SECTION 1. SHORT TITLE.

This Act may be cited as the "Trauma Care Systems Planning and Development Act of 2003".

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) The Federal Government and State governments have established a history of cooperation in the development, implementation, and monitoring of integrated, comprehensive systems for the provision of emergency medical services.

(2) Trauma is the leading cause of death of Americans between the ages of 1 and 44 years and is the third leading cause of death in the general population of the United States.

(3) In 1995, the total direct and indirect cost of traumatic injury in the United States was estimated at \$260,000,000,000.

(4) There are 40,000 fatalities and 5,000,000 nonfatal injuries each year from motor vehicle-related trauma, resulting in an aggregate annual cost of \$230,000,000,000 in medical expenses, insurance, lost wages, and property damage.

(5) Barriers to the receipt of prompt and appropriate emergency medical services exist in many areas of the United States.

(6) The number of deaths from trauma can be reduced by improving the systems for the

provision of emergency medical services in the United States.

(7) Trauma care systems are an important part of the emergency preparedness system needed for homeland defense.
