SEC. 561. SENSE OF SENATE ON IMMIGRATION.—(a) FINDINGS.—The Senate makes the following findings:

(1) On June 28th, 2007, the Senate, by a vote of 46 to 53, rejected a motion to invoke cloture on a bill to provide for comprehensive immigration reform.

(2) Illegal immigration remains the top domestic issue in the United States.

(3) The people of the United States continue to feel the effects of a failed immigration system on a daily basis, and they have not forgotten that Congress and the President have a duty to address the issue of illegal immigration and the security of the international borders of the United States.

(4) People from across the United States have shared with members of the Senate their wide ranging and passionate opinions on how best to reform the immigration system.

(5) There is no consensus on an approach to comprehensive immigration reform that does not first secure the international borders of the United States.

(6) There is unanimity that the Federal Government has a responsibility to, and immediately should, secure the international borders of the United States.

(7) Border security is an integral part of national security.

(8) The greatest obstacle the Federal Government faces with respect to the people of the United States is a lack of trust that the Federal Government will secure the international borders of the United States.

(9) This lack of trust is rooted in the past failures of the Federal Government to uphold and enforce immigration laws and the failure of the Federal Government to secure the international borders of the United States.

(10) Failure to uphold and enforce immigration laws has eroded respect for those laws and eliminated the faith of the people of the United States in the ability of their elected officials to responsibly administer immigration programs.

(11) It is necessary to regain the trust of the people of the United States in the competency of the Federal Government to enforce immigration laws and manage the immigration system.

(12) Securing the borders of the United States would serve as a starting point to begin to address other issues surrounding immigration reform on which there is not consensus.

(13) Congress has not fully funded some interior and border security activities that it has authorized.

(14) The President of the United States can initiate emergency spending by designating certain spending as “emergency spending” in a request to the Congress.

(15) The lack of security on the international borders of the United States rises to the level of an emergency.

(16) The Border Patrol are apprehending some, but not all, individuals from countries that the Secretary of State has determined have repeatedly provided support for acts of international terrorism who cross or attempt to cross illegally into the United States.

(17) The Federal Bureau of Investigation is investigating a human smuggling ring that has been bringing Iraqis and other Middle Eastern individuals across the international borders of the United States.

(b) *SENSE OF SENATE.*—It is the sense of Senate that—

(1) The Federal Government should work to regain the trust of the people of the United States in its ability of the Federal Government to secure the international borders of the United States;

(2) in order to restore the credibility of the Federal Government on this critical issue, the Federal Government should prove its ability to enforce immigration laws by taking actions such as securing the border, stopping the flow of illegal immigrants and drugs into the United States, and creating a tamper-proof biometric identification card for foreign workers; and

(3) the President should request emergency spending that fully funds—

(A) existing interior and border security authorizations that have not been funded by Congress; and

(B) the border and interior security initiatives contained in the bill to provide for comprehensive immigration reform and for other purposes (S. 1639) introduced in the Senate on June 18, 2007.

(C) The degree to which the program has been implemented in airports.

(D) Whether a helpline or other similar mechanism of assistance provided by an air carrier, foreign air carrier, or the Transportation Security Administration should be established to provide assistance to employees of air carriers and foreign air carriers who are uncertain of the procedures of the program.

(3) In making the assessment required by paragraph (2)(C), the Administrator may make use of unannounced interviews or other reasonable and effective methods to test employees of air carriers and foreign air carriers responsible for registering law enforcement officers, firefighters, and emergency medical technicians as part of the program.

The SPEAKER pro tempore. Pursuant to House Resolution 1488, the gentleman from Wisconsin (Mr. OBEY) and the gentleman from California (Mr. LEWIS) each will control 30 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. OBEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the pending legislation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. OBEY. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Pennsylvania (Mr. MURTHA), the Chair of the Defense Appropriations Subcommittee.

Mr. MURTHA. The House Appropriations Subcommittee on Defense has

held 22 hearings and our members and staff have visited over 100 military bases and facilities, both here at home and throughout the world. The result is a \$487.7 billion fiscal year 2009 Defense Appropriations bill that supports our troops and their families; invests in equipment needed to support the force; imposes fiscal discipline necessary to manage the department's resources; and addresses flaws in the U.S. national security policy.

