

Mrs. MURRAY, and Mr. WYDEN) submitted the following resolution; which was considered and agreed to:

S. RES. 311

Whereas ovarian cancer is the deadliest of all gynecological cancers, and the reported incidence of ovarian cancer is increasing over time;

Whereas ovarian cancer is the 5th leading cause of cancer deaths among women in the United States;

Whereas all women are at risk for ovarian cancer, and 90 percent of women diagnosed with ovarian cancer do not have a family history that puts them at higher risk;

Whereas the Pap smear is sensitive and specific to the early detection of cervical cancer, but not to ovarian cancer;

Whereas there is currently no reliable and easy-to-administer screening test used for the early detection of ovarian cancer;

Whereas many people are unaware that the symptoms of ovarian cancer often include bloating, pelvic or abdominal pain, difficulty eating or feeling full quickly, and urinary symptoms, among several other symptoms that are easily confused with other diseases;

Whereas due to the lack of a reliable early screening test, 75 percent of cases of ovarian cancer are detected at an advanced stage, when the 5-year survival rate is only 50 percent, a much lower rate than for many other cancers;

Whereas if ovarian cancer is diagnosed and treated at an early stage before the cancer spreads outside of the ovary, the treatment is potentially less costly, and the survival rate is as high as 90 percent;

Whereas there are factors that are known to reduce the risk for ovarian cancer and play an important role in the prevention of the disease;

Whereas awareness and early recognition of ovarian cancer symptoms are currently the best way to save women's lives;

Whereas the Ovarian Cancer National Alliance, during the month of September, holds a number of events to increase public awareness of ovarian cancer; and

Whereas a National Ovarian Cancer Awareness Month should be designated to increase the awareness of the public regarding the cancer; Now, therefore, be it

Resolved, That the Senate supports the goals and ideals of National Ovarian Cancer Awareness Month.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 134

Whereas extensive research has demonstrated a link between high-quality school libraries and student achievement in the classroom and on standardized tests, regardless of the level of poverty or family instability experienced by the student;

Whereas 37 percent of all fourth grade children in the United States are reading at below-basic reading levels;

Whereas the school libraries of the United States are valuable tools that could be used to inspire and enhance literacy for all children;

Whereas, to become a lifelong reader, a student must be exposed to adults who read regularly and serve as positive reading role models;

Whereas school librarians are—

(1) instrumental in helping teachers educate the students of the United States; and

(2) through the use of books, computer resources, and other resources, a necessary component for expanding the curriculum of the public schools of the United States;

Whereas the school libraries of the United States are used as media centers to provide students with opportunities to interact with computers and other electronic information resources;

Whereas the use of school library computers helps students develop media and technological skills, including—

- (2) communication competency; and
- (3) the ethical and appropriate use of technology information access, retrieval, and production;

Whereas the school libraries of the United States serve as a gathering place for students of all ages, backgrounds, and interests to come together to debate ideas;

NATIONAL POLYCYSTIC KIDNEY DISEASE AWARENESS WEEK

The resolution (S. Res. 282) supporting the goals and ideals of a National Polycystic Kidney Disease Awareness Week to raise public awareness and understanding of polycystic kidney disease and to foster understanding of the impact polycystic kidney disease has on patients and future generations of their families, was considered and agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 282

Whereas polycystic kidney disease (known as "PKD") is 1 of the most prevalent life-threatening genetic diseases in the United States, is a severe, dominantly inherited disease that has a devastating impact, in both human and economic terms, on people of all ages, and affects equally people of all races, sexes, nationalities, geographic locations, and income levels;

Whereas, based on prevalence estimates by the National Institutes of Health, it is estimated that about 600,000 patients in the United States have a genetic inheritance from 1 or both parents for polycystic kidney

disease, and that countless additional friends, loved ones, spouses, and caregivers must shoulder the physical, emotional, and financial burdens that polycystic kidney disease causes;

Whereas polycystic kidney disease, for which there is no treatment or cure, is the leading genetic cause of kidney failure in the United States and the 4th leading cause overall;

Whereas the vast majority of polycystic kidney disease patients reach kidney failure at an average age of 53, causing a severe strain on dialysis and kidney transplantation resources and on the delivery of health care in the United States, as the largest segment of the population of the United States, the "baby boomers", continues to age;

Whereas end stage renal disease is one of the fastest growing components of the Medicare budget, and polycystic kidney disease contributes to that cost by an estimated \$2,000,000,000 annually for dialysis, kidney transplantation, and related therapies;

Whereas polycystic kidney disease is a systemic disease that causes damage to the kidney and the cardiovascular, endocrine, hepatic, and gastrointestinal organ systems and instills in patients a fear of an unknown future with a life-threatening genetic disease and apprehension over possible genetic discrimination;

Whereas the severity of the symptoms of polycystic kidney disease and the limited public awareness of the disease cause many patients to live in denial and forego regular visits to their physicians or to avoid following good health management which would help avoid more severe complications when kidney failure occurs;

Whereas people who have chronic, life-threatening diseases like polycystic kidney disease have a predisposition to depression and its resultant consequences due to their anxiety over pain, suffering, and premature death;

Whereas the Senate and taxpayers of the United States desire to see treatments and cures for disease and would like to see results from investments in research conducted by the National Institutes of Health (NIH) and from such initiatives as the NIH Roadmap to the Future;

Whereas polycystic kidney disease is a verifiable example of how collaboration, technological innovation, scientific momentum, and public-private partnerships can generate therapeutic interventions that directly benefit polycystic kidney disease sufferers, save billions of Federal dollars under Medicare, Medicaid, and other programs for dialysis, kidney transplants, immunosuppressant drugs, and related therapies, and make available several thousand openings on the kidney transplant waiting list;

Whereas improvements in diagnostic technology and the expansion of scientific knowledge about polycystic kidney disease have led to the discovery of the 3 primary genes that cause polycystic kidney disease and the 3 primary protein products of the genes and to the understanding of cell structures and signaling pathways that cause cyst growth that has produced multiple polycystic kidney disease clinical drug trials;

Whereas there are thousands of volunteers nationwide who are dedicated to expanding essential research, fostering public awareness and understanding of polycystic kidney disease, educating polycystic kidney disease patients and their families about the disease to improve their treatment and care, providing appropriate moral support, and encouraging people to become organ donors; and
