

"Most states fail to require that the jury be instructed that it may impose a life sentence if a juror does not believe that the defendant should receive the death penalty";

"Every state studied appears to have significant racial disparities in its capital system, particularly those associated with the race of the victim"; and

"States do not formally commute a death sentence upon a finding that the inmate is incompetent to proceed on factual matters requiring the inmate's input".

As illustrated by this small sampling, these injustices are so grave, Madam Speaker, that the ABA—an organization normally silent in regards to the death penalty—has called for a nationwide moratorium.

Madam Speaker, in light of such regular occurrences of injustice in our system, it is important now more than ever to celebrate the work of individuals who are correcting the ills in our judicial system.

I encourage my colleagues to join me in bestowing upon Barry C. Scheck and Peter J. Neufeld the Congressional Gold Medal. Their work to ensure that we, as a country, remain a nation devoted still to "truth, justice, and the American way" is admirable and must be recognized.

CELEBRATING THE BIRTH AND  
LIFE OF FATHER D'AGOSTINO

**HON. GEORGE MILLER**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, January 29, 2008*

Mr. GEORGE MILLER of California. Madam Speaker, I rise today to commemorate the anniversary of the birth of Father Angelo D'Agostino, SJ, MD. Father D'Ag, as he was called by all who knew and loved him, was born on January 26, 1926 in Providence, Rhode Island. Unfortunately, Father D'Ag was taken from us in 2006. However, his birth is a cause for continued celebration as he was a living testament to the principle that one person can indeed make a difference.

I have met many wonderful and inspiring people in my years of service in Congress, but there was clearly something very special about Father D'Ag, and I feel honored and, frankly, lucky to have had the opportunity to meet him in Kenya and in Washington. He made a lasting impression on me, just as he did on so many others throughout the world.

In 1992, at a time in Africa when so many lives were lost to the scourge of AIDS, Father D'Ag set up the first facility in Kenya to care for HIV infected children known as Nyumbani, Swahili for "home". These children were orphaned by the loss of a parent from the same affliction or who were abandoned by parents who could not or would not care for an HIV-positive child. His first three children soon blossomed into a community of children, but they were dying at an alarming rate. Through strong perseverance and advocacy on behalf of the children, Father D'Ag battled the drug companies for affordable anti-retroviral medicines. He also battled the Kenyan government to allow the children into the public primary schools.

Ultimate success on both fronts enabled him to manage the virus and start to chip away at the societal HIV stigma against these precious

children. As a result, Nyumbani was transformed from a hospice into a program that nurtured the children's growth and development, thanks to the painstaking care and love that he and his staff gave to these kids. Nyumbani today has 107 bright children with loving hearts, beautiful smiles, and boundless energy on the soccer field.

Despite this monumental accomplishment at Nyumbani, Father D'Ag did not rest after providing a home for HIV-positive children without parents. He went on to develop another program: Lea Toto, Swahili for "to raise the child", to provide medical care and nutrition to HIV-positive children who have parents but live in poverty in the many slums in and around Nairobi. Today there are approximately 2,500 people who benefit from this community outreach program and stand a chance to survive under extreme hardship because of Father D'Ag.

However, Father D'Ag was not done. After reading the stories about abandoned street children that had been slain by police, Father D'Ag felt a need to expand his reach and protect the ever burgeoning number of street children in Kenya. He designed an additional program, one that pairs children and the elderly, the two groups most vulnerable to the ravages of the HIV/AIDS pandemic. Father D'Ag designed this program in his mind, and through his perseverance and guile acquired a tract of land in Kitui that became his beloved Nyumbani Village. In this eco-friendly, self-sustaining village the grandparents care for their own grandchildren as well as other needy children in a house with a garden, access to the village school, and training in one of the many income-generating projects. While this village is still a work in progress, it already has 258 residents, 29 grandparents, and 229 children, with a capacity of 1,000 residents.

These achievements by Father D'Ag should serve as an inspiration to us all. He changed the world one child at a time, and he expanded his reach to do so much for so many people who are in desperate need of food, medical care and love. Even though he has departed from this world, he has left behind an enduring legacy through his programs for children. His passion and commitment are carried on through his incredible disciple and partner, Sister Mary Owens, who continues his work. She is joined by many other dedicated staff members and volunteers who will continue to nurture and protect Father D'Ag's children. No one can visit Nyumbani without being changed forever.

Today, Kenya, the home of Father D'Ag's work, is facing unusually difficult civil discord. This recent civil unrest reminds us how fragile life can be in a nation where so many people live in such quiet desperation. Hopefully, these tribal divisions will soon be healed. In the meantime, we must stop and take a moment to reflect upon one man—a Jesuit priest and medical doctor—who put his heart, soul and life into caring for those who could not care for themselves. It is an honor to rise today and call on all of my colleagues and people around the world to join in celebrating the great fortune that the birth and life of Father D'Agostino was for the children of Kenya and each of us who had the opportunity to know him.

