year over 120,000 primary and specialty care visits were rendered at Urban Health Plan. Paloma can also add to her list of achievements the successful relocation of Urban Health Plan's main site, a project she embarked upon over 15 years ago. Through her spearheading efforts, financing was secured through municipal tax free bonds as well as a New York City Council Grant. The new site is a 40,000 square foot state of the art medical facility that will further support Urban Health Plan's ability to continue to provide medical services to its community.

Paloma currently serves on multiple boards and organizations. She is a true example of the consistent and outstanding leadership that exist in our cities' community based organizations. For her service to the people of her community, I ask my colleagues to join me in honoring this remarkable woman.

TRIBUTE TO THE ACTION OF NAVAL RESERVISTS IN BALTI-MORE, MARYLAND

# HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

### Tuesday, March 9, 2004

Mr. CARDIN. Mr. Speaker, I rise today to pay special tribute to the brave members of the U.S. Naval Reserve unit stationed at the Naval Reserve Center near Ft. McHenry in Baltimore, Maryland. The quick thinking of these Reservists saved the lives of 21 patrons of a Baltimore water taxi when a freak storm capsized their vessel on the afternoon of Saturday, March 6, 2004.

This tragic accident could have been much worse. Approximately 20 Naval Reservists were at the waterfront Reserve Center for weekend exercises when the storm struck. They saw the water taxi, Lady D, flip over and quickly rushed to their ACUV-27 vessel to help the victims of the overturned craft.

Their guick action saved almost all the victims of this tragedy. Unfortunately, one person died and three others are still missing. The survivors of the accident and Coast Guard officials credit the rescue efforts of the Naval Reservists as critical to saving most of those who were on the overturned water taxi in 44 dearee waters.

I know, in some respects, it was pure luck that the water taxi capsized so near the Naval Reserve Center and that the Reservists were on site to carry out the rescue. But it also represents the quick action and outstanding bravery and courage of these Reservists.

I hope my colleagues in the U.S. House of Representatives will join me in saluting the members of the Naval Reserve, who, through quick thinking and action, saved the lives of 21 patrons of the Baltimore water taxi accident. While we honor the courage of these Naval Reservists, our hearts and prayers are with the victims of this tragedy and their families.

## HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES Tuesday, March 9, 2004

Mr. MORAN of Virginia. Mr. Speaker, today I am introducing a resolution to acknowledge 125 years of reliable, timely, and objective science that illustrates and enhances our understanding of the Earth, and serves the important needs of individuals and communities across this great land.

The United States Geological Survey has an outstanding history of public service and scientific breakthroughs. It has been at the forefront of advances in our understanding of the Earth, its processes, and its resources. Scientists from the U.S. Geological Survey pioneered hydrologic techniques for gauging the impact of floods and modeling the flow of complex ground-water systems. The astronauts who landed on the Moon in 1969 were trained in geology by the USGS.

Innovative ventures with the private sector have given the world access to digital images of neighborhoods and communities in one of the largest data sets ever made available online. Modern-day understanding of the formation and location of energy and mineral resource deposits is rooted in fundamental scientific breakthroughs by USGS scientists. Their biologists revolutionized thinking about managing wildlife resources, providing a sound scientific basis that lets waterfowl conservation and recreational hunting work in tandem as adaptive management, not as conflicting interests. Advances in seismology are making early warnings of earthquakes a reality that will give the needed alert time to save lives. The future of the global community presents infinite opportunities for the science of the USGS to continue to make substantive and life-enhancing contributions to the betterment of the nation and the world.

I congratulate the United States Geological Survey on its 125th anniversary. By commemorating this date, I hope we will come to recognize the crucial services that this institution continues to provide this nation.

The United States Geological Survey is a vital Federal science agency that is headquartered in my District in Northern Virginia; however, Members should know that this agency has an important presence in every state of the union.

How has 125 years of independent science benefited our nation? It has given us an extensive record of our land and resources, which allows us to realize and track the changes in our land, water, and wildfire. It has provided a wealth of long-term data and research, which continues to serve thousands of government agencies, companies, non-profit organizations, recreational groups, and individual Americans. And it has given us scientific expertise and understanding that we can count on to be accurate and up to date.

Since its inception, the United States Geological Survey has become the premier science organization for the nation, covering all of the natural science disciplines (biology, geography, geology, and hydrology) in every state. This expansive coverage provides us

with the comprehensive information we need to tackle many complicated issues in many geographical areas.

As an unbiased science agency, the United States Geological Survey often serves the needs of the nation behind the scenes. Whether it's research on windborne dusts, mercury contamination, or West Nile Virus used to protect public health; or natural hazards assessments used to ensure public safety; or the energy and mineral resources, water and biological information, and geologic mapping and geospatial information used to serve our economy, for 125 years, the United States Geological Survey has provided the science that serves as the basis for our most important decisions.

