

The American taxpayers are entitled to a fair accounting and an objective review of the underlying science that supports many of the very expensive recovery plans, particularly the salmon supplementation and habitat restoration programs, that will be developed by the States and participating Tribes.

The peer review requirement in this bill will provide the reasonable assurances of competency for those expensive programs that the taxpayer deserves.

Again, I thank my colleagues from Idaho, California, and Oregon for their strong support and commitment to include Idaho in the quest to achieve successful salmon recovery in the West and for their tireless efforts over the last several months to draft the appropriate legislative framework in which to accomplish the complex task of recovering those marvelous and important fish.

TOP GOVERNMENT ETHICS AWARD

Mr. ROCKFELLER. Mr. President, today I am proud to highlight the recognition given to the Department of Veterans Affairs for the outstanding job they have done and the recognition they are receiving for their employee ethics programs.

The Office of Government Ethics has announced that VA's Office of General Counsel received their Outstanding Ethics Program Award. The award was presented on December 13 by Amy Comstock, the director of the ethics office.

VA has the largest centralized ethics program in the Federal Government and is the second largest Federal department with 219,000 employees scattered nationwide and hundreds of facilities. Ethics issues are administered through the Office of General Counsel, both in VA's central office and through its 23 regional counsel office, who review financial disclosure reports and conduct annual ethics training. These efforts are supported by human resources staff.

In addition, VA's ethics issues are particularly complex. VA's mission is so broad and many of its employees have outside activities. For example, many VA physicians are also on faculty at affiliated universities and conduct outside research.

It is critical that our Federal agencies live up to the expectations of the Americans people, particularly of the nation's veterans whom we serve. This award demonstrates how a centralized and proactive approach can yield tremendous results. I am pleased to see VA's efforts being recognized.

BERNICE FOX

• Mr. DOMENICI. Mr. President, I rise to recognize a long-time New Mexican, Bernice Fox, who is retiring after an amazing record of service in the public and private sectors. Her work in these areas has spanned 63 years, a most remarkable achievement.

for almost 40 years. In the private sector, she owned and operated motels and apartments, and she worked as a legal secretary for several New Mexican attorneys.

She was present to witness the opening of that remarkable facility, the world's only permanent repository for transuranic radioactive wastes.

Now Bernice Fox is planning to retire from the Department of Energy at the end of this year. I salute her for her long service to the citizens of New Mexico and the nation. Whether her next career involves real retirement or still another challenge, I salute Bernice Fox on her long history of contributions.

Bernice Fox is being honored with her own special day by proclamation of the Governor of New Mexico. It is only fitting that Congress further honor her with this statement today.●
