

a spirit, a dream, and the inspiration to express themselves innovatively. She celebrated women's freedom and power in her monumental works. Her generosity and spirit graced San Diego, and she will be missed.

**NATIONAL STROKE AWARENESS MONTH**

**HON. RONNIE SHOWS**

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mr. SHOWS. Mr. Speaker, I rise today to request my Colleagues join me in recognizing May as National Stroke Awareness Month.

Like most Americans, I have seen first hand the devastating effects of strokes. My own mother-in-law suffered a series of debilitating strokes, which left her speechless and severely weakened. She passed away last year, unable to communicate with her family and friends who had loved her for so long.

The statistics on strokes are staggering. Every 53 seconds, someone in America has a stroke. About 600,000 Americans will have a stroke this year and 160,000 of them will die. Furthermore, stroke is our nation's No. 3 killer and is a leading cause of severe, long-term disability. Stroke kills twice as many women as breast cancer each year.

It is critical that we raise awareness so that our family and friends do not ignore the warning signs for stroke. Too often, our natural inclination is to ignore troublesome ailments and hope that they'll go away. Unfortunately, by trying to "sleep it off", people lose valuable time when doctors can be treating their stroke. Every second counts.

We need to make it a matter of course to know that numbness or weakness of the face, arm or leg, especially on one side of the body are serious warning signs for strokes. Sudden confusion, trouble speaking or understanding, trouble seeing in one or both eyes, trouble walking, dizziness, loss of balance or coordination and severe headache with no known cause are also ailments to be carefully considered.

I am proud to stand with 173 of my colleagues in the House of Representatives in strong support of H.R. 3431, the Stroke Treatment and Ongoing Prevention Act. This important legislation will provide programs for the prevention, treatment, and rehabilitation of strokes. Stroke is No Joke. We must act on this legislation today.

**TRIBUTE TO W.J. (JERRY) SANDERS III ON THE OCCASION OF HIS RETIREMENT FROM ADVANCED MICRO DEVICES, INC.**

**HON. ANNA G. ESHOO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Ms. ESHOO. Mr. Speaker, I rise today to honor a distinguished American, a proud Californian and a Silicon Valley icon, W.J. (Jerry) Sanders, III, who is retiring as Chief Executive Officer of Advanced Micro Devices, Inc. (AMD) after 33 years of leadership.

Jerry Sanders has had an extraordinary career building an extraordinary company. He

started from a modest beginning as a salesman for Motorola, then moved on to hold positions in the Engineering Department of Douglas Aircraft in sales, and in the Semiconductor Division of the Fairchild Camera and Instrument Corporation where he worked as a Sales Manager, Area Sales Manager, Department Head, Director of Marketing, and eventually, as Group Director of Marketing Worldwide from 1967 to 1969.

In 1969, Jerry Sanders left Fairchild Semiconductor to launch AMD out of the living room of one of its co-founders. Today, the Sunnyvale-based company, located in my Congressional District, is a global supplier of integrated circuits for the personal and networked computer and communications markets. Employing 14,000 people worldwide with over \$4 billion in annual revenues, AMD today is the world's second largest manufacturer of microprocessors.

Under the able stewardship of Jerry Sanders, AMD has honored its commitment to making our communities better places to live and work. Through its school partnerships, corporate giving, and employee volunteer programs, the company continues to serve as a model of corporate and civic responsibility.

Jerry Sanders has been honored with many awards, including being named the Best Chief Executive Officer in the semiconductor industry for the years 1983, 1984 and 1985 by the Wall Street Transcript. In 1991, under his leadership and guidance, AMD was named Comeback Company of the Year by Electronic Business.

Mr. Speaker, I ask my colleagues to join me in honoring Jerry Sanders for his exceptional leadership, his great determination, his sheer guts and his lasting contributions to our community, to Silicon Valley and to our nation's economy. We're a better country because of him and all he's done.

**RECOGNITION OF NANCY GUTHRIE**

**HON. SHELLEY MOORE CAPITO**

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mrs. CAPITO. Mr. Speaker, I rise today in recognition of Nancy Guthrie, president and owner of Capitol City Communications, in the Second Congressional District of West Virginia. Ms. Guthrie has achieved the title of Home-Based Business Advocate of the Year. The West Virginia District of the United States Small Business Administration, a leader in the promotion and growth of our state, gives this award annually.

Ms. Guthrie began Capitol City Communications in 1996 at her home in Charleston, West Virginia, to provide public relations and advertising services. Capitol City Communications has since grown statewide. Ms. Guthrie embodies the values that created the American success story: self-reliance, hard work, perseverance and optimism. I commend her for her contributions to the West Virginia economy.

Successful small businesses not only serve as the backbone of the economy, they anchor communities and promote civic pride. I urge my colleagues to join me in celebrating Ms. Guthrie's tremendous achievement as the West Virginia Small Business Administration's Home-Based Business Advocate of the Year.