Earlier this year, I was disappointed to hear the Secretary of Defense say that the U.S. military must prepare for fighting wars against insurgents and militias, he is talking about the future, such as those in Iraq and Afghanistan, rather than spend time and resources preparing for future conventional conflicts.

I find these comments to be misguided and lacking in strategic vision, and the subcommittee agrees. When 90 percent of our ground combat units are rated as not fully mission capable and with what happened in Georgia, we need to be prepared for a contingency to prevent war.

This lack of strategic foresight has left our Armed Forces in a degraded state of readiness, has left our military facilities in disrepair, and has left many defense acquisition programs broken or badly damaged. That is in spite of the fact that under JERRY LEWIS and under BILL YOUNG we put all the money we could put into the products in order to get them upgraded.

The bill addresses our future military needs and provides the resources urgently needed by the Department of Defense to prepare the United States military forces for threats to our national security beyond the current wars in Iraq and Afghanistan.

I am inspired by our troops and their families. Their sacrifice and service to this great country are applauded by both the American people and this Congress. We may disagree on matters of policy, but we can all agree on the need to take care of our troops and tend to the needs of their families. This bill addresses these needs in many ways.

For medical treatment and research, the bill adds \$1 billion over the budget request within the Defense Health Program. Some of the recommendations include \$300 million for traumatic brain injury and psychological help. Our subcommittee has been in the forefront of making sure that we have PTSD in mind; \$40 million for medical care centers of excellence at Walter Reed Army Medical Center; \$150 million for breast cancer research; \$80 million for prostate cancer research; \$20 million for ovarian cancer research; and \$20 million for lung cancer. We found that 20 percent more military families have lung cancer than non-military families, so we put money in trying to detect it early, which is how we prevent it.

For Family Advocacy Programs, the bill includes \$102 million above the budget request, for a total of \$410 million.

The bill provides \$72 million to compensate servicemembers for Stop-Loss. We originally had more money in, but we couldn't figure out exactly how many people we had with Stop-Loss, so we said to the military, okay, we put \$72 million in. After October 1st, anybody that has Stop-Loss gets paid, but you have to go back, do a study, and then tell us how much money you need for the period after that.

The bill provides \$734 million above the budget request for the renovation and repair of barracks, military hospitals and other O&M funding for these facilities.

The bill includes language to ensure that the DOD takes steps necessary to ensure that Walter Reed National Military Medical Center and Fort Belvoir remain the gold standard of military medicine.

The bill expresses concern over the frequency of troop deployments and

the stress this places on the servicemembers and their families. All of us have seen the stress on the families.

Equipment and support of the forces. Key to improving U.S. military posture is to maintain our domestic industrial base.

Shipbuilding, \$14.1 billion.

The bill provides an additional \$523 million for the F-22.

The bill more efficiently aligns funding of the Joint Strike Fighter, \$6.3 billion.

The bill includes \$750 million for the National Guard, and we put \$750 million in the supplemental unanimously.

The bill includes \$3.6 billion for the Army's Future Combat Systems.

Improving fiscal responsibility. This bill reduces programs which have experienced uncontrolled cost growth due to poor management and designed instability while increasing funding for oversight activities.

The bill cuts \$650 million from unjustified and uncontrolled growth in outsourcing, and adds \$24 million for additional personnel required by the DOD Inspector General to oversee growth of DOD contracts.

For instance, I just saw in the news media, and that doesn't mean it is true, but there is \$13 billion that has gotten lost someplace in the Iraq spending, \$9 billion of it U.S. funds, according to the newspaper.

The bill reduces the presidential helicopter program, but we kept it alive, hoping we can get the cost down for the individual.

It cuts \$197 million and 16 aircraft from the Armed Recognizance Helicopter.

I recommend that the Members vote for this bill. It is an entire bill. When the bill is signed by the President, it will be money for the rest of the year.

FOOTNOTES:

- 1/ Included in Budget under Procurement title.
- 2/ Contributions to Department of Defense Retiree Health Care Fund (Sec. 725, P.L. 108-375).

Mr. LEWIS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I come to the floor today with serious reservations about the process, or rather the lack of process, governing the development of this year's end spending bill.

This package is made up of several components. We have just heard from the Defense Chairman. It also includes the Homeland Security bill and the Military Construction-VA spending bills, all of these together total some \$603 billion; a continuing resolution for nine spending bills funded at fiscal year 2008 levels; emergency spending totaling something in the neighborhood of \$23 billion; and other provisions costing even billions more.

