

Whereas, More than 80 United States Senators, including Senator Ben Nighthorse Campbell, signed letters of support for this legislation; and

Whereas, The bill now before the 107th Congress modernizes the railroad retirement system for its 748,000 beneficiaries nationwide, including over 9,000 Colorado citizens; and

Whereas, Railroad management, labor, and retiree organizations have agreed to support this legislation; and

Whereas, This legislation provides tax relief to freight railroads, Amtrak, and commuter lines; and

Whereas, This legislation provides benefit improvements for surviving spouses of rail workers who currently suffer deep cuts in income when the rail worker retiree dies; and

Whereas, No outside contributions from taxpayers are needed to implement the changes called for in this legislation; and

Whereas, All changes will be paid for from within the railroad industry, including a full share to be paid by active employees; now, therefore, be it

Resolved by the House of Representatives of the Sixth-third General Assembly of the State of Colorado, the Senate concurring herein:

That the Colorado General Assembly urges the United States Congress to enact the Railroad Retirement and Survivors Improvement Act in the 107th Congress. Be it further

Resolved, That copies of this Joint Resolution be sent to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, and each member of the Colorado Congressional delegation.

POM-110. A concurrent resolution adopted by the Legislature of the State of Louisiana relative to increasing funding for agricultural conservation programs; to the Committee on Appropriations.

SENATE CONCURRENT RESOLUTION NO. 134

Whereas, since the adoption of the 1985 Farm Bill and subsequent iterations of federal farm legislation in 1990 and 1996, U.S. agriculture policy has included major voluntary conservation incentive programs such as the Conservation Reserve Program (CRP) and Wetlands Reserve Program (WRP); and

Whereas, the most popular of the federal agricultural conservation programs in Louisiana have been the WRP with 368 approved easements on 137,632 acres, the Environmental Quality Incentives Program (EQIP) with 4,803 approved contracts on 494,006 acres, the Wildlife Habitat Incentives Program (WHIP) with 168 contracts on 12,900 acres, and the Forestry Incentives Program (FIP) with all available funds having been allocated; and

Whereas, Louisiana has the most easement acres enrolled in the WRP of all participating states, 407 pending applications on over 102,000 acres, and a potential WRP enrollment demand of up to 474,000 acres; and

Whereas, Louisiana is second only to Texas in the number of EQIP contracts with an estimated potential demand of three to four times the allocation currently available and only one out of every four applications for assistance able to be funded; and

Whereas, the demand for participation in WHIP and FIP also exceeds available funds; and

Whereas, CRP, which benefits Louisiana primarily through improving upstream water quality and providing nesting habitats for waterfowl and other migratory birds, and these other agricultural programs have profound beneficial impacts on wildlife habitat and water quality in our state, including ameliorating the nutrient loading of rivers

and streams that contribute to the annual occurrence of hypoxia in the Gulf of Mexico, while aiding rural communities and benefiting farmers; and

Whereas, agricultural conservation incentive programs are an efficient and effective use of tax dollars to restore habitats and prevent the degradation of soil, water, and habitat over a long term and, with WRP and CRP, overproduction of crops and direct subsidy payments are reduced; and

Whereas, the Lower Mississippi Valley Initiative (LMVI), a multi-state partnership to address agriculturally based environment stewardship consisting of producers, universities, natural resource agencies, and conservation organizations in Louisiana, Arkansas, Mississippi, Missouri, Kentucky, and Tennessee formed to inform the process of developing the conservation provisions of the next farm bill, has recognized the importance to the environment, the farming community, and the future of agriculture of strategically enlarging and enhancing farm bill conservation programs; and

Whereas, although agricultural conservation programs authorized by the 1996 farm bill have reached their acreage and funding caps, additional funding has not been included in the proposed FY 2002 budget; and

Whereas, legislation has been introduced in Congress to expand agricultural conservation programs to meet the needs of farmers and the environment until the next farm bill is enacted. Therefore, be it

