

National Teachers Association. Charlene is a true inspiration to her colleagues and her students. Her tireless efforts over the past twenty years have had an enormous impact on the Alabama educational system.

Judy Reeves is an environmental science teacher at Baldwin County High School in Bay Minette. Judy has also been praised for her work, using outdoor activities to inspire her elementary students. In a courageous effort to help children outside her classroom, she successfully instituted a mentor program for younger students in her community. Judy began teaching almost ten years ago at Fairhope High School, and ever since she has been encouraging and inspiring Alabama's children to excel in both Math and Science.

Over the course of the last few years, Judy has become quite accustomed to receiving awards. Numerous agencies and associations including the Alabama Wildlife Federation and the Alabama Science Teachers Association have recognized her for displaying superior teaching and motivational skills. She stands out among her colleagues as an exceptional teacher and her unflagging efforts to better the level of education for Alabama's children must not go unnoticed.

Mr. Speaker, we seldom meet people who give so tirelessly of their time and efforts as Judy Reeves and Charlene Dindo. Sir, please join me in paying tribute to these two wonderful women whose contributions to their community and the children around them are unmatched. May they continue to educate and enlighten Alabama's youth for a number of years to come.

A TRIBUTE TO PAUL H. SELDENRIGHT ON HIS INDUCTION INTO THE U.P. LABOR HALL OF FAME

HON. BART STUPAK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 2001

Mr. STUPAK Mr. Speaker, I rise today to pay special tribute to Paul H. Seldenright, who has devoted 41 years of his life to the labor movement, working to ensure a good quality of life for working men and women.

Born and raised in Detroit, Paul began his union career in 1960 as a member of United Steelworkers of America, Local 2659, in Trenton, Michigan. His strong interest in politics led to his becoming chairman of his local's Political Action Committee from 1962 to 1968. In 1968 Paul became assistant director for Vice President Hubert Humphrey's Democratic presidential campaign in Michigan, Michigan Citizens for Humphrey.

A number of jobs in state government followed, including Administrative Assistant to the Deputy Secretary of State, Assistant Secretary of State, and Assistant Director of the Senate Democratic Staff. In 1970, Paul served as Associate manager for the successful G. Mennen "Soapy" Williams for Michigan Supreme Court Campaign.

In 1973 Paul began working for the Michigan AFL-CIO as coordinator for COPE, the AFL-CIO's political arm. He became COPE director in 1982 and, except for a brief stint as the federation's legislative director from 1984 through 1986, he served in that role until his

retirement at the end of 2000. As COPE director, Paul was responsible for organizing and implementing the State AFL-CIO's year-round political program in conjunction with the federation's affiliated unions.

Another important responsibility was serving as liaison between the state AFL-CIO and the Upper Peninsula central labor councils. When Paul first took over this role, there were only four central labor councils in the U.P. He was instrumental in helping form two new councils, the Eastern U.P. Labor Council and the Dickinson-Iron Labor Council.

Paul also served key roles in other U.P. initiatives and activities. Along with former Michigan State AFL-CIO President William C. Marshall, he served on the original planning committee for the Italian Hall project in Calumet. The project, now complete, is considered one of the Northwest U.P. Labor council's most important achievements. Mr. Speaker, the Italian Hall memorial commemorates the deaths of more than 70 people—striking miners, their wives and children—who were killed when fire struck their gathering on Christmas Eve in 1913.

Paul also was a member of the Northern Michigan University Labor Studies Advisory and Planning Committee since its inception in the late 1970s. Since the early 1980s he has coordinated the annual U.P. Labor Conference, considered the U.P.'s most important labor event other than Labor Day.

Although officially retired, Paul maintains an active interest in the labor movement and politics. He and his wife Lesley live in the Lansing suburb of DeWitt.

Paul will be honored Saturday, April 7, 2001, with induction into the U.P. Labor Hall of Fame at a banquet in Northern Michigan University in Marquette, Michigan. With his years of work on behalf of the labor movement in Michigan, Paul Seldenright has more than earned this recognition.

TRIBUTE TO RICHARD BREWER

HON. JAMES E. CLYBURN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 2001

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to a remarkable South Carolinian who was named "MVP 2001" by the South Carolina State Council of Senior Citizens. Richard Brewer has earned this prestigious honor through his constant dedication to his community.

Mr. Brewer is the first elected president of ILA Local 1422 Retirees, where he continues to serve. He is also on the Executive Board of the South Carolina State Council of Senior Citizens. Family and church have always come first for Mr. Brewer, but he selflessly devotes his time to his Chartered ILA Club. He is active in the politics of South Carolina, leading rallies at the State Capitol dealing with issues ranging from the Confederate Flag to workers rights.

Richard Brewer led the ILA Retiree volunteers in hosting a "Legislative Breakfast" in Charleston, South Carolina last year. He also took it upon himself to ensure the attendance of key elected officials, causing the event to be a complete success. The funding for the breakfast was also secured by Mr. Brewer, whose ILA Retirees paid for the event.

