

minute speeches on each side of the aisle.

EXTEND RENEWABLE ENERGY TAX CREDITS

(Ms. GIFFORDS asked and was given permission to address the House for 1 minute.)

Ms. GIFFORDS. Madam Speaker, I rise today to address the urgent issue of extending the renewable energy tax credits. These tax credits are due to expire this year. As we all know, their extension is critical to the young renewable energy industry in our Nation.

The House has passed extensions four separate times, and I applaud my colleagues for doing so. But our job is not done. I urge our colleagues in the Senate to work with us to pass a responsible extender bill quickly.

Solar power and other renewables are poised to be one of the biggest opportunities of the 21st century. Yet unlike our foreign competitors, we still haven't made a firm national commitment to this industry.

America can do better. We have always looked to the future, imagined a better world, and then partnered with the private sector to build it: railroads, the highways, the Internet as well. Government support was critical to every one of these technologies in its earliest stages. Renewable energy is no different.

I refuse to believe that we cannot get this legislation passed. I call on the leadership to pass it immediately. There's no time to waste.

RENEWABLE ENERGY AND ENERGY EFFICIENCY EXPO

(Mr. WAMP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAMP. Mr. Speaker, I rise this morning as the co-chair of the Renewable Energy and Energy Efficiency Caucus in the House of Representatives, representing well over half of the full House, to praise today's 11th annual Renewable Energy and Energy Efficiency Expo being held all day long in the Cannon Caucus Room.

Republicans and Democrats will join in support of these most important investments in renewable energy: wind, solar, biomass, geothermal. We have an abundance of these opportunities. We need to grow this from 6 percent of our electricity utilization to much, much higher.

We believe that Members should lead, encouraging weatherization of your homes, new appliances in your homes, ways to conserve. Conservation is not for wimps. It's for warriors. Not every American will wear the uniform of our Armed Forces, but every American can help our country reduce the demand and lower the cost for energy.

It's a critical issue. Our all-of-the-above strategy includes a tremendous focus on renewable energy, energy efficiency, energy conservation.

We encourage all Members to come to Cannon Caucus at any time today and join us in this most important bipartisan effort.

STOPPING THE FURTHER THEFT OF IRAQ'S OIL RESOURCES

(Mr. KUCINICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KUCINICH. Mr. Speaker, just prior to the invasion of Iraq on March 17, 2003, the price of a barrel of oil was \$30.01, and the price of a gallon of gas was \$1.77, the average.

On July 29, 2008, the price of a barrel of oil was \$122.21, and the average gallon of gas, \$3.96.

The invasion of Iraq was about oil, but it didn't result in more oil or cheaper gas. It resulted in war profiteering by oil companies who benefited by keeping Iraq oil off the market. Remember the secret meetings between the administration and the oil company executives before the war?

Well, today, I'm going to introduce a bill which prevents U.S.-based oil companies from development of and investment in the petroleum resources of Iraq. This will discourage U.S. oil companies from profiting from the war and will stop the further theft of Iraq's oil resources by the very interests who have profited from the war for oil, the U.S. oil companies.

PROMOTING NEW AMERICAN ENERGY ACT

(Mrs. BACHMANN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BACHMANN. Mr. Speaker, as part of our action plan for energy, Republicans in the United States House of Representatives are asking that we push forward with an all-of-the-above energy plan to utilize every source of American energy to release us from our dependence on foreign oil.

That's why today I'm introducing, Mr. Speaker, the Promoting New American Energy Act which accelerates tax depreciation to 3 years for investments in newer, cleaner, more efficient technologies, including wind, solar, and geothermal, as well as others.

According to the nonprofit American Council for Capital Formation, American energy investments have less favorable tax depreciation rules in the United States compared to many other countries. This does not put America in a good position for alternatives.

My bill will bring America's tax depreciation schedule in line with those of our major trading partners overseas, which will put America on a better foot globally, and that means more jobs in the United States.

