

forest's campgrounds, hiking trails, ski resorts and other recreation activities attract millions of visits each year. The forest is also home to thousands of constituents in my district, who see the Forest Service as their largest neighbor and in many cases their landlord.

Although the national forest has seen a number of dramatic wildfires in the past decade, the Forest Service under Mr. Weeden has helped limit the losses of property and wildlife habitat in each case. The agency has increasingly worked with local officials to provide maximum recreation opportunities while protecting the natural beauty that attracts the visitors. As manager of a 440-person agency with a \$24 million budget, Mr. Weeden has helped guide the forest into the 21st Century as a verdant oasis in one of the largest urban areas in the world.

Even as he watched over the San Bernardino National Forest, Mr. Weeden in 1998 coordinated American aid to Mexico in response to the worst wildland fire season in that nation's history. He has since provided guidance and leadership to Mexico's fire-fighting, detection and prevention programs, as well as helping in the restoration of important natural lands.

Mr. Speaker, Paul Weeden retired last month to take a job in the private sector, although he and his wife Barbara remain residents of Highland, California, in my district. I ask you and my colleagues to Join me in thanking Mr. Weeden for his three decades of service, and wishing him well in his future endeavors.

## BLOCKING AID TO HAITI

### HON. MAXINE WATERS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 15, 2001*

Ms. WATERS. Mr. Speaker, Haiti is the poorest country in the Western Hemisphere. Yet the U.S. government is blocking aid to Haiti in order to expand the influence of a single political party that is supported by less than four percent of the Haitian electorate.

Meanwhile, the people of Haiti are facing a serious humanitarian crisis. Haiti's per capita income is only \$460 per year. Four percent of the population is infected with the AIDS virus, and 163,000 children have been orphaned by AIDS. The infant mortality rate is over seven percent. For every 1000 infants born in Haiti, five women die in childbirth.

Not only has the U.S. suspended development assistance, the U.S. is also blocking loans from international financial institutions. U.S. policy has effectively prevented Haiti from receiving \$146 million in loans from the Inter-American Development Bank that were already approved by that institution's Board of Directors. These loans are desperately needed by the people of Haiti.

It is time for the United States to end this political impasse and restore bilateral and multilateral assistance to this impoverished democracy.

## KLAMATH BASIN EMERGENCY OPERATION AND MAINTENANCE REFUND ACT OF 2001

SPEECH OF

### HON. PETER A. DeFAZIO

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, November 13, 2001*

Mr. DeFAZIO. Mr. Speaker, Nobody could have foreseen the devastating drought that has besieged Oregon over the past year. The lack of water has adversely effected agriculture, energy generation, recreation, and fish and wildlife habitat. The Klamath Basin in Southern Oregon and Northern California has suffered particular hardship through this drought. The snowpack and rainfall that supply the Basin with life-sustaining water are critical to the economic viability of the Basin, and have been significantly below normal. Because the federal government, through the Bureau of Reclamation, has encouraged the Basin's dependence with nearly a century of promised federal water allocation, this Congress has an obligation to take further steps to provide further funding for relief and mitigation.

This bill, H.R. 2828, will provide further assistance to the farmers of the Klamath Basin by reimbursing them for operations and maintenance costs. Farmers receiving federal water pay these fees to the government for upkeep of the infrastructure of the Klamath Project. Many of the farmers in the project did not receive federal water this year. Therefore, those farmers should not have to bear the cost of maintaining the federal infrastructure. Representative WALDEN has taken every precaution to ensure that this modest reimbursement is fair and equitable. Only irrigation districts receiving severely limited water supplies will be reimbursed, and districts who have already been reimbursed by California will not be eligible for the funds in this bill.

I am pleased to be working with Mr. WALDEN, and many members of the Oregon and California delegations, to find reasonable short and long term solutions to the situation in the Basin. This bill will provide farmers in the Basin with much needed economic assistance by simply refunding their O&M costs. Passing this bill is fair, and the right thing to do for the farmers in the Klamath Basin. I urge adoption of H.R. 2828, the Klamath Basin Emergency Operation and Maintenance Refund Act of 2001.

## IN HONOR OF LT. COMMANDER ERIC CRANFORD

### HON. BOB ETHERIDGE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 15, 2001*

Mr. ETHERIDGE. Mr. Speaker, I rise today to honor Lt. Commander Eric Cranford, who lost his life in service to our nation on September 11th. A Navy rescue pilot, Lt. Commander Cranford knew danger, he knew sacrifice—and courage could have been his middle name. If Eric had not been in the Pentagon that fateful morning, or if his side of the building had not been hit, you can bet he would have sacrificed his own safety, risking his own life to rescue others. He had done it

before. It was his job. And we pay our respects to him, his wife Emily Cozort Cranford and his entire family. I want to personally salute my friend and Emily's Uncle Jack Cozort who led efforts to establish a scholarship at North Carolina State University, Eric and Emily's alma mater, for Burke County students in Eric's name.

