STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DASCHLE (for himself and Mr. BINGAMAN):

S. 1766. A bill to provide for the energy security of the Nation, and for other purposes; read the first time.

Mr. JOHNSON. Mr. President, I rise in strong support of the comprehensive energy bill that is being introduced today.

As we all know, there has been a great deal of discussion this year about the nation's energy situation. The increasing volatility in gasoline and diesel prices and the growing tension in the world from the terrorist attacks have affected all of us. There is a clear need for energy policies that ensure long term planning, homeland security, fuel diversity and a focus on new technologies.

To this end, I am very pleased that a comprehensive energy bill has been introduced in the Senate by my South Dakota colleague, Senator TOM DASCHLE. The bill is the result of many months of hard work by the Majority Leader and the chairmen of the committees of jurisdiction, including Senator JEFF BINGAMAN, the chairman of the Energy Committee, of which I am a member. They have listened to the concerns of both those who run our energy systems and our constituents in crafting the legislation. The result is a balanced and thorough product that addresses most of the major segments of the energy system and looks ahead to the needs of future.

The bill covers a number of important areas, including incentives to increase oil and gas production and the nation's supplies of traditional fuels, streamlining of electricity systems and regulations, important environmental and conservation measures, and provisions to increase efficiency of vehicles and appliances.

One of the key provisions in the bill is the inclusion of a renewable fuels standard. Earlier this year, I introduced a bill with Senator CHUCK HAGEL of Nebraska, the Renewable Fuels for Energy Security Act of 2001 (S. 1006), to ensure future growth for ethanol and biodiesel through the creation of a new renewable fuels content standard in all motor fuel produced and used in the U.S. I am pleased the framework of this bill is included in the comprehensive energy legislation.

Today, ethanol and biodiesel comprise less than one percent of all transportation fuel in the United States. 1.8 billion gallons is currently produced in the U.S. The energy bill's language
