

it, and I try not to let a day go by without remembering with deep gratitude all of those who, like my brother, Bill, made the supreme sacrifice; and all of those who served and were willing to put their lives on the line—as servicemen and women are doing right now—for all that we hold dear. That is why when I get up in the morning, the first two things I do are to thank God for my life and veterans for my way of life.

Today, Mr. Speaker, and this Memorial Day, I am proud to say “Thank You” to the veterans of the 27th Infantry Division.

**TRIBUTE TO MARQUETTE AREA
PUBLIC SCHOOLS ON THE OCCA-
SION OF THE SCHOOL DISTRICT'S
150TH ANNIVERSARY**

HON. BART STUPAK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mr. STUPAK. Mr. Speaker, I rise today to call your attention and that of our colleagues to a special event which took place in my northern Michigan congressional district this past month. In April the Marquette Area Public School District, the largest school district in the Upper Peninsula of Michigan, marked 150 years of service to the local community and to the region.

Here in Congress the debate and discussion of education is often moved to an abstract level, where, we discuss programs and dollars. In northern Michigan, as in much of this young nation, education has traditionally been viewed as a means of personal enrichment, achievement and advancement. In Marquette, a town settled by loggers, miners and the tradesmen who followed them to build a community, education still serves that basic social role.

It remains the belief of the Marquette Area Public School District, as outlined in its mission statement, that “all students can learn and achieve mastery of basic skills.” The school district, the board and the administrators, pledge to “teach all students so that they can attain their maximum educational potential and become responsible, contributing members of society.”

The Marquette Area Public School District covers an area of 123 square miles and serves a population of approximately 31,000, according to its 2000–2001 annual report. During that period, 246 teachers in six elementary schools, two middle schools and one high school provided public education to more than 4,100 students in grades kindergarten through 12.

Clearly, Mr. Speaker, Marquette Area Public Schools has come a long way as a civic institution since Marquette's first school began in a home in 1849 with just four students. This focus on education is even more important today to prepare students for tomorrow, because Marquette itself has changed. Hallmarks of the community today include a fine university, Northern Michigan University, and a fine hospital, Marquette General Hospital, which as a key resource in a rural area has been working on the cutting edge of telemedicine.

Jacqueline Winkowski, administrative assistant to the superintendent and the school

board, noted in a recent document that Marquette Area Public Schools is often called up by other school districts in Michigan's Upper Peninsula to share its practices and procedures and to provide expertise and professional development. Teachers from this district have continued to serve on state-level panels and committees on the topics of reading, literacy, social studies and science.

Dr. Patrick Smith, superintendent of Marquette Area Public Schools, recently told the Marquette Mining Journal that the district was happy to be celebrating its first 150 years and looks forward to the next 150. If this first century and a half are any indication, this school district, ably assisted by community members serving on its board, will continue to provide vision and leadership in the field of education for this region.

REMEMBERING PETE BEIDEN

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mr. RADANOVICH. Mr. Speaker, I rise today to honor the memory of Pete Beiden on the occasion of the dedication of a statue in his honor at Beiden Field at California State University, Fresno. Beiden served as the baseball coach at Fresno State from 1948–1969 and the field was renamed for him in 1972.

Coach Beiden had an impressive resume with a record of 602–268 in his tenure at Fresno State with winning seasons every year and 10 Conference Championships. Pete was inducted into the Fresno Athletic Hall of Fame in 1964, the College Coaches Hall of Fame in 1972, and the Fresno State University Baseball Hall of Fame in 1991. Coach Beiden's contributions to baseball extended well beyond Fresno State. His extensive understanding of the fundamentals of the game and his talent for teaching the skills to young athletes enabled Pete to reap a harvest of gifted ball players, coaches, and entire teams. His legacy lives on in those he coaches and mentored.

Coach Beiden's legacy goes beyond the baseball diamond, however. Pete is also, and perhaps best, remembered as a devoted husband, father, and friend. He was a farmer who loved his ranch, a reader who loved history, and a music lover. Pete's wife, Martha, died in 1997 after 69 wonderful years of marriage. Their son, Roland, a renowned pianist and teacher, died in 1980.

Coach Beiden passed away on March 6, 2000. A statue, sculpted by William Behrends, will be unveiled at Beiden Field on May 25, 2002, prior to the Fresno State baseball game.

Mr. Speaker, I rise today to remember Coach Pete Beiden and thank Fresno State for commemorating his life and service. I invite my colleagues to join me in honoring Coach Beiden for his service to baseball and his community.

**CONFERENCE REPORT ON H.R. 3448,
PUBLIC HEALTH SECURITY AND
BIOTERRORISM PREPAREDNESS
AND RESPONSE ACT OF 2002**

SPEECH OF

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 2002

Ms. ESHOO. Mr. Speaker, I'm pleased that we have reached an agreement on H.R. 3448, the Bioterrorism Preparedness Act. I commend my colleagues who served on the conference committee for reporting out a strong, effective and balanced bill.

