

much money to buy our national debt and \$700 billion of our money goes overseas every year; and our national security, when we see what other countries do with oil dollars, Iran buying missiles, building nuclear weapons, Venezuela sending terrorists to attack Colombia, the Saudis paying off al Qaeda, and Russians attacking Georgia, threatening Ukraine and Poland.

We have to have energy independence, and the means to energy independence is to drill for our oil and use that money to fund vast conservation efforts and innovative fuels so we can get off of oil. We have got oil to do that, and the oil is off of our Outer Continental Shelf and out in Colorado in the shale oil and out in the Arctic shores, and we can't get to it if we put a lock on it and turn the key and throw away the key.

We need energy independence, and this is a means towards the end.

THE SOLUTIONS TO ENERGY INDEPENDENCE ARE THERE AND AVAILABLE TODAY

(Mr. HALL of New York asked and was given permission to address the House for 1 minute.)

Mr. HALL of New York. Mr. Speaker, I agree that we need energy independence. All Americans agree that we need energy independence. There used to be bipartisanship on this issue. In fact, it was the first President Bush who proposed an executive order banning drilling on the Outer Continental Shelf.

We've had eight budgets sent here by President George W. Bush, who's his son. Every one of them, including this February when we got the budget for fiscal 2009, included language banning drilling on the Outer Continental Shelf.

Somebody got a poll this last spring, and the prices went up because they're being manipulated by oil companies and OPEC, and we wind up with a situation where it becomes a campaign issue that was made into a partisan issue by, I believe, the party that had originally supported these things, whose President sent us eight budgets with banning the Outer Continental Shelf language.

So I would just say calm down. We are working on a genuine, all-of-the-above, bipartisan—we hope it will be a bipartisan bill. It's up to my colleagues and my friends on the other side of the aisle, but the solutions are there. They're available today. The renewables are in front of us, and they hire more people than fossil fuels.

ALLOW A VOTE ON THE AMERICAN ENERGY BILL

(Mr. PRICE of Georgia asked and was given permission to address the House for 1 minute.)

Mr. PRICE of Georgia. Mr. Speaker, the most pressing, the most urgent issue facing the American people today is energy policy, gas prices. Yet the

strongest Nation, the greatest Nation in the world is 70 percent reliant on foreign oil.

Now, the good news is that there are wonderful and incredible alternatives and opportunities to create American energy for Americans. The problem is that this Democrat bill today will not, will not allow any new supply.

The reason the American people are so disgusted with Congress is because of this style of leadership: closed, unfair, un-American. This is most frustrating and concerning to the American people because they know that there are positive alternatives.

Madam Speaker, fulfill your duty. Allow a vote on the American energy bill. Honor your oath.

COMPREHENSIVE ENERGY ACT

(Mr. PERLMUTTER asked and was given permission to address the House for 1 minute.)

Mr. PERLMUTTER. Mr. Speaker, it's great to be here this morning to talk in favor of a Comprehensive Energy Act that we're going to bring up on the floor today.

My friends on the other side have been complaining for weeks that we don't have a comprehensive energy bill. We've passed bill after bill really designed to focus on new ways to power America. We can't be hooked on just one commodity anymore. We're hooked on oil. We are beholden to eight countries, most of which don't like us, and five oil companies. So we're always sort of at risk, and we've seen that this year with the price going straight up.

So we've got a bill that talks about energy efficiency, renewable energy, and incorporates domestic drilling all over the place, quite frankly, coal, a whole variety of things.

It's going to take our coming across the board with new policies with respect to energy to break our dependence on foreign oil. That's what this bill does.

And I always say, is it any wonder with two oilmen in the White House that the price of oil went straight through the roof?

PEOPLE NEED HELP IN AMERICA

(Mr. GOHMERT asked and was given permission to address the House for 1 minute.)

Mr. GOHMERT. Mr. Speaker, I just came back from a weekend of being with my constituents that were hit by a hurricane. They don't care about Republican or Democrat, and they cannot find a generator that's a hybrid generator. They need help.