Happy Birthday, Father D'Ag, and thank you for your enduring contributions.

HONORING HURON HUMANE  
SOCIETY

**HON. BART STUPAK**

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, January 29, 2008*

Mr. STUPAK. Madam Speaker, I rise to recognize the Huron Humane Society (HHS) in Alpena, Michigan, on its 25th anniversary this year. HHS is a nonprofit organization dedicated to caring for the homeless dogs and cats of Alpena County. On any given day, the shelter is charged with caring for more than 20 dogs and more than 80 cats. With a maximum capacity of 120 animals, the shelter often houses closer to 150. With so many urgent needs in our local communities, our pets are often overlooked. The Huron Humane Society is making sure the welfare of four-legged friends, considered family to many, is not overlooked.

The Huron Humane Society has been providing a valuable service to Alpena and the surrounding communities for more than a quarter century. HHS is a no-kill shelter and works to heal and rehabilitate the pets that come through its doors. While HHS cooperates with local governments to provide services to the surrounding city, township and county, it relies mostly on private donations to keep the doors open. Fundraisers, grants and donations account for more than 85 percent of its budget. And even with limited resources, the shelter continues to put the animals it cares for first.

The Huron Humane Society provides a full range of services to help keep animals in homes and rehabilitate those animals that come to the shelter. The shelter serves as safe haven for stray animals, and provides a service for the residents of the community by making sure all animals that come through its doors are properly vaccinated. HHS provides shelter for stray and lost pets, rehabilitates those that are ill or injured, and ultimately locates suitable homes for those pets. The Huron Humane Society promotes a public education program, urging individuals to spay and neuter their pets, helping to reduce the number of unwanted animals in the community. HHS also offer valuable training to pet owners on properly caring for their pets, and offers a microchipping service to the community to aid in locating pets should they become lost.

The shelter manages to accomplish this great work with a full-time staff of three and three additional part-time employees. While the shelter also receives assistance from those required to perform community service and local inmates, it is the community volunteers that provide the additional labor to keep the Huron Humane Society running.

This coming weekend, the Huron Humane Society will hold its 25th Anniversary Gala. One year ago, this annual event raised more than \$15,000. More than 200 people opened up their checkbooks to help the shelter continue to provide its valuable service to the community. Especially as we see story after story in the news of helpless animals being abused and mistreated, it is important every community have its own Huron Humane Society to look out for the animals that can't look out for themselves.

Madam Speaker, as the Huron Humane Society celebrates its 25th anniversary, I ask that

you and the entire U.S. House of Representatives join with me in recognizing the valuable contribution the shelter, its staff and volunteers make to Alpena County. Please join with and the people of Alpena County, Michigan in congratulating the Huron Humane Society on a job well done and best wishes for the future.

INTRODUCTION OF THE NATIONAL  
GEOLOGIC MAPPING REAUTHOR-  
IZATION ACT OF 2008

**HON. JIM COSTA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, January 29, 2008*

Mr. COSTA. Madam Speaker, today I am proud to be joined by the Chairman of the Natural Resources Committee, Mr. RAHALL of West Virginia, in introducing the National Geologic Mapping Reauthorization Act of 2008, which would reauthorize the National Cooperative Geologic Mapping Program, a critically important initiative that was created by the Geologic Mapping Act of 1992, originally sponsored by Chairman RAHALL.

The importance of geologic maps to our society is not very well known by the general public, but it is hard to overstate. Geologic maps help us build highways, safeguard drinking water, prepare for disasters, protect wildlife, discover precious minerals, locate the fuels that power our society, and much more.

Geologic maps are particularly essential for my own home State. Californians face more geologic hazards than almost anyone else in the country. Over 25 million people live in the State's tectonically active regions near the coast, where earthquakes are only one of a multitude of geologic threats. Landslides, floods, hazardous minerals, and tsunamis are some of the other dangers that come with living in one of the most seismically active and geologically diverse states in the nation.

The STATEMAP component of the National Cooperative Geologic Mapping Program has provided over \$2.5 million to California, matched by over \$2.6 million from the State, to create highly precise geologic maps that are being used by the California Geological Survey's Seismic Hazard Mapping Program to identify areas that are most prone to liquefaction or landslides during earthquakes. This information allows communities to require stronger building codes in areas that are more susceptible to these hazards, or to avoid them altogether.

In addition, the maps created through STATEMAP provide information about the location of California's abundant supply of oil, natural gas, and valuable minerals, and have also been used to support water management decision-making around Lake Tahoe.

California is, of course, not the only State that benefits from the National Cooperative Geologic Mapping Program. Since the program's inception, 49 States, plus Puerto Rico, have matched nearly \$70 million in STATEMAP funds to help produce over 7,500 new geologic maps. Despite this effort, only about 25 percent of the Nation has been mapped at a precision that provides the maximum benefits. And only 2 percent of Cali-

fornia has been mapped under the STATEMAP program.

