

Baghdad had set in. "He started crying and started throwing things," she said about her 26-year-old husband from Frackville, Pa.

Little by little, though, the things he didn't want to talk about came to light. Among them were the four roadside bomb attacks that he survived but left some of his buddies wounded. But the worst, she said, were the times he was called to bag up body parts of dead soldiers who had been blown up by improvised explosive devices on patrols ahead of his platoon, a mortar troop of the 1st Squadron, 89th Cavalry Regiment from the 10th Mountain Division out of Fort Drum, N.Y.

With her husband displaying the classic symptoms of PTSD, or post-traumatic stress disorder, she checked him into a privately owned psychiatric hospital where he was treated for major depression related to PTSD. He was given anti-depressants and while he was there, she said, his first sergeant called to inform him he would be listed as absent without leave and his paycheck for May would be canceled if he didn't report back to his squadron in Iraq, one of many regular Army units whose tours had been extended.

Lori Shoup said her husband told the first sergeant about his bout with PTSD. The sergeant's response to him, she said, was: "How's that different from the way you normally act?" That really upset him. It was as if they didn't care."

With his mental problems persisting, John Shoup met with doctors at O'Callaghan Federal Hospital at Nellis Air Force Base. Doctors there tried to help him, but on April 16, the day before he was supposed to return to Fort Drum, his condition took a turn for the worse. While at home, he took too many drugs described as a suicide attempt, and Lori had to rush him back to the Nellis hospital. His stomach was pumped and he was put in supervised care.

In the meantime, Lori has been struggling to make ends meet by continuing to work as a bartender at a cantina on the Strip while caring for their 3-year-old son, Levan, and her 8-year-old daughter, Emily, from a previous marriage. "I'm at wit's end," she said. "There's no way I can do it all by myself."

Her father, Joseph Godlewski, a retired Army staff sergeant, has been trying to help with babysitting. He is also helping his daughter understand what John is trying to endure. "The poor kid has seen so much death," he said. "Once the smell of death is in your nose it never goes away."

For Lori, the gravity of the situation became too much last week, when she experienced a nervous breakdown that resulted in a trip to the Nellis hospital emergency room. Now back at home, she was feeling better Monday even though she learned that John's status with his overseas unit had officially changed to AWOL while he's still at the federal hospital. His paycheck had not been deposited. "I couldn't believe it. My heart went right down into my stomach," she said.

In a telephone interview from his hospital room, John Shoup said he had served his four-year obligation but his orders had been extended. He said his first sergeant had called him to say he had "better hurry up and stop fooling around and get back to Iraq." "All we do is drive around and wait to get blown up," he said. "I just want to get back to the Army and get out and get back to my family."

On Tuesday, a spokesman at Fort Drum acknowledged that John Shoup had called the fort to say he needed mental help. They directed him to the Nellis hospital to continue PTSD treatment until he was well enough to return to Fort Drum. "Then they would make a determination if his future is best not serving in the Army," Fort Drum spokesman Ben Abel said.

Given the current circumstances, Abel said he could not foresee the Army sending him back to Iraq. As for stopping his pay, that was a misunderstanding that stemmed from his overseas unit, Abel said, noting, "It's on its way to being cleared up."

Lori Shoup said, however, that her husband won't be returning to Fort Drum immediately. Instead, he will be transferred today from the Nellis hospital to Walter Reed Army Medical Center in Washington, D.C.

In the meantime, she wants to see "all of our boys come home" from Iraq. "I believe our job is done there. . . . I believe that our troops are doing a lot of good there. I back our soldiers 100 percent. I've heard it referred to as a modern-day Vietnam. "It's getting uglier and uglier. It's really unfortunate because our society is going to suffer from it because there's a lot of fathers and sons and brothers who will never return. And some will never return the same people they were when they left."

#### RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

#### MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will be a period for the transaction of morning business, with Senators permitted to speak for up to 10 minutes each.

#### YOUTHS AND FIREARMS

Mr. LEVIN. Mr. President, often discussions about combating gun violence center around preventing criminal access to dangerous firearms. Another important component of the issue is the ability of our children and teenagers to access firearms. Most fatal firearm incidences occur when children and teens discover loaded and unsecured firearms in their homes. Over the years, accidental shootings and suicides have claimed the lives of thousands of young people. Sadly, many of these tragedies could have been prevented through common sense gun legislation.