This will take us one step closer, Mr. Speaker, to increasing domestic energy production and making it more efficient.

As a member of the Renewable Energy and Energy Efficiency Caucus, I ask my colleagues to promote newer, cleaner, more efficient energy solutions.

COMMENDING SANTA ANA POLICE DETECTIVE CHUCK SALLE

(Ms. LORETTA SANCHEZ of California asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. LORETTA SANCHEZ of California. Mr. Speaker, on May 18, 2007, a young mother was executed in cold blood by her former live-in boyfriend. The woman's 11-year-old daughter was in the house and heard her mother begging for her life, then a pause, then a gunshot, and then silence.

Santa Ana Police Detective Chuck Salle, badge number 2005, was on assignment to the United States Marshall's Fugitive Task Force and was tasked with tracking down and arresting that suspect.

Task force members located the suspect in a crowded restaurant and arranged a meeting away from the public area. Detective Salle approached the suspect, identified himself as a police officer, and the suspect pointed his gun directly at Salle's head and fired. The bullet missed, officers returned fire, and the suspect fell to the ground fatally wounded.

Today, the Treasury Department will recognize Officer Salle with the highest valor award that they honor ATF agents with.

Today, I publicly commend and thank Detective Salle, the United States Marshall's Fugitive Task Force, and law enforcement officers all across this great Nation for their efforts in protecting and serving our communities, day or night, rain or shine, every minute of the day.

□ 1015

LET'S VOTE ON AMERICAN ENERGY ACT

(Ms. FALLIN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FALLIN. Mr. Speaker, in just 2 weeks, children from all across America and in my district will be starting back to school. All over America, school officials are struggling with the rising costs of fuel. They have to run their buses twice a day for the next 9 months. And in some States, they're already talking about cutting back on bus routes. They're already talking about forcing some children to have to walk to school, and even going to four-day-a-week school classes. That's just not inconvenient for our families and our children, but it's flat-out dangerous for our children, especially our young ones.

Day after day, we wait for this House and the Democratic leadership to allow

us a vote on expanded energy resources, whether it is drilling, whether it is alternative resources—wind, solar, nuclear, refinery capacity, and day after day they say no.

In just a few weeks, our children, who have been riding buses safely, are now going to have to alter the way they get to school.

Mr. Speaker, time is up. It's time for us to vote on the American Energy Act. Let's vote on it today. Let's vote on it before we go on our August break. Let's give the American people relief on gas prices.

GAS PRICES

(Mr. HALL of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HALL of New York. Mr. Speaker, gas prices in New York are still at the outrageous price of \$4.19, well above what working families in the Hudson Valley can bear. They are looking to us in the government for answers, and Congress needs to respond.

The fact is that the Democratic majority has advanced a wide variety of proposals to provide relief. We have pushed tax credits for fuel-efficient vehicles and renewables, we've called for Big Oil to drill on its land that it has already leased and gotten permits for, and advocated a release from the SPR. Each time President Bush and his allies have opposed these measures and are holding real energy solutions hostage to their insistence on old, ineffective drilling proposals.

The Republican minority treats our energy crisis like a multiple choice question. The problem is that they keep answering "none of the above." On this side of the aisle, we will keep pushing solutions to responsibly enhance American energy supplies and usher in an innovative and independent energy future.

I hope that after the break our friends on the other side of the aisle will come back to Congress ready to cooperate instead of standing in the way.

AMERICA NEEDS COMPREHENSIVE ENERGY REFORM

(Mr. LATTA asked and was given permission to address the House for 1 minute.)

Mr. LATTA. Mr. Speaker, I am proud to represent the ninth largest manufacturing district of the United States Congress. Earlier this week, I had the pleasure of visiting two manufacturing facilities in my district.

During the visits, the management of each facility told me that the number one issue facing them is the rising cost of energy and petroleum products.

Natural gas is a much-needed resource in the manufacturing industry to fuel production, in addition to the thousands of petroleum-based products that are used to fabricate various goods.

