

southern region of the United States, the Ouachita National Forest.

As Chairwoman CHRISTENSEN indicated, in 1907 President Theodore Roosevelt created the Arkansas National Forest on reserved public lands south of the Arkansas River. And by 1926 President Calvin Coolidge issued an Executive order to change the name of the forest to the Ouachita National Forest, named after the Ouachita Mountains, which stretch from near the center of Arkansas to southeast Oklahoma, and after the principal river which drains the national forest, the Ouachita River.

For the past 100 years, the Ouachita National Forest has remained a vast, magnificent region that offers spectacular recreation, scenic and wilderness areas for numerous visitors from throughout the world. The forest provides an array of activities, ranging from ATV recreational activities and opportunities, to hiking and to mountain biking to horseback riding trails and swimming. The forest also contains five lakes, often referred to as "Diamond Lakes," which are known for their crystal clear quality and beautiful scenery.

In addition to the scenic views and outdoor activities the forest has to offer, the Ouachita National Forest is also one of the only places in the United States that contains an incredible crater area which allows visitors and rock collectors to dig for real diamonds and quartz crystals.

Today the Ouachita National Forest also includes more than 1.8 million acres in Arkansas and eastern Oklahoma, and provides timber and forestry products throughout the United States.

And while the word "Ouachita" is the French spelling of the Native American word for "good hunting ground," the forest also contains six locations that have been designated as wilderness areas covering 65,000 acres. These areas provide environmentally safe habitats for wildlife and fish, including many threatened and endangered species, as well as watershed protection and improvement and wilderness area management.

This resolution honors and recognizes all the important services and contributions that the Ouachita National Forest continues to make available to visitors all across our country and throughout the world who come here to visit and to the spirit and practice of ensuring that our natural resources remain sources of pride for our citizens, our communities and, yes, our Nation.

I'm proud to sponsor a resolution commemorating its 100th anniversary, and I urge my colleagues to vote in favor of House Resolution 390 today and honor Ouachita National Forest's centennial celebration.

Mr. CANNON. Mr. Speaker, I have no further speakers on this matter, and I yield back the balance of my time.

Mrs. CHRISTENSEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) that the House suspend the rules and agree to the resolution, H. Res. 390.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

#### RIVERSIDE-CORONA FEEDER WATER SUPPLY ACT

Mrs. CHRISTENSEN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1139) to authorize the Secretary of the Interior to plan, design and construct facilities to provide water for irrigation, municipal, domestic, and other uses from the Bunker Hill Groundwater Basin, Santa Ana River, California, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1139

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. SHORT TITLE.

This Act may be cited as the "Riverside-Corona Feeder Water Supply Act".

#### SEC. 2. DEFINITIONS.

For the purposes of this Act, the following definitions apply:

(1) DISTRICT.—The term "District" means the Western Municipal Water District, Riverside County, California.

(2) PROJECT.—The term "Project" means the Riverside-Corona Feeder Project and associated facilities.

(3) SECRETARY.—The term "Secretary" means the Secretary of the Interior.

#### SEC. 3. PLANNING, DESIGN, AND CONSTRUCTION OF THE RIVERSIDE-CORONA FEEDER.

(a) IN GENERAL.—The Secretary, in cooperation with the Western Municipal Water District, is authorized to participate in the planning, design, and construction of a water supply project, the Riverside-Corona Feeder, which includes 20 groundwater wells, groundwater treatment facilities, water storage and pumping facilities, and 28 miles of pipeline in San Bernardino and Riverside Counties, California.

(b) AGREEMENTS AND REGULATIONS.—The Secretary may enter into such agreements and promulgate such regulations as are necessary to carry out this section.

(c) FEDERAL COST SHARE.—

(1) PLANNING, DESIGN, CONSTRUCTION.—The Federal share of the cost to plan, design, and construct the project described in subsection (a) shall be not more than 25 percent of the total cost of the project, not to exceed \$50,000,000.

