

unanimous consent that they be removed at this time:

FRANK WOLF  
MAJOR OWENS  
CAROLYN MCCARTHY  
FRANK PALLONE  
RICHARD NEAL.

Also, the following cosponsors were incorrectly added to H.R. 2118, and I ask unanimous consent that they be removed at this time:

HENRY WAXMAN  
MARTIN FROST.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

**MAKING IN ORDER MOTIONS TO SUSPEND THE RULES ON WEDNESDAY, JUNE 20, 2001**

Mr. GREENWOOD. Madam Speaker, I ask unanimous consent that it be in order at any time on the legislative day of Wednesday, June 20, 2001, for the Speaker to entertain motions that the House suspend the rules relating to the following measures: S. 1029, H. Res. 124, H. Res. 168, H.R. 1753, H.R. 819, and S. Con. Res. 41.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

**IMPROVING THE HOPE SCHOLARSHIP TAX CREDIT**

(Mr. CAMP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAMP. Madam Speaker, the passage of the Taxpayer Relief Act of 1997 contained a signature initiative, the HOPE Scholarship Tax Credit. The HOPE Scholarship provides annual scholarship benefits to students. However, many of the students who need the most help do not benefit from the program.

The gentleman from Massachusetts (Mr. McGOVERN) and I are introducing legislation that would address these shortcomings. Currently, the HOPE tax credit can be used only for tuition and some expenses. However, college students must pay for much more than just tuition. Our legislation would allow the scholarships to cover required fees, books, supplies and equipment.

Additionally, a student's eligibility is currently reduced by any other grants they receive. As a result, benefits have been limited primarily to middle and upper-middle income taxpayers. That explains why fewer than one-fifth of all full-time students attending community colleges qualify for maximum HOPE Scholarship benefits. Our legislation would ensure that any Pell Grants and other grants a student receives are not counted against the student's eligibility.

Let us help make the HOPE Scholarship available to community college

students. This legislation has bipartisan support and cosponsors, and also support from a number of higher education organizations.

I urge the House to bring up this legislation in the near future.

**HOPE SCHOLARSHIP REFORM BILL**

(Mr. McGOVERN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McGOVERN. Madam Speaker, I am proud to join with the gentleman from Michigan (Mr. CAMP) in introducing the HOPE Scholarship reform bill.

In April, the Institute for Higher Education Policy issued a report, "Rhetoric and Reality: Effects and Consequence of the HOPE Scholarship." The report concluded, quite simply, that low-income students and students from low-income families do not qualify for the HOPE Scholarship.

It stated that if educational costs to the student beyond tuition and fees could be considered for the HOPE Scholarship, and if low-income students were not penalized for receiving other grants, then more low-income students could enjoy the full benefit of the HOPE Scholarship.

Our bill addresses these exact issues. Our bill ensures that students are not penalized for receiving Pell Grants or SEOG grants. It also ensures that the costs of required fees, books, supplies and equipment can be included as part of the eligible HOPE Scholarship expenses. Our bill expands access to higher education, it expands opportunity to higher education, and it expands the affordability of higher education.

Madam Speaker, I urge my colleagues to support the HOPE Scholarship reform bill.

**CALIFORNIA ENERGY PROBLEMS  
THE FAULT OF CALIFORNIA**

(Mr. KINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINGSTON. Madam Speaker, anybody that gets frustrated with a utility company, I am completely sympathetic with. But I have to stay, I think it is a little immature of the Governor of California to continuously blame power companies for some of their problems out there.

Just think about this: The State of California in the last 10 years had unprecedented prosperity and growth, and during that period of time, they, like any other growing municipality or entity, would add new schools, new roads, new hospitals; but when it came time to approve new power plant construction, oh, no, we cannot do that.

□ 1900

We are going to defy the law of supply and demand. What were they thinking? Grow up. They have to add to

their infrastructure power. They cannot have a 25 percent increase in demand and only increase the supply 6 percent. It is as if Governor Davis has the key to the power that they need for hospitals, for schools, for learning, for lights, and even the gasoline for going places in one's car. It is like he has the key to it and he is throwing it away so that the lowly working folks, in his opinion, the middle class, cannot function.

