

we could pass this resolution during Lung Cancer Awareness Month.

House Resolution 335 calls on the President to declare lung cancer a public health priority and encourages a greater investment in lung cancer research. This could not come at a more important time.

We have just seen newly released statistics that show, while overall cancer mortality rates are dropping quicker than ever, lung cancer mortality rates in women are actually increasing. As our Nation is committed to working towards the goal of eliminating all cancer deaths by 2015, the statistics for lung cancer are extremely disappointing.

Mr. Speaker, lung cancer is the number one cancer killer of both men and women, yet we are perhaps making the least amount of progress in effectively treating it. We must put greater investment into prevention and early diagnosis of lung cancer. This is the only way to improve outcomes.

One of the most effective ways to reduce lung cancer incidence is, of course, smoking cessation. I am proud of the remarkable achievements our Nation has made to encourage smokers to quit, and better yet, to teach people never to begin at all.

Disappointingly, some of America's leading women's magazines don't share that goal. As many of you have heard and seen, they continue running ads for cigarettes like Camel No. 9 which are clearly targeted at young women.

After years of steady decline, smoking rates have remained stagnant from 2004 to 2006. Launching an aggressive marketing campaign targeting young people is a terrible step backwards in our national efforts to reduce smoking. I hope this resolution today will reinforce our commitment to smoking cessation.

But one of the lesser known facts of lung cancer is that 8 percent of men and an astonishing 20 percent of women with lung cancer have never smoked. I am very aware of this fact through my own personal experience as my daughter became one of these statistics. I think the Nation as a whole became more aware with more visible cases, such as Dana Reeve. It often takes a high-profile case to propel us into action, and I hope that the growing awareness and action over the past 2 years will continue to improve our understanding of and our ability to confront lung cancer.

With a greater investment into integrated, multidisciplinary research organized around lung cancer, we do have a chance of reducing death. Let us use the opportunity of passing this resolution to reaffirm our shared commitment to combating lung cancer deaths, truly making it a public health priority for our Nation. I urge my colleagues to support H. Res. 335.

Mr. Speaker, I reserve the balance of my time.

Mr. UPTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to thank my colleague, Mrs. CAPPS. And I also want to thank Chairman DINGELL and Ranking Member BARTON, and others who have had a real hand in moving this legislation before us.

I rise today in support of this resolution, a resolution recognizing the impact of lung cancer and the recent recommendations of the Lung Cancer Progress Review Group of the National Cancer Institute. This group's process is a comprehensive, collaborative, integrated approach to control and eliminate lung cancer. The group was tasked with making recommendations, strategizing, and reporting on progress made in an effort to control and eliminate lung cancer.

□ 1400

The group was able to identify scientific priorities and needs and set forth a national agenda for research on lung cancer.

This Progress Review Group made the recommendation to foster the creation of scientifically integrated multi-institutional research consortia organized around the problem of lung cancer rather than around specific research disciplines. The recommendation speaks to the ongoing work at the NIH as well as in the private sector for cross-cutting research. And as a Congress, it is our responsibility to endow these researchers to best pursue answers. This report clarifies the benefits of broad science. Putting disease research into silos so that, as so many authorizing bills often do, is not always helpful to the greater goal. Let's take these recommendations to pursue a multilevel, multidisciplinary science in an effort to find a cure for lung cancer or thousands of other diseases that afflict the world. Reducing the mortality rate of lung cancer is an objective to which we all can subscribe. It is our responsibility to make sure that the scientists have the tools and the access necessary to pursue a cure.

So many of us here have been with someone at a bedside that is suffering from this awful disease, one of the worst. It is a great step forward that we can pass this legislation, to see the research come about, the funding with it, so that some day in fact we will have a cure to prevent this tragedy in families across the globe.

I yield back the balance of my time.

Mrs. CAPPS. In closing, I just want to urge our colleagues to pass this resolution and to press forward with the research on lung cancer. I do this in the name of my daughter and of Dana Reeve and other people whose lives have not been saved but who could be promoting others to be encouraged to eradicate this most deadly of cancer scourges.

I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PASTOR). The question is on the motion offered by the gentlewoman from California (Mrs. CAPPS) that the House suspend the rules and agree to the resolution, H. Res. 335, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

The title was amended so as to read: "Resolution expressing the sense of the House of Representatives with respect to lung cancer as a public health priority and the recommendations of the Lung Cancer Progress Review Group of the National Cancer Institute."

A motion to reconsider was laid on the table.