(2) STUDIES.—The Federal share of the cost to complete the necessary planning studies associated with the project described in subsection (a) shall not exceed 50 percent of the total study cost and shall be included as part of the limitation on funds provided in paragraph (1).

(d) IN-KIND SERVICES.—In-kind services performed by the Western Municipal Water District shall be part of the local cost share to complete the project described in subsection (a).

(e) LIMITATION.—Funds provided by the Secretary under this section shall not be

used for operation or maintenance of the project described in subsection (a).

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary to carry out this Act \$50,000,000 or 25 percent of the total cost of the Project, whichever is less.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) and the gentleman from Utah (Mr. CANNON) each will control 20 minutes.

The Chair recognizes the gentlewoman from the Virgin Islands.

#### GENERAL LEAVE

Mrs. CHRISTENSEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from the Virgin Islands?

There was no objection.

Mrs. CHRISTENSEN. Mr. Speaker, I yield myself such time as I may consume.

The purpose of H.R. 1139, as amended, is to authorize the Secretary of the Interior to plan, design and construct water facilities for municipal, domestic irrigation and other uses in the Bunker Hill Groundwater Basin, Santa Ana River in California.

H.R. 1139, as amended, would authorize limited Federal financial assistance for the design and construction of 20 groundwater wells, groundwater treatment facilities, water storage and pumping facilities and 28 miles of pipeline in San Bernardino and Riverside Counties of California.

□ 1450

The West, now more than ever, must explore and identify new ways of providing a reliable water supply to meet the current and future water demands of a rapidly growing population. H.R. 1139, as amended, seeks to accomplish this by building new pipelines and infrastructure that would allow for the storage of conserved water in groundwater basins.

This project would also serve to provide a critical emergency supply, aid in groundwater cleanup, and reduce dependence on the Colorado River and the very sensitive Bay-Delta.

I thank Mr. CALVERT for his efforts on this legislation, and I urge my colleagues to join me in supporting H.R. 1139, as amended.

Mr. Speaker, I reserve the balance of my time.

Mr. CANNON. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of H.R. 1139. H.R. 1139, sponsored by the distinguished gentleman from California (Mr. CALVERT), authorizes the Secretary of the Interior to assist the Western Municipal Water District in the planning, design, and construction of the Riverside-Corona Feeder. This project includes water storage, pumping facilities, and 28 miles of pipeline in San Bernardino and Riverside Counties, California.

This legislation, as amended, is another step toward "drought proofing" Southern California and also reduces the region's dependence on imported water supplies, while providing limited Federal assistance. I urge my colleagues to support this important measure.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. CALVERT).

Mr. CALVERT. Mr. Speaker, the Riverside-Corona Feeder Water Supply Act represents an important investment in the water infrastructure in western Riverside County, California, one of the fastest-growing regions in this country.

At a time when water demand continues to grow due to the West's increasing population, traditional water sources have been confronted by a prolonged drought and other environmental challenges. In fact, just last week California water officials turned off the huge pumps that send water to Southern California from the Sacramento-San Joaquin Delta to protect a tiny imperiled fish. While the shutdown is only scheduled to last a week or two, it is a stark reminder that Southern California must continue to reduce its dependence on imported water from the Delta and the Colorado River.

The Western Municipal Water District provides water service to western Riverside County and serves a population of more than 600,000 people. The purpose of the Riverside-Corona Feeder water supply project is to capture and store water in wet years in order to increase Western's firm water supplies, provide a cost-effective water supply, and improve water quality.

New wet year water will come from local runoff, including regulated releases from Seven Oaks Dam and the State Water Project and stored in San Bernardino groundwater basins. To deliver the stored water to consumers in Western's service area, the project will provide for new groundwater pumping and pipeline capability. As an additional benefit, the Riverside-Corona Feeder will provide the means to control water tables, thereby reducing liquefaction dangers in the Colton and San Bernardino communities. Additionally, the project improves local water quality as perchlorate and other contaminants would be removed from the basin when water is extracted from the well heads via the Riverside-Corona Feeder.

