□ 1838

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Ms. SOLIS. Mr. Speaker, during rollcall vote No. 208 on H.R. 4800, Repealing the sunset of expansion of the adoption credit and adoption assistance programs, I was unavoidably detained due to airplane delays.

Had I been present, I would have voted “yea.”

PERSONAL EXPLANATION

Mr. DEAL of Georgia. Mr. Speaker, on June 4, 2002, I was unable to record my vote for both H.R. 4823 and H.R. 4800. Had I been here to record my vote, I would have voted in the affirmative for both bills by voting “yea.”

PERSONAL EXPLANATION

Mr. GRAVES. Mr. Speaker, I was unavoidably detained.

Had I been present I would have voted in the affirmative for H.R. 4823, Holocaust Restitution Tax Fairness Act of 2002. A "yea" vote would have also been cast for H.R. 4800, a bill to repeal the sunset of the Economic Growth and Tax Relief Reconciliation Act of 2001 with respect to the expansion of the adoption credit and adoption assistance programs.

PERSONAL EXPLANATION

Ms. SLAUGHTER. Mr. Speaker, I was unable to be present for rollcall votes 207 and 208. Had I been present, I would have voted "yea" on both.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

URGING INCREASED FEDERAL FUNDING FOR JUVENILE TYPE 1 DIABETES RESEARCH

Mr. TAUZIN. Madam Speaker, I ask unanimous consent for the immediate consideration of the concurrent resolution (H. Con. Res. 36) urging increased Federal funding for juvenile (type 1) diabetes research.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

Mr. GREEN of Texas. Madam Speaker, reserving the right to object, I will not object; but I would ask the gentleman from Louisiana (Mr. TAUZIN), the chairman of our full committee, to give an explanation of the bill.

Mr. TAUZIN. Madam Speaker, will the gentleman yield?

Mr. GREEN of Texas. I yield to the gentleman from Louisiana.

Mr. TAUZIN. Madam Speaker, I thank the gentleman for yielding to me.

As the gentleman knows, at this time, more than 1 million Americans have type 1 diabetes. Type 1 diabetes is a disease which strikes children suddenly. It makes them insulin-dependent for life, and it carries a constant threat of life-threatening complications. Someone is diagnosed with type 1 diabetes every hour. This devastating disease also afflicts adult populations.

Madam Speaker, I want to applaud the efforts of the gentleman from Texas (Mr. GREEN) to raise awareness about juvenile (type 1) diabetes and the need to find a cure for this disease.

I ask my colleagues to support this very worthwhile resolution.

(Mr. GREEN of Texas asked and was given permission to revise and extend his remarks.)

Mr. GREEN of Texas. Continuing my reservation of objection, Madam Speaker, I know the gentleman has been a long-time advocate for increasing funding for juvenile diabetes, and he has been recognized many times by the health care industry.

I think all of us have been touched by someone with diabetes. Throughout my life, I have met many courageous people who have struggled with this disease every day.

I want to especially mention the Balthazars. They are not only constituents, but live in my hometown of Houston. They had come to a town hall meeting a couple of years ago to tell me about the struggle their family faces with their son, Larry, who has juvenile diabetes.

Larry Balthazar was diagnosed with this horrible disease when he was 2 years old. He has no memory of life without insulin shots, blood glucose tests, hypoglycemia, or the fear of dreaded complications. He has never had the chance to live a carefree life that every child deserves. Instead, he is tied to a regimen of painful shots, finger pricks, and a strictly controlled diet, which is not a way to spend a childhood.

Unfortunately, Larry's childhood is no different than that of 1 million other Americans with juvenile diabetes. This serious disease restricts the ability of these people and their families to live normal lives. Instead, they are forced to give themselves multiple insulin injections each day, test their blood sugar frequently, and be prepared for the high and low blood sugars that ravage their bodies.

If their blood sugar is too high, they face the possibility of blindness, heart disease, stroke, nerve damage, kidney failure, and lower-limb amputation.

□ 1845

With low blood sugar, people with diabetes suffer disease, dizziness, hunger, seizure, coma and even death. This disease forces its victims into a careful balancing act that is almost impossible to achieve. While this is all very sobering, we have never been closer to finding a cure for this horrible disease. Research in islet cell transplantation has
