

that could hurt American oil companies, reduce production, and put further pressure on already high global oil prices.

He has already seized private oil fields if companies do not convert operating contracts to joint ventures in which the Chavez government assumes a majority stakeholder share. In free countries, that is called extortion.

Elsewhere in Latin America, Nicaragua, Bolivia, and Argentina, Chavez is forging alliances with Socialist groups and narcoterrorists. In Nicaragua, former Sandinista leader Daniel Ortega announced that local governments in Nicaragua that are friendly to Sandinista's cause would receive low-cost oil from Chavez.

Venezuela has been flagged as a major transit country for illegal drug shipments to the United States and Europe. In fact, more than one-third of all cocaine that reaches the U.S. travels through Venezuela from Chavez's allies' countries.

What is worse, at the same time Chavez is cracking down on freedom within Venezuela and exporting his Socialist revolution throughout Latin America, he has embarked on an alarming military build-up.

Chavez is receiving military and intelligence assistance and training from Fidel Castro's government; and he has tried to acquire nuclear technologies from Iran, and reports suggest that Iran has actively sought uranium supplies inside Venezuela.

I have introduced a resolution that addresses these problems and expresses our support for the people of Venezuela to restore democratic institutions. I urge my colleagues to join me in fighting for freedom for the Venezuelan people.

Mr. Speaker, Hugo Chavez seeks nothing less than absolute authoritarian power. He despises freedom. He is determined to alter the balance of power in the Western Hemisphere, and he is leveraging his nation's oil supply to do all he can to achieve his dream of a unified, socialist Latin America.

After all, it was Chavez himself who, with Fidel Castro by his side said, "Fidel, 'I think you were always right: It's socialism or death.'"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. EMANUEL) is recognized for 5 minutes.

(Mr. EMANUEL addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

□ 1930

#### WE NEED ACTION NOT JUST TALK

The SPEAKER pro tempore (Mrs. DRAKE). Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Madam Speaker, when you become President and Vice President of the United States, but you have spent your life in the oil industry, I

suppose it isn't surprising that decisions that you might make when you are President and Vice President would result in your enriching yourself more from the industry in which you had spent your life.

It may not be surprising that gasoline now in this country is well over \$3 a gallon, and imported oil over \$70 a barrel, two-thirds of what we consume in making that gasoline coming from the most undemocratic places in the world, Saudi Arabia, Kuwait, Venezuela, Colombia, Nigeria.

It is interesting, if you look at the President and the Vice President, the President spent his life in Midland, Texas, really drilling that community dry, and then he and his family founded the Zapata Oil Company and made relationships with oil companies in Mexico.

The President that we have now had investments in Bahrain prior to his becoming President of the United States. And the Vice President, of course, was the CEO of Halliburton, which got all of those noncompetitively bid contracts in Iraq.

We watched the former President Bush become a major partner in the Carlisle Group, getting big money from all the oil-producing countries in the Middle East and huge investments and speaking fees from these very same places. Is that merely coincidence?

Yesterday, at long last then we see President Bush make a cameo appearance before the Renewable Fuels Association, and he gave a speech that many people had been waiting years to hear. He said in the speech we needed an investigation of why prices are going up the way they have over the last year. I would like to respectfully suggest to the President we need more than an investigation. We need new energy, new energy leadership by the President and Vice President. We don't need any more studies, and we don't need any more investigations.

The President said that every car can run on 10 percent ethanol. Well, where is his action plan to do it? That is what many of us have been arguing, not just this year, not just last year, going back to the beginning of his administration when we pushed for a renewable energy title as part of the farm bill, and his administration has barely funded it, and they fought it every step of the way inside this Chamber.

Now, the President said that with small changes some cars can run on E-85, a blend of 85 percent ethanol and 15 percent gasoline. Mr. President, there are more than 5 million cars, trucks, vans on the road that will run on 85 percent ethanol right now. Every major manufacturer has announced major efforts to produce more E-85 vehicles. DaimlerChrysler announced two more just this week. Guess what, Mr. President? The drivers can't get the fuel for the cars they have bought. What are you doing to help America develop the infrastructure for these new fuels?