Madam Speaker, I would say, let the key go and open up the supply, Governor Davis.

**SPECIAL ORDERS**

The SPEAKER pro tempore (Mr. JOHNSON of Illinois). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

**CHANGES IN MANAGEMENT OF MISSOURI RIVER WILL LEAD TO FLOODING, ECONOMIC DEVASTATION, AND UNSAFE ENVIRONMENT FOR COMMUNITIES**

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. HULSHOF) is recognized for 5 minutes.

Mr. HULSHOF. Mr. Speaker, as a Nation, we are fond of looking back over our country's relatively short history and commemorating noteworthy events. For instance, in a few short years, in 2004, our country will be celebrating the bicentennial anniversary of the Lewis and Clark expedition. Some will take that opportunity and look back with nostalgia and wistfully wish that we could turn the clock back and restore the great Missouri River to its natural condition of 200 years ago.

Indeed, Mr. Speaker, some strong political activists, including the newly minted Senate majority leader, have been forcefully advocating for a change in the management of the Missouri River. These individuals or entities are pushing legislation insisting on manipulating higher water flows in the spring months, called a spring rise, and lower flows in the late summer. Now, environmentalists claim that such a controlled flood is necessary to accommodate two endangered and one threatened species.

Those from the Upper Missouri River Basin, like the senior Senator from South Dakota, support this plan because it would help the multimillion dollar recreation industry. Members of this alliance have been reassuring Missourians all along that a controlled flood in the springtime will be no big deal, that somehow our concerns on the lower river basin are inconsequential or invalid.

Well, Mr. Speaker, this arrogance is not just limited to interest groups outside of Washington. I contacted a high-level government official in mid-May regarding continued concerns about

flooding, about economic devastation, and constituent safety. The reply I got from this government official: "A spring rise will only result in some inconvenience."

Well, apparently in the minds of some, the habitat of two birds and one fish take precedence over the homes of 22,500 families who live alongside the Missouri River Basin.

I want to tell my colleagues, Mr. Speaker, what has happened over the last 2½ weeks. On June 1, the Missouri River was at 13 feet, which is normal. Due to heavy rainfall up-river on June the 8, 7 days later, the river stage was at an astounding 29 feet. That is a 16 foot rise in elevation a week. Now, for those of us unfamiliar with river towns or river terminology, flood stage is when a channel is full and damage begins to occur. So in these short 7 days, the Missouri River went from normal levels to 8 feet above flood stage.

Now, fortunately not a lot of damage occurred because there is adequate structural flood protection that is built to withstand flows under the current management plan. But I shudder to think what would have happened if the proposed controlled flood plan had been in effect, because once the decision is made on the up-river to release water from those up-river reservoirs, it cannot be stopped, and it takes 8 to 10 days to finally get down to the point of the confluence at St. Louis. That man-made spring rise, coupled with the heavy rainfall we saw during this 7-day period provided by Mother Nature, would have been, in my estimation, economically devastating and potentially life-threatening.

While the up-river recreation industry would have been congratulating themselves, shaking hands and heading off to the bank, Missourians would have been consoling themselves, holding hands, stranded on top of their rooftops.

To those who would have us return to the romantic times of 1804, let me say that Missouri scientists and biologists from our own State Department of Natural Resources believe that a spring rise in the flow of the Missouri River would not improve the habitat restoration of the pallid sturgeon, of the least tern, and the piping plover. In fact, according to the Army Corps of Engineers, the cost to accommodate these three species through changing the management of the Missouri River system would be \$1 billion over 20 years. We are already helping species restoration through effective and less costly mitigation efforts.

In addition, if low-summer flows, the second component of this plan were instituted, commercial navigation would be severely interrupted not only in the Missouri River, but on the lower Mississippi River region, and hydroelectric power generation would be lost.

Mr. Speaker, the vast majority of Members of this House in Congress have agreed with Missourians on this issue. In fact, they have been over-

whelmingly with us over the past 5 years. In fact, I see my friend from Iowa here and I applaud his efforts today in the House Agricultural Committee on Appropriations which included an amendment that would restrict funding for the Fish and Wildlife Service if such spring rise and split navigation zones were implemented.