And when I went and was dealing with sheriffs that were trying to get help for their people in the middle of the night, one of them said, You know I'm a Democrat. I said, You know I don't care.

People need help in America, and this bill that's been put on the floor will provide none of the above. The litigation

has stopped 68 million acres from being drilled, and now once we find that out, we find out that's their ace in the hole to keep this bill from producing anything.

People want hope. People need gasoline. They need diesel. They don't need a joke that is turned into a mean, mean, hurtful bill.

THE REPUBLICANS DON'T WANT TO FIX THE ENERGY PROBLEM

(Mr. OLVER asked and was given permission to address the House for 1 minute.)

Mr. OLVER. Mr. Speaker, our Republican colleagues are saying that H.R. 6899, the Comprehensive Energy Policy Act that this House will debate and pass later today, is a sham.

Let me remind them, H.R. 6899 contains essentially the same drilling language they demanded a vote on in June and July. Yet, they will vote against it today just as they did in June and July when they voted against requiring drilling in the already leased National Petroleum Reserve in Alaska, against cracking down on speculation, and against releasing a small portion of the Strategic Petroleum Reserve.

The truth is, they don't want to even begin to fix the problem. They only want to distract public attention from eight disastrous years of the Bush administration.

A failing economy, a failing foreign policy, a clearly failed energy policy, and no new ideas.

THE WORKING CLASS ARE GETTING STIFFED BY THE DEMOCRAT ENERGY BILL

(Ms. GINNY BROWN-WAITE of Florida asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. GINNY BROWN-WAITE of Florida. Mr. Speaker, back in the Fifth Congressional District in Florida, I tell people I came from a dysfunctional family. My father was a Democrat. My mother was a Republican. But let me tell you, my father was a Democrat because he thought that the Democrat Party was for the working class.

Ladies and gentlemen in this Chamber, the working class are getting stiffed by this bill. It's interesting because since the Democrats took control of both the Houses, gasoline has gone up over \$1 a gallon. Now you know what that means? That means that the working class and the middle class are really getting hurt.

The bill that we have before us today is not one that's going to produce any kind of energy. Let me tell you why. First of all, lawsuits will stop any drilling. There's no consolidation or method to consolidate any lawsuits that may be brought by numerous environmental groups. Certainly, we want to protect the environment, but you know what, this bill does not produce one ounce of any kind of petroleum product.

Also, I come from a State that could be producing, but there's no revenue-sharing. So no legislature or no Governor will ever vote to allow any kind of drilling off their shore.

THE REPUBLICANS ARE POLITICIZING THE HEARTBREAK OF AMERICA

(Mr. SALAZAR asked and was given permission to address the House for 1 minute.)

Mr. SALAZAR. Mr. Speaker, frankly, today I'm totally surprised that the other side is politicizing the heartbreak of America. The other side has actually raised fuel prices. We have an oilman in the White House. What we need now is common energy policy, expanding our renewable energy policy, and making sure that we address clean coal burning technology.

Who was it that withdrew the FutureGen project off the table? It was President Bush that did this.

Ladies and gentlemen, let's make sure that America listens to what Americans are talking about: high energy prices; they're losing their jobs.

Today, this bill expands domestic drilling opportunities, not only offshore but also on the land.

THE SPEAKER HOLDS THE KEY IN HER HAND TO UNLOCK THE POTENTIAL OF AMERICA

(Mr. SULLIVAN asked and was given permission to address the House for 1 minute.)

Mr. SULLIVAN. Mr. Speaker, when I was coming to the House after the August vacation, where we did nothing on energy policy, I was walking through the airport, and many people were patting me on the back, said get down there, get that energy bill done, it's hurting us, we need something done.

And they said they couldn't believe that the Speaker, NANCY PELOSI from San Francisco, would not allow us a vote on this. One guy said, I can't believe she's that powerful that she is single-handedly holding this up when the majority of the American people want to see this done and done now and get a comprehensive, all-of-the-above strategy.

She does have that power, and she's exercising her power. She has the key. She holds the key in her hand to unlock the potential of America, to unlock oil and gas reserves in this country that would last for 160 years that we can get right here in our own backyard. And while we're doing that, we can develop technologies like wind, solar, nuclear, hydro, biomass, all other technologies in an environmentally sound way, and we need to do it now.