If you are like me, you have a great many questions about what is actually included in this package. The simple truth is this: Very few people have any idea what is in it. During this time of economic uncertainty, our constituents are demanding oversight, transparency and accountability from Congress.

Last Friday, I began writing a letter to the three leaders writing this legislation. My message was simple: Given the size and scope of this spending bill, it is paramount that House Members and Senators of both parties be active participants in crafting this bill. I felt then, and I feel now, that it is essential that chairmen and ranking members of our Appropriations subcommittees be at the table during substantive negotiations.

I didn't send the letter, Mr. Speaker, because on Saturday morning I was told that the key elements of the spending bill were already in place and that there would be no Member or Senator participation. In other words, no full Appropriations Committee consideration, no meetings involving the key chairmen and ranking members, and no formal House-Senate conference deliberations.

I am convinced that the completion of this legislation without the full participation of Members and Senators will result in lasting long-term damage to not just the Appropriations Committee, but also to the institution, the House of Representatives that I love. It also leads the House and Senate into an unprecedented dangerous territory by handing the sole decision-making authority on national spending practices to a handful of elected leaders and a whole lot of unelected staff members.

It is not as if these leaders were negotiating 12 individual spending bills that had passed the House and the Senate. This year, the House has passed one funding bill. The Senate has not passed any. Over the last 2 years, out of the 24 regular order bills, the Appropriations Committee in the House has produced exactly one regular order conference report.

The challenge of developing and passing a Federal budget requires full active participation of Members and Sen-

ators in the full Appropriations Committee, on the floor of the House and Senate, and through an open House-Senate conference committee.

By the way, I might mention it was suggested on the floor earlier today that the chairman of our committee indicated the reason we haven't had a full, open committee hearing regarding this process was because Members tend to stand up and pontificate in open hearings.

Well, let me suggest that may very well be the case, and I wouldn't suggest that our chairman was ever known for pontificating, but, in the meantime, this lack of Member involvement is absolutely unacceptable. All year long, the majority leadership has chosen to ignore regular order. The assumption has been that BARACK OBAMA would be elected President in November, and that he would support higher levels of spending all across the board.

But join me in this question: What happens if JOHN MCCAIN gets elected President? And what if that President draws an even tougher line than President Bush? What does that mean? Does that mean, Mr. Chairman, that we won't have Appropriations Committee meetings or hearings or bills for another 4 years? It is an interesting question.

When I first came to Congress, legislation was drafted by Members with jurisdiction over the issues of the day. Members of both parties had every opportunity to participate in the debate by offering amendments.

Today, whether you are Republican or a Democrat, you no longer have any opportunity to participate, no opportunity to offer amendments, no opportunity to settle meaningful differences in the committee and on the House floor or in the conference between the House and the Senate.

My colleagues, this is no way to govern. We ought to work together, produce spending bills through a legitimate committee process and return to a full and open debate in committee and on the House floor.

Let me say that I did have a conversation just yesterday, indeed a cursory conversation, with my chairman, Mr. OBEY, about what's in this bill. I appreciated that opportunity to chat for a few minutes about this horrendous process as well as this bill.

Let me say that the issue that seemed to have paralyzed the process this year, and caused the committee to essentially close down, involves the majority's unwillingness to address the high price of oil and gas. That issue is finally, at least in part, addressed with this bill. Had we dealt with the OCS moratorium in June, the committee probably would have completed all of its bills, but we chose not to let that process go forward.

It is now late September, and, finally, the voices of millions of Americans, financially drained from paying

\$4 a gallon for gasoline, they are finally being heard. Section 152 of the CR represents a gigantic step in the right direction relative to energy independence. We actually suspend the moratorium on drilling in the United States.

Now, frankly, depending on who is elected as President, we may have to worry about that next year. I mean, a President could literally be involved in reestablishing that moratorium and thereby hampering America one more time.

In closing, I don't believe we should shut down our government. We must support funding for our troops, our veterans, and protect our homeland. Each of the 535 House Members and Senators should have played a role in shaping this bill.

It is time that we insist upon a return to regular order. It's certainly time that we get back to that which the Speaker promised, an open and transparent process with everybody's involvement, Members, but also the public as well.

