

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and pass the bill, H.R. 609.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

AUTHORIZING PARTICIPATION IN LOS ANGELES COUNTY WATER SUPPLY AUGMENTATION DEMONSTRATION PROJECT

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 786) to amend the Reclamation Wastewater and Groundwater Study and Facilities Act to authorize the Secretary of the Interior to participate in the Los Angeles County Water Supply Augmentation Demonstration Project, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 786

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORIZATION OF LOS ANGELES COUNTY WATER SUPPLY AUGMENTATION DEMONSTRATION PROJECT.

(a) IN GENERAL.—The Reclamation Wastewater and Groundwater Study and Facilities Act (Public Law 102-575, title XVI; 43 U.S.C. 390h et seq.) is amended by adding at the end the following:

"SEC. 16. LOS ANGELES COUNTY WATER SUPPLY AUGMENTATION DEMONSTRATION PROJECT.

"(a) IN GENERAL.—The Secretary of the Interior, in cooperation with the Los Angeles and San Gabriel Rivers Watershed Council, is authorized to participate in the planning, design, construction, and assessment of a neighborhood demonstration project to—

"(1) demonstrate the potential for infiltration of stormwater runoff to recharge groundwater by retrofitting one or more sites in the Los Angeles area with features designed to reflect state-of-the-art best management practices for water conservation, pollution reduction and treatment, and habitat restoration; and

"(2) through predevelopment and postdevelopment monitoring, assess—

"(A) the potential new water supply yield based on increased infiltration; and

"(B) the value of the new water.

"(b) COST SHARING.—The Federal share of the cost of the project described in subsection (a) shall not exceed 25 percent of the total cost of the project.

"(c) LIMITATION.—No Federal funds shall be used for the operation and maintenance of the project described in subsection (a). For purposes of this subsection, pre- and post-development monitoring for not more than 2 years before and after project installation for project assessment purposes shall not be considered operation and maintenance.

"(d) SUNSET OF AUTHORITY.—The authority of the Secretary to carry out any provisions of this section shall terminate 10 years after the date of the enactment of this section."

(b) CLERICAL AMENDMENT.—The table of sections in section 2 of Public Law 102-575 is amended by inserting after the item relating to section 16 the following:

"Sec. 16. Los Angeles County Water Supply Augmentation Demonstration Project."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from New Mexico (Mr. PEARCE) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. GRIJALVA. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I yield myself such time as I may consume.

The purpose of H.R. 786, sponsored by our colleague from Lakewood, California, LINDA SÁNCHEZ, is to authorize the Secretary of Interior to participate in the Los Angeles County Water Supply Augmentation Demonstration Project.

The legislation will authorize Federal financial assistance for a unique water reuse and conservation project in the Los Angeles area. The initiative will demonstrate that small-scale neighborhood projects can be built to increase local water supplies and reduce urban runoff pollution. Projects like this can help residents of southern California increase local water supplies, reduce our dependence on imported water from northern California and the Colorado River.

This is an innovative project and a good bill that deserves our support. I congratulate my colleague, Congresswoman SÁNCHEZ, for championing this legislation.

In the 109th Congress, the Subcommittee on Water and Power held a hearing on similar legislation. This legislation was subsequently passed by the House under suspension of the rules.

We strongly support H.R. 786, and I would like, once again, to thank and commend my friend, LINDA SÁNCHEZ, for her work on this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. PEARCE. Mr. Speaker, I yield myself such time as I may consume.

H.R. 786 authorizes the Secretary of the Interior to participate in the design, planning, and construction of a water recharge demonstration project in southern California. To meet the needs of future population growth in this arid region, capturing storm-water runoff and recharging groundwater could substantially increase local water supplies.

I urge my colleagues to support this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I yield such time as she may consume to the gentlewoman from California, LINDA SÁNCHEZ.

Ms. LINDA T. SÁNCHEZ of California. Mr. Speaker, let me begin by thanking Mr. GRIJALVA for being so generous with time. And I would also like to thank Natural Resources Committee Chairman NICK RAHALL and Ranking Member DON YOUNG, as well as Water and Power Subcommittee Chairwoman GRACE NAPOLITANO, for recognizing the importance of this bill, H.R. 786, the "Southern California Water Augmentation Study."

I would like to especially thank Chairwoman GRACE NAPOLITANO for her support on this bill and her leadership in moving it through the Natural Resources Committee.

I became interested in this effort because California and other parts of the country need to move forward on two very important issues. First, we must increase our groundwater drinking supplies. We can do this by improving the safe infiltration of surface water which seeps into the ground. Second, we must reduce urban storm-water runoff that can carry trash and contamination to our beaches and oceans. This water augmentation study addresses both of those issues.

Storm-water currently becomes contaminated by running off rooftops and roads and carrying that pollution into our oceans. Our study is assessing ways to safely absorb that water into the ground where natural purifying processes can take place. This will stem the flow of polluted water into the ocean and safely recharge our groundwater supplies. Simply put, this project is about taking the water that we lose and turning it into water we use.

This study will assess the potential of urban storm-water infiltration to augment our water supplies. It will determine the benefits, costs, and risks of infiltration. It will help us understand what conditions we need to make infiltration work and assess its potential for increasing our drinking water supply. At the same time, it will show us how to reduce water pollution, creating additional environmental and social benefits.

Mr. Speaker, this bill is designed to make southern California more water-self-sufficient and less reliant on imported water from our neighbors in the central and northern parts of our State.

