

Some of them are living like that now, and some of the communities down there have been virtually emptied out of the working-age people. Senior citizens only sitting there waiting for the giant ATM America to zap a portion of the \$20 billion that goes to Mexico or the overall \$30 billion that goes to Mexico and Central and parts of South America. That is \$30 billion out of the wages earned here that are wired down there, and some to be saved in banks for retirement, as they plan on returning back, and some to be spent to maintain the senior citizens that are there, the parents and the extended family members.

What does this do for Mexico if we set up a policy here that draws or magnetizes and attracts every willing person in Mexico and in Central America to come to the United States and empties out their communities and drains them of the flower of their youth and the productivity and the vitality of their Nation? What future then does that country have, particularly Mexico, with the vast natural resources, with the huge quantity of oil, much of it not developed to the extent it should be? This Nation would sit there on a massive supply of natural resources without the human energy, without the skills, without the education, without the technology to develop it.

Nature abhors a vacuum. Something, Mr. Speaker, will fill that vacuum. We have the Chinese that are in Central America today, and they are involved in drilling for oil offshore of Cuba, between Cuba and Florida. They are involved in the Panama Canal. They are looking, I am convinced, at potentially filling a vacuum that could be created.

I submit that we shut off the jobs magnet. I submit that, when we do so, there will be people making a decision to go back to their home country because that opportunity they came for is no longer here. If that happens, Mr. Speaker, we can send back to their home country a very skilled and educated group of people who can transform Mexico and take them into the 21st century.
