We can work out the issues of what to do with people that are here illegally down the road. America will do the right thing, but we can never deal with that issue until we secure the border.

One of the things we ought to do is enforce the rule of law, and if businesses choose to hire folks that are illegally in the country and they know they're illegal, those business owners need to be prosecuted under current law. We see a few of those CEOs be carted off to jail in handcuffs, maybe they'll quit hiring folks that are illegally in the country. That's just one answer, but it's already the law.

So I encourage our government: enforce the law, protect our borders, secure our Nation first. That is the duty, obligation, and moral duty of our government.

And that's just the way it is.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. Pallone) is recognized for 5 minutes.

(Mr. PALLONE addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

UNJUST PROSECUTION OF FORMER U.S. BORDER PATROL AGENTS RAMOS AND COMPEAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. Jones) is recognized for 5 minutes.

Mr. JONES. Mr. Speaker, yesterday, I met with Monica Ramos, the wife of imprisoned U.S. border patrol agent Ignacio Ramos. I also met with her father, Mr. Joe Loya.

As the Members of this House are aware, in February of 2006, Agents Ramos and Compean were convicted of shooting and wounding a Mexican drug smuggler who brought \$1 million worth of marijuana across our border into Texas. The two agents were sentenced to 11 and 12 years in prison respectively. They have been in Federal prison, in solitary confinement, for 595 days.

Mr. Speaker, I continue to be distressed by the actions of U.S. Attorney Johnny Sutton and the prosecutors in this case.

Like thousands of Americans across the country, I was extremely disappointed by the ruling announced on July 28, 2008, by the Fifth Circuit Court of Appeals. The Court affirmed all convictions except those for tampering with an official proceeding, but this case is not closed.

□ 2000

A conviction secured on the testimony of a known drug smuggler should not stand. The same drug smuggler who told the Ramos and Compean jury that he did not carry a gun the day of the shooting also told the jury he was just a one-time offender who needed

money for his sick mother. Since the agents' conviction, however, the Mexican drug smuggler was convicted for additional smuggling offenses. His testimony against the agents has been proven completely unreliable.

Those of us who have urged a pardon for Ramos and Compean will continue to support them in their future legal appeals, and we will work tirelessly to ensure that the miscarriage of justice is corrected. The details of this case deserve an unbiased review by the U.S. Department of Justice. I have also asked JOHN CONYERS, chairman of the House Judiciary Committee, to hold hearings to examine the prosecution of these agents who were doing their job to protect our border.

Questions surrounding the prosecution of this case deserve to be answered. For example, why was not the jury allowed to hear crucial evidence that the smuggler was a repeated offender? And why did the prosecutor charge the agents under a statute that was intended for violent criminals carrying guns, not for law enforcement officers acting in the line of duty?

Mr. Speaker, nothing can erase the suffering these agents have undergone and the months they have spent in prison in solitary confinement away from their families, but I want the families of Ramos and Compean to know that my colleagues on both sides of the political aisle and I will continue to do all we can to see this miscarriage of justice corrected. It is my hope and prayer that one day soon these two heros will be home with their families.

Mr. Speaker, I close by asking God to continue to bless our men and women in uniform and their families. And I ask God to please continue to bless the families of agents Ramos and Compean. And I ask God to continue to bless America.

The SPEAKER pro tempore. Under a previous order of the House, the gentle-woman from California (Ms. Woolsey) is recognized for 5 minutes.

(Ms. WOOLSEY addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

SUNSET MEMORIAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. FRANKS) is recognized for 5 minutes.

Mr. FRANKS of Arizona. Mr. Speaker, I stand once again before this House with yet another Sunset Memorial.

It is September 10, 2008 in the land of the free and the home of the brave, and before the sun set today in America, almost 4,000 more defenseless unborn children were killed by abortion on demand. That's just today, Mr. Speaker. That's more than the number of innocent lives lost on September 11 in this country, only it happens every day.