**TRIBUTE TO VICE ADMIRAL GEORGE PETER NANOS, JR., COMNAVSEA**

**HON. JOHN E. SUNUNU**

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 2002

Mr. SUNUNU. Mr. Speaker, I rise today to honor Vice Admiral George Peter Nanos, Jr., United States Navy. Vice Admiral Nanos will retire on Monday, 1 July 2002, after 35 years of faithful service to our nation.

Hailing from my hometown of Bedford, New Hampshire, Vice Admiral Nanos is a graduate of the U. S Naval Academy. At the Academy, he was awarded the 1967 Harry E. Ward Trident Scholar's Prize. Following graduation, he spent two years at sea as Antisubmarine Warfare and Gunnery Officer on USS *Glennon* (DD 840) before entering Princeton University, where he earned a Ph.D. in physics in 1974.

Returning to sea, Vice Admiral Nanos served as Engineer Officer aboard USS *Forrest Sherman* (DD 931) and as Materiel Officer on the staff of Destroyer Squadron Ten. From 1978 to 1982, he was the manager for Technical Development in the Navy's High Energy Laser Program Office (NAVSEA PMS 405). He then served as the Combat Systems Officer in Norfolk Naval Shipyard while also training to become an Engineering Duty Officer. He returned to sea yet again as Chief Engineer for the aircraft carrier USS *America* (CV 66). While on *America*, he participated in Operation Eldorado Canyon and helped to ensure the successful launch of naval airstrikes against Libya after that country was linked to a terrorist bombing of a West Berlin discotheque, which killed 1 American and injured 78 people. Following this tour, he was assigned as the Deputy Director, Warfare Systems Engineering in the Space and Naval Warfare Systems Command.

In 1988, Vice Admiral Nanos reported to Strategic Systems Programs, serving consecutively as Head of the Navigation Branch, Head of the Missile Branch, and Director of the Technical Division. In June 1994, he assumed duties as Director, Strategic Systems Programs, responsible for all aspects of the Navy's Fleet Ballistic Missile Weapon Systems.

In May 1998, Vice Admiral Nanos assumed his rank and duties as Commander, Naval Sea Systems Command, the Navy's largest acquisition organization. Throughout the past four years, he has been responsible for the design, engineering, procurement, integration, construction, in-service support, and maintenance of the Navy's ships, shipboard weapons, and combat systems.

Vice Admiral Nanos' service education includes U.S. Naval Destroyer School at Newport, Rhode Island; Engineering Duty Officer basic and mid-career courses; the Senior Officer Ship Materiel Readiness Course at Idaho Falls, Idaho; and the Program Management Course at the Defense Systems Management College, Fort Belvoir, Virginia. His specialty as an Engineering Duty Officer is ordnance and weapons systems acquisition.

Vice Admiral Nanos successfully led the Command through a brilliant transformation of NAVSEA'S business practices in executing complex acquisition and Fleet maintenance and modernization responsibilities. He expertly

managed the resizing, recapitalizing, and realignment of the personnel and technical resources devoted to designing, building, repairing, and modernizing ships and their weapons systems. Displaying bold vision, innovation, and superb leadership, he instituted far-reaching quality initiatives that forged a highly focused, reenergized workforce. These have transformed the Command into a unified corporation that provides world-class technical, acquisition, and life-cycle support leadership to America's Navy. His contributions have had a direct and lasting impact on the overall readiness, effectiveness, and survivability of the United States Armed Forces.

Vice Admiral Nanos' superb leadership, exceptional integrity, engineering expertise, and tireless devotion to duty reflect great credit upon him and are in keeping with the highest traditions of the United States Naval Service. He has done a superb job in leading the Naval Sea Systems Command to fulfill its mission: Keeping America's Navy #1 in the World.

Although Vice Admiral Nanos has worked diligently to increase the efficiency and effectiveness of naval and marine shipbuilding capabilities throughout the United States, he has often shown his dedication to and respect for the men and women of the Portsmouth Naval Shipyard team. He recently visited the Shipyard to personally congratulate and thank the Shipyard team for their record-setting work on two submarines: A record-setting depot maintenance period on USS *Miami*, followed by a record-setting engineering refueling overhaul on USS *City of Corpus Christi*. Thanks in part to his vision, the Shipyard retains its important military-industrial capabilities and continues to provide critical jobs for the region.

Vice Admiral Nanos' innovation has ensured the success of the Naval Sea Systems Command and the United States Navy's ships well into the 21st Century. He is an individual of uncommon character and his professionalism will be sincerely missed. I am proud, Mr. Speaker, to thank him for his honorable service in the United States Navy, and to wish him fair winds and following seas as he closes his distinguished military career.

I suspect Vice Admiral Nanos will continue his adventures, and will bring much credit to his name, as well as our government and our country. He is a true American hero, and his direct contributions to our military will long be remembered with heartfelt gratitude.

**RE-INTRODUCTION OF THE SAFE AND FAIR ENFORCEMENT AND RECALL FOR MEAT AND POULTRY ACT**

---

**HON. JOHN ELIAS BALDACCI**

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 23, 2002*

Mr. BALDACCI. Mr. Speaker, I rise today to reintroduce the Safe and Fair Enforcement and Recall for Meat and Poultry Act—to help strengthen the protection of meat and poultry across the United States. As a member of the House Agriculture Committee, I have long been concerned about the safety of our nation's food and water supplies. My SAFER Meat and Poultry Act would expedite the removal of potentially contaminated products from store shelves and provide greater enforcement authority to protect public health.