Instead, we're getting a bill that's full of tax increases and drilling less in America, and this is the biggest hoax perpetrated on the American people that I've seen since I've been in Congress.

And on her Web site, she says a bill should generally come to the floor under procedures that allow full and open debate. Members should have 24 hours to examine bills and conference reports before they come to the floor. But she's not doing it.

□ 1145

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind the Members to observe proper decorum and please heed the gavel.

GRAND OLD OIL PARTY HAS A CASE OF AMNESIA

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute.)

Mr. DEFAZIO. Well, the Grand Old Oil Party has a case of collective amnesia. They would hope that the American people will share in their amnesia. The American people should forget that for 6 years they controlled everything, the House, the White House and the Congress. And for 6 years they labored and they brought forth the Bush-Cheney energy policy. I voted against it, as did most Democrats. We said it would make us even more dependent upon Saudi Arabia—one of the President's best friends here, the King of Saudi Arabia—and it has. It has worked exactly as they designed.

Now they're born again into caring about other forms of energy and energy independence and American consumers. It's just a smoke screen to cover for their continued addiction to the contributions of the oil industry and to fighting for the oil industry to continue that addiction.

We're bringing forward a bill to break that dependence, to break the enslavement to OPEC, and to move this country toward true energy independence on domestic resources and new technologies and jobs. I don't think anybody believes that they really care about the American consumers.

DEMOCRAT ENERGY BILL WILL BE RECEIVED WITH A THUD ON WORLD MARKETS

(Mr. RADANOVICH asked and was given permission to address the House for 1 minute.)

Mr. RADANOVICH. When President Bush lifted the Presidential moratorium on offshore oil drilling, the price of oil dropped \$12 a barrel immediately and has been falling ever since.

I have said many times over the summer that if Congress passes an energy bill that increases production of domestic energy, the markets will react immediately with lower prices. This is the litmus test that Congress will be delivering what the American people want.

The Democrat energy bill will be received with a resounding thud on the

world markets. It won't move the price of gas one cent because it provides no incentives for States who increase production offshore.

Unlike the Comprehensive American Energy Act, the bill we are voting on today does not address oil shale production, lawsuit reform, streamlining the nuclear energy process, coal-to-liquid technology, increase refinery capacity, and opening ANWR. However, the bill does include a drawdown over Strategic Petroleum Reserves, a fraudulent use-it-or-lose-it legislation, and an extremely costly renewable energy mandate. Maybe this majority ought to go back to suing OPEC to produce more oil because under this bill, that reliance is still there.

ENERGY BILL IS A COMPROMISE

(Mr. RAHALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAHALL. Mr. Speaker, Members of the House, the American people want us to solve the energy problems facing our country in a bipartisan way. They're looking to the Congress for answers, but they realize that the Congress cannot provide the only answers.

No less than T. Boone Pickens has said that we cannot drill our way out of this mess. The plan that we bring to the floor today is a comprehensive energy plan that does do all of the above. It's a compromise between the drill nowhere crowd and the drill everywhere crowd. And let's face it, there are some on the minority side in this body that would drill everywhere and they're not going to settle for anything less, including under the National Mall if they could. They would want to drill every inch of this land, and that is not a responsible way.

Our plan provides for reliance upon domestically produced energy sources, all of the above. It requires oil companies to be responsible and transparent in the collection of royalties. It provides for a new ethics code for the people at the Minerals Management Service to operate under so that the American taxpayer can receive a fair return for the disposition of their resources. These are public resources deserving public accountability.

NO COAL IN DEMOCRAT ENERGY BILL

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, my coal Democrats, who have promised me that they would take one vote in this Congress to advance coal, and we have not seen it. And my colleagues will want to attack the oil, but the best way to get off of imported crude oil is to use coal.

There is nothing in the Democrat bill that advances coal use; nothing, zero—no oil shale, no coal, no oil sands, nothing. It's not a comprehensive plan.