The President talks about increased research for new forms of energy, but what are we doing with the research we already have? Where are the Federal standards requiring Federal buildings to use more solar energy? How about the White House itself? How many Federal facilities are putting wind generators on their own property to develop energy? How many of our military bases are converting to biodiesel and to ethanol? When will the Chevy Suburbans that escort the Presidential motorcades actually use E-85 as an example of what can be done? I encourage the President to put a gas pump right over there at the White House.

The President can talk about not buying oil to place in the Strategic Petroleum Reserve to help hold the price of gasoline down by a penny or two, but why is he letting America continue her addiction to imported oil? Wouldn't a good way to break with the past be to rename the Strategic Petroleum Reserve as the Strategic Fuels Reserve and start filling it with stocks of ethanol and biodiesel that can be rotated through the fuel supply system to help make these new fuels a bigger part of our energy mix? I introduced H.R. 3345 last year to do just that. I invite the President's endorsement of that effort.

We need real action for today and tomorrow, not more of these false promises. We really don't need to build any more oil refineries when we are trying to move to new sources of energy. That would be like building more horseshoe factories when the automotive age was dawning.

We need to mandate that oil companies use their exorbitant properties to put E-85 and biodiesel pumps in the ground right now across this country and to use some of their profits to do that.

We need to help our country, not just let these companies enrich themselves and their top executives more. Then the millions of vehicles that are already on the road could help lead America to a new energy future.

We need a President that gives us some action, not just talk.

We need legislation like the Biofuels Energy Independence Act, H.R. 388, my bill to provide additional financing for the marketing, production, and distribution of biofuels, as well as the establishment of a biofuels feed stock reserve held by our farmers.

We need legislation like H.R. 1398, my bill to require that by 2010 gasoline be blended with at least 10 percent ethanol, and that diesel be blended with at least 5 percent biodiesel. We need standards that give us quantifiable goals against which we can measure progress, and to which we can hold ourselves accountable.

In short, Mr. President, while we appreciate your kind words and good wishes, we are begging for your active support in the form of realistic budget requests, speedy implementation action by agencies, and a commitment to making a difference not 10 years from now when your administration has its place in history but in the remaining days that you have to make a difference that can be felt in every

American home, every American business, and every American community.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. MCHENRY) is recognized for 5 minutes.

(Mr. MCHENRY addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. RAMSTAD) is recognized for 5 minutes.

(Mr. RAMSTAD addressed the House. His remarks will appear hereafter in the Extensions of Remark.)

#### COMMEMORATING MILITARY SERVICE OF FOUNDERS OF STATE OF GEORGIA AIR NATIONAL GUARD FIGHTER AIRCRAFT WING, 54TH FIGHTER WING.

Ms. MCKINNEY. Madam Speaker, I ask unanimous consent to address the House out of order for 5 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Ms. MCKINNEY) is recognized for 5 minutes.

Ms. MCKINNEY. Madam Speaker, I rise today to commend, celebrate and commemorate the military service of Brigadier General "Big John" Collins, Lieutenant General Cuthbert A. "Bill" Patillo, Major General Charles C. "Buck" Patillo and Major General Joel B. "Bill" Paris.

These four generals were, in the year 1946, founders of the first State of Georgia Air National Guard Fighter Aircraft Wing, the 54th Fighter Wing.

Big John Collins is a friend of mine. This friendship began when my efforts resulted in him getting his long overdue war medals. Big John had tried for 20 years to get his medals. And he was a pilot. Bill and Buck Patillo are identical twin brothers who, along with Bill Paris, flew Republic Aircraft Corporation P-47 Thunderbolt fighter aircraft. These four pilots formed a tight "Diamond" attack formation.

These four pilots were ordered to fly at air shows around the State of Georgia to boost enlistments in the Georgia National Guard. The idea was a great success; so successful, in fact, that the increase in Georgia enlistments came to the attention of the National Guard Bureau at the U.S. Air Force headquarters at the Pentagon. This work of these four pilots was the foundation upon which the U.S. Air Force Thunderbirds Precision Flying Team was created to rank along with the Blue Angels Precision Flying Team of the U.S. Navy. Air Force Chief of Staff General Hoyt Vandenberg credited the Georgia Air National Guard with being

the founders of the Air Force Thunderbirds Precision Flying Team.