Mr. Speaker, I proudly reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from North Carolina, chairman of the Homeland Security subcommittee.

Mr. PRICE of North Carolina. Mr. Speaker, I am pleased that the package we are considering today includes the fiscal year 2009 funding for the Department of Homeland Security.

The Homeland Security provisions are the product of months of information-gathering and analysis by both the House and Senate subcommittees, and they reflect a careful matching of dollars to priorities. Our subcommittee held 15 hearings featuring testimony from department officials, watch-dog agencies and outside experts, and what we are voting on today is well informed by what we learned from those hearings. As always, we are indebted to our dedicated professional staff and the staff from our personal offices who have worked with them.

I want to thank our distinguished ranking member, Mr. ROGERS, for his advice and partnership in helping make this a better bill. He and his staff worked cooperatively with us during the bill-writing process and during our negotiations with the Senate, and they provided many constructive suggestions and additions. I also want to recognize Mr. ROGERS' substantial and lasting contribution as the first chairman of this subcommittee, especially since this is likely to be his last year as our ranking member.

The discretionary total in the bill is \$39.98 billion, \$2.31 billion or 6 percent above the comparable fiscal year 2008 amount—that includes funding with an emergency designation—and \$2.37 billion above the administration's requested funding level.

Our primary objective in this bill was to correct known funding deficiencies,

which were substantial. Prime among these was the President's proposal to cut first responder, transit, and port grant programs by \$2 billion, or 49 percent. This bill restores funding for these grants.

A second deficiency in the President's budget was the proposed repeal of law enforcement officer benefits for CBP officers. The bill provides the full \$200 million necessary to pay for these benefits in fiscal year 2009.

The last major deficiency in the President's budget was a proposed \$140 million cut for explosive detection equipment at airports. This cut was based on assumed revenue from a new passenger surcharge that has not been enacted. The bill restores the \$140 million to provide level funding at \$544 million for this program.

The bill also reduces funding that was not fully justified, or for which the budget justification overestimated the need, and it uses the savings to provide increases above the President's request for critical priorities. This includes \$200 million for the Emergency Food and Shelter Program, \$100 million more than the President requested and \$47 million more than was provided in fiscal year 2008. Such an increase is warranted by the rising number of Americans who are relying on food banks and other community support organizations to meet their basic needs.

The bill includes \$4.99 billion for Immigration and Customs Enforcement, \$241 million above the request, and it targets \$1 billion for identifying and deporting dangerous criminal aliens. The President proposed no additional dedicated funds for this activity, which should be ICE's top priority.

The bill fully funds the request for border infrastructure and technology, while continuing a requirement that the Department consult with local communities on the character and placement of such infrastructure. This does not give border communities a veto over departmental decisions about fencing or other infrastructure, but it does give them a right to be heard.

As in past years, the bill requires the Department to provide a plan for how it will allocate its appropriation for border infrastructure and technology, and it withholds a portion of the appropriation until that plan is reviewed by GAO and approved by the committee.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. OBEY. I yield the gentleman 1½ additional minutes.

Mr. PRICE of North Carolina. The bill, including funding provided through the disaster relief package, includes \$9.3 billion for the Disaster Relief Fund, ensuring that FEMA can continue its work helping communities recover from recent disasters.

The bill imposes requirements on the Homeland Security Department to manage its programs efficiently and robustly, and to ensure that programs comply with all laws before they begin operations. The bill withholds a total

of \$1.4 billion to ensure that this planning takes place before taxpayer dollars are spent. Programs for which funding is conditioned include the Secure Border Initiative, Deepwater, and Cyber Security.

Also, I want to correct some comments made on this floor earlier about a sensitive DHS program. The bill does not provide funding for DHS's National Applications Office to use surveillance satellites for Homeland Security or law enforcement purposes. The bill does allow for the Department to use satellites for scientific and emergency purposes—for example, assessing damage from earthquakes or hurricanes. That's being done today. But provisions in this bill bar the Department from using these assets to pay for any other purpose until the Department explains how it will use them, protecting our citizens' rights and liberties, until the GAO reviews that explanation, and until our committee approves the expenditure of funds.

Mr. Speaker, this Homeland Security portion of the bill represents the right balance of investments and cost savings to ensure that we continue to make our homeland more secure, and it makes clear that the Federal Government will continue to be a faithful partner with State and local governments in that endeavor.