I applaud Western and our local elected officials in Western Riverside County for taking bold, proactive steps in meeting our region's current and future water demand. In particular, I would like to acknowledge the leadership of Western's General Manager, John Rossi, as well as the Western board members, Charles Field, Tom Evans, Brenda Dennstedt, Don Galleano, and Al Lopez. I also want to thank my good friend GRACE NAPOLITANO, the chairwoman of the

Water and Power Subcommittee, for her leadership and support of my legislation.

I think it is crucial that we recognize and assist communities that are working to reduce their reliance on imported water, and I urge all of my colleagues to support the Riverside-Corona Feeder Water Supply Act.

Mr. CANNON. Mr. Speaker, I yield back the balance of my time.

Mrs. CHRISTENSEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) that the House suspend the rules and pass the bill, H.R. 1139, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

#### CONJUNCTIVE USE OF SURFACE AND GROUNDWATER IN JUAB COUNTY, UTAH

Mrs. CHRISTENSEN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1736) to amend the Reclamation Projects Authorization and Adjustment Act of 1992 to provide for conjunctive use of surface and groundwater in Juab County, Utah.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1736

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

#### SECTION 1. CONJUNCTIVE USE OF SURFACE AND GROUNDWATER IN JUAB COUNTY, UTAH.

Section 202(a)(2) of the Reclamation Projects Authorization and Adjustment Act of 1992 (Public Law 102-575) is amended by inserting "Juab," after "Davis,".

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) and the gentleman from Utah (Mr. CANNON) each will control 20 minutes.

The Chair recognizes the gentlewoman from the Virgin Islands.

GENERAL LEAVE

Mrs. CHRISTENSEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from the Virgin Islands?

There was no objection.

Mrs. CHRISTENSEN. Mr. Speaker, I yield myself such time as I may consume.

The purpose of H.R. 1736, as introduced by our distinguished colleague from Utah (Mr. CANNON), is to amend the Reclamation Projects Authorization and Adjustment Act of 1992 to provide for conjunctive use of surface water and groundwater in Juab County, Utah.

H.R. 1736, when enacted, would authorize a water resources feasibility study for the city of Juab, Utah. This study includes groundwater recharge and management, as well as a review of the joint use of surface water and groundwater.

The assessment and evaluation of current water resources is essential to understanding the needs of the community and the environment. H.R. 1736 seeks to provide the technical information needed by the city of Juab.

I thank Mr. CANNON for his hard work on this legislation and urge my colleagues to join me in supporting H.R. 1736.

Mr. Speaker, I reserve the balance of my time.

Mr. CANNON. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of H.R. 1736. I would like to begin by thanking the gentlewoman from the Virgin Islands for her kind comments and background on this bill.

H.R. 1736 passed the House of Representatives last Congress, and I reintroduced this legislation earlier this year. This bill will benefit many of my constituents by allowing Juab County to become eligible for funding for conjunctive use under the Central Utah Project. Precious water resources in Utah are highly valued and maximizing existing water resources efficiently is imperative.

The Bonneville Unit of the Central Utah Project was planned to develop and export water from the high Uinta Mountains in the eastern part of the State and bring it to the populated Wasatch Front.

As originally planned, Juab County would have received a large amount of water. However, due to alterations in the original plan, much of that water is planned for use in the Wasatch, Utah, and Salt Lake Counties. While efforts will continue to identify and secure substantial additional water supplies for Juab, there are near-term steps that can be taken to help the county meet its current needs and growing demands. This legislation will facilitate one of those near-term steps.

H.R. 1736 will allow Juab County to become eligible for funding for studies and construction of conjunctive use projects by amending the Reclamation Projects Authorization and Adjustment Act of 1992. Allowing Juab County to be eligible to receive funds under the Central Utah Project Completion Act will allow the county to maximize surface water flows and groundwater sources by storing flows in existing aquifers.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mrs. CHRISTENSEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) that the House suspend the rules and pass the bill, H.R. 1736.