It has now been exactly 13,015 days since the tragedy called Roe v. Wade was first handed down. Since then, the very foundation of this Nation has been stained by the blood of almost 50 million of its own children. Some of them, Mr. Speaker, cried and screamed as they died, but because it was amniotic fluid passing over the vocal cords instead of air, we couldn't hear them

All of them had at least four things in common. First, they were each just little babies who had done nothing wrong to anyone, and each one of them died a nameless and lonely death. And each one of their mothers, whether she realizes it or not, will never be quite the same. And all the gifts that these children might have brought to humanity are now lost forever. Yet even in the glare of such tragedy, this generation still clings to a blind, invincible ignorance while history repeats itself and our own silent genocide mercilessly annihilates the most helpless of all victims, those yet unborn.

Mr. Speaker, perhaps it's time for those of us in this Chamber to remind ourselves of why we are really all here. Thomas Jefferson said, "The care of human life and its happiness and not its destruction is the chief and only object of good government." The phrase in the 14th Amendment capsulizes our entire Constitution It says, "No State shall deprive any person of life, liberty or property without due process of law." Mr. Speaker, protecting the lives of our innocent citizens and their constitutional rights is why we are all here.

The bedrock foundation of this Republic is the clarion declaration of the self-evident truth that all human beings are created equal and endowed by their Creator with the unalienable rights of life, liberty and the pursuit of happiness. Every conflict and battle our Nation has ever faced can be traced to our commitment to this core, self-evident truth.

It has made us the beacon of hope for the entire world. Mr. Speaker, it is who we are.

And yet today another day has passed, and we in this body have failed again to honor that foundational commitment. We have failed our sworn oath and our God-given responsibility as we broke faith with nearly 4,000 more innocent American babies who died today without the protection we should have given them.

So Mr. Speaker, let me conclude this Sunset Memorial in the hope that perhaps someone new who heard it tonight will finally embrace the truth that abortion really does kill little babies; that it hurts mothers in ways that we can never express; and that 13,015 days spent killing nearly 50 million unborn children in America is enough; and that it is time that we stood up together again, and remembered that we are the same America that rejected human slavery and marched into Europe to arrest the Nazi Holocaust; and we are still courageous and compassionate enough to find a better way for mothers and their unborn babies than abortion on demand.

Mr. Speaker, as we consider the plight of unborn America tonight, may we each remind ourselves that our own days in this sunshine of life are also numbered and that all too soon each one of us will walk from these Chambers for the very last time.

And if it should be that this Congress is allowed to convene on yet another day to come, may that be the day when we finally hear the cries of innocent unborn children. May that be the day when we find the humanity, the courage, and the will to embrace together our human and our constitutional duty to protect these, the least of our tiny, little American

brothers and sisters from this murderous scourge upon our Nation called abortion on demand.

It is September 10, 2008, 13,015 days since Roe versus Wade first stained the foundation of this Nation with the blood of its own children; this in the land of the free and the home of the brave.

STEM CELL RESEARCH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. Welldon) is recognized for 5 minutes.

Mr. WELDON of Florida, Mr. Speaker, this summer has been a breath-taking one for stem cell researchers around the world, but not because of embryonic stem cells or cloning. Building on important work published last year showing that it is possible to reprogram an adult cell back to its primitive embryonic-like state, researchers led by Doug Melton at Harvard University have done what was thought impossible only a few short years ago. Melton and his team used mice to show that it is possible to directly reprogram support cells or exocrine cells of the pancreas into insulinproducing beta cells without ever removing any cells from the pancreas. Amazingly, it appears that one adult cell type has been directly and specifically transformed into another adult cell type. In other words, a simple injection of three critical reprogramming factors successfully produced insulinproducing beta cells and gave patients with diabetes and their families new reason to hope in the power of regenerative medicine.

Melton and his colleagues have brought us one step closer to what many have called the "holy grail" of regenerative medicine. He has shown that, in principle, it is possible to induce the body to heal itself by reprogramming one cell type into another. Imagine that; your beta cells can no longer make insulin and you are diabetic, perhaps because of immune destruction of your insulin-producing cells like in Type I diabetes, or perhaps because, like in Type II diabetes, your insulin-producing cells have just given

If the work Melton describes can be reproduced in human patients, diabetes patients would have to receive a simple injection, maybe two or three times, and with that, their pancreas could resume producing insulin and they would be cured of their diabetes, no longer requiring insulin injections, no longer requiring painful pinpricks.

