veterans to choose between cost and comfort. That is not the way our veterans should be treated.

I have introduced the Veterans Medicare Assistance Act to correct this problem. Our laws should be working for veterans, not against them. I urge my colleagues to join me in this effort to enable our veterans to use their Medicare benefits to help them pay their bills at VA hospitals.

Most veterans pay into Medicare for most of their lives. This law should not prohibit them from using those Medicare benefits at VA hospitals later on in their lives. Cosponsor H.R. 4992 and show our veterans that we are putting their needs first.

We need to work together in Congress to enhance health care options for our veterans, not take them away.

RAISING QUESTIONS ABOUT THE PRESIDENT'S FLU PLAN

(Mr. EMANUEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks)

Mr. EMANUEL. Mr. Speaker, later this morning, the President will unveil his plan for responding to a flu pandemic. The Homeland Security Department will be playing a key role in the response. That is right, the pandemic flu response will be brought to you by the same people who gave us one heck of a job in responding to Hurricane Katrina.

The other great initiatives were duct tape as a national response to chemical weapons and the Dubai Ports fiasco. According to reports, the President's plan predicts chaos, quote-unquote, with a scenario of nearly 2 million American deaths. Given the Department of Homeland Security's track record, are these really the folks you want in charge of managing our response to a crisis of this magnitude?

The Homeland Security Department had a plan for New Orleans: they just ignored it. And the parts they did follow were so bungled and mismanaged, we are still dealing with the aftermath.

Mr. Speaker, no well-funded plan can go forward without a good general. At a time in which we need Grant, we have got McClellan. Forget the compassionate conservative this President promised; at this point, I would settle for a competent conservative.

BIGGEST REFINERY IN TEXAS

(Mr. POE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. POE. Mr. Speaker, part of the reason gasoline prices have jumped to record highs is because there have been no new refineries or major refinery expansion in America. United States refineries are at 97 percent capacity turning that black gold into gasoline at a rapid rate, but there is a tremendous demand for more refining capacity.

Royal Dutch Shell has announced that the Motiva Refining Plant in Port Arthur, Texas, will expand to become the biggest refinery in the United States. Construction will begin next year. Currently, ExxonMobil, in Baytown, Texas, is the biggest refinery in America. By the way, Mr. Speaker, both of these refineries are in the energy belt of the Texas gulf coast.

To get back on the path of energy self-reliance, the United States needs more American refineries and more offshore drilling. The country has not built a new refinery in over 25 years because of burdensome bureaucratic Federal regulations and environmental energy obstructionists. Congress needs to encourage refinery development and offshore drilling. That will increase supply so that the gasoline price at the pump comes down to an acceptable American consumer level.

The people of southeast Texas welcome Motiva's new progress, and we congratulate them on this endeavor. That's just the way it is.

REPUBLICAN CONGRESS CONTINUES TO WASTE OPPORTUNITIES

(Mr. BLUMENAUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLUMENAUER. We have just heard an example of the Republican line of why there is an energy problem: We haven't built new refineries because of burdensome environmental regulations, Hogwash.

We have had the industry actually close refinery capacity. There is no evidence that there is an inability to build refineries. Sadly, we are continuing the spectacle of the Republican control in Congress to waste opportunities and try to change the subject, whether it is wasting subsidies on oil companies that don't need them or starving renewables and conservation.

The latest debacle is scheduled here on the floor in a few hours, where they will force communities to accept refineries on closed military bases, with no committee markups, no hearings and no meaningful records.

There will come a time when Congress will act like a Congress, will legislate on energy, on conservation, on innovation and prepare for the future, but, sadly, not with this Republican leadership.

CONDEMNING MEXICAN PRESIDENT FOR LEGALIZING DRUGS

(Mr. KELLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KELLER. Mr. Speaker, Vicente Fox, the president of Mexico, is at it again. Yesterday, he said he would sign into law an irresponsible law legalizing the possession of drugs. As a result, millions of American young people who

travel to Mexico for summer vacation will now legally be able to use cocaine, heroin, ecstasy, and marijuana.

