

men and the rate among Black women is sixteen times that of white women. More children with AIDS are African American than all other race and ethnic groups combined. There is no question that we must continue to devote considerable attention and resources to support the efforts of National Black HIV/AIDS Awareness Day and its mission to build capacity and increase the awareness, participation and support for HIV prevention, care and treatment among African Americans in particular. For these many reasons, I urge you to support the passage of H. Con. Res. 35, National Black HIV/AIDS Awareness Day.

While a cure for HIV/AIDS remains just beyond our reach, there are many known factors that contribute to the devastating effects that HIV/AIDS continues to have in the African American community in particular. For example, we know that the stigmatization surrounding those with HIV/AIDS deters many from being tested and learning about treatment needed to prolong their lifespan. We also know that economic issues such as the need for more inexpensive housing, substantial increases in livable wages and affordable health care, weakens community ties making it difficult to build capacity, disseminate information and target interventions. It is also evident that funds are needed to support these initiatives, perform meaningful outreach and provide organizations with the resources necessary to serve this vulnerable population.

It is important for us to increase knowledge about preventative measures, educational techniques, capacity building and outreach to find targeted solutions to the problem of HIV/AIDS in the Black Community. In the State of New York alone there are 33,747 Black Americans living with HIV/AIDS. Sadly, this number will continue to grow at exponential rates without the attention, care and resources supported by the National Black HIV/AIDS Awareness Day. While it is important to direct resources to Black Americans and others who are disproportionately affected by HIV/AIDS, we must remember that HIV/AIDS does not discriminate. It is estimated that between 1,039,000 and 1,185,000 infected persons live in the United States and approximately 40,000 new infections occur each year. Those affected belong to all gender, racial, ethnic, religious, socio economic and regional configurations. Those affected are mothers and fathers, sisters and our brothers, bosses, friends, and children.

The devastating effect of HIV/AIDS impacts us all. Confronting this international crisis will require the collective efforts of researchers, legislators, clergy members, community activists and organizations, and all others committed to reducing the force of HIV/AIDS. We must work together to find solutions that are scaleable and make possible innovations that result in value adding and sustainable positive changes.

Observance of the National Black HIV/AIDS Awareness Day provides an opportunity for governments, national AIDS programs, churches, community organizations and individuals to communicate the importance of the fight against HIV/AIDS. If we have any hope of ending conversations about the injurious effects of HIV/AIDS, we must immediately devote the time, energy and resources needed to educate, treat and prevent against future transmission.

RECOGNIZING MATTHEW HELM
FOR ACHIEVING THE RANK OF
EAGLE SCOUT

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 7, 2007

Mr. GRAVES. Madam Speaker, I proudly pause to recognize Matthew Helm, a very special young man who has exemplified the finest qualities of citizenship and leadership by taking an active part in the Boy Scouts of America, Troop 138, and in earning the most prestigious award of Eagle Scout.

Matthew has been very active with his troop, participating in many scout activities. Over the many years Matthew has been involved with scouting, he has not only earned numerous merit badges, but also the respect of his family, peers, and community.

Madam Speaker, I proudly ask you to join me in commending Matthew Helm for his accomplishments with the Boy Scouts of America and for his efforts put forth in achieving the highest distinction of Eagle Scout.

IN HONOR OF VERNA M.
WOOLFOLK-SLOAN

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 7, 2007

Mr. FARR. Madam Speaker, I rise today to speak in honor of Verna M. Woolfolk-Sloan, who passed away on Wednesday, January 31, at the age of 81. Verna lived in Central California's Monterey County for more than 50 years. In that time she built a great record of personal, professional, and community achievement in advancing equal employment opportunity for women and minorities.

Verna was born in Providence, Kentucky and received straight A's throughout school, indicative of professional successes to come. She graduated as class Valedictorian from Rosenwald High School. Verna married Sergeant First Class Robert D. Sloan and they traveled throughout the United States and Germany with their son Joseph. They first set down roots in Seaside with her husband's 1955 posting to Fort Ord. A lifelong learner, Verna studied at Monterey Peninsula College, was awarded high honors in a Masters Degree in Business Administration from Golden Gate University, and later completed a Ph.D. in Organizational Psychology from International University.

Verna's motivation for education and equal opportunity came from her paternal grandparents, former slaves, who established Woolfolk School as the first Black secondary school in Kentucky. These principles guided her civil service career, which she began in 1956 as a simple typist, before climbing the career ladder as an accountant, manager, and ultimately Director of the U.S. Army's Equal Opportunity Office, which monitored and oversaw equal employment opportunity programs at Fort Ord and Fort McArthur. Here, she was the highest-ranking civilian employee at these bases.