It's time we congratulated those whose labor provides us with the information we need to manage our resources and safeguard societv. I am delighted to have this opportunity to bring attention to the work of the United States Geological Survey and showcase its remarkable history. I urge you to support this resolution, thereby confirming our appreciation for their ongoing work that has served the health. safety, and prosperity of the United States for 125 years.

In addition to Congressman James P Moran, the following members are original sponsors of the House Resolution Congratulating the United States Geological Survey on its 125th Anniversary: Barbara Cubin, Tom Davis, Norm Dicks, Ånna G. Eshoo, Ron Kind, Eddie Bernice Johnson, Zoe Lofgren, Ralph Regula, Nick Smith, Bill Young, and Sherwood Boehlert.

#### RESOLUTION

Whereas March 3, 2004 will mark the 125th Anniversary of the establishment of the United States Geological Survey;

Whereas the United States Geological Survey has become the Nation's premiere earth and biological science agency;

Whereas during its 125-year history, the United States Geological Survey has been the birthplace of a number of other Federal agencies, including the Reclamation Service (later renamed the Bureau of Reclamation) in 1902, the Forest Service in 1905, the United States Bureau of Mines in 1910, the Grazing Service (later renamed the Bureau of Land Management) in 1934, and the Minerals Management Service in 1982;

Whereas the United States Geological Survey has been a widely respected source of relevant and objective science to address the Nation's diverse natural resource issues:

Whereas the United States Geological Survev continues to serve the Nation as an independent fact-finding agency that collects, monitors, analyzes, and provides scientific information and understanding about natural resource conditions, issues, and problems:

Whereas a hallmark value of the United States Geological Survey to the Nation is its ability to carry out studies on a national scale and to sustain long-term monitoring and assessment of natural hazards and natural resource conditions;

Whereas the United States Geological Survey is an agency of the Federal Government with no regulatory or land management responsibilities and is thus a trusted entity to provide impartial science that serves the needs of the Nation; and

Whereas the United States Geological Survey has a scientific presence in every State and Territory of the United States and serves the Nation's extensive and diverse needs for objective scientific knowledge and understanding: Now, therefore, be it

*Resolved*, That the House of Representatives—

(1) congratulates the United States Geological Survey on its 125th anniversary; and

(2) expresses strong support for the United States Geological Survey as it serves the Nation by providing timely, relevant, and objective scientific in formation which helps to describe and understand the Earth, minimize the loss of life and property from natural disasters, manage water, biological, energy, and mineral resources, and enhance and protect the quality of life of all Americans.

### TRIBUTE TO MS. HEIDI HYNES

### HON. JOSÉ E. SERRANO OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, March 9, 2004

Mr. SERRANO. Mr. Speaker, it is with great pleasure that I rise during this month of March, which has been designated Women's History Month, to pay tribute to Ms. Heidi Hynes, a remarkable woman who has dedicated most of her life to the service of others.

A native of Kansas City, MO, Heidi moved to the Bronx, New York, to attend Fordham University in the fall of 1986. After graduating with a B.A. in philosophy she became an associate of the Friars of the Atonement and subsequently volunteered for a year of service in Jamaica. In Jamaica, Heidi worked at a preschool, distributed food, tutored, provided assistance at a local clinic and did other activities related to the Friars Parish. Upon the completion of a year of volunteer work with the Friars Parish, Heidi returned to New York and worked as a full time volunteer with the Catholic Worker on the lower East Side. In this role, she lived with former homeless men and women, ran a soup-line, assisted with the distribution of their newspaper and was active in peace and justice campaigns.

In 1995, after marrying Bryan Hynes, a man she met while at the Catholic Worker, Heidi began working as a community organizer for the Northwest Bronx Community and Clergy Coalition. In that capacity she organized tenants, homeowners, and park groups in the Fordham Bedford community. In the fall of 1997, Heidi began working as the Executive Director of the Mary Mitchell Family and Youth Center in the Bronx. Through her work providing and developing youth and family programs she has learned a great deal about the Croton Community, non-profit management and youth development.

Mr. Speaker, such selflessness must not go unnoticed. Since graduating from college, Heidi has dedicated herself to uplifting others. For that reason, I ask my colleagues to join me in honoring this remarkable woman.

IN COMMEMORATION OF THE DAY OF REMEMBRANCE AND IN SUP-PORT OF THE WARTIME PARITY AND JUSTICE ACT OF 2003

### HON. XAVIER BECERRA

OF CALIFORNIA IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 9, 2004

Mr. BECERRA. Mr. Speaker, I rise today to ask my colleagues to reflect on our past as we

pave the way to a brighter future. The Japanese-American community recognizes a National Day of Remembrance each year to educate the public about the lessons learned from the internment camp experience during World War II to ensure that it never happens again. The Day of Remembrance commemorates February 19, 1942, the day on which President Franklin D. Roosevelt signed Executive Order 9066, which eliminated the civil liberties of 120,000 people of Japanese descent and sent our country down a shameful path of race-based discrimination, veiled by the fog of war. I ask for my colleagues' support for House Resolution 56 (H. Res. 56); and I commend my friend from California, Congressman MIKE HONDA, for offering it and for his leadership in championing awareness of the Japanese-American internment, H. Res. 56 recognizes the historical significance of February 19 and expresses congressional support for the Japanese-American, German-American, and Italian-American communities in their goals to raise public awareness of Day of Remembrance events.