How much is okay? Two ecstasy pills, four joints, four lines of cocaine and 25 milligrams of heroin are now all allowed, according to Vicente Fox. Who is advising this guy, Courtney Love?

What a year President Fox is having. Earlier this year, his Mexican government provided maps to illegals to help them cross our borders. Then, his Mexican military soldiers got caught providing an armed escort to Mexican drug smugglers into Texas. Now he wants Congress to reward millions of illegal aliens with amnesty and permanent citizenship so they can earn money here and send it back to Mexico.

Vicente Fox says he's our friend. With friends like these, who needs enemies?

SOARING GAS PRICES

(Mr. STUPAK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STUPAK. Mr. Speaker, it seems almost everyone these days is rightfully outraged at the massive profits of oil and gas executives and companies. While they are raking in record profits, gas prices hit historic highs. That is, everyone except House Republicans.

It is not enough that Republicans supported provisions in the energy bill last year that provided oil companies with \$20 billion in special interest gifts while neglecting to include any real initiatives that would lower gas prices, but House Republicans then repeatedly refused to support Democratic efforts to give the Federal Trade Commission the authority to investigate all price gouging at all points of the supply chain. And last week. House Republicans had the opportunity to roll back \$5 billion in additional tax breaks for oil companies over the next 5 years but voted overwhelmingly to reject this Democratic proposal.

Are House Republicans that far out of touch? Don't they realize that companies with profits of \$130 billion last year do not need tax breaks? Mr. Speaker, the cozy relationship House Republicans have with oil and gas executives is hurting everyday Americans who are struggling to pay record prices at the pump.

U.S. LEADS WORLD IN COAL

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, the problem we have is our reliance on imported crude oil. The way we try to address this solution is through renewable fuels, conservation, additional exploration and new technologies. I want to talk about one of those new technologies today, which is coal-to-liquid application, called Btu conversion.

Imagine this: a coal mine in the Midwest, on top of which sits a refinery, a liquid fuel refinery. Sound far fetched? Well, this technology has been around for 50 years. The Germans used it in World War II.

The refinery bill that we have on the floor of the House today will provide the same incentives to expansion of petroleum refineries to coal-to-liquid applications.

Mr. Speaker, the U.S. has 27 percent of the world coal supply, the largest of any country, but less than 2 percent of the world's oil and less than 3 percent of the world's natural gas. For a forceful response to the energy challenge, the U.S. must make much greater use of its unrivaled coal reserves.

□ 1015

ENERGY POLICY

(Mr. LANGEVIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANGEVIN. Mr. Speaker, as of this morning, Rhode Islanders are paying on average \$2.92 a gallon for gasoline. That is 40 cents more than they were paying a month ago and 70 cents more than a year ago.

Last year, Congress passed an energy bill which I opposed because it gave away billions of tax dollars to oil and gas companies, instead of investing in new technologies, alternative fuels and energy efficiency.

As it turns out, oil and gas prices have gone up since we passed the Republican energy bill. And you know what else has gone up? The profits of oil and gas companies. Now the Republican majority is proposing even more giveaways to the oil and gas industry by handing over Federal lands to open refineries and by opening up ANWR.

Mr. Speaker, enough is enough. We cannot simply drill our way out of this crisis. Growing demand from China and India and other countries is going to keep the cost of oil high for years to come, and subsidies to the oil and gas industry will not change that. We need new leadership that will promote an energy policy that encourages new technologies, energy efficiency and creates American jobs.

This morning on the "Today Show," the chairman of ExxonMobil said they were in the business of making money. Well, we are in the business of protecting the American people, and it is about time this Congress does its job.