SUPPORTING THE GOALS AND IDEALS OF CHILDREN'S HEALTH MONTH

Mrs. CAPPS. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 760) supporting the goals and ideals of Children's Health Month, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 760

Whereas children comprise one quarter of the population of the United States;

Whereas nearly 1 in 5 children in the United States are overweight;

Whereas 7 percent of children in the United States have limitations on activity due to chronic health conditions;

Whereas an estimated 12 percent of high school seniors put themselves at risk by smoking cigarettes daily;

Whereas children account for 30,000,000 annual visits to the emergency room to receive care for injuries or illnesses;

Whereas asthma affects nearly 5,000,000 American children;

Whereas allergies affect about 50,000,000 American children;

Whereas motor vehicle crashes are the number one cause of death for children and adolescents ages 1 to 21;

Whereas dental caries is the most common chronic disease affecting American children, and is 5 times more common than asthma and 7 times more common than hay fever;

Whereas during fiscal year 2005, an estimated 899,000 children in the 50 States, the District of Columbia, and Puerto Rico were determined to be victims of abuse or neglect; and

Whereas every year since 1928 the President has issued a proclamation designating the month October as "Children's Health Month": Now, therefore, be it

Resolved, That the House of Representatives—

(1) supports the goals and ideals of Children's Health Month;

(2) invites the chief executive officers of the States, territories, and possessions of the United States to issue proclamations recognizing the goals and ideals of Children's Health Month;

(3) commends the efforts of States, territories, and possessions of the United States, localities, nonprofit organizations, businesses, and the people of the United States who support the goals and ideals of Children's Health Month;

(4) recognizes and reaffirms our Nation's commitment to providing access to health care, ensuring preventative care, seeking cures for debilitating diseases and chronic conditions, and promoting healthy living habits for America's children;

(5) recognizes and salutes the health care professionals who provide care and treatment for childhood illnesses and afflictions;

(6) recognizes and salutes the officials who protect children from environmental health and safety risks;

(7) recognizes and salutes the officials who educate parents, schools, and communities about health risks and related issues for children; and

(8) encourages States, territories, and possessions of the United States to educate children about healthy living habits when they are young so that they will be more likely to lead healthy lives as adults.

The SPEAKER pro tempore (Mr. COSTA). Pursuant to the rule, the gentlewoman from California (Mrs. CAPPS) and the gentleman from Michigan (Mr. UPTON) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Mrs. CAPPS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Mrs. CAPPS. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of House Resolution 760 which supports the goals and ideals of Children's Health Month. I commend my colleagues, Kathy Castor of Florida and Dave Reichert of Washington, for introducing this important resolution. A school nurse myself for 20 or more years, I can't emphasize enough the importance of reaffirming a stronger commitment to provide better access to health care for children.

We absolutely must take greater steps in providing preventive care, promoting healthy habits, and finding cures to chronic conditions that are becoming more prevalent in our Nation's children.

Perhaps one of the greatest steps we can take is to finally reauthorize the Children's Health Insurance Programs. As this resolution notes, one of the greatest contributors to unhealthy outcomes in our children is a lack of access to care. Our Children's Health Insurance Program would provide health care access to an additional 4 million children who are eligible but not now covered. This bill was supported by 265 House Members and 64 Senators. I hope we will soon see this bill signed into law. Though we know there are other steps we must also take, this is the primary one.

There are steps in addition to this legislation that we can take. When one in five children in the United States are overweight, 5 million children are affected by asthma, and 50 million children suffer from allergies, we know we must take steps to improve healthy environments as well as healthy habits. With this resolution, we applaud the efforts of the many families, communities, health care professionals, and others in our communities, and officials as well, who are taking these steps already; and we encourage in this

resolution that States be proactive in promoting healthy living habits to children so that they can lead healthy lives as adults.

Most importantly, perhaps, this resolution reminds us of what our priorities in this Congress should be. Undoubtedly, our children should be number one. I commend this resolution for reaffirming that.

I reserve the balance of my time.

Mr. UPTON. Mr. Speaker, I yield myself such time as I might consume.

I want to again thank Chairman DINGELL, Ranking Member BARTON, and certainly LOIS CAPPS for her leadership on this issue. I again rise in support of H. Res. 760, a resolution supporting the goals and ideals of Children's Health Month.

The overarching goal of designating October each year as Children's Health Month is to draw attention to the need to provide access to health care, insuring preventative care, seek cures for diseases and chronic conditions, and promote healthy living habits for all of America's children.

There has been much discussion recently both on the floor and in the media about children's health care. The objective, obviously, to cover the health needs of children is of paramount concern, particularly with low-income children. Children's Health Month should remind us of that important message. I stand in support, and ask that my colleagues support the resolution as well.