I urge colleagues to support this bill.

Mr. LEWIS of California. Mr. Speaker, I yield 4 minutes to the gentleman from Florida, who is the former chairman of the full committee as well as the Defense subcommittee.

Mr. YOUNG of Florida. Mr. Speaker, the Defense part of this bill is a very important part of the package, although it's only one of three appropriations bills.

It's a good bill. The Republican members and the Democratic members of the subcommittee all played a part in drafting this legislation and coming to the final product.

I want to express my appreciation to Chairman MURTHA for the fact that he included us in every step of the way. I have had the privilege of chairing this subcommittee on two different occasions. Mr. MURTHA is serving as chairman the second time in his career. Whether he was chairman or I was chairman, all members, Republican or Democrat, were included in the process. We were this year as well.

The problem is, once we finished our part of the process, the process broke down. This bill, for the first time, as long as I can remember in many years, did not go to the full committee for the committee to review it, did not go to the floor, did not go to an official formal conference. Nevertheless, the product is a good product. It's a good bill.

Chairman MURTHA has explained the highlights of this bill. I agree with what he said about the importance of all of those issues.

Another one of these bills is the bill that provides for military construction and for our veterans, and I have the

privilege of serving as a member of that subcommittee. I would say that under Chairman CHET EDWARDS, the same thing happened. The Republicans and the Democrats all had a chance to be players in making a decision on what was included in that bill.

Chairman EDWARDS had the good fortune to get his bill to the full committee, and it was reviewed and adopted almost the way he wrote it. Then it came to the floor, and it was passed here on the floor with all Members having an opportunity to discuss it, to debate it, and offer amendments if necessary. The bill, a good bill, passed. You have got the Veterans bill and you have got the Defense bill as part of this overall package, and I strongly support both of them.

But I do have to speak out against the procedure. I just don't think that it's right that all of the Members have not had an opportunity to review these bills when they could debate them, when they could offer amendments to the bills. It probably wouldn't have changed either one of these two bills very much, if any, because they are both good bills. So I stand here objecting to the procedure, but I stand here supporting those two bills. From what I have heard, I am not a member of the Homeland Security subcommittee, but I understand that it is also a good bill.

So I have no objection. I support the bills, but I do object to the process. We need to vote this package today. The end of the fiscal year is rapidly approaching. In 5 more days, the fiscal year is over. We don't want the Defense Department and the soldiers and sailors and airmen and marines, who are protecting this country, to go without knowing what they are going to have by way of funds for training, by way of funds for equipment, by way of funds for protective gear for themselves. This is a commitment that I think all of us in this Chamber have made.

We want to guarantee that our military troops, our heroes who protect this Nation, have the best equipment that is possibly available to them to do their job and have the best training on how to use that equipment and use it effectively to do their job and have the best protective gear to protect them while they are doing their job. So all in all, I suggest we vote for this package.

□ 1430

Mr. OBEY. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Texas, the chairman of the Military Construction Subcommittee.

Mr. EDWARDS of Texas. Mr. Speaker, less than 2 years ago, a new Speaker of the House, NANCY PELOSI, made a solemn promise to America's veterans. The gentlewoman from California said that the new 110th Congress would honor our veterans not just with our words, but with our budgets that would be truly worthy of their sacrifice.

With the passage of this bill, Speaker PELOSI has kept her promise to those

who have kept their promise to serve our Nation. With the dedicated leadership of Chairmen OBEY, SPRATT, FILLNER, and an incredible staff, in just 2 years this House will have increased veterans' health care and benefits funding by more than the Republican-led House did in the previous 12 years. In 2 years, the 110th Congress will have done more to increase funding for veterans' health care and benefits than any Congress in the history of our Nation. Promises made, promises kept to America's heroes. That's what this bill is all about.

Specifically, this bill adds to last year's historic increase in veterans' programs by increasing VA health care and benefits funding by \$4.5 billion. That is \$2.8 billion above the President's request.

What does this mean to our veterans?

By hiring more doctors and nurses, health care services will be expanded, and waiting time for doctors' appointments will be shorter. For the first time since 2003 when the Bush administration put a rigid income cap on veterans eligible for VA health care, we will open the doors of VA hospitals and clinics to more middle-income veterans.