Mr. Speaker, I ask you to join me in paying tribute to Richard Brewer and the ILA Local 1422 Retirees. Mr. Brewer has demonstrated tireless dedication and loyalty to the citizens of my state of South Carolina and for this he should be honored.

THE MEDICARE AND MEDICAID NURSING SERVICES QUALITY IMPROVEMENT ACT of 2001

HON. EARL POMEROY

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 2001

Mr. POMEROY. Mr. Speaker, today I join my colleague from Wisconsin, Representative PAUL RYAN, in introducing legislation to allow certain non-certified resident assistants to continue to be employed by nursing facilities in North Dakota, Wisconsin, and up to 8 other states under a 3-year demonstration project.

For several years, nursing facilities in these and other states have relied upon single-task employees, specifically assistants who help their residents dine, to supplement professional nurse staffing levels and increase patient care. Unfortunately, the Health Care Financing Administration (HCFA) has given our states' facilities until August 31, 2001 to discontinue the employment of feeding assistants. With the current national shortage in nursing facility employees, the loss of these valuable workers will further strain our nursing homes. Particularly as our elderly population increases in future years, we must ensure that nursing homes do not lose existing staff. Unless Congress acts, significantly fewer trained professionals will be available to ensure that nursing home residents can comfortably and safely enjoy their meals.

In North Dakota alone, 40 percent, or two out of five, of the state's nursing facilities have had to deny new admissions in the past 12 months due to staffing shortages. The state currently has 600 open positions for Certified Nursing Assistants (CNAs). While the North Dakota Long Term Care Association encourages all feeding assistants to become CNAs, many assistants are members of a contingent workforce and are not able to become CNAs due to physical or other limitations.

I understand that certain consumer groups, patient advocates, and labor organizations have concerns regarding the continued employment of feeding assistants in long-term care facilities. I also believe, as do these organizations, that we must act during this Congress to address the nursing shortage in our nation, increase wages for certified and licensed nurse professionals, and improve the work conditions of these individuals. At the same time, I believe that moderate steps can be taken to address the reservations regarding feeding assistants without compromising the ability of nursing facilities to care for our nation's seniors.

Specifically, I support efforts to allow only feeding assistants to continue to be employed by nursing facilities in a few states through a pilot project administered by the Department of Health and Human Services. Under such a program, these assistants augment staffing levels in a facility—they do not supplant professional nurses and are not counted toward any minimum staffing levels. Furthermore,

these feeding assistants would have to complete a state-reviewed training and competency evaluation, and would only complete a limited number of tasks under onsite supervision by a licensed health professional. I believe that these safeguards, among others, would ensure the quality of care without obviating the need for CNAs and other nurse professionals in long-term care facilities.

Mr. Speaker, I look forward to working with my colleagues this year to ensure that our nursing facilities have the staff and resources necessary to care for our families and friends in the years to come.

NATIONAL HEALTH PROMOTION RESOLUTION OF 2001

HON. GENE GREEN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 2001

Mr. GREEN of Texas. Mr. Speaker, I rise today, along with my colleague Mr. BURTON, to introduce the National Health Promotion Resolution of 2001. This resolution recognizes the importance of health promotion and disease prevention, and expresses the sense of Congress that more should be done to integrate lifestyle improvement programs into national policy, health care workplaces, families and communities.

Modifiable lifestyle factors such as smoking, sedentary lifestyle, poor nutrition, unmanaged stress, and obesity account for approximately half of premature deaths in the United States. Spending on chronic diseases related to lifestyle and other preventable diseases accounts for an estimated 70 percent of total health care spending. With the pending retirement of the baby-boom-generation, the financial burden of these preventable diseases will further threaten the solvency of the Medicare program.

Health promotion programs have the potential to improve health, improve quality of life, reduce health care costs, and boost productivity. The Institute of Medicine has recommended that additional research is required to determine the most effective strategies at the individual, organizational, community, and societal level to create lasting health behavior changes, reduce medical utilization and enhance work-place productivity. Unfortunately, a very small percentage of health care spending is devoted to health promotion.

The National Health Promotion Resolution of 2001 expresses the sense of Congress that more must be done in this area. In light of the pending crisis facing our Medicare system, the federal government stands to benefit greatly from the potential reduction in costs associated with an aggressive health promotion agenda.

This bipartisan legislation has forty original cosponsors, including the gentleman from Indiana, Mr. BURTON, who has worked closely with me and my office to shape this into a meaningful resolution. It is my hope that we will continue to work together to further our commitment to health promotion and disease prevention.

I urge my colleagues to join us on this important resolution.