On April 14, two 14-year-old boys were playing in one of their homes in Iosco Township, MI, when they found an unlocked .45-caliber handgun. After playing with it for a short time, the gun went off. The two boys were home alone, so no adult was aware of what happened until one of the boys called 911 and uttered the words, "I shot him." The other boy was pronounced dead after being airlifted to the University of Michigan Medical Center.

The very next day not far away in Battle Creek, MI, a 19-year-old accidentally shot and killed his 17-year-old best friend and cousin. The two were sitting on a couch in the living room, playing with an unregistered gun. They had removed the gun's clip but were not aware of the single bullet remaining in the chamber.

These are two examples of the misery gun violence can inflict. The Centers

for Disease Control and Prevention have released some staggering statistics on gun-related deaths among young people:

In 2002 a child or teen was killed in a firearm-related accident or suicide every 9 hours.

On average, four children died every day in non-homicide firearm incidents between 1999–2002.

From 1997–2002, more than 1,324 children were killed in firearm accidents.

In 2004, 13,846 kids were injured by a firearm.

Over the last 10 years, an average of 1,213 kids committed suicide with a firearm each year; on average more than 135 each year were under the age of 15.

The overall firearm-related death rate among U.S. children under the age of 15 was nearly 12 times higher than among children in 25 other industrialized countries combined.

As adults, parents and grandparents, we have a responsibility to protect our children from gun-related deaths. Trigger locks and other sensible gun safety measures can have a significant impact. I urge my colleagues to wait no longer to act on such measures.

#### ADDITIONAL STATEMENTS

##### IN MEMORY—ARTHUR H. GUENTHER, PH.D.

• Mr. BINGAMAN. Mr. President, today I note the passing away of Dr. Art Guenther on April 21, 2007.

Art Guenther was born April 18, 1931, in Hoboken, NJ. As a kid he loved the outdoors and became New Jersey's youngest Eagle Scout. He wanted to be a forest ranger and hoped to attend a college with a good forestry program, but those schools didn't accept out-of-state students. A teacher had noticed Guenther's aptitude in math and science and got him into Rutgers. There he majored in chemistry, earning his bachelor's degree in 1953.

As a grad student at Penn State, he wanted to pursue optics. His thesis advisor asked, "Why optics? The cream is gone," meaning all the good research had been done. Guenther persisted, receiving his Ph.D. in chemistry and physics in 1957. He joined the Air Force and was sent to Kirtland Air Force Base. His mother wondered why they were sending him out of the country on his first assignment. After serving 2 years, he left the Air Force and became a civilian employee and a New Mexican for the remainder of his life. His optics work would pay off in 1960, after the laser was first demonstrated. As the only person at Kirtland with a background in optics, Guenther was asked by the commander of the research directorate to evaluate lasers for potential Air Force use. He toured the country and reported back on the promise of the new technology. At the request of the Air Force, he established a laser program and later became chief scientist of the Air Force Weapons Lab, a

position he held for 15 of his 31 years with the Air Force.

By 1965 Guenther had become one of the world's leading experts in simulating effects of atomic explosions. He also gained experience in advanced optical systems, high-power lasers, high-power microwaves, pulsed power, materials science, and weapons effects. Guenther is considered a pioneer in the development of pulsed-power technology and its defense applications. Dr. Guenther stood out as not only a scientist but someone who was deeply concerned about bettering the lives of New Mexicans by promoting the spread of science outside the laboratory gates through education and high technology economic development. Art Guenther helped develop an optics curriculum at Albuquerque Technical Vocational Institute. The program was so successful it had a waiting list.

In the 1980s, Guenther was one of the first to see a high-tech future for New Mexico. Gov. Bruce King in 1981 established the Governor's Technical Excellence Committee, GTEC, with Guenther as a member. King asked GTEC to assess the State's high-tech assets; they found 15,000 Ph.D.s, major research universities and three Federal laboratories along the Rio Grande.

At a time when other States had their Silicon Valley or Research Triangle, it was Guenther who coined the term "Rio Grande Research Corridor." He chaired the State Science and Technology Committee, which proposed and got the five Centers of Technical Excellence in 1983. One of those was the Center for High-Tech Materials at UNM.

