

important work they have done over the past twenty years.

THE LONG TERM CARE SUPPORT
AND INCENTIVE ACT OF 2004

HON. SUSAN A. DAVIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Mrs. DAVIS of California. Mr. Speaker, I rise today to talk about an important issue facing our community: the affordability of long-term care. People today are living longer and healthier lives than ever before.

When the Declaration of Independence was signed, the average life expectancy was 23. In the United States today, life expectancy at birth is 80 years.

While this increased life expectancy is allowing us to live fuller lives, it is also presenting us with serious financial challenges. Half of all older Americans who live alone will "spend" themselves into poverty after only 13 weeks in a nursing home.

My own family had to make difficult emotional and financial decisions when my father needed care. My dad was a pediatrician, and always lived a full life. When he needed care, my sister and I struggled to find the perfect place for him to live.

We wanted to make sure he was happy and received high quality medical care. We searched for months to find the right place for our dad and we learned very quickly how expensive long-term care is. Fortunately, we had the financial resources to take care of him, but many families do not.

My experience with my dad renewed my commitment to improve our long-term care system. I took on this mission in Congress and I am pleased today to reintroduce the Long Term Care Support and Incentive Act. This much needed legislation will make a real difference for San Diegans caring for older family members.

First, the bill will give a \$4,000 tax credit for seniors with long-term care needs and their caregivers. We know how many sacrifices families make to take care of their loved ones. They miss work, or in some cases are forced to give up their jobs. They pay for expensive medical supplies and equipment, and bare the burden of enormous medical bills. This tax credit will help ease their financial burden.

The second section of my legislation will establish a tax deduction for long-term care insurance premiums. As the long-term care needs in our community increase, we must face the reality that many seniors do not have family or friends to take care of them full time.

This is particularly important to women. Women live longer than men. Often times, women are the primary caregivers for their husbands. After their husbands pass away, there is often no one around to take care of them.

Long-Term Care Insurance can help fill this gap, but premiums can be expensive. My legislation will make long-term care insurance more affordable by allowing individuals over 65 to deduct 75 percent of the cost of their premiums and individuals under 65 to deduct 50 percent of the cost of their premiums.

In addition, I have included several important consumer protections in the bill to ensure

that people are purchasing responsible insurance plans that will adequately meet their long-term care needs.

The bill requires plans to include:
Mandatory Inflation Protection.

A Lifetime Deductible Requirement that ensures policy holders must only pay their deductible one time in their lifetime.

Mandatory Interchangeability so that individuals can determine where their benefits are spent.

A Care Coordination program that ensures seniors receive assistance in planning and securing the services they need.

By encouraging people to plan ahead for the future and purchase Long-Term Care Insurance, we can ensure that seniors live dignified and independent lives. I urge all of my colleagues in Congress to work with me to pass it quickly into law.

RECOGNIZING WATER AWARENESS
MONTH

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Ms. SOLIS. Mr. Speaker, I rise to recognize May as Water Awareness Month throughout California and the United States of America.

As our most precious natural resource, water sustains all life in our planet. From humans and animals to plants and trees, every living organism needs water to live. For this reason, it is important for all Americans to protect and conserve our water from contamination and careless waste.

This year marks the 29th anniversary of the Safe Drinking Water Act, which authorizes the U.S. Environmental Protection Agency to regulate public health by setting high health standards and regulating the nation's public drinking water supply. I salute all government leaders, public water providers such as the Walnut Valley Water District, and the California Water Awareness Campaign for their hard work and tireless leadership in making safe drinking water a priority and Water Awareness Month a reality.

In addition, I salute our responsible citizens, urban and agricultural water agencies, and farm bureaus in California who have made exceptional strides to improve water quality and conservation since the state's drought years of 1987-1993. Their significant work and leadership have educated communities throughout California and have set an example to other states to care for the quality of their drinkable and non-drinkable water.

Mr. Speaker, it is an honor to recognize Water Awareness Month and the people who work hard to make water safe for our daily consumption.

THE JEWISH STATE AND A PALESTINIAN STATE: MUTUALLY EXCLUSIVE OR INCLUSIVE?

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Mr. BURTON of Indiana. Mr. Speaker, the State of Israel has for decades been an un-

wavering friend and ally of the United States. And Israel has stood in complete solidarity with the United States in the War on Terror. So, it is critically important that we send the message to our Israeli friends that we stand in complete solidarity with them in their fight against terrorism, because you cannot negotiate with terror or trust the promises of terrorists; you can only defeat them. And the establishment of a new terror-supporting regime on the shores of the Mediterranean seems inconsistent with the strategic goal of the U.S. and Israel to defeat terrorism and stabilize the Middle East.