The force of wartime hysteria darkened the light of justice and reasonable people suddenly embarked on an unreasonable course. Indeed, America was engaged in a monumental struggle as our soldiers engaged the enemy in the European and Pacific Theatre. Here in the United States, many citizens had faces that looked like that of the enemy. Without any evidence, fear was mounting, and the patriotism of these Japanese Americans was questioned. Some worried that they were intent on doing harm against the very flag they saluted. Decades later, history vindicated these loval Americans as not even a single documented case of sabotage or espionage was committed by an American of Japanese ancestry during that time.

What our Nation found through the disinfectant of time, those who endured internment knew all along. Surrounded by armed guards behind a prison fence, mothers thought of their sons who fought for the freedom of the Nation that denied them of their own liberty.

Indeed today history shows that the Japanese-American soldiers of the 442nd combat regiment fought honorably and bravely for ideals they knew our Nation had not yet afforded to their own families back home. Still, they were worth fighting for. And this regiment would become the most decorated group of soldiers in American history as they proved their devotion to our Nation fighting in both the European and Pacific theatres. It took more than 50 years, but finally in 2000, President Bill Clinton awarded 22 of these heroes with the Medal of Honor.

In 1983, a Presidential Commission concluded that the internment was the result of both racism and wartime hysteria. Five years later, then President Ronald Reagan signed the Civil Liberties Act into law that provided an official apology and redress to most of those confined in U.S. internment camps during World War II. This was the culmination of half a century of struggle to bring justice to those for whom it was denied. I am proud that our Nation did the right thing. But 16 years after the passage of the CLA, we still have unfinished work to be done to rectify and close this regrettable chapter in our Nation's history.

I introduced bipartisan legislation, the Wartime Parity and Justice Act of 2003 (H.R. 779) to finish the remaining work of redress. While

most Americans are aware of the internment of Japanese Americans, few know about our government's activities in other countries resulting from prejudice held against people of Japanese ancestry. Recorded thoroughly in government files, the U.S. Government involved itself in the expulsion and internment of an estimated 2,000 people of Japanese descent who lived in various Latin American countries. Uprooted from their homes and forced into the United States, these civilians were robbed of their freedom as they were kidnapped from nations not even directly involved in World War II. These individuals are still waiting for equitable redress, and justice cries out for them to receive it. That is why I introduced H.R. 779, to finally turn the last page in this chapter of our Nation's history, so that we not only remember that our country took away civil rights from innocent people from other countries, but that we now have recognized the wrong of our actions and have taken steps to provide equitable redress.

This bill provides redress to every Japanese Latin American individual forcibly removed and interned in the United States. These people paid a tremendous price during one of our Nation's most trying times. Indeed, America accomplished much during that great struggle. As we celebrate our great achievements as a Nation let us also recognize our errors and join together as a Nation to correct those mistakes. My legislation is the right thing to do to affirm our commitment to democracy and the rule of law.

In addition, the Wartime Parity and Justice Act of 2003 provides relief to Japanese-Americans confined in this country but who never received redress under the Civil Liberties Act of 1988 given technicalities in the original law. Our laws must always establish justice. They should never deny it. That is why these provisions ensure that every American who suffered the same injustices will receive the same justice. Finally, my legislation will reauthorize the educational mandate in the 1988 act, which was never fulfilled. This will etch this chapter of our nation's history into our national conscience for generations to come as a reminder never to repeat it again.

Recently, in Los Angeles I was fortunate to join with about 300 individuals to commemorate the Day of Remembrance in Los Angeles at the historic Japanese American National Museum. Included in the Los Angeles Day of Remembrance program was the screening of a film, "Stand Up for Justice," which tells the story of Ralph Lazo, a Mexican-Irish American student at Belmont High School in downtown Los Angeles. Even in 1941, the school had an ethnically diverse population, and the film depicts Ralph's anger at the pain suffered by his Japanese American friend, Jimmy Matsuoka. Jimmy and his family are forced to sell their belongings and "evacuate" to a remote concentration camp. At the age of 16 Ralph voluntarily accompanied his Japanese American friends to Manzanar Internment Camp, where he spent 21/2 years. Ralph remained a dear friend to the Japanese community and his loss was sorely felt in 1992 when friends mourned the death of their loyal friend. He had stood by Japanese Americans during the difficult times at Manzanar and throughout the campaign for redress, and he demonstrated that you don't have to be Japanese American to stand up for what is right.

At the forefront of this fight for justice, there are Members of Congress, the community and