For veterans having to drive long distances to VA hospitals and clinics, the VA mileage reimbursement, which was just 11 cents in 2007, will now be 41.5 cents per mile.

For many Iraq and Afghan war veterans, this bill will ensure the mental health care services they need and deserve to rebuild their lives.

For veterans who never delayed in answering their call to duty, this bill will mean shorter waiting times for their earned benefits to be approved.

For military troops and their families, this bill will mean better housing, more daycare centers and modernized training facilities with a military construction budget that is \$649 million above the President's request.

And let me thank our ranking member, the gentleman from Tennessee (Mr. WAMP) for his partnership every step of the way; and Mr. YOUNG and the other members of our subcommittee, both Republican and Democrat alike, who helped build this bipartisan bill on military construction and veterans.

Mr. Speaker, a vote for this bill is a vote of respect, respect for those who have given so much in service to our Nation in uniform. They have kept their promise. Today, let us keep ours.

Mr. LEWIS of California. Mr. Speaker, I am proud to yield 5 minutes to my colleague, HAL ROGERS, the chairman of the Homeland Security Committee.

Mr. ROGERS of Kentucky. Mr. Speaker, let me start by echoing Ranking Member LEWIS's misgivings about this so-called process. While I am certainly no stranger to omnibus appropriations bills, I must say we could have avoided this amended bill business that we are going through here today, this kabuki dance, and actually conferenced each bill. That was cer-

tainly the case on the Homeland Security bill when Republicans were in the majority. The bill was debated on the House floor. It was brought through the conference committee with the Senate in regular order.

Instead, this has been a closed-door process largely devoid of Member input, no formal conference, no motion to recommit, very little debate. Needless to say, this process falls far short of the open and fair debate that has been a hallmark of this People's House.

Now, having said that, and getting that off my chest, I am reminded a bit of what Mark Twain said about Wagner's music. He said it is really better than it sounds. And this bill is better than I have just described it.

I have to commend Chairman PRICE on doing his very best through this flawed process, looking out for House priorities and putting together a thoughtful agreement on the homeland security portion of this bill.

This division includes substantial funding for critical border security, immigration enforcement, infrastructure protection, and State and local programs that will certainly make our Nation safer and more secure.

I also want to applaud Chairman PRICE's efforts in keeping DHS on track to produce results and continuing our subcommittee's tradition of strict accountability. Tying funding to results has always been the mantra of this subcommittee, and I trust it will thus ever be so.

Lastly, I would be remiss, Mr. Speaker, without personally thanking Chairman PRICE for accommodating the minority's concerns where possible. He has approached his duties as chairman with the honorable statesmanship for which he is known in this chamber, and I have sincerely valued my time in serving alongside him over the last 2 years.

Mr. Speaker, I reflect upon the last 6 years in which I have had the privilege of serving both as chairman and now ranking member on the Homeland Security Appropriations Subcommittee. I am struck by both the progress that we have made since 9/11 and the daunting challenges that remain before us. Homeland security is not just about guns, guards and gizmos. It is about the dedication of hundreds of thousands of people who are working tirelessly and standing the watch to keep us safe. We must all remember that the department is only 5 years old, a fledgling agency that is mature in some areas, sadly deficient in others.

And it is this continued development of DHS that probably concerns me most. I have always cautioned the department to resist a migration toward the bureaucratic inertia that so grips and paralyzes many government agencies. In the case of homeland security, the mission is far too critical to head down such a cumbersome path to failure.

I remain hopeful the vast resources we have devoted to homeland security

over the past 6 years have not only made us more secure against known threats, but also more prepared for those we have not even thought of. It is this devotion to resolute vigilance and constant improvement that will carry our great Nation through the fire and over all of those who wish to do us harm.

Again, let me thank the staff for the work that they have contributed on this bill, both majority and minority and personal office staffs have all pitched in. We have had a good time working together, and I would like to say finally how much I have enjoyed working with the new chairman of this subcommittee, DAVID PRICE, who has been agreeable most of the time and has been a gentleman all of the time. I have enjoyed our association, and wish that it would continue.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the distinguished majority leader.

Mr. HOYER. I thank the distinguished chairman of the Appropriations Committee for yielding.