I recently was presented a copy of an interesting advertisement that is running in Israeli newspapers regarding the dangers of ceding Israeli territory to terrorists. This particular ad is the ninth in a series, and it focuses on the Security Significance of Judea & Samaria Mountain Ridges. I would like to have the text of this advertisement placed into the CONGRESSIONAL RECORD following my statement.

THE JEWISH STATE AND A PALESTINIAN STATE:
MUTUALLY EXCLUSIVE OR INCLUSIVE?

THE SECURITY SIGNIFICANCE OF JUDEA AND
SAMARIA MOUNTAIN RIDGES

The Demise of Saddam Has Not Waived the Threat to Israel

The Mideast is the world's most violent and unpredictable region, which requires preparedness for the worst-case scenario, including an Eastern Front Assault on Israel.

In 1967 Israel crushed Egypt, Syria and Jordan, and grew over-confident that no Arab attack would be forthcoming. The 1973 War almost annihilated Israel.

Will the U.S. be able to stabilize Iraq? Will Bush retreat from Iraq? Will his successor (in 2005 or 2009) retreat from Iraq? A U.S. evacuation of Iraq could produce more terror than it intended to quell.

Judea and Samaria Mountain Ridges—Irreplaceable for Israel's Security

Missiles cause damage; they don't bring enemies to submission. There is a marked difference between a barrage of missiles on Tel Aviv, and the invasion of Arab tanks to Tel Aviv.

The centrality of ground forces suggests the centrality of ground features (Topographic edge and geographic depth).

The eastern mountain ridge of Judea & Samaria—rather than the Jordan Valley—constitutes the best tank obstacle in the world (3,000 foot steep slopes, controllable by a small force).

The western mountain ridge of Judea & Samaria (2,000 foot moderate slope overlooking Jerusalem, Tel Aviv and Haifa) constitutes an invader's dream platform. A withdrawal from Judea & Samaria would submit the Jerusalem-Tel Aviv-Haifa area (80 percent of the Israeli population) to daily terror.

The Judea & Samaria mountain ridges constitute the "Golan Heights" of Israeli's Soft Belly.

Until 1967, Israel limited Jordan's military presence in Judea & Samaria to 5,000, lest it become a lethal threat. The 40,000 armed Palestinian terrorists in Judea & Samaria amount to 4 brigades. A withdrawal from Judea & Samaria would make a 1973-style surprise Arab attack a lethal threat.

Technology Cannot Replace Ground Features

High-tech today becomes low-tech tomorrow, but high-ground today remains high-ground tomorrow.

Every high-tech system is eventually outflanked by an emerging system. The dominant mountain ridges of Judea & Samaria can never be outflanked by an emerging ground feature.

No nation alters its borders per technological developments.

HELP SENIORS RECOGNIZE THE BENEFITS OF THE DRUG DISCOUNT CARD

HON. MIKE FERGUSON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Mr. FERGUSON. Mr. Speaker, today we are here to discuss the immediate savings that our nation's seniors realize due to the prescription drug discount cards provided by the Medicare Law that Congress wrote last year. After years of promises, this law fulfills our commitment to our nation's seniors by providing the first ever universal prescription drug benefit under Medicare.

One would think that these new benefits for seniors, coupled with the prescription drug discount card would be a cause for celebration. Rather than educate seniors on the benefits of the discount cards, the other side of aisle has continued to play politics with this issue and resorted to scare tactic towards our nation's seniors and in some cases suggest that seniors are too dumb to make decisions for themselves. There are even those who are discouraging seniors from signing up for the discount card. Perhaps because if seniors sign up, the program will be a success; that is not just wrong, it is unconscionable and shameful, and anyone who engages in that sort of behavior should be ashamed of themselves.

In my home state of New Jersey we have a very generous state pharmaceutical assistance program called PAAD. After working with our Governor and CMS, New Jersey has the opportunity to directly enroll seniors into the discount card program. Out of the 81,000 seniors and persons with disabilities who were eligible for the transition assistance provided by the discount card, only 350 opted out of the program. As a result of the discount card and our delegation's work to get this card to New Jersey's seniors, my state will save \$90 million on the cost of prescription drugs. These savings can be put back into the PAAD program to provide expanded coverage for additional seniors. New Jersey is one example that I encourage more states to follow. By putting partisan politics aside, our delegation worked with CMS to provide a simple process which benefits our state and our state's seniors.