There are two additional components to the National Cooperative Geologic Mapping Program: the FEDMAP component, which is run by the United States Geological Survey and carries out geologic mapping according to priorities developed by a Federal advisory committee, and the EDMAP component, which has provided millions of dollars to help train over 600 students at 131 universities across the Nation. According to the Department of the Interior, the vast majority of those students receiving EDMAP grants continued in the geosciences, indicating that this program is truly helping to train the next generation of geologists.

A reauthorization of the National Cooperative Geologic Mapping Program is necessary in order to continue to move the goals of the program forward, to build on the momentum of the previous 16 years, and to provide comprehensive geologic mapping of the entire country. The program has been reauthorized with broad bipartisan support in 1997 and 1999, and a similar bill introduced in the 109th Congress received the endorsement of the administration and passed the House on a voice vote. I urge my colleagues to join me in supporting this legislation, and moving forward quickly toward reauthorizing this essential program.

HONORING HRANT DINK

**HON. JOE BACA**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, January 29, 2008*

Mr. BACA. Madam Speaker, this month we remember the one-year anniversary of the tragic death of Hrant Dink, a prominent Turkish-Armenian intellectual and human rights advocate. Dink fought tirelessly to engage the Turkish community in open discussions of the many injustices suffered by Armenians, beginning with the Genocide of 1915. As a mentor and a hero, his tragic death shook the lives of many around the world.

Dink's tireless efforts and strong conviction to educate the citizens of Turkey, and his writings of the Armenian Genocide led to a 6-month jail sentence in October 2005. He advocated for justice, and wrote with a conscience, all despite daily threats to his life. Hrant Dink was killed because he was a courageous journalist and continued to write his columns in hopes of getting rid of the ignorance that exists in Turkey. On the one-year anniversary of his death we remember Dink's message of liberty, civility, truth and bridge-building. In Dink's memory, I have joined my House colleagues in recognizing the Armenian Genocide of 1915.

It is my hope that Turkey will repeal the arbitrary statute, which makes it a crime to "insult Turkishness." Turkey claims to be a secular state with free elections, yet it clearly lacks the chief principle of a democratic nation: freedom of the press. The death of Hrant Dink is a tragedy that was fueled by injustice, and I strongly urge Turkey to abolish this capricious and dated statute.

I express my condolences to the family and colleagues of Hrant Dink. As we recall him in

life, and mourn his tragic death, we renew our commitment to work towards advancing the ideals and values, for which he so passionately stood.

IN TRIBUTE TO GUAM POLICE  
OFFICER FRANKIE E. SMITH

**HON. MADELEINE Z. BORDALLO**

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, January 29, 2008*

Ms. BORDALLO. Madam Speaker, I rise today to join the people of Guam in mourning the loss of one of Guam's finest in a senseless hit and run. On the night of December 30, 2007, Guam Police Officer Frankie E. Smith was on his police motorcycle responding to a 911 call for police assistance when he was fatally struck by a drunken driver. I rise to honor and pay tribute to Officer Frankie E. Smith, and all law enforcement personnel on Guam and throughout our country, who have paid the ultimate sacrifice while serving and protecting our communities.

Officer Frankie E. Smith, a young man of 35 years, was born on August 30, 1972, attended the public schools of Guam and graduated from the 1st Guam Community College Basic Law Enforcement Academy in 1997. He immediately began his career in service to his community in the aftermath of the devastation of Super typhoon Paka. But even before the completion of his police training, his service to his people and his country began as a citizen soldier of the United States Army and Air Force Reserves. "Smitty" wanted to become the best police officer he could be, and this motivated him to seek out and complete extensive training in various areas of law enforcement, including crime scene investigation, responding to terrorist threats, and detection of illegal substances. His desire for greater knowledge and skills was answered through intensive training with various local and Federal law enforcement agencies, including the U.S. Drug Enforcement Administration, the U.S. Department of Justice, and the U.S. Environmental Protection Agency.

Officer Smith's tenacity as a police officer was instrumental in solving numerous crimes against property and violent crimes against individuals, in the apprehension and arrest of their perpetrators, and in the recovery of evidence leading to convictions. His skills and motivation as an officer of the law were recognized and commended on numerous occasions by the leadership of the Guam Police Department and the Governor of Guam. His resolve and determination to serve the public and protect our community will be sorely missed by his fellow officers and the citizens of Guam, but his memory will always serve as motivation to those who served with him and to those who will follow.

On behalf of the people of Guam I extend our sincere condolences and heartfelt sympathy to his wife Tishawanna Hernandez Smith, daughters, Tamara Perez and Kae'Ana Justine Smith, to his parents, Frank Borja and Teresita Fejeran Smith, and to his fellow brothers and sisters in uniform, the officers in the Guam Police Department.