This is a bipartisan effort in which there is agreement on the merits of the project throughout our government. I am very pleased that President Bush has included funding for the water augmentation study in his last four budgets, including this year.

Also, the Bureau of Reclamation has been extremely supportive of this project. In fact, they helped create it in the year 2000 because they see it as helping to solve the real problem we face in California and other, shall I say, "water-challenged" areas of the country.

Again, I would like to thank Chairman RAHALL and Ranking Member YOUNG, as well as the great staff on the

House Resources Committee; and to thank Representative NAPOLITANO for her unyielding support of this bill.

In 1907, Theodore Roosevelt said, "The conservation of natural resources is the fundamental problem. Unless we solve that problem, it will avail us little to solve all others." With your help, Southern California can make significant progress toward improving its water resources management.

I urge approval of this legislation.

Mr. PEARCE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and pass the bill, H.R. 786.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

ESTABLISHING DEMONSTRATION PROGRAM TO FACILITATE LANDSCAPE RESTORATION PROGRAMS WITHIN CERTAIN UNITS OF NATIONAL PARK SYSTEM

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 309) to direct the Secretary of the Interior to establish a demonstration program to facilitate landscape restoration programs within certain units of the National Park System established by law to preserve and interpret resources associated with American history, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 309

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PURPOSE.

The purpose of this Act is to establish a demonstration program to facilitate landscape restoration programs within those units of the National Park System established by statute to preserve and interpret resources associated with American military history.

SEC. 2. DEMONSTRATION PROGRAM AUTHORIZED.

(a) AUTHORIZATION.—The Secretary of the Interior (hereafter in this Act referred to as the "Secretary"), acting through the Director of the National Park Service, shall carry out a demonstration program that provides that receipts from timber sales shall be retained for expenditure within units of the National Park System from which the timber is removed as part of an approved plan for the restoration or protection of park resources or values.

(b) PARTICIPATION.—The Secretary shall permit each of the 24 National Battlefields, National Battlefield Parks, National Military Parks, and National Battlefield Sites in existence on the date of the enactment of this Act to participate in the demonstration

program authorized by subsection (a) if the unit has in place, before the date of the enactment of this Act, a general management plan, cultural landscape plan, or other resources management plan approved pursuant to the National Environmental Policy Act of 1969 (43 U.S.C. 4321 et seq.), that identifies specific timber for removal for purposes of cultural or historic landscape restoration or fuel load reduction.

(c) USE OF RECEIPTS.—Each unit selected to participate in the demonstration program authorized under subsection (a) shall retain receipts from the sale or disposal of timber removed from that unit. Such receipts shall be available for expenditure without further appropriation or fiscal year limitation for the following purposes only:

- (1) Landscape restoration within the unit.
- (2) Interpretive services within the unit.
- (3) Eradication of disease, insects, or invasive species within the unit.
- (4) Fuel load reduction within the unit.

SEC. 3. REPORT.

Two years after the date of enactment of this Act, the Secretary shall submit a report to the House Natural Resources Committee and the Senate Committee on Energy and Natural Resources that contains the results of the demonstration program authorized under this Act, including—

- (1) a detailed accounting of the receipts generated in each unit by the demonstration program;
- (2) the expenditure by each unit of those receipts; and
- (3) any resource or other impacts, positive or negative, on each participating unit.

SEC. 4. SUNSET.

The authority granted to the Secretary in section 2 shall expire 4 years after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from New Mexico (Mr. PEARCE) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. GRIJALVA. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I yield myself such time as I may consume.

Many units of the National Park System were established to conserve U.S. military history. All these units have restoration of their historic landscapes as an important management goal. This restoration entails removal of landscape features, including trees, which were not present at the time of the relevant historic event. However, removal of any natural resources from a National Park must be undertaken extremely carefully. In addition, many of these park units report a lack of funding for such work.

H.R. 309, introduced by my colleague on the Natural Resources Committee, Representative STEVE PEARCE, would create a revenue source for such projects by allowing individual units to retain proceeds from the sale of timber

removed from the unit. Importantly, the legislation is narrowly written as a demonstration project to apply within a defined list of 24 military parks and to prevent any change to existing environmental requirements governing logging on NPS land.

Representative PEARCE has worked tirelessly on behalf of this legislation and is to be commended for his efforts.

We strongly support the passage of H.R. 309, as amended, by the House today.

Mr. Speaker, I reserve the balance of my time.

Mr. PEARCE. Mr. Speaker, I yield myself such time as I may consume.

I appreciate the comments by the gentleman from Arizona (Mr. GRIJALVA).

H.R. 309, introduced by me, would establish an innovative 4-year demonstration program in the National Park Service to improve and expedite landscape restoration programs within 24 units of the National Park System to better preserve and interpret resources associated with American military history.

One of the tenets of the Park Service is to preserve the look of national battlefields as they existed at the time of the conflict. Often this involves removing trees and other woody debris that encroach on sightlines. Under current law, these trees are removed and any funds from their sale are returned to the General Treasury.

As a part of this new program, selected parks would be permitted to retain receipts from any timber sales and use those funds on the respective landscape restoration programs and interpretive services. While this would not involve a lot of money, every little bit helps, especially given the National Park System maintenance backlog.

This noncontroversial bill was favorably reported last Congress by unanimous consent, and I urge my colleagues to support H.R. 309.

Mr. Speaker, I yield back the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and pass the bill, H.R. 309, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

SOUTHERN NEVADA READINESS CENTER ACT

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 815) to provide for the conveyance of certain land in Clark County, Nevada, for use by the Nevada National Guard.
