

density of more than 10,000 people per square mile."

Section 12 therefore currently would exclude the Lake Charles, Louisiana LNG facility, the Elba Island, Georgia LNG facility, and the soon-to-be reactivated Cove Point, Maryland LNG facility from coverage, as none of those facilities are located in areas with a population area of more than 10,000 people per square mile. For example, the population density of Lake Charles (home of the CMS Trunkline Facility) is 1786 people per square mile. There is one other LNG Terminal currently operating, which is located at Elba Island, Georgia, near Savannah, Georgia (which has a population of 1759.5 people per square mile). It was reactivated in December. The Cove Point facility, in Maryland is not yet reopened, but it is located in a rural area that is even less densely populated.

Section 12 also excludes an LNG facility that is not used to dock or receive LNG tankers. We are focused narrowly on LNG terminals in this amendment since these are facilities that may receive ocean-going tankers from Middle Eastern countries like Algeria, where there may be active terrorist cells operating, or from other foreign nations, where there may not be adequate screening of ship's crews or adequate systems in place to assure ship security. The section is intended to supplement the other measures undertaken to ensure the security of such LNG terminals, included those taken by the Coast Guard in addressing the security of LNG tankers and screen their crews as they enter U.S. waters and travel through U.S. harbors to their destinations. In the past, I have seen at the Everett facility that while the Coast Guard does a reasonably good job of addressing security at the water side of the plant, there simply has not been enough attention focused on what could happen on the land side, or the potential for a coordinated attack that might involve insiders. Section 12 gives the Department the tools needed to address this.

I appreciate the cooperation of the Chairman of the Energy and Commerce Committee and his staff, who have offered some helpful suggestions on how to tighten the language of the amendment, as well as the Ranking Member, who have been helpful in assuring that the amendment touched only this facility, and did not inadvertently affect other facilities where the security problems may not be as serious, or the consequences of a successful terrorist attack so potentially devastating.

I urge adoption of the legislation.
