

35 years, and it continues to benefit the Hendersonville area in innumerable ways.

Over the past 35 years of dedicated service, the church has seen great changes. Beginning with the Phillips Robinson Chapel in 1969, the church constructed a 300-seat auditorium in 1972. It built the fellowship hall in 1989 and a church office complex in 1993. The church plans to move to a 36-acre property on New Shackle Island Road in the near future. Over the years, the dynamic nature of the church's facilities has served as a mirror for its ever-increasing role in the community.

Hendersonville is a better place because of the work of the Bible Baptist Church and its congregation. I am sure the church will continue to make a positive difference in the community for the next 35 years, and I congratulate the congregation and pastor Jim Crockett for all the good work they have done.

HONORING BRIGADIER GENERAL  
RILEY P. PORTER

HON. MARION BERRY

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, June 17, 2004*

Mr. BERRY. Mr. Speaker, I rise today to honor a great Arkansan and an outstanding citizen with a long history of service to his country. I am proud to recognize Riley P. Porter and congratulate him on his recent promotion from Colonel to Brigadier General.

Born and raised in Arkansas, Gen. Porter is a native of West Helena, and a 1974 graduate of the University of Arkansas in Fayetteville. Upon completion of his degree in business administration and marketing, Gen. Porter committed to the Air Force Reserve Officer Training Corps and was commissioned as a second lieutenant.

After completing a rigorous pilot training at Vance Air Force Base in Oklahoma, Gen. Porter's commitment to service continued by attending the Strategic Air Command Combat Crew Training in the KC-135 at Castle Air Force Base in California. In 1981, Gen. Porter joined the Arkansas Air National Guard at the Little Rock Air Force Base and is now an accomplished command pilot with more than 5,700 flying hours in training, tanker and airlift aircraft.

Gen. Porter's abilities and leadership are exemplified in the many awards and decorations he has earned, including the Meritorious Service Medal with two oak leaf clusters, the Air Force Commendation Medal with two oak leaf clusters, the Air Force Outstanding Excellence Award with one oak leaf cluster, and the National Defense Service Medal with service star.

Gen. Porter continues to serve his country with distinction as the Chief of Staff for the Arkansas Air National Guard and Joint Force Component Commander. Throughout his career, Brigadier General Riley P. Porter has served his country with honor and dignity. On behalf of the Congress, I would like to extend our gratitude and appreciation for his service and commitment to our great Nation.

HONORING BECCA KERN

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, June 17, 2004*

Mr. HYDE. Mr. Speaker, I rise today to commend a young individual from my district who recently won the honor of "Mayor For The Day" of Elmhurst, Illinois. Miss Becca Kern, who is in Sixth Grade at Visitation Catholic School, won this honor by composing the following essay in 50 words or less:

"Good citizenship is important in Elmhurst because. . . ."

Citizenship means contributing to the community. In Elmhurst, our town relies on each other. People taking the time to make it a fun, safe, and successful community. I am proud to be a citizen of this town because everyone in Elmhurst makes a contribution to its greatness."

RECOGNIZING FOUNDING FATHERS  
OF CITY OF JACKSON, MICHIGAN

HON. NICK SMITH

OF

IN THE HOUSE OF REPRESENTATIVES

*Thursday, June 17, 2004*

Mr. SMITH of Michigan. Mr. Speaker, I rise today to recognize the Founding Festival of the City of Jackson, Michigan. This celebration commemorates the 175th anniversary of the founding of the City of Jackson, Michigan, and the 150th anniversary of the meeting "Under the Oaks," the first convention of the Republican Party.

New Yorker Horace Blackman arrived at what is now Jackson on July 3rd, 1829. On July 4th, he staked out his 160-acre claim along the banks of the Grand River. Named for President Andrew Jackson, the village also known as Jacksonburgh and Jacksonopolis grew quickly, and became a hub of commerce and transportation in southern Michigan. It became the terminus of the Michigan Central Railroad, which helped to spur economic growth in the region, and served as a starting point for pioneers heading west.

Jackson has played an important role in defending our country. It was the first city in Michigan to muster troops for the Civil War, and made significant contributions to the war effort during WW II, manufacturing materiel and supplies.

Jackson was a leader in the automotive industry, with 23 different cars manufactured in the City, including the "Jackson" automobile. Both Buick automobiles and Ritz Crackers were originally manufactured in Jackson. Gilbert's Chocolates, Sperton Electronics, and the All-Star Dairy also call Jackson home.

July 6, 2004 marks the 150th Anniversary of the Under the Oaks meeting in Jackson, MI. On this day in 1854, the name "Republican" was used in affiliation with a political party for the first time in the history of the United States of America. With its seeds sown at meetings in Ripon, Wisconsin; Friendship, NY; and Bangor, Maine, the movement took root at the meeting in Jackson, adopting a platform, nominating candidates, and formally adopting the name "Republican."