Defying logic, today and in the future, you will hear members on the other side of the aisle argue that the cost of prescription drugs will increase as a result of the discount card. For those members I would like to point to a May 14th study by CMS which shows that in the past week more cards have offered increase discounts for our nation's seniors compared to prices offered the previous week. Sponsors are now comparing their discounts to their competitors, more cards are offering favorable prices, and CMS is working with card sponsors to make sure that the best discounts are published for Medicare beneficiaries. This is what happens when competition is injected into the marketplace. That's how markets work. Some on the other side of the aisle would prefer a government run, command and control system where bureaucrats or politicians tell people what medicines they

can have, how much they can have and when and where they can have it. That sounds more like the former Soviet Union to me.

Today you will also hear members who will criticize the pharmaceutical industry for charging too much for prescription drugs. Yet they will not mention the miracle drugs or treatments these companies create. Representing the scientists and researchers who live in my district of New Jersey, I would like to highlight the good work that two of the pharmaceutical companies are doing to help seniors. Once a low-income beneficiary has exhausted his or her annual \$600 transitional assistance allowance, Merck and Johnson and Johnson will provide its medicines free to that beneficiary's participating discount card plan or directly to the beneficiary, through the pharmacy. Neither company will receive any fees from these programs.

In closing, I encourage all members to put aside partisan politics and help seniors recognize the benefits of the drug discount card. This can be accomplished by working with CMS to clarify any questions our seniors may have and allowing seniors to realize the discounts that are available to all seniors through the discount card.

NATIONAL SMALL BUSINESS WEEK

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, this is National Small Business Week; a time to celebrate and recognize America's small business entrepreneurs.

I honor our nation's 23 million small businesses and recognize their vital contribution to our nation. I want to especially thank my good friend, Congresswoman NYDIA VELÁZQUEZ from New York and applaud my House colleagues for their hard work on behalf of small business. Additionally, I thank the many small business owners for their numerous contributions.

Small business is the backbone of our state and national economy. Unfortunately, many small businesses are suffering in these trying financial times. Government contracts and spending are a vital source of revenue, and have become even more so during this current economic slump. Small businesses lack high powered lobbyists, therefore it is imperative that all levels of government continue to pay diligent attention to small business in their purchasing and contracts. It is important that we ensure that businesses of all sizes have access to government contracts regardless of their ability to buy influence.

As Congress continues its work, I will dedicate myself to assuring that good news is on the way for small businesses. Both our federal and state government have an obligation to aid, assist and protect the interests of small businesses. The future of America depends on it. I will continue to strongly support federal programs that benefit small businesses.

OSTEOPOROSIS PREVENTION AND AWARENESS MONTH

HON. SHELLEY BERKLEY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Ms. BERKLEY. Mr. Speaker, May is Osteoporosis Prevention and Awareness Month. Osteoporosis and low bone density affects over 44 million Americans over the age of 50, many of whom were unaware of their risk for osteoporosis and were not able to take steps to prevent it. While both men and women are at-risk of developing osteoporosis, women comprise 80 percent of those who develop the disease. Even though the risk of a hip fracture for a woman is equal to her combined risk of breast, uterine, and ovarian cancer, most adult women are unaware of the risk factors for osteoporosis.

Like many Americans, I had no idea I was at risk for developing osteoporosis. I believed I simply had bad posture and was reluctant to be screened for osteoporosis. Yet, as I was running for Congress in 1998, I was diagnosed with this disease.

Fortunately, within 10 months of treatment I was able to stop my bone density loss and my bones actually began to strengthen again. Because of my personal experience with osteoporosis, I am committed to ensuring Americans are aware of the importance of strong bones, so they can reduce their chances of developing the disease.

I commend the National Osteoporosis Foundation (NOF) for their efforts to educate the public during the month of May. This month, the NOF has reached out to healthcare providers and consumers with the message, "Osteoporosis. Chances are . . . it could be you." Throughout the year, the NOF is dedicated to promoting lifelong bone health in order to reduce the prevalence of osteoporosis and osteoporosis related fractures and they continue to work to find a cure for the disease through research, education, and advocacy. For all those who have this disease and those who may in the future, I will continue to work with and support NOF's efforts to raise awareness of the risk factors and ways to prevent osteoporosis.

HONORING THE CREW OF THE USS "PITTSBURGH" FOR THEIR HEROISM IN WORLD WAR II

HON. CHRIS VAN HOLLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 20, 2004

Mr. VAN HOLLEN. Mr. Speaker, I am pleased to rise today to announce the introduction of a concurrent resolution recognizing and honoring the crew of the USS *Pittsburgh* for their heroism in World War II.

On March 19, 1945, the USS *Franklin*, as part of Task Force 58, launched an attack against Japan. The Japanese responded with an air attack against Task Force 58, striking the USS *Franklin*, killing 724 crew members and injuring 265 other crew members, and setting the USS *Franklin* ablaze.

The USS *Pittsburgh* was dispatched to assist the USS *Franklin*. The crew of the USS