I reserve the balance of my time.

Mrs. CAPPS. Mr. Speaker, I am very pleased to yield such time as she may consume to the gentlewoman from Florida (Ms. CASTOR).

Ms. CASTOR. Mr. Speaker, I would like to thank my good friend and colleague, Mrs. CAPPS from California, for yielding the time, and thank her for her ongoing efforts and advocacy on behalf of the health of America's children and all Americans all across this country.

Mr. Speaker, I rise today in support of House Resolution 760, supporting the goals and ideals of Children's Health Month. As cochair of the Congressional Children's Health Care Caucus, I am pleased to offer this resolution along with my colleague from the other side of the aisle, Mr. REICHERT of Washington, who is the cochair of the caucus.

This has been an important year for work on children's health issues. As grandparents and parents and teachers and doctors and nurses and all community members understand, our work on behalf of children's health is constant, notwithstanding the fact that we are going to recognize a certain month here today.

We are working on behalf of children's health in so many collaborative ways, and we want to encourage more. We are encouraging families and schools to focus on healthy living habits and healthy nutrition for children. We are working to combat childhood

obesity and to promote exercise and physical activity. We are continuing our concerted efforts to keep our children and teens from smoking. We are working to educate families and raise medical awareness about critical childhood illnesses such as asthma and diabetes. And, so many across this country are working to help parents and other families sign their kids up for Medicaid and the Children's Health Insurance Program, and those activities must continue.

But our concerns are not limited only to the physical health of our children, but also to their mental health and their behavioral health. I note just today that two new studies were released relating to early childhood behavior. We have got to remain at the cutting edge, and we have got to continue to encourage our talented researchers in my home State in Florida, Mrs. CAPPS' State of California, and all across the country to continue their work.

In addition, all too often our children are victims of abuse and neglect and do not receive the special care required to meet their health care needs and their mental health care needs. Here in the Congress, we are working to ensure that these disparities are eliminated and that our children receive all the support that they need. We would like our neighbors back home to know that we care about their families and the well-being of their children, and we will continue to draw attention to these issues and work hard to amend these problems.

Mr. Speaker, today as we acknowledge Children's Health Month and the importance of its meaning, we remind our neighbors and this body of the special attention needed for children's health. We salute the parents, pediatricians, nurses, and all community members that work every day to care for our kids, for their physical and mental well-being. We commend those institutions that have honored the goals of this special month, and we acknowledge the importance of supporting America's children by reinforcing our sincere dedication to providing access to health care for our kids, ensuring preventative care, seeking cures for debilitating diseases and chronic conditions, and promoting healthy lifestyles for America's children.

Mr. UPTON. Mr. Speaker, I yield back the balance of my time.

Mrs. CAPPS. Mr. Speaker, in closing, I would like to urge adoption of this resolution which goes to the heart of a major priority that we have in this Congress, which is to support our children's health. This is for the sake of our children, of course, but it is also on behalf of their families, the most important people in their lives, on behalf of our communities. And really, in truth, it is about our future, because, after all, our children are our future, and a healthy future is that much better for all of us.

Mrs. CAPPS. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Mrs. CAPPs) that the House suspend the rules and agree to the resolution, H. Res. 760, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

SUPPORTING THE GOAL AND MISSION OF AMERICA RECYCLES DAY

Mr. WYNN. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 122) supporting the goal and mission of America Recycles Day, as amended.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 122

Whereas America Recycles Day is on November 15th of each year;

Whereas America Recycles Day is an annual national awareness event, the mission of which is promoting the social, environmental, and economic benefits of recycling and buying recycled-content products;

Whereas the goal of America Recycles Day is to increase the purchase of recycled-content products and recycling throughout America;

Whereas Americans have a long tradition of recycling;

Whereas in 1896, the first recycling center was established in New York City, and, by 1989, the Environmental Protection Agency had set a national waste reduction and recycling goal, and 26 States had enacted laws making recycling an integral part of their solid waste management plans;

Whereas in 2003, homes, businesses, and institutions in the United States produced more than 236,000,000 tons of municipal solid waste;

Whereas this amounts to approximately 4.5 pounds of waste per person in the United States per day, and is almost triple the amount of municipal solid waste generated in 1960;

Whereas the Environmental Protection Agency reports that 30 percent of municipal solid waste is recovered for recycling or composting, 14 percent is incinerated, and the remaining 56 percent is discarded in landfills;

Whereas a significant amount of this disposed solid waste can be recovered for recycling or composting through source separation, mechanical separation, and community-based recycling programs;