Called to the City of Jackson by Charles V. DeLand, editor of the Jackson American Cit-

izen newspaper, thousands of former Whigs, FreeSoilers, disgruntled Democrats, and others assembled in Jackson to consider further anti-slavery actions. The call was taken up by newspapers throughout the state to meet on the 6th of July 1854. The crowd of more than 3,000 quickly filled Bronson Hall to overflowing, and the meeting adjourned to the oak grove on Morgan's Forty, at what is now the corner of Franklin and Second streets. At this meeting "Under the Oaks," the first Republican platform was passed, the first Republican candidates were nominated, and the name "Republican" was formally adopted. It is only fitting that this city, that also played an important role in the Underground Railroad, is where the first political platform calling for the abolition of slavery would be adopted. Thus was born the Grand Old Party.

At the time of year that we celebrate the founding of the United States of America, it is my great honor to recognize the founding of Jackson, Michigan, a truly American city born on the fourth of July, and of that Grand Old Party, the Republicans.

A TRIBUTE TO DR. JOHNNY RAY  
YOUNGBLOOD

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, June 17, 2004*

Mr. TOWNS. Mr. Speaker, I rise in honor of Dr. Johnny Ray Youngblood in recognition of his spiritual leadership and contributions to the community.

Dr. Johnny Ray Youngblood is without a doubt, one of the leading theologians of his time. His commitment to the call of spiritual healing, racial parity, social justice and economic equity for all people has garnered him national recognition as a preacher, national leader, public advocate, motivator, writer and teacher. Now in his 30th year serving as senior pastor of St. Paul Community Baptist church and 3rd year as senior pastor of Mt. Pisgah Baptist Church, both located in Brooklyn, New York, he has completed more than a quarter of a century pastoring to God's people.

In May of 1990, Youngblood received his Doctorate of Ministry degree from United Theological Seminary in Dayton, Ohio, where he studied with an elite group of preachers from across the country as a Samuel D. Proctor Fellow. Dr. Youngblood earned his Masters of Divinity degree from Colgate-Rochester Divinity in Rochester, New York and his bachelor's degree from Dillard University in New Orleans. Dr. Youngblood is now single and a father of three sons, Joel Ray, Jason Royce and Johnny Jenell, and the grandfather of Donny Lynn, Joshua, Jalen and Jordyn.

Dr. Youngblood has earned national recognition because of his work with East Brooklyn Congregations (EBC), an affiliate of the Industrial Areas Foundation. He is credited through EBC with spearheading the Nehemiah Housing project, which to date has constructed approximately 2,850 owner-occupied single family homes in some of the most devastated communities in Brooklyn. He has served as national spokesman for the group and in 1990, was recognized in the Congressional Record for his trailblazing work with the project. Dr. Youngblood is a subject of the

Harper Collins book, "Upon This Rock: The Miracles of a Black Church," written by Samuel G. Freedman. In 1996, Youngblood and the ministry of St. Paul community were featured in an article titled "Crossing Border" in the premiere of Common Quest magazine. In December of 1995, Dr. Youngblood was also listed in The New Yorker magazine as one of the "ten most influential" New Yorkers. He has been profiled on ABC's 20/20, NBC Nightly News, CBS Sunday Morning News, FOX 5's McCreary Live Report, and the Charlie Rose Show.

In September 1995, Dr. Youngblood launched what has become one of the premier projects on the Church's annual calendar, now known as the commemoration of the Maafa. Dr. Youngblood is spearheading a national effort to promote the Maafa as a spiritual movement aimed at healing this nation around the scars of slavery. Since 1998, the St. Paul Community has toured "The Maafa Suite" production to venues including Dallas, Mississippi, Seattle, Atlanta, Chicago and Connecticut.

In June of 1998, Dr. Youngblood released his own book of poetry titled, "I Honor My Father"; a collection of poems inspired by the illness and loss of his father in the same year.

Mr. Speaker, Dr. Youngblood has dedicated his life to helping people through his spiritual leadership, public advocacy and civic participation. As such, he is more than worthy of receiving our recognition today and I urge my colleagues to join me in honoring this truly remarkable person.

#### CELEBRATING OLDER AMERICANS

#### HON. MICHAEL H. MICHAUD

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 17, 2004

Mr. MICHAUD. Mr. Speaker, communities around the country and in my district celebrated Older Americans Month this May. The theme for 2004 was "Aging Well, Living Well", a goal I'm sure we all hope to achieve as we enter into our golden years. Every day in our country, some 6,000 people turn age 65 and become eligible for Social Security, Medicare and other age-based entitlements. In less than 7 years, the daily tally of Americans celebrating their 65th birthday will increase by more than 50 percent to 10,000 a day.

It is in the spirit of Older Americans Month and our support for these individuals that I bring to my colleagues' attention the work of the Jackson Laboratory in Bar Harbor, Maine. For more than 75 years, The Jackson Lab has worked tirelessly for the benefit of older Americans and has been at the forefront of discovering cures for human diseases. Their research into the specific diseases of old age as well as the overall mechanisms of aging have helped pave the way to important discoveries that serve to improve quality of life for all older Americans. As we take a moment to honor Older Americans, we should recognize those individuals and institutions that do all they can to enhance the human condition as we grow older.