It's critically important that we protect our nation from biological and chemical attacks and this bill takes a number of necessary steps to bolster our defenses in these areas.

As we know, response to any attack against our country begins at the local level. This bill provides significant resources to state and local governments to ensure that they are ready and able to respond to any situation.

Communities must be able to adequately train and equip their first responders.

These block grants will allow communities to purchase supplies, train staff, and upgrade infrastructure—all necessary components of creating safe towns and cities. This bill also provides needed funding for vaccine and pharmaceutical stockpiling and future anti-terrorism medical research efforts. We must continue our efforts to prepare for any eventuality and medical research is a critical component of this plan.

I'm also pleased that the bill takes a number of steps to protect our nation's food supply. Dinner-time should not be a source of worry to the American people.

However, we must continue to evaluate the effectiveness of these provisions. I believe that there is more to be done in this area in order to fully establish safe and effective monitoring of our food supply.

Finally, I'm particularly pleased that the conference committee was able to include language that directs the Centers for Disease Control to consider the use of antiviral products in the National Pharmaceutical Stockpile.

Biological agents such as smallpox and anthrax are significant concerns for our government to address. We must ensure that our stockpile contains vaccines and treatments that are effective for all citizens. Antiviral products are yet another mechanism for treating smallpox and I'm pleased that the CDC will be evaluating the appropriateness of their use.

Again, I thank my colleagues for their hard work on this bill and I commend them for their efforts.

**NATIONAL STROKE AWARENESS
MONTH**

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mr. DAVIS of Illinois. Mr. Speaker, this month has been designated as National Stroke Awareness Month. In this regard, I will focus on the topic of stroke and its prevention.

Stroke is an acute onset of focal neurologic deficits resulting from diminished blood flow.

This diminished blood flow can be caused by ischemia (clogging) or hemorrhage (bleeding). In both scenarios, there is not enough oxygenated blood nourishing the brain, hence, a person will have a stroke.

Risk factors for stroke include diabetes, high blood pressure, smoking, atrial fibrillation (fast heart beat), and cocaine.

This disease affects so many citizens in our Nation. Stroke is America's No. 3 killer. This disease kills nearly 170,000 Americans annually. It attacks an American every 53 seconds consequently killing an American every 3 minutes.

When we look at death rates in each State, the State of Illinois's death rate from stroke is ranked No. 23.

This deadly disease costs our economy billions to manage in our hospitals and healthcare facilities. The estimated direct and indirect costs (in billions of dollars) for the management of stroke patients are 49.4 billion in the year 2002. The numbers for Heart disease are even more devastating.

Stroke has no preference for any race or gender. It is one of the cardiovascular diseases, the top killers in each ethnic group. Many citizens of the African-American community deal with high blood pressure and diabetes. These citizens visit family physicians for check-ups infrequently. Education on prevention is not prevalent in many minority communities. Additionally, minorities deal with more stress than other populations. As a result, minorities become likely candidates for having a stroke.

In the midst of these devastating statistics, there are answers. Education on prevention is an excellent route to fight the horrors of stroke. Additionally, we should continue to emphasize heart and stroke research. Heart and stroke research have not kept pace with the burdens of this disease. The NIH only invested \$1.6 million on heart research and \$240 million for stroke research in fiscal year 2001. Even in this time of increasing funding, the NIH only funds 1 of every 3 research applications. Hence, two-thirds of potentially life-saving opportunities are lost.

I urge my colleagues to increase funding to the NIH and CDC for heart and stroke research. It is critical that we act swiftly. I urge society to do their individual part and live healthy lifestyles. An American if capable should exercise three to four times a week, eat low-fat and high-fiber diet mostly throughout the week, perform activities that remove stress, and visit your family practitioner routinely.

In closing, cardiovascular diseases including stroke kill almost as many Americans as the next seven leading causes of death combined. Let's invest in heart and stroke research,

during floor consideration of H.R. 3448, let me clarify that language included in the Conference Report regarding Section 307 as it relates to food packaging materials. Section 307 dealing with prior notice of imported food shipments should not be construed to apply to food packaging materials or other food contact substances if, at the time of importation, they are not used in food.

VETERANS HONORED BY THE NATIONAL BASEBALL HALL OF FAME

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mr. SMITH of New Jersey. Mr. Speaker, I rise today to inform my colleagues about a very special event that will take place this Monday, May 27th, Memorial Day, in Cooperstown, New York. In a special ceremony, on the day in which we honor America's fallen heroes, the National Baseball Hall of Fame will take time out to honor the 64 members of Baseball's Hall of Fame who served honorably in our nation's armed forces.