Resolved, That the Legislature of Louisiana does hereby urge and request the president of the United States and memorializes the Congress of the United States to expand and fund federal agricultural conservation programs, including the Conservation Reserve, Wetlands Reserve, Environmental Quality Incentives, Wildlife Habitat Improvement, and Forestry Incentives Programs. Be it further

Resolved, That a copy of this Resolution shall be transmitted to the President of the United States, the Secretary of the United States Senate, the clerk of the United States House of Representatives, and to each member of the Louisiana delegation to the Congress of the United States.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUTCHINSON (for himself and Mr. DAYTON):

S. 1058. A bill to amend the Internal Revenue Code of 1986 to provide tax relief for farmers and the producers of biodiesel, and for other purposes; to the Committee on Finance.

Mr. HUTCHINSON. Mr. President, the debate over energy use in America has gripped our national attention for well over a year. A week doesn't go by that you don't pick up a newspaper or magazine and read at least one story about our Nation's domestic or foreign energy crisis. One issue in the energy debate that has caught my attention and that of farmers in my State is renewable fuels.

The technology to convert agricultural crops into combustible fuel, suitable for use in modern diesel and gasoline engines, has existed for more than 100 years. I believe this process continues to hold great potential for America. The production and use of biofuels offers our Nation a safe, renewable source of energy for travel and transport, not to mention the long-term economic benefits for farmers and consumers.

That is why I rise today to introduce the Biodiesel Renewable Fuels Act. I am pleased that Senator DAYTON has joined with me as my lead cosponsor. This bill encourages the use of biodiesel by establishing a tax credit for manufacturers who produce a blend of conventional diesel and soybean or oilseed additives. By reducing the diesel fuel excise tax, suppliers will receive a 3-cent-per-gallon credit for using a diesel blend that contains at least 2 percent biodiesel. This tax credit is very similar to the existing tax incentive for ethanol, a biofuel made from corn-

based products. I believe a tax incentive for soy-based biodiesel will increase domestic production and capture the agricultural, environmental and economical benefits associated with using this renewable source of energy.

Most Americans don't realize that farm communities sit atop a vast and virtually untapped source of renewable fuels in the form of agriculture crops. Farmers in Arkansas are interested in developing new markets for soybean and oilseed products. In Arkansas for example, farmers grew 94 million bushels, or 2.5 million metric tons, of soybeans last year. Nationally, farmers produced 2.6 billion bushels of soybeans in 1999-2000, equal to 72 million metric tons. The oil derived from soybeans and other oilseed crops can be refined into a diesel additive or diesel alternative. According to a USDA study released in 1996, an annual market for biodiesel of 100 million gallons in the United States would raise the price of soybeans by up to seven cents per bushel. Given the recent U.S. soybean crop, that kind of annual market would result in more than \$168 million directly related to the use of soy-based diesel.

Producing biodiesel domestically also means that more money stays in the U.S. Instead of purchasing more foreign petroleum, manufacturers can reduce their dependence on overseas oil by adding biodiesel blends for use in existing diesel engines. If domestic companies are encouraged to develop the infrastructure necessary to produce more biodiesel, the economic effect will be more U.S. jobs, lower prices for the consumer and larger markets for farmers.

Developing markets for agricultural commodities and reducing our dependence on foreign oil is good, but there are environmental benefits as well. It is well documented that the burning of biofuels in combustion engines reduces the emissions of harmful greenhouse gases and particulate matter. In fact, biodiesel passes some of the Environmental Protection Agency's most stringent emissions and health standards for fuel additives and fuel alternatives. This becomes important when you consider the EPA's recent announcement that California should continue to use ethanol as a fuel oxygenate to improve air quality. As more cities and States are faced with having to improve the quality of their air, I believe biofuels are a sensible alternative to existing oxygenates which are not as friendly to the environment or human health.

If using biodiesel improves air quality, reduces our dependence on foreign oil and provides a value-added market for soybean and oilseed crops, then we should support legislation to further development of this renewable source of fuel. My bill is good for farmers, it's good for consumers and it's good for