Retiring after forty years of civil service employment gave Verna an opportunity to be-

come ever more deeply involved in her local community as a volunteer. She was a Golden Heritage life member, Secretary and Executive Committee member of the Monterey Peninsula's branch of the National Association for the Advancement of Colored People, and held seats on the boards of many Christian, cultural, and women's organizations. Verna was a role model and inspiration to countless young women and minorities in her local Monterey County, and was recognized with a number of awards, including the Outstanding Woman of Achievement Award and the Outstanding Equal Opportunity Officer award.

She is survived by her sister Eloise Wells of Marina, her brother Thomas Woolfolk of Chicago, grandson Joseph Sloan, Jr. of Atlanta, along with numerous beloved family members, including two great great nieces, one great great nephew, and three godchildren. Many of her family are also based in Seaside or Monterey County, which will ensure her legacy is continued and her work remembered in the district.

Madam Speaker, on behalf of the House, I would like to extend our Nation's deepest thanks for Verna's service to the United States and her local community. Her dedication and commitment opened the door to equal opportunity for many to whom that door would have otherwise been closed, and I know that I speak for every member of Congress when I say that it is our honor to recognize her today.

TOM MARTIN

HON. JANE HARMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 7, 2007

Ms. HARMAN. Madam Speaker, every once in a while, someone great comes along who flawlessly fills a position and epitomizes the role he or she performs. Tom Martin, long-time aide and Field Representative to Los Angeles County Supervisor Don Knabe, is such a person.

Tom spent almost 35 years working in state and local government, retiring only after a serious health condition forced him from the job he loved. These many years of public service earned him the well-deserved nickname "Godfather of Field Deputies." It's widely acknowledged that few people in the region have done as much as Tom has for so many. And his upbeat demeanor is always matched with seemingly effortless action. For Tom, helping people has always been second-nature.

I do not think I have ever seen Tom without a smile on his face, or heard him say "no" to someone. From 1969 until his retirement in 2005, Tom worked to improve the lives of his neighbors and enhance the community. During that time, the South Bay saw many changes, but one thing remained constant: Tom was always there to listen and to assist those who came to him with their problems, concerns, and ideas.

No item was too small for Tom when it came to helping others and he seemed to involve himself in everything. He ensured that the lights would be promptly fixed in Marina del Ray. He made limiting growth at LAX and its modernization a priority. And he was instrumental in engineering the land swap that saved Los Angeles Air Force Base in the most

recent base closure round. Over the years, Tom worked closely with me and my office and grew to be a personal friend.

But I never saw 'working' with Tom as work. Each meeting, each conversation was more of an interaction with an old friend than official business. His personal generosity integrated itself into the way he approached his job and how he lives his life.

Today, I honor his career and his service to the community. And I wish Tom improving health and Jeri and Tom many, many more years of happiness together.

DEPARTMENT OF PEACE

HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 7, 2007

Mr. LEWIS of Georgia. Madam Speaker, I rise today to support the establishment of a Department of Peace and Nonviolence as a cabinet-level office of the executive branch of our government. I agree with Representative KUCINICH that war and the threat of war have dominated international relationships for much too long. As a participant in the Civil Rights Movement, as a human being who has faced the barrel of a loaded gun armed only with the philosophy of peace, it has been my belief for many years that war is obsolete as a tool of our foreign policy. But I realize that position may be too progressive for many of my colleagues to accept.

But maybe, just maybe at this moment in our nation's history, when we find ourselves struggling with the hopeless legacy of violence, maybe, just maybe we might be willing to consider the methods of peace as an intelligent, strategic alternative to war. At this very moment our sons and daughters are battling in the middle of an unnecessary war, a war we started, hoping that we could force democracy to grow.

But Mahatma Gandhi once said that violence begets violence. And a recipient of the Nobel Prize for Peace, Martin Luther King, Jr., once said if we as a people want peaceful ends, we must use peaceful means. When will the warring factions in Syria, Lebanon, Israel, Iran, Iraq, Afghanistan and the United States be willing to say they have spilled enough innocent blood? When will they say it is time for us to lay down the tools and instruments of war? Today, can we hear the words of Gandhi, perhaps stronger now than ever before, "We must choose non-violence or non-existence"?

Are we finally willing to hear the words of Martin Luther King, Jr., "We must learn to live as brothers and sisters or perish as fools"? Can we, the most powerful nation in the world, use our influence, to raise these questions and give peace a chance?

Madam Speaker, as a nation and as a people we have researched, written about, studied, constructed, deployed and spent trillions of dollars on the best ways to destroy humanity. We have used the power of fear to dominate world affairs. What would happen if the most powerful nation on earth took the lead and through this Department of Peace decided to put even half of those resources toward developing ways to sustain humanity, ways to keep the peace in spite of competing inter-

national interests, and ways to gain influence using the power of diplomacy and negotiation?