Earlier this week, our nation observed Veterans Day in remembrance and in gratitude of the many men and women like Lt. Commander Cranford have served our nation so bravely in the United States military. Veterans have always represented what is best about our great nation, From the American Revolution's Minutemen to today's soldiers, sailors, airmen, and marines, American men and women have dedicated themselves to the preservation of liberty and democracy throughout the history of our country.

Those in uniform—past and present—are the defenders of the American values that have made our nation strong and kept us free. I commend each and every one of them for their brave service to America. This Veterans Day, we gathered with heavy hearts and troubled minds. We are at war. It is a war Eric Cranford and those who lost their lives at the Pentagon on September 11th would have been ready to fight. Today, we face the greatest challenge to our freedom since World War II. September 11 will forever be remembered as a day that evil visited our great nation as never before. Four commercial planes were transformed into missiles and aimed at buildings that define our nation, and symbolize our freedom and values. These attacks resulted in a loss of life on a scale not seen in our country since the Civil War.

The terrorists who committed these terrible acts on completely innocent men, women and children are not just criminals. They are mortal enemies of the United States of America. But these cowards cannot hide forever. We must pursue them to the ends of the earth to ensure that international terrorists can never again threaten innocent Americans.

Once again, we have called on our men and women in uniform to defend those values we hold so dear. President Bush has said that this campaign will not be simple, it will not be quick, and it will not be without casualties. But we will show the world that any enemy who chooses to test the resolve of the United States and its allies will face the collective might of our military. I have full confidence in our Commander in Chief and our armed forces.

We will win this war because we cannot afford to fail. We will win this war for Eric Cranford and the thousands who lost their lives on September 11. We will win it for Emily, and those who were left behind to mourn. We will win it because we are a good and just nation and because evil must not be allowed to flourish anywhere in this world. We must show these cowards that their efforts to terrorize us will not succeed.

As we pray for those fighting to avenge the terrible events of September 11, let us not forget those who came before them. Their great strength and sacrifice during the conflicts of the Twentieth Century moved heaven and earth, and showed the world that the American warrior is the most potent force on the face of the earth. Millions of men and women served bravely in the first and second World

Wars, the Korean Conflict, the jungles of Vietnam, and the sands of Desert Storm. But many who served did not come home.

They came from every walk of life. They were our friends, neighbors, mothers, fathers, sons, daughters, sisters and brothers. They were ordinary and extraordinary all at once, and all Americans should honor their sacrifices. Freedom is not free. But freedom is worth fighting for. On Veterans Day, and every day, let us salute Lt. Commander Cranford and all our nation's veterans. May God Bless America, now and forever.

#### PERSONAL EXPLANATION

#### HON. ANTHONY D. WEINER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 15, 2001*

Mr. WEINER. Mr. Speaker, I was unavoidably detained in my District on Tuesday, November 13, 2001, and I would like the RECORD to indicate how I would have voted had I been present.

For rollcall vote No. 436, the conference report for the Agriculture appropriations act for fiscal 2002, I would have voted "aye."

For rollcall vote No. 437, a bill to enhance the authorities of special agents and provide limited authorities to uniformed officers responsible for the protection of domestic Department of State occupied facilities, I would have voted "aye."

#### IN MEMORY OF MAMON POWERS, SR.

#### HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 15, 2001*

Mr. VISCLOSKY. Mr. Speaker, it is with great sorrow and a heavy heart that I offer my heartfelt condolences to the family of a pioneer in the communities of Northwest Indiana. Mr. Mamon Powers, Sr., a construction worker and owner of Powers and Sons Construction Company, died on Tuesday, November 13, 2001, following a long struggle with illness, and will be laid to rest on Saturday, November 17, 2001. Mr. Powers was 80 years old.

Mamon Powers, Sr. was born of humble means in the small town of Churchill, Mississippi. The son of a preacher and homebuilder, Mamon learned the virtues of hard work and strong faith at an early age. Although African-Americans were only allowed to attend school through eighth grade in Churchill at that time, Mamon refused to be encumbered by the bonds with which society attempted to restrict the rights of African-American citizens. He continued his education by attending Campbell College, now known as Jackson State University, and by serving his country in the United States military.

To the benefit of Northwest Indiana, Mamon Powers, Sr. came to the city of Gary after serving with the military. He went to work in the steel mill, but quickly learned that he would not be successful because racial barriers prohibited many African-Americans from joining the union. However, Mamon's love for the community and his determination to suc-

ceed led him to work for Means Developers. With the addition of Mamon's knowledge of construction and his desire to make the city of Gary a better place, Means Construction developed one of the city's finest neighborhoods, Means Manor.