The good news is that many older Americans see retirement as a time to enjoy the fruits of their earlier labors. A 2002 survey by Peter D. Hart Research Associates found that

more than 59 percent of individuals aged 50 and over see retirement as "a time to be active and involved, to start new activities, and to set new goals." Recent studies, such as the MacArthur Foundation's "Study of Aging in America" demonstrate that engaging in life is a key component of successful aging. Americans are pleased and proud that in our country, most people are enjoying the blessings of longer and healthier lives. Meanwhile, we know that scientists searching for answers to the diseases of aging such as cancer and Alzheimer's are likely to succeed in adding even more healthy and vital years to the average life span.

However, for many Americans, the concept of "growing old gracefully" is now, and will always be, unattainable. The combination of reduced income, increased health care needs, and decreased quality of life create more problems than opportunities for too many in our aging population. Over 5 million older Americans live at or near the poverty level. The median level of income is around \$19,000 per year. At the same time, most older Americans have at least one chronic condition (such as hypertension or diabetes). These conditions contribute to increased health care costs at precisely the time when their incomes are reduced.

Policy makers have a responsibility to better understand the challenging issues facing our country as we press the boundaries of human aging and health. What level of funding should Congress invest to further extend human longevity? What impact will longer and healthier lives have on the economy and on the costs of health care? It is part of our responsibility as legislators and representatives to stay informed at the crossroads of science and human aging. Sooner than we may expect, Congress may be called upon to render judgments in public policy on these issues. That is why I was so pleased to learn of The Jackson Laboratory's participation in a powerful new on-line forum called SAGE (for "Science of Aging") Crossroads (www.SAGECrossroads.net).

Launched in March, 2003, www.SAGECrossroads combines the high journalistic standards of SCIENCE magazine, with the immediacy and interactivity of the Internet. A particularly exciting centerpiece of the project is a monthly debate that is webcast live to viewers who participate in these timely discussions as they are happening. Through this series of innovative and thought-provoking discussions, SAGE Crossroads invites researchers, policymakers and concerned citizens to interact with respected thought leaders. For example, Dr. David Harrison of the Jackson Lab recently participated in a debate entitled "Are Biomarkers the Key to the Fountain of Youth?" This particular debate considered the issue of whether resources are better spent on seeking to cure the specific causes of various diseases, or whether to work to identify the key biomarkers of aging that might lead us to a better understanding of aging in its entirety. Other debate topics have ranged in recent months from contrasting views of life extending and life enhancing technologies to appropriate uses of information about individual genetic risks to disease. Through this forum, leaders in the aging research community address questions such as whether a person's age should count in rationing limited health care resources or whether public policy

considerations impact the scope of scientific research.

The people in my district, as well as people across the country, are very interested in what it will take to maintain health and enjoy a high quality of life as they age. As policymakers, we know that the forward march of the life sciences will raise as many questions as it settles. I urge my colleagues to draw upon the wisdom of some of our most provocative and learned thought leaders by signing on to www.SAGECrossroads.net and registering to participate in future debates.

#### TRIBUTE TO ROBERT G. WANNAMAKER

#### HON. JAMES E. CLYBURN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 17, 2004

Mr. CLYBURN. Mr. Speaker, I rise today to pay tribute to one of South Carolina's leading executives, Robert G. Wannamaker, General Manager of Tri-County Electric Cooperative. Mr. Wannamaker, who will be retiring at the end of this month, has spent his entire career insuring that rural areas in South Carolina's Sixth Congressional District have access to reliable, affordable electricity.

Throughout his 23 years with the Cooperative, Mr. Wannamaker has led his team to many profound successes, especially in times of crisis. This past January he impressively managed the effects of a natural disaster when one of the most violent ice storms in South Carolina's history tore through the state's Midlands leaving roughly 15,000 Co-op customers without power. Mr. Wannamaker directed a recovery process that had total restoration of power within a week despite extensive damage to more than 250 poles and 200 cross arms.

Mr. Wannamaker began his career with McCall-Thomas Engineering Company of Orangeburg as an Engineering Assistant. He was hired at Tri-County in January of 1972 by the late Dewey Kemmerlin, Jr. as a field designer and staking engineer. He was later promoted to the position of manager of member services, which he held until he left Tri-County Co-op to become the district manager of the Johns Island District of Berkeley Electric Co-op near Charleston. He is a graduate of Spartanburg Methodist College and the University of South Carolina and serves as a member of community development committees and organizations.

Mr. Speaker, I ask you and my colleagues to join me in honoring and congratulating Mr. Wannamaker on a distinguished career of insuring a better quality of life for rural citizens of South Carolina. His work has given thousands of customers the reliability and convenience of having efficient energy services through even the most challenging conditions. And he will be sorely missed.