Without comprehensive energy reform, the price of oil and natural gas will continue to rise here in the United States, forcing costs to rise, and leaving us at a competitive disadvantage with the rest of the world. Foreign manufacturers located in countries such as India and China are allowing for exploration and recovery of their domestic natural resources that keep their energy prices low.

The bottom line is that energy equals manufacturing which equals jobs. And without comprehensive energy reform, our Nation will continue to lose business to these countries and our economy will continue to suffer. The time to act is now.

COMPREHENSIVE IMMIGRATION REFORM

(Mr. BACA asked and was given permission to address the House for 1 minute.)

Mr. BACA. Mr. Speaker, we are a Nation with a Constitution and a Bill of Rights, with human rights; and that's what makes our country so great.

These rights were violated for hundreds of families in immigration raids throughout the country, including Postville, Iowa. What we fail to see at times are the long-lasting and devastating impact raids leave behind.

In Postville, hundreds of children have been ripped from their families, elderly left to fend for themselves, single parents forced to wear ankle bracelets are prohibited from working to feed their children. And the schools now resemble ghost towns with the absence of so many children.

We cannot continue to look the other way and ignore what is happening in this country.

The human dignity of these families have been stepped on. We are a country with moral principles and core family values. There is no blanket solution for the immigration crisis. We need to look beyond this ugly anti-immigrant rhetoric that is dividing our Nation and work towards comprehensive immigration reform.

213 VOTE TO GET OUT OF DODGE

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, it was 213 to get out of town and it was 212 to stay here and do our job, which is to pass an energy bill for Americans. So the 213 that won this vote, at the end of the day tomorrow they're getting out of town. But you see, back home where I live, people can't even leave town because they don't have enough money to pay for gasoline for their vehicles.

It's a shame on Congress that we are going in recess when we have to deal and have not dealt with the issue of high energy prices.

So let's bring a vote up today on whether we should drill offshore or not. Let Congress decide—no politics, up or

down vote—whether we should drill offshore and get America back to work by lowering gasoline prices. That's what we need to do rather than get out of Dodge—or should I say Washington, DC.

And that's just the way it is.

VETERANS TRAVEL PROGRAM REFORM ACT

(Mr. WALZ of Minnesota asked and was given permission to address the House for 1 minute.)

Mr. WALZ of Minnesota. Mr. Speaker, I rise today to introduce a new bill, the Veterans Travel Program Reform Act of 2008. I'm proud to be joined by my colleague from Connecticut (Mr. COURTNEY) in introducing this legislation.

Many of our veterans incur significant costs traveling to and from VA facilities to receive their health care treatment. This is especially true because of skyrocketing gas prices, and it's a big problem in rural areas like southern Minnesota.

While some veterans are reimbursed for their travel, the rate they receive is way below what Members of this body receive when we travel in our cars. That is simply wrong. What's more, current law requires the VA Secretary to raise the deductible that veterans have to pay when the mileage reimbursement goes up.

Many of our veterans travel—and travel long distances—and end up paying for it out of their own pocket. This bill would fix these problems by making it more generous and fair in the reimbursement. It would set the mileage rate at the same rate that other Members of Congress and other Federal employees receive. It would eliminate the deductible, and it would eliminate the restrictions on eligibility so more of our veterans would be able to receive that.

Mr. Speaker, our veterans served us, now it's time we serve them. I urge my colleagues to join me.

CONGRESS SHOULD DO ITS JOB AND VOTE ON ENERGY

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Yesterday, by one vote, the House voted to adjourn as soon as today for the August recess. This means Congress is about to take a 5-week vacation without even taking a vote on bipartisan measures that would lessen our dependence on foreign oil by allowing more domestic drilling on the Outer Continental Shelf.

Mr. Speaker, the American people won't get a vacation from high gasoline prices, so Congress shouldn't take a vacation until we vote to lessen our dependence on foreign oil.

If the Speaker won't keep the House in session to allow this vote, I urge President Bush to call an immediate
