Mr. POMBO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 2511, authored by Senator DOMENICI of New Mexico, directs the Secretary of Interior to study the feasibility of constructing a potable water supply system for the town of Chimayo, New Mexico, in the Santa Cruz River Valley. The bill also directs the Secretary to plan, design, and construct a water filtration system for the city of Espanola, New Mexico.

I urge adoption of the bill.

Mr. Speaker, I reserve the balance of my time.

Mr. RODRIGUEZ. Mr. Speaker, I yield myself such time as I may consume. We have no objection to this consideration of this measure.

Mr. UDALL of New Mexico. Mr. Speaker, I rise today in support of S. 2511, the Chimayo

Water Supply System and Española Filtration Facility Act of 2004. Both of these communities located in my district are in dire need of improvements to their water facilities and I am pleased that the House is acting today to address the needs.

The unincorporated community of Chimayo, home to 3,000 citizens and the world-famous Santuario de Chimayo, currently relies on individual wells for their potable water. They also are forced to rely on largely deteriorated septic systems to dispose of wastewater. The absence or deterioration of sewer and water infrastructure in the region results in 75% of well samples taken having significant contamination. Also, because of the unreliability of the well water, some residents use free-flowing water from irrigation ditches for drinking, also containing high levels of different types of contamination. This situation is so badly in need of remedy, that in 2001 the region was declared an emergency area and required National Guard tanker trucks to bring potable water to the area. Still today Chimayo remains an emergency area.

To address this situation, S. 2511 directs the Secretary of the Interior, in cooperation with State and local authorities to conduct a feasibility study of constructing a water supply system for Chimayo. In conducting the feasibility study, the Secretary is to consider various options for supplying water, long-term operation and maintenance costs, and local water resources. The bill would also direct the Secretary to provide emergency water assistance to Chimayo, which may include water treatment, installation of an emergency water supply system and installation of transmission and distribution lines.

Similarly in need of improved water infrastructure is the City of Española. Currently the City's water system produces approximately 1,000 gallons per minute less than is needed to provide for its current population. This production shortfall has resulted in inadequate water pressure throughout the city. The chronic lack of pressure is prevalent especially in the portion of the City where the Española Hospital is located. The City has twice declared a state of emergency due to lack of adequate water and water pressure, and has been forced to call on the National Guard to supply water to the hospital.

S. 2511 authorizes the Secretary of the Interior to provide financial assistance to the City of Española for the construction of a water filtration facility, and to the nearby Pueblos of Santa Clara and San Juan for related infrastructure.

Mr. Speaker, both of these communities will greatly benefit from this legislation. I urge my colleagues to support passage of this bill, and I would like to thank the two New Mexico Senators for their work on this bill.

Mr. RODRIGUEZ. Mr. Speaker, I yield back the balance of my time.

Mr. POMBO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. POMBO) that the House suspend the rules and pass the Senate bill, S. 2511.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.