SNOWMOBILES IN NATIONAL PARKS

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 2001

Mr. HOLT. Mr. Speaker, I am today introducing, with 17 of my colleagues, a bill to protect America's national parks from what is expected to be the next environmental rollback by the Bush Administration—an effort to overturn the National Park Service (NPS) decision to phase out snowmobile use in Yellowstone and Grand Teton national parks.

In response to a 1997 lawsuit, the NPS prepared an environmental impact statement (EIS) on the 100,000 snowmobiles entering Yellowstone and Grand Teton each winter. The NPS determined that those snowmobiles produce noise that can be heard by other visitors as much as 95% of the time, produce more air pollution than all other motor vehicles in Yellowstone throughout the year, and disturb bison and wildlife when they already face the stresses of brutal winter conditions. Because of these and other impacts, the NPS adopted a new rule to phase out by the winter of 2003-2004 all snowmobile use in Yellowstone and most of that use in Grand Teton, with expanded service by snowcoaches (multi-passenger vehicles) to provide continued wintertime access to the parks. The rule, the culmination of a 3½ year process, was published in the Federal Register on January 22, 2001.

Three key facts about the Yellowstone-Grand Teton snowmobile rule:

First, it is strongly supported by the public—by most public comments on the EIS, and fully 85% of the public comments on the proposed rule.

Second, the National Park Service determined not only that the snowmobile use in these parks is inappropriate, but also that it is unlawful. The Service determined that it violates the basic NPS mandate, in its Organic Act of 1916, to keep the scenery, natural and historic objects, and wildlife of national parks “unimpaired for the enjoyment of future generations.” The Park Service determines that the snowmobile use violates the Clean Air Act. The Service determined that the snowmobile use violates two Executive Orders, one by President Nixon and one by President Carter, setting standards for snowmobile use in national parks. And the Service determined that it violates the NPS's own general regulation on snowmobile use, in effect since 1983, that prohibits snowmobile use in parks that disturbs wildlife or damages other park resources.

Third, this is the first time in the NPS's 84-year history that it has determined that a use it has authorized in parks has gotten so out of control that it has ended up violating the mandate of the Service's Organic Act. In that sense alone, the NPS decision to end all snowmobile use in Yellowstone and most use in Grand Teton is historic.

Still, the Bush Administration has this rule in its sights. It has already delayed its effective date. Now there are published reports that the Administration wants to settle a legal challenge from snowmobile groups, in a backdoor attempt to overturn the rule without going through a new, public process.

Yellowstone and Grand Teton are not the only national parks where inappropriate and unlawful snowmobile use is occurring.

Last year, in response to a petition by 60 environmental organizations, the NPS acknowledged that much of the snowmobile use it has allowed to occur in other national parks violates, in four separate ways, some of the same requirements that are being violated in Yellowstone and Grand Teton. First, in nearly every instance, the Park Service merely allowed areas that were already open to snowmobile use to stay open, without reviewing them to determine if that use is consistent with protection of park resources, as required by President Nixon's Executive Order.

Second, the NPS has allowed snowmobile use to occur in two parks and on some trails without designating them for that use through a public rulemaking process, which is required by the NPS's general regulations.

Third, the NPS has consistently failed to monitor the effects of the snowmobile use it has allowed to occur, as required by President Nixon's Executive Order.

Finally, the NPS concluded that it has allowed snowmobile use to continue that violates the substantive standards of the two applicable Executive Orders and its general regulations. The Park Service concluded that in many instances snowmobiles disrupt the natural wintertime quiet of the parks, disturb the enjoyment of other visitors, adversely affect wildlife, and otherwise harm the resources, values, and management objectives of the parks, all of which is prohibited by the standards of the Executive Orders and the NPS's own regulations. Based on these impacts, the NPS determined that, in general, recreational snowmobile use is not an appropriate use of most national parks.

The NPS developed a plan to end inappropriate snowmobile use and to come into compliance with the standards governing snowmobile use in national parks. That plan would limit snowmobile use in national parks (other than in Alaska and in Voyageurs National Park, where special statutes apply) to short crossing routes providing access to adjacent public lands open to snowmobile use, and to routes providing necessary access to private lands in or adjacent to parks. Under this approach, of the 43 units of the national park system where some snowmobile use is now occurring, that use would be ended in 12 (including Yellowstone), would be allowed to continue but in more limited fashion in 10 (including Grand Teton), and would be allowed to continue without change in 21.

However, in addition to reviewing the Yellowstone-Grand Teton rule, the Bush Administration has halted the rulemaking process to implement this overall NPS approach to snowmobiles in other parks. Because of the Administration's policy, the NPS has not yet been able to finalize a rule proposed last December to restrict snowmobile use in Rocky Mountain National Park, and has not been able to propose other regulatory changes with respect to other parks.

The legislation my colleagues and I are introducing would legislatively adopt the sound approach the National Park Service developed last year to end inappropriate snowmobile use in national parks and come into compliance with the long-established standards of law that are supposed to govern that use. The bill would allow continued snowmobile use in
