STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

Mr. CORZINE:

S. 1381. A bill to require the Nuclear Regulatory Commission to consider certain criteria in relicensing nuclear facilities, and to provide for an independent assessment of the Oyster Creek Nuclear Generating Station by the National Academy of Sciences before any relicensing of that facility; to the Committee on Environment and Public Works.

Mr. CORZINE. Mr. President, I rise today to introduce legislation to help ensure the safety of the Nation's oldest nuclear power plants before they receive a renewed license to operate.

The Oyster Creek Nuclear Generating Station in Lacey, NJ, has operated for 35 years and is the oldest nuclear facility in the country. It provides approximately ten percent of New Jersey's electricity, powering 600,000 homes. Oyster Creek also provides high paying jobs for 450 New Jerseyans. While the plant is an important source of energy and jobs for New Jerseyans, serious environmental, health, and safety concerns must be taken into account before the plant is relicensed. Three and a half million Americans live within a fifty-mile radius of this plant. Congress must recognize that it is imperative that the safety, performance and reliability of this plant be assessed by an independent entity before it is relicensed.

I have been very clear about my support for an independent review of Oyster Creek's safety and security as part of the relicensure process. Such an assessment would have to go beyond what is currently studied by the Nuclear Regulatory Commission (NRC) when it reviews a license renewal. Unfortunately, when the NRC decides whether to renew a plant's license, it does not subject that application to the same thorough analysis that would be applied to a new power plant's application.

In particular, a plant's emergency plan is not evaluated by the NRC when it considers a license renewal. This is surely unacceptable.

The legislation I am introducing would require the NRC to withhold relicensing of the Oyster Creek Station until the National Academy of Sciences provides an independent assessment of safety performance, along with recommendations for relicensing and relicensing conditions. The assess-

ment must identify health risks, vulnerability to terrorist attacks, evacuation plans, population increases, ability to store nuclear waste, safety and security records, and the impact of a nuclear accident. The NRC would not be allowed to grant the license until it gives appropriate consideration to the recommendations in the report. This is important not just for New Jersey as it applies to Oyster Creek, but for all nuclear plants across the country.

In addition, the bill requires NAS to review and recommend what the life expectancy of nuclear plants should be that are designed like Oyster Creek.

Most public officials do not have the training or knowledge base needed to make an independent assessment regarding the safety and security of a nuclear power plant. This is why it is so critical that policymakers solicit the independent and unbiased opinion of experts who are able to thoroughly assess whether the Oyster Creek nuclear power plant would be able to operate without fail throughout the duration of a new license.

This Nation needs a plan for a sound energy future. Such a plan must address the increasing role for clean, renewable energy. The plan, however, must ensure that nuclear power plants such as Oyster Creek operate safely and only as long as they are needed.

If New Jersey's energy future is left up to chance, it could leave my State more reliant on coal-fired energy imported from other States over a regional grid that is unable to handle bulk power transfers of such a magnitude. The obvious end result of such reliance on distantly generated and transported energy is more air pollution and more blackouts.

Considering that New Jersey already suffers from the health effects of out-of-State air pollution and is still smarting from the 2003 blackout, we should know better than to let this happen.

A mistake in this matter has devastating potential consequences for New Jersey. An independent assessment of the safety of Oyster Creek is a significant step to ensure the safety of the 3.5 million residents who live in the vicinity of the plant. This additional layer of safety will help ensure that if Oyster Creek is relicensed, it will have passed a stringent, independent assessment of its safety. New Jersey should not expect anything less when it comes to the safety of its citizens.

I urge my colleagues to support this crucial piece of legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1381

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Oyster Creek Nuclear Generating Station Relicensing Act of 2005".