This bill calls for more consistent and vigilant implementation of the USDA's Hazard Analysis Critical Control Point (HACCP) program. The legislation will strengthen government accountability and expedite the removal of potentially harmful meat and poultry from store shelves.

Recent reports suggest that USDA properly inspects meat-processing facilities on a daily basis less than 40 percent of the time. Further, a number of plants may have never been tested. I am pleased that the Bioterrorism legislation passed earlier this week will help to alleviate some of USDA's problems with funding plant inspections.

However, this bill to provide greater disclosure of contaminants, increased penalties for knowingly distributing tainted products, and greater authority for the Agriculture Secretary to move swiftly against facilities found to be producing harmful meat and poultry products will lead to a healthier and safer American food supply.

Furthermore, my bill will help alert Americans to the seriousness of food borne contamination, which is estimated to cause approximately 75 million illnesses, 325,000 hospitalizations and 5,000 deaths per year.

Mr. Speaker, given the new and emerging threats to public health and our national security, we must be vigilant in safeguarding our national food supply.

I am pleased to be reintroducing this important legislation, and I strongly urge my colleagues to support it.

---

**A MEMORIAL DAY MESSAGE—A TRIBUTE TO OUR BRAVE SERVICEMEN AND WOMEN**

---

**HON. ANDER CRENSHAW**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 23, 2002*

Mr. CRENSHAW. Mr. Speaker, I wanted to share some thoughts with you today as the nation pauses to honor the men and women who fought and died to preserve our freedom. It is an especially meaningful Memorial Day as we so recently were reminded of the great country that we live in and the burden that goes with protecting our freedoms.

Today, our military is fighting a new kind of war. A war not against a country but against an ideology that would try to destroy the liberties that we have come to enjoy. It is a war fought differently. It is a war fought with new technology in a land that is very old world. It is a war that has Forward Air Controllers riding horseback and calling in strikes from laptop computers. It is a war being fought from our ships stationed 700 miles from targets. It is a war that utilizes B-52s for precision targeting, but it is also a war that calls for our troops to go from cave to cave to seek out the enemy. It is a war whose enemy is difficult to identify. It may be a different kind of war, but war always brings casualties—and this war is no exception.

September 11, 2001, gave us a wake-up call on our own soil not felt since Pearl Harbor. This time the victims were not just sailors and other military personnel. This time the victims were secretaries, clerks, stockbrokers, office workers, and, lots and lots of firefighters. These victims, like our military troops, were fa-

thers, sons, mothers, daughters, aunts and uncles. Some died while performing heroic acts, but most were just ordinary people who perished during a brutal act of war.

So this year, as we remember our war heroes, let us say a prayer for our newest casualties. Let us make room in our hearts for these new recruits to the battle for freedom and peace.

But make no mistake; it will be the military that will shoulder the responsibility of trying to protect us against another attack. It will be our uniformed troops who will serve in distant lands, who will miss their children's graduations and birthdays, who will not be home for Christmas. And, as in the past, they will go into harm's way unafraid and with the determination that draws strength from those who fought and died before them.

I thank you for your service to our country and to your fellow comrades, especially those who paid the ultimate sacrifice. I thank you for the leadership you have shown as you have lived your lives as stalwart soldiers in America's role as freedom's beacon. The young men and women serving today are fighting a new kind of war. But it will take the same type of soldier America has always produced—a soldier, like you, who is willing to put aside self interests for the good of the country. A soldier, like those we honor today, who is willing to die for those ideals.

Thank you for all that you have done for your country and for the memory of those who are no longer with us.

---

**ESSAY CONTEST WINNERS**

---

**HON. HENRY J. HYDE**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 23, 2002*

Mr. HYDE. Mr. Speaker, every year in my district, I ask students in grades 8th and 12th to participate in an essay contest. This year's contest focused on the events of September 11, 2001, and how they shaped our Nation. Specifically, this year's essay question was as follows: "September 11, 2001, was a shock felt around the world. Our country was attacked by suicidal, fanatic terrorists. It must be our resolve to protect America. Eternal vigilance is the price of liberty. How can our government protect us at home and abroad?"

I am pleased that so many students chose to enter this essay contest. Unfortunately, however, there can only be one winner in each group: 8th grade and 12th grade. This year's 8th grade winner was Melissa DeLeo from Chicago. She attends Mary, Seat of Wisdom School in Park Ridge, IL. The 12th grade winner was Karen Differ from Niles, IL. She attends Maine Township High School South in Park Ridge, IL.

Ms. DeLeo's untitled essay is as follows:

I have been taught that America stands for freedom, equality, liberty and justice for all. I believe this even now more than ever before. This is our America, the America that many men and women fought for, the America that is the land of opportunities and my America, the America where I have the opportunity to write this essay with my right of freedom of speech. Our America was attacked, but there are ways that our government and we, the American people, can protect ourselves. I think that there are three