Mamon Powers, Sr. began his own construction company in the early 1950's and eventually became one of the first African-American members of a union in the city of Gary. Over the years, he developed his business into the most successful African-American construction company in the state, and one of the 100 largest in the country. Powers and Sons Construction Company was also recognized nationally by the Small Business Administration in 1997 for its minority business development initiatives. He was responsible for the construction of hundreds of private homes in Northwest Indiana, as well as the construction of many commercial buildings. His professional career made an impact on the community that cannot be measured simply by the number of buildings he created. His love for his work was revealed in his creations, and it inspired the citizens of Gary to take pride in their community.

While Mamon was dedicated to his work, his love for his family and his community remained his top priority. He was committed to his late wife, Leolean, and their six children, Mamon, Jr., Mark, Demetrius, Claude, Florida, and Marquita. He served on the Methodist Hospital Board of Directors and as a member of the Lake County Community Development Committee. In 1989, he was inducted into the Steel City Hall of Fame for his outstanding contributions to Northwest Indiana. Earlier this year, the Frontiers Service Club nominated Mamon for the prestigious Gary Drum Major Award for extraordinary set-vice in the community.

Mr. Speaker, I ask you and my other distinguished colleagues to join me in offering our condolences to the family of Mr. Mamon Powers, Sr. Mamon was a true inspiration to everyone who knew him, and his work in Northwest Indiana will survive as a tribute to his memory. He impacted the lives of many in our community, our state, and our country, and I am proud to have had the opportunity to represent Mamon Powers, Sr. in Congress.

#### INTRODUCTION OF HOMESTAKE MINE CONVEYANCE ACT OF 2001

#### HON. JOHN R. THUNE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 15, 2001*

Mr. THUNE. Mr. Speaker, I rise today to introduce a bill very important to the world of science, our nation, and my state of South Dakota.

Thirty years ago, the Homestake Mine was host to pioneering research about neutrinos; particles with virtually no weight and possessing no electrical charge that are everywhere around us. Scientists believe these mysterious particles hold secrets that can provide us with important insights into the fundamental nature of the universe.

This legislation, which I will introduce today, envisions an underground neutrino telescope that extends pioneering research begun three decades ago.

While the potential scientific benefits of studying neutrinos is clear, this agreement is also vital to the economies of South Dakota, the Black Hills and the city of Lead. If Homestake were to close, its absence would have a tremendous economic and cultural impact on our state. The Mine has been an integral part of the Hills culture since it opened over 125 years ago. The miners and their families have contributed so much to the area.

However, with the cost of mining gold increasing, Homestake has decided to terminate its operations in Lead. The introduction of a national physics laboratory is a fitting substitute. The lab will employ a number of the current Homestake employees to maintain the integrity of the mine and to make improvements to the structure for the siting of the lab there. Additionally, the lab will employ many scientists and support staff bringing new diversity to the South Dakota economy.

The legislation I will introduce today is a companion bill to S. 1389, introduced by Senator TOM DASCHLE and is the result of months of negotiations between the Homestake Gold Mine, the State of South Dakota, the South Dakota congressional delegation and others. Recently, those negotiations were concluded, and late last week this bill was completed.

The purpose of the bill is to set the terms of land conveyance from Homestake to the State of South Dakota for the establishment of a National Underground Science Laboratory. The Homestake Mining Company would turn over portions of their property, including a nearly 8,000 foot mine shaft and equipment that together likely will be worth hundreds of millions of dollars saving taxpayers hundreds of millions of dollars in construction and developmental expenses.

In addition to the land conveyance, the bill also addresses current and future environmental remediation and reclamation concerns. The bill accomplishes this through three main mechanisms. First, it requires an independent evaluation of current and future environmental risks on the site. This evaluation would be conducted under the auspices of the Environmental Protection Agency and would be subject to public review and comment. Second, it establishes an environmental trust fund. Contributions to this trust fund would be calculated as a part of the cost of constructing and operating the lab and the experiments that would take place there. Third, it requires insurance coverage by the State of South Dakota, which would be the managing entity, and any group conducting experiments in the mine. These provisions will provide the needed protection of the environment and the taxpayers that I believe is necessary for this agreement.

This legislation is one piece of the puzzle that will make this lab a reality. I look forward to working with the House leadership, the Committees of jurisdiction, my colleagues in the House and Senate and the Administration to see this bill enacted into law.

#### CONSTITUTIONAL AND CIVIL LIBERTIES ISSUES

#### HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, November 15, 2001*

Mr. CONYERS. Mr. Speaker, I am growing increasingly concerned about a series of recent actions taken by the Bush Administration