Of course, Melton's work is a long way from the clinic. Mice are not people, and some of the details must be modified to ensure that the injection is safe and won't cause tumors. But this work represents an enormous step forward and should be pursued with all of the resources NIH can provide.

This exciting news comes on the heels of another announcement also this summer, that researchers from Harvard and Columbia have used the reprogramming protocol to create 21 disease-specific stem cell lines that will enable researchers to intimately study diseases such as Lou Gehrig's disease, Type I diabetes, Parkinson's and muscular dystrophy. And it is important to note that this technique also does not require the creation, destruction or even the presence of human embryos. These cells may not be ready to transplant into humans in the near term, but they will be available for research today and for use in screening for drugs.

So in a few short months, the promise of regenerative medicine comes closer to reality. Just last year, scientists and cloning advocates told us that we had to do human cloning—or at least to create cloned human embryos—so that we could accomplish these two goals that were deemed essential for moving regenerative medicine forward; creating disease-specific cell lines, and regenerating stem cells that could be a perfect match for patients affected by these diseases.

Both of these goals have been accomplished with the reprogramming protocol; no cloning, no human embryo stem cells required. To say it another way, there is no medical reason to proceed with research into cloning human embryos for their stem cells because that science is obsolete, it is more cumbersome, it is more expensive. We have a better, quicker, easier way to do it.

Now, I will note that these researchers who were involved with these breath-taking breakthroughs have done the politically correct thing and have said we still have to move forward with embryo stem cell research for compelling reasons. What those compelling reasons are I do not know. And I disagree with them. It cannot be denied that research is moving forward at a breakneck speed, and the Bush policy is still fully in place.

This work also lends more support for all the adult stem cell work that we have been talking about in this body for years. For years, embryonic stem cell research advocates have claimed that only embryonic stem cells can be transformed this way. Now we have direct evidence that it is not necessary. Science is moving beyond the debate. Science is taking us in a direction of ethically responsible research.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

(Mr. DAVIS of Illinois addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

UNFAIR TRADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KAGEN) is recognized for 5 minutes.

Mr. KAGEN. Mr. Speaker, I rise this evening to present some of the stories from northeast Wisconsin, a region in the country known as "Paper Valley."

We have, for over 150 years in Wisconsin, been the leaders in the paper industry, not just paper manufacturing, but paper research, designing new ways and new methods of manufacturing and using paper products all throughout the world. We have led the way because we've invested our educational system, our time and energy in developing the industry. And now, across the country, all the paper industry is imperilled because of unfair, unbalanced trade deals, and a trading partner that breaks the rules, and that is Communist China.

Recently, in November, the International Trade Commission ruled that there was illegal paper coming into the United States, but there was no damage, no damages to the paper industry here in these United States. Well, shortly thereafter, New Page Corporation closed the Niagara Paper Mill in Niagara, Wisconsin, displacing hundreds of workers who had been there for generations.

More recently, several days ago, in Kimberly, Wisconsin, the Kimberly Mill—and you've heard of Kimberly Clark, you've heard of Kleenex, you've heard of other paper products and Huggies and diapers—listen, Kimberly, the only mill that they've had, has been closed and shut down, shut down because of the illegal competition from Asian governments like both South Korea and China.

The decision by the International Trade Commission was that there were no damages. Well, I beg to differ. In my office, I have a scroll signed by nearly 5,000 people from Kimberly and the surrounding villages who have been damaged. They are real people with real damages. One of the families, the Van Zeelands, are here with me in picture form. Bruce and his wife Nancy have three children, Alicia, Scott and Courtney. And here is his statement which I read on the floor this morning, "It turned our life upside down. Working at one company for 28 years and having no other skills to compete in this horrible job market. My wife is struggling to find a full-time job now. We cannot help out our three kids with college. We worry about losing our home." And he's not alone. There are hundreds of other workers and other families with real damages that the International Trade Commission may not have considered.

What about the family of Tom Sternhagen, who had worked for 29 years at the Kimberly mill? His wife Maureen, his son Ben and daughter Lexi, and here's what he has to say. "Can't pay the mortgage. Can't pay the property taxes. Our son can't go to college. We have no more health insurance. Can't make car payments. This is nothing but corporate greed with no regard for human life." That is Tom Sternhagen.