In 1988, Guenther became chief scientist for advanced defense technology at Los Alamos National Laboratory. In that post, he was science adviser to Gov. Garrey Carruthers and again for Gov. Bruce King. In 1991 he became scientific adviser for laboratory development and manager of alliances at Sandia.

Guenther retired in 1998, but his family and colleagues know he didn't really retire. He became a research professor at UNM's Center for High-Tech Materials and was also on contract with the Air Force Office of Scientific Research. He maintained a staggering schedule of travel, meetings, research and civic involvement. Also in 1998, after identifying a wealth of optics activity in the State, he became co-founder of the New Mexico Optics Industry Association. And through NMOIA, he was instrumental in founding the Photonics Academy at West Mesa High School. He also helped organize the Directed Energy Professionals Society.

Art received numerous honors and awards. Some of these awards include the Distinguished Executive Rank Award from President Reagan, the Harry Diamond Award from the Institute of Electrical and Electronic Engineers, the Director's Award of the International Society of Optical Engineering, the David Richardson Medal of the Optical Society of America, and the Arthur L. Schawlow Medal from the Laser Institute of America in 1983. He has twice received the New Mexico Distinguished Public Service Award. In 1992 he was one of the first Americans to be named to the Russian Academy of Sciences. He had worked with Russian scientists since the 1960s and was credited with improving communication between the two countries.

Guenther brought so many technical meetings to Albuquerque that he earned a special award from the Albuquerque Convention and Visitors Bureau. On April 25, the New Mexico Optics Industry Association honored him with the organization's first Lifetime Service Award.

Mr. President, my State was blessed by Art Guenther's energy and dedication and we will miss him.●

#### MEASURES PLACED ON THE CALENDAR

The following bills were read the second time, and placed on the calendar:

S. 1301. A bill to preserve and protect the free choice of individual employees to form, join, or assist labor organizations, or to refrain from such activities.

S. 1305. A bill making emergency war appropriations for American troops overseas, without unnecessary pork barrel spending and without mandating surrender or retreat in Iraq, for the fiscal year ending September 30, 2007, and for other purposes.

#### REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 735. A bill to amend title 18, United States Code, to improve the terrorist hoax statute (Rept. No. 110-61).

By Mr. LEAHY, from the Committee on the Judiciary, without amendment:

S. 621. A bill to establish commissions to review the facts and circumstances surrounding injustices suffered by European Americans, European Latin Americans, and Jewish refugees during World War II (Rept. No. 110-62).

#### INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first

and second times by unanimous consent, and referred as indicated:

By Mr. KERRY:

S. 1311. A bill to permanently prohibit oil and gas leasing in the North Aleutian Basin Planning Area, and for other purposes; to the Committee on Energy and Natural Resources.

#### ADDITIONAL COSPONSORS

S. 469

At the request of Mr. BAUCUS, the name of the Senator from Florida (Mr. NELSON) was added as a cosponsor of S. 469, a bill to amend the Internal Revenue Code of 1986 to make permanent the special rule for contributions of qualified conservation contributions.

S. 604

At the request of Mr. LAUTENBERG, the name of the Senator from Maryland (Mr. CARDIN) was added as a cosponsor of S. 604, a bill to amend title 10, United States Code, to limit increases in the certain costs of health care services under the health care programs of the Department of Defense, and for other purposes.

S. 673

At the request of Mr. SALAZAR, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 673, a bill to amend the Internal Revenue Code of 1986 to provide credits for the installation of wind energy property, including by rural homeowners, farmers, ranchers, and small businesses, and for other purposes.

S. 749

At the request of Mr. NELSON of Florida, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 749, a bill to modify the prohibition on recognition by United States courts of certain rights relating to certain marks, trade names, or commercial names.

S. 935

At the request of Mr. NELSON of Florida, the name of the Senator from Maryland (Mr. CARDIN) was added as a cosponsor of S. 935, a bill to repeal the requirement for reduction of survivor annuities under the Survivor Benefit Plan by veterans' dependency and indemnity compensation, and for other purposes.

S. 960

At the request of Mrs. CLINTON, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 960, a bill to establish the United States Public Service Academy.
