H.R. 5384

OFFERED BY: Mr. KING OF IOWA

AMENDMENT No. 20: At the end of the bill (before the short title), add the following new section:

SEC. ____ (a) SHORT TITLE.—This section may be cited as the “Livestock Identification and Marketing Opportunities Act”.

(b) FINDINGS.—Congress finds the following:

(1) For purposes of animal health investigation and surveillance, there needs to be an identification system that can trace animals from the time of first movement of the animal from its original premise to the time of slaughter of the animal in less than 48 hours.

(2) The beef industry estimates that the United States cattle industry lost approximately \$3,000,000,000 in export value on beef, beef variety meats, hides, and tallow during the 12 months after a December 2003 diagnosis in the United States of bovine spongiform encephalopathy. A livestock identification system may have prevented some of this loss.

(3) In order to be as efficient as possible, the livestock identification system needs to be automated and electronic with participants using compatible technologies.

(4) The livestock identification system needs to be flexible enough to adapt to changes in technology and to the demands of the industry and the markets.

(5) The best technology available should be used for the livestock identification system while still allowing for registration into the system for livestock owners who are economically disadvantaged.

(6) Confidentiality of information on animal movements, sales, and ownership is necessary to ensure that livestock owners have the confidence to comply with and fully participate in the livestock identification system.

(7) Besides animal disease surveillance, the livestock identification system should provide a commercial information exchange infrastructure that would allow for enhanced marketing opportunities.

(c) LIVESTOCK IDENTIFICATION BOARD.—

(1) ESTABLISHMENT.—There is established a board to be known as the “Livestock Identification Board”.

(2) DUTIES.—The duties of the Board shall be to—

(ii) tracks all relevant information about the livestock, including—

(I) the livestock identification number or the group or lot identification number for the livestock, as applicable;

(II) the date the livestock identification number or the group or lot identification number was assigned;

(III) the premise identification number;

(IV) the species of the livestock;

(V) the date of birth of the livestock, to the extent possible;

(VI) the sex of the livestock;