All four of these pilots are alive today. They are healthy, and they are happy to have their service recognized in this way. Although the Patillo twins now live in Valrico, Florida, near McDill Air Force Base, I am proud to say that they were born in my district in Decatur, Georgia. Bill Paris was born in my home State and still lives in Georgia, in Alpharetta. Big John Collins, my friend, was born in Oklahoma, raised in Bradenton, Florida, but saw the light and found his way to Georgia where he has lived since 1939. I think he found our sweet Georgia peaches too irresistible to leave.

Bill Paris was a leading fighter pilot ace destroying nine Japanese aircraft. Bill Patillo destroyed a Japanese version of the German ME 262 rocket-powered fighter, one of only three of such fighters destroyed worldwide in World War II. Plus Bill destroyed five other Japanese aircraft. Buck Patillo destroyed five Japanese aircraft. And big John Collins, my constituent who has now become my friend, shot down three Japanese fighter aircraft. Sergeant James Campbell shot down two Japanese fighter aircraft. Sergeant Donald Schopp shot down one Japanese fighter, making a total of six enemy fighters downed on one mission. Plus one Japanese war ship exiting Simpson Harbor at full speed was destroyed. Big John Collins led an attack on Tobera Air Drome, destroying numerous Japanese aircraft on the ground.

Bill and Buck Patillo, Bill Paris and Big John Collins collectively received the following combat medals: 4 Silver Stars, 9 Distinguished Flying Crosses, 9 Legion of Merits, 36 Air Medals, 5 Distinguished Service Medals, 9 Presidential Unit Citations, 4 Government of the Philippines, 2 Croix de Guerre with Palm, US SWPA medal with 9 major campaign battle stars, 121 various noncombat service medals.

Sixty years after the conclusion of World War II, all Americans should renew and rededicate their honor for the noble sacrifices, valorous deeds and enduring accomplishments of military veterans of what has become known as the greatest generation.

I would also like to commend my sister colleague, Congresswoman MARCY KAPTUR, who just spoke, who fought hard to get a memorial on the Mall for them, the greatest generation, including for my four Georgia pilots.

Congratulations to them all for a job well done.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GEORGE MILLER) is recognized for 5 minutes.

(Mr. GEORGE MILLER of California addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from New York (Mr. OWENS) is recognized for 5 minutes.

(Mr. OWENS addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. BLUMENAUER) is recognized for 5 minutes.

(Mr. BLUMENAUER addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. CUMMINGS) is recognized for 5 minutes.

(Mr. CUMMINGS addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

#### 30-SOMETHING WORKING GROUP

The SPEAKER pro tempore. Under the Speaker's announced policy of January 4, 2005, the gentlewoman from Florida (Ms. WASSERMAN SCHULTZ) is recognized for 60 minutes as the designee of the minority leader.

Ms. WASSERMAN SCHULTZ. Madam Speaker, Members of the House, it is a pleasure to be here tonight as the 30-something Working Group takes the floor each night to talk about our concerns, both as it relates to our generation and our generation's perspective, and also as it relates to the issues that are important to America.

I can tell you that our thanks goes out to our minority leader, Ms. PELOSI and Mr. HOYER. We have been given the privilege to come to the floor and talk about the concerns of all Americans. And, boy, Mr. RYAN, who I am pleased that you have joined me once again tonight, we have been spending quite a bit of time together in the last 14 months since I joined you in the United States Congress, and it has truly been an honor and a pleasure.

There is sure a lot to talk about. We are facing so many different crises, so many different crises of the confidence of Americans, that it is hard to know where to begin sometimes when we take the floor each night. But I know that the thing that is most on the minds of at least the constituents that I represent, and I am certain the ones that you do, because no matter where we go now, particularly in the last 2 weeks when we were home, gas prices and the energy crisis, because there is no other term you can apply to it, that we are in right now is foremost on the minds of Americans. It is virtually impossible for many Americans to be able to afford to get themselves around their communities. Even when they have mass transit, we are literally stuck in the present. We are stuck in neutral, and it is time to shift into overdrive when it comes to looking towards the future and pursuing alternative energy sources.
