting plants to energy. With these advances, it is now possible to envisage a future where the world's thirst for additional sources of energy is fueled by biomass.

Biobased fuels are our best means of reducing American dependence on imported oil. Reliance on the unstable states of the Middle East adversely impacts American strategic security, and massive oil imports skew our balance of payments. Fuels and chemicals derived from biomass will reduce our dependence on Middle Eastern oil without necessitating a rebuilding of the existing gasoline infrastructure. With the need for affordable energy rising as population grows, the Middle East will control nearly three-quarters of the world's oil this century. We have stark options: submit to increased influence of foreign oil cartels; wrangle over pipeline routes to new oil supplies at the ends of the Earth, such as the Caspian region; or, support research that could lead to a revolution in the way we produce energy.

In addition to fuels, biobased chemicals have the potential to replace essentially all chemicals currently derived from petroleum, and they are often endowed with superior performance characteristics. The manufacturing of biobased products is generally more environmentally friendly than analogue petrochemical processes.

Fuels, cloth fibers, plastics and adhesives are already produced from corn; the new genetic engineering techniques will make it possible to use entire plants, rather than just the tiny portion of edible grains. With sound land use policies, local crops that enrich the soil, prevent erosion and improve local environmental conditions can be planted and then harvested for co-production of food, fuel, chemicals, electricity and materials. Rural communities will be strengthened through the diversification of marketable agricultural products and farmers will have expanded sources of income.

Before we are able to reap the outstanding benefits offered through utilization of America's sustainable biomass resource, costs of the new conversion technology must be significantly reduced. Research offers the only systematic means for creating the innovations and technical improvements that will lower the costs of biomass processing. Given the relatively short-term

horizon characteristic of private sector investments, and because many benefits of biomass processing are in the public interest, the Federal government has a compelling mandate to fund the necessary innovation-driven research that will result in cost effective technologies for biomass conversion.

Although government sponsored research programs have been largely responsible for demonstrating the potential of biomass conversion technology, coordination among key Federal agencies is disjointed and funding levels are declining. The Biomass Research and Development Act is designed to address these shortcomings. America's leading technical experts from universities, national laboratories and the private sector will be brought together in a dynamic research initiative with the purpose of overcoming technical barriers to low cost biomass conversion.

At a time when political compromise seems elusive and progress on environmental and energy issues often seems slow, I am convinced that the idea of encouraging human ingenuity to create a sustainable resource for clean fuels and chemicals represents a remarkable opportunity for consensus. Working together we can promote research that will improve our national security and balance of payments, reduce greenhouse gas emissions and strengthen rural economies.

Mr. President, I would like to take this opportunity to thank Dr. Joseph Michels, my science policy adviser, for the excellent advice he has provided me on this issue. Dr. Michels is leaving my staff to assume an important post at Princeton University. I shall miss him.

I urge my colleagues to support this bill.

JURISDICTIONAL CLARIFICATION

• Mr. LUGAR. I would like to enter into a colloquy with my distinguished colleague, Senator MURKOWSKI, Chairman of the Energy and Natural Resources Committee. I want to inform my colleague that any action taken by the Committee on Agriculture, Nutrition, and Forestry in relation to S. 935 is not an attempt to encroach on the jurisdiction of the Committee on Energy and Natural Resources. Further, the fact that S. 935 was reported from the Committee on Agriculture, Nutrition, and Forestry does not affect the jurisdiction of the Committee on Energy and Natural Resources over energy matters, including biofuels and bioenergy. Specifically, USDA biomass research and development programs remain within the jurisdiction of the Committee on Agriculture, Nutrition, and Forestry and DOE biomass research and development programs remain within the jurisdiction of the Committee on Energy and Natural Resources.

Mr. MURKOWSKI. I thank my colleague, the Chairman of the Agriculture, Nutrition, and Forestry Committee, for addressing this matter and clarifying our understanding that this

legislation does not alter the jurisdiction of the Committee on Energy and Natural Resources.

I would also like to note that the authorization of appropriations contained in section 3 of S. 935 clarifies that money may be appropriated for the biomass research and development activities described in the bill pursuant to the existing general authority of the Secretary of Energy to fund biomass research and development, and does not create a new specific level of authorization for this program.

Mr. LUGAR. I agree and thank the Senator from Alaska. •

Mr. CRAPO. Mr. President, I ask unanimous consent that the amendment be agreed to, the committee substitute, as amended, be agreed to, the bill be read the third time and passed, the amendment to the title be agreed to, the motion to reconsider be laid upon the table, and that any statements relating to the bill appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2862) was agreed to.

The committee amendment, as amended, was agreed to.

The bill (S. 935), as amended, was read the third time and passed.

The title was amended so as to read:

To authorize research to promote the conversion of biomass into biobased industrial products, and for other purposes.

ORDERS FOR WEDNESDAY, MARCH 1, 2000

Mr. CRAPO. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:30 a.m., Wednesday, March 1. I further ask consent that on Wednesday, immediately following the prayer, the Journal of the proceedings be approved to date, the morning hour be deemed to have expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume debate on the pending Robb amendment to S. 1134, the education savings account bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. CRAPO. Mr. President, for the information of all Senators, the Senate will resume consideration of the Robb amendment regarding school construction at 9:30 a.m. tomorrow. Following 30 minutes of debate, at approximately 10 a.m., the Senate will proceed to a vote on or in relation to the amendment. Senator ABRAHAM's amendment regarding computers will be introduced following the Robb vote. Other amendments will be offered and debated during tomorrow's session and therefore Senators can expect votes throughout the day.

Senators should be aware that an agreement to have all first-degree