Mr. Speaker, as a nation, we remember and honor the dedicated service of all veterans who have worn the uniform of the United States, including those without the famous sobriquets or the notoriety of our baseball legends.

As a fan and amateur player, I have long cherished baseball and those who played the game. As Chairman of the Committee on Veterans' Affairs of the United States House of Representatives, I have the privilege of working every day on behalf of America's veterans. That is why I am so pleased that the Hall of Fame has chosen to hold this remembrance. During a special ceremony on Monday at Cooperstown, a plaque will be erected in the Hall of Fame Gallery to permanently honor these veterans who earned baseball's highest recognition.

In announcing this event, Dale Petroskey, president of the National Baseball Hall of Fame, explained its purpose:

"Since the first pitch was thrown, baseball history has been intertwined with American history . . . during World War II, some 95 percent of all major leaguers registered for active duty, including its biggest stars. Hall of Fame members who put themselves in harm's way and sacrificed some of their most productive baseball years join a special category we call true national heroes. This plaque represents their sacrifice and bravery and reminds us of all Americans who have fought—and are continuing to fight—for freedom."

Mr. Speaker, among the 64 veterans being honored this coming Monday are five veterans of World War II who will be in attendance: Warren Spahn, Bobby Doerr, Bob Feller, Ralph Kiner, and Phil Rizzuto.

Warren Spahn, of Buffalo, New York, was elected to the Hall of Fame in 1973. A left handed batter and pitcher for the Boston-Milwaukee Braves, Mr. Spahn had 363 career wins, led the National League in wins eight times, and was awarded the Cy Young award in 1957 as baseball's most outstanding pitcher. In his 21-year long career, he was voted an all-star 14 times, pitched two no-hitters,

and holds the National League record for total number of innings pitched. Mr. Spahn missed the 1943, 1944, and 1945 major league seasons while serving courageously in the United States Army. During his service, he was awarded the Purple Heart and Bronze Star.

Bobby Doerr, known as "the silent captain of the Red Sox", played second base for Boston. He held the American League record for handling 414 plays without errors and was also a prominent leader among second basemen in double plays, putouts, and assists. Following his service in the United States Army, Mr. Doerr returned to baseball in 1946, leading the Red Sox to the World Series where he batted a remarkable .406.

Bob Feller of the Cleveland Indians was known as "Rapid Robert" during his 18 years of professional baseball. In 1940, Mr. Feller led the American League with 27 games won, a 2.61 earned run average, 261 strikeouts, and 31 complete games. Despite the loss of four years in his career due to his time spent serving his country in World War II, Mr. Feller had 2,581 strikeouts and pitched three no-hitters. During his service in the United States Navy, Mr. Feller was awarded five campaign ribbons studded with eight battle stars.

Ralph Kiner played for the Pittsburgh Pirates, debuting in 1946 after his service with the United States Navy. In his 10-year career, Mr. Kiner had 369 homeruns and averaged 7.1 homeruns per 100 at-bats, which places him directly behind Babe Ruth, the all-time leader in this statistical category. In 1951, Mr. Kiner led the National League with a .452 on-base percentage and a .627 slugging percentage. Elected into the Hall of Fame in 1975, Mr. Kiner was known as a true powerhitter who envisioned a home run each time he stepped up to the plate. Following his playing career, he became an announcer for the New York Mets, where he has remained for 40 years, still hosting a popular post-game show called "Kiner's Corner."

And finally, Phil Rizzuto, of Brooklyn, New York, played for the Yankees for 13 seasons. Known as "The Scooter", Rizzuto was a slick fielding shortstop and incredible base runner who ended his baseball career with a .273 batting average. He was named an All-Star five times and was the American League's Most Valuable Player in 1950. As a member of the United States Navy, Phil Rizzuto fought in World War II for three years and missed the 1943, 1944 and 1945 seasons.

As you can see, Mr. Speaker, these gentlemen were extraordinary ball players who earned the title of American heroes on the diamond. More importantly, they were soldiers, sailors and marine, audacious and bravehearted, who answered their country's call. Like the other 59 members of the Hall of Fame, including one Civil War veteran, they interrupted successful careers to defend the freedom and liberties that each of us are privileged to enjoy today.

On a day when we celebrate the heroism and honor the memory of millions of men and women who paid the ultimate sacrifice on behalf of our country, I am pleased to see that these Hall of Famers also honored for their service. It is both fitting and appropriate to pay homage to these special veterans who answered the call to duty when their nation needed them.

Mr. Speaker, I call on all Americans who cherish liberty and freedom to join us this

CONFERENCE REPORT ON H.R. 3448, PUBLIC HEALTH SECURITY AND BIOTERRORISM PREPAREDNESS AND RESPONSE ACT OF 2002

SPEECH OF

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 22, 2002

Mr. SHIMKUS. Mr. Speaker, in addition to my statement for the record on May 22, 2002