Without constructive, alternative policies, without viable tools that leaders of nations and leaders of human kind can reach for, peace will always be a vanishing ideal that holds no substance. If we truly believe that peace is our ultimate goal, then we must use the resources of this great nation to that end. We must use the brilliance of American intelligence to develop the methods and mechanisms of peace, even more actively than we develop the mechanisms of war. That's why we need a Peace Academy that will create a diplomatic corps armed with the tools of peaceful influence.

We are all one people, Madam Speaker. We are one family, the human family, and we must find a way to understand each other, to make peace, and learn to live together.

THE GLOBAL CHANGE RESEARCH
AND DATA MANAGEMENT ACT
OF 2007

HON. MARK UDALL

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 7, 2007

Mr. UDALL of Colorado. Madam Speaker, today I am pleased to introduce the Global Change Research and Data Management Act of 2007 with my colleague from South Carolina, Mr. INGLIS. This bill updates the existing law that formally established the U.S. Global Change Research Program (USGCRP) in 1990. This bill is also similar to the Global Change Research and Data Management Act that I introduced in the 107th and 108th Congresses.

Over the past decade, the USGCRP has significantly advanced our scientific knowledge of Earth's atmosphere and climate and has provided us with a wealth of new data and information about the functioning of our planet.

However, the program has not produced sufficient information, both in terms of content and format, to be the basis for sound decisions. The program has focused nearly all of its resources and efforts on scientific inquiry. Only one broad assessment of the impact of global change on society has ever been attempted by the program, and that assessment was completed nearly 7 years after its Congressionally mandated deadline. The local, state, regional, and national policymakers responsible for managing resources, fostering economic development, and responding to natural disasters need information to guide their decisions. In my view, it is critical that Congress reorient the USGCRP toward a user-driven research endeavor.

The recent release of the policy summary from the Fourth Assessment Report by the Intergovernmental Panel on Climate Change (IPCC), Working Group I, has helped solidify the growing scientific consensus that our climate is changing. This international effort had government support from around the world, including strong involvement from the U.S., and is a summary of the latest science about our climate. It reports that the Earth is warming—sea temperatures are rising, glaciers are melting, and air temperatures worldwide are increasing.

Most of the public and policy makers also agree that the climate is changing, but dis-

agreement remains about how much is the result of human activities. I think this bill deserves the support of people on both sides of that argument.

We need to move beyond debates about whether global change is occurring and allocating responsibility for the changes. I continue to believe fervently that we must do all we can to soften our impact on the environment and to slow the pace of global change. But we are going to have to deal with climate change with some mix of mitigation and adaptation. We must acknowledge the interdependence of our social, economic and environmental systems and learn to anticipate and adjust to changes that will inevitably occur.

In its 2003 review of the Administration's draft strategic plan for the USGCRP, the National Academy of Sciences (NAS) acknowledged the need for research to evaluate strategies to mitigate and adapt to the impacts of global change, and the Academy recommended that the plan be revised to enhance efforts to support decision-making. The Global Change Research and Data Management Act of 2007 reorients the program to accomplish these goals.

The NAS praised the Administration for including the development of decision support tools in the strategic plan, but criticized the plan for its failure to "recognize the full diversity of decision makers" and for failing to "describe mechanisms for two-way communication with stakeholders."

The Global Change Research and Data Management Act would address these criticisms by requiring the Administration to identify and consult with members of the user community in developing the USGCRP research plan. The bill would also mandate the involvement of the National Governors Association in evaluating the program plan from the perspective of the user community. These steps would help to ensure that the information needs of the policy community will be met as generously as the funding needs of the academic community.

The 1990 law outlined a highly specific organizational structure for the USGCRP. Our bill would eliminate this detailed organizational structure and provide the President with the flexibility to assemble an Interagency Committee and organizational structure that will best deliver the products Congress is requesting. Our bill would, however, retain many of the key features of current law—the requirements for a ten-year strategic plan, for periodic assessments of the effects of global change on the natural, social, and economic systems upon which we depend, and for increased international cooperation in global change science.

Our bill would establish a new interagency working group to coordinate federal policies on data management and archiving. Advances in computer, monitoring, and satellite technologies have vastly expanded our ability to collect and analyze data. We must do a much better job of managing and archiving these important data resources to support the work of current and future scientists and policymakers.

I would like to thank Mr. INGLIS from South Carolina for cosponsoring of this bill. Crafting a new approach for the USGCRP is a non-partisan issue—increasing access to better and more relevant science is something that we all can agree will help us make better decisions.