I want to tell all of my colleagues in this House, Mr. Speaker, how deeply that we Missourians appreciate the support, especially because of recent developments in the Senate, and that we may need their undaunted courage in the very near future.

#### A DISCUSSION OF IMPORTANT ISSUES FOR AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. Ross) is recognized for 5 minutes.

Mr. ROSS. Mr. Speaker, today we passed a resolution to honor our troops in Bosnia. I personally want to thank the National Guard troops, our men and women in uniform. I want to especially recognize them today because they spend time away from their families and their jobs.

I know this because I have a neighbor in my hometown of Prescott, Arkansas, Kevin Smith, who is serving tonight in Bosnia through the National Guard while his wife remains home, pregnant, and continues to hold down a job. Our families make huge sacrifices so our men and women in the National Guard can serve our country and yes, serve Bosnia in this time of need and they do so with honor and dignity and I want to thank each and every one of them.

This is especially important to me because I have two National Guard units from my district, one from Magnolia and another from Sheridan, that are presently serving in Bosnia. My legislative assistant for military affairs has been there to visit with the troops. I wish I could have gone, but it was at a time when we had votes going on here in our Nation's capital. So I want to thank all of them. I want to thank them for this important service to our country and to Bosnia during this time of need.

Today we celebrate Juneteenth, something else that is important to me that I would like to visit with my colleagues about this evening. On this date in 1865, Major General Gordon Granger lead his troops into Galveston, Texas and officially proclaimed freedom for slaves for the State of Texas, concluding a 2½ year journey through the Deep South. Today I join African Americans and citizens of all races across Arkansas, across America, and across the world in celebrating Juneteenth in honor of the Emancipation Proclamation signed by President Abraham Lincoln and Major General Granger's historic journey. African Americans have played an important role throughout America's history

and we should all be grateful for their many, many contributions to our society.

Mr. Speaker, as we gather today with family, friends and neighbors in marking the tradition of Juneteenth, I extend my warmest wishes for a special celebration, one that we will remember, and I ask all citizens to renew our commitment to a nation that stands for civil justice and opportunity for all people.

Finally, this evening I would like to visit for a few minutes on the issue of energy. Mr. Speaker, as temperatures across the country heat up and this summer's travel season begins, our Nation finds itself in the midst of an energy crisis like one that has not been seen in 2 decades. While my constituents in south Arkansas have not had to face the electricity shortages that California has seen, like all Americans, they have been strapped by the dramatic rise in oil and gas prices.

The hardworking families of south Arkansas already struggle to make ends meet. Many of my constituents come from poor and rural areas where they depend on their cars or trucks to get to and from their jobs, oftentimes traveling many miles, or where they have large tractors and equipment to tend to their family farms. When already faced with the cost of feeding their families, paying their electricity bills, and paying for expensive prescription drugs to stay healthy and get well, they simply cannot afford these high gasoline costs.

Mr. Speaker, I believe we must act to bring these prices down, and we must do it now. Since this most recent increase in gasoline prices began, I, along with many of my colleagues in Congress, have written letters to energy Secretary Spencer Abraham as well as President Bush asking them to come to the aid of gasoline consumers by aggressively lobbying OPEC, the Organization of Petroleum Exporting Countries, to increase the production of oil or, as President Bush suggested last year, "open up their spigots" to help alleviate this problem, this crisis.

Just last March, OPEC decided arbitrarily to cut oil production by 4 percent in the countries that our men and women in uniform went to serve in Desert Storm. That is one million barrels a day.

Mr. Speaker, it is time for OPEC to do right by the American consumers. It is time for OPEC to do right by the consumers of south Arkansas. Increase production, increase production now.

In addition to pressuring OPEC to increase production, we must also work with U.S. oil producers to increase their dangerously low levels of oil inventories. Our nation lacks the refinery capacity to keep up with current demand for oil and gas. We should work to streamline regulatory requirements to facilitate investment in new refineries and other improvements to our energy infrastructure, and I urge the Administration to work with our current domestic refineries to increase their inventories of refined gasoline.