Whereas recycling saves energy, which in turn can reduce American dependence on foreign oil and prevent pollution; reduces the need for certain natural resources; can create more jobs; can cost communities less than other waste disposal options; supplies valuable raw materials to industry; stimulates green technology development; and reduces the need for new landfills and combustors;

Whereas over the past 10 years, many new markets for recycled products have been created, including remanufacturing plastic containers into other plastic containers, fleece, carpet, car parts, strapping, stuffing, bottles, pipe, lawn and garden products, injection molded products, and plastic lumber;

Whereas while there are many new markets for recycled products, community curbside pickup programs have decreased and recycling rates for certain recyclable household products, like plastic and aluminum containers, have decreased or stayed the same;

Whereas Federal, State, and local governments should encourage increased recycling of recyclable household products; and

Whereas there remains significant opportunity to increase recycling in the United States, and Americans should be encouraged to participate in endeavors that promote waste separation methods, community-based recycling programs, and expanded utilization of recovered materials: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress—

(1) supports the goal and mission of America Recycles Day; and

(2) encourages all Americans to participate in promoting the social, environmental, and economic benefits of recycling and buying recycled-content products.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Maryland (Mr. WYNN) and the gentleman from Michigan (Mr. UPTON) each will control 20 minutes.

The Chair recognizes the gentleman from Maryland.

GENERAL LEAVE

Mr. WYNN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. WYNN. Mr. Speaker, I yield myself such time as I may consume.

Today, I rise in strong support of H. Con. Res. 122, to support the goal and mission of America Recycles Day.

A strong commitment to recycling is needed in this country. Recycling saves energy consumption and can reduce our dependence on foreign oil, prevent pollution, provide valuable raw materials, and, most importantly, create more jobs. I think this is an excellent resolution, and I urge my colleagues to support its passage.

I reserve the balance of my time.

Mr. UPTON. Mr. Speaker, I yield 5 minutes to the chief Republican cosponsor of this resolution, Mr. SHAYS from Connecticut.

Mr. SHAYS. I thank the gentleman for yielding me time.

I rise in support of H. Con. Res. 122, introduced by JAY INSLEE of Washington State, a resolution supporting the goal and mission of America Recycles Day.

November 15, 2007, marks the 10th anniversary of this nationally recognized day dedicated to encouraging Americans to recycle and buy recycled products. This bill expresses support for this day of recognition, and encourages all of us to participate in promoting the social, environmental, and economic benefits of recycling and buying recycled-content products.

□ 1415

America Recycles Day informs millions of Americans about the importance of daily recycling and asks us to commit ourselves to increasing our recycling habits at home and at work.

Across the country, the National Recycling Coalition organizes community awareness and education campaigns about the benefits of recycling, and volunteers work with communities and schools to organize recycling awareness events in conjunction with their local municipalities.

Recycling is one of the easiest ways anyone can work to improve the world we live in on a daily basis. Recycling saves energy and reduces greenhouse gas emissions that cause global warming.

The EPA estimates that recycling a ton of mixed recyclables avoids emissions equivalent to 2.8 tons of carbon dioxide. Today there are more than 10,000 curbside recycling programs in the United States, which serve approximately half of the population.

These programs are also good for our economy. Recycling is a \$236 billion a year industry, and more than 56,000 recycling and reuse enterprises employ 1.1 million workers.

I believe we should increase our recycling for ourselves and future generations because we simply will not have a world to live in if we continue our neglectful ways. Recycling and buying recycled products create demand for more recycled products, decreasing waste, protecting our natural resources, and helping our environment and economy.

America Recycles Day asks that we pledge ourselves to recycle and buying recycled products, and I strongly urge support of this resolution and the recognition that this is not just a resolution about nothing. It is about something very important. It's about getting us, as human beings, to think about wasting less and economizing and helping to save our planet in the process.

Mr. WYNN. Mr. Speaker, at this time I am pleased to yield to the sponsor of this resolution, a leader on environmental matters in this Congress, the distinguished gentleman from Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Speaker, I rise to support passage of H. Con. Res. 122, a resolution to support America Recycles Day, the only nationally recognized day dedicated to recycling.

And I want to thank the Chair, Chairman AL WYNN, for getting this to the floor; and my cosponsor, Republican CHRIS SHAYS, who has been a leader on so many environmental issues, for working on this issue.

You know, the economic ramifications of recycling are well known. It creates 1.1 million jobs. It has annual sales of \$236 billion gross sales, and has \$37 billion in annual payrolls.

But I want to focus my comments for the moment on why recycling is so much even more important than it was