THE FOUR-STEP DANCE

(Ms. FOXX asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FOXX. Mr. Speaker, in country line dancing there is a dance called the two-step. When it comes to energy policy, the Democrats have come up with their own dance, the four-step. Here is how it goes:

First, Democrats do not acknowledge the supply component in the supply and demand principle of economics. When confronted with solutions to the supply problem, Democrats always vote "no" and drive up prices.

Step two for Democrats is to scream about the evil of SUVs, even though they may be driven around in one.

Step three for Democrats is to call for investigations, point fingers, call for investment in R&D that already exists, and say that if it weren't for those darn Republicans, we could get off oil tomorrow.

Finally, step four for Democrats is repeating steps one, two and three until voters and the media stop paying attention.

Mr. Speaker, if this sounds familiar, it should. Since President Clinton vetoed ANWR in 1995, Democrats have performed this dance when it comes to increasing our energy supply. But with gas reaching \$3 a gallon, Democrats need to retire it and learn a new dance, but they should try to learn one that will actually increase our oil supply.

ADDRESSING ENERGY NEEDS

(Mrs. MALONEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MALONEY. Mr. Speaker, when President Bush took office 5 years ago, the average price at the gas pump was \$1.45. It has more than doubled over the past 5 years. And Republicans over the past 5 years have controlled the House, the Senate and the White House. Washington Republicans have done nothing to pass a sound energy policy that would wean us from foreign oil, create conservation programs, and provide incentives to develop alternative fuels, programs that would help us provide consumers some relief.

It took Republicans 4 years before they finally passed an energy bill, but that bill continued massive subsidies to the oil industry like the rip-off "royalty in kind" program. The President's own Energy Department admitted at the time that the energy bill would do absolutely nothing to lower gas prices. Five years of Republican power, and 5 years of no positive results for the consumer.

IMMIGRATION AND ENERGY PRICES

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, it is quite obvious that everyone is talking about the issues of the day: immigration and energy prices. And too many in this body are overcomplicating the issue. It is really not that hard. On immigration, secure the border, build a wall if necessary. Secure the border. It is what our constituents in Tennessee want. It is what the Republican major-

ity want. It is what the American people want and need.

On energy, we should be exploring for domestic sources of energy. We should pass the energy legislation that is going to come before this body this week. We should define price gouging, set some penalties, encourage construction of refineries. Currently, we are not doing that.

Liberals in Congress have spent the past three decades pandering to environmental extremists. The policies they have put in place are in large part responsible for the energy crunch we are seeing today. We have not built a refinery in this country for 30 years.

Mr. Speaker, the liberals need to start serving American families and stop serving special interests.

PHONY LOBBYING REFORM BILL

(Mr. BERRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BERRY. Mr. Speaker, first of all, I would ask that everyone remember our men and women in uniform and keep them in your hearts and minds and certainly in your prayers, especially those on the battlefield today.

Today, the Republican Congress is going to attempt to extend the culture of corruption and chaos. They are going to offer a so-called lobbying reform bill. It makes me think of that wonderful American, Merle Haggard, who wrote a song called "Rainbow Stew." It goes something like this: When a President goes through the white House door and does what he says he'll do, we'll all be drinking that free Bubble-Up and eating that rainbow stew.

This bill is clearly rainbow stew. It is a phony lobbying reform bill. America deserves better. America deserves integrity. America deserves honor. And they certainly don't deserve another dose of rainbow stew and free Bubble-Up.

ECONOMIC BOOM IN AMERICA

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, America's economy continues to surge ahead, delivering tremendous benefits to families throughout our country.

Over the past 3 years, over 5.1 million Americans have found new jobs. I am glad that my visitors from Grace Christian School will enjoy expanded job opportunities, inspired by Jeanne Sleigher and Tim Stevens.

While House Democrats ignore this continued job creation, it is obvious that the 2003 tax cuts were the true source behind the tremendous economic growth in our country.

Last week, we witnessed another example of economic excellence in America. Last Friday, the Department of