I rise obviously in very strong support of this continuing resolution and the three full bills that are attached to it and the other nine of course that will be funded at last year's level with certain exceptions that are necessary to act responsibly. Obviously, passing a CR is never an ideal step.

I want to say that as someone who served on the Appropriations Committee for 23 years, actually 25 years, I guess, I hold that committee in very high regard. And I am pleased that I am following the Representative from Kentucky, the ranking member of this committee, as he spoke not only about the substance of the bill that he has been most intimately involved in, but as well of the respect that he and the chairman have for one another and the ability they have to work together. I think it has been one of the hallmarks of the Appropriations Committee that has been possible.

Regrettably, however, very frankly from my perspective, forces outside of the context of the Appropriations Committee, for whatever reasons, whether they are from the administration or from each of our caucuses, has undermined that ability of the committee to work the way it has worked and wants to work.

No one in this body is more attuned to the needs of this body, loves this institution more, is more a student of this institution, and very frankly is a better legislator than the chairman of this committee, my friend, DAVID OBEY. I want to congratulate him for the extraordinary patience, and he is not known as a patient man, which makes his patience even more extraordinary, that he has been working on a bill that has been so frustrating for him, as well as the committee and the Congress.

The CR does contain a number of important funding provisions: an increase

in the Home Energy Assistance Program which the chairman has been involved in all of his congressional career, which spans some 3½, almost 4 decades. It helps families heat their houses during a winter of high fuel costs.

It includes funding for Pell Grants to ensure that college aid is not cut in the middle of the school year so that our students will have access to college; and nutrition funding for women and children struggling with the economic downturn and food prices that confront them.

Nevertheless, we are debating, frankly, a CR today because we did not complete the appropriations process. I think that is regrettable. I hope we do not repeat that next year. I see Mr. WAMP shaking his head as a ranking member. I think everybody on the Appropriations Committee wants to make sure that we can complete our process next year. And I think we can.

Very frankly, we were confronted, the chairman was confronted with an administration who wanted to limit funding, frankly, far below what was possible in order to meet the responsibilities that we have to this Nation and to our people.

Today's outcome was a direct result, in my opinion, of the White House's unwillingness to come to the table to discuss funding levels for priorities, to determine what those priorities are, whether they be the National Institutes of Health, whether they be vocational education programs, whether they be protecting our environment; or, very frankly, whether they be overseeing in a regulatory way the financial community, the failure of which has led us to a very critical time in our country's history.

There were 20 programs eliminated. Congress did not agree with all of those. The administration would have slashed funds for crumbling infrastructure, law enforcement, for energy research. Those are items which could have been debated and should have been debated and brought to this floor, but because there was no flexibility, that did not occur.

Simply saying, We'll adopt your priorities, Mr. President, is inconsistent with article I of the Constitution which gives to the 435 of us that have been elected by the people of this country to come and to set priorities for our country. We do so in a representative way. The President, very frankly, is elected to make a determination on our product, not to tell us what our product is, but to make a judgment once our product is passed whether or not he will agree. If he does not agree, he vetoes that bill and then we have a determination to make by two-thirds vote that we disagree with his judgment. That is the way that the process should work, not be told that your product is going to be unacceptable unless it is as I tell you.

With his veto threat hovering over the entire appropriations process, sti-

fling debate and compromises, that process simply could not continue.

I want to again congratulate Mr. OBEY. If we do not pass this CR, of course, the government runs out of funding authority on the 30th of this month. October 1 is the beginning of our fiscal year. We really don't have an alternative. The only responsible vote, in my opinion, is to pass this bill.

I want to congratulate Mr. MURTHA and Mr. LEWIS and Mr. YOUNG. I want to thank Mr. YOUNG for the extraordinary leadership he brings to this House. Mr. YOUNG is not of my party, but he is, I think, one of those who has the highest character and care for the people of America. His willingness to work together has been, I think, in large part responsible for us getting a defense product with Mr. MURTHA that this House will overwhelmingly support, in my opinion.

I want to thank Mr. LEWIS as well for helping to bring this bill to the floor. I want to congratulate those with the Homeland Security and the Military Construction and VA parts of this bill.

□ 1445

They are bills which have been considered, and I think are going to be overwhelmingly supported.

I would urge all of my colleagues, meet our responsibilities, fund our government, come back here in an atmosphere in which open debate as to the priorities of our country is welcomed by all sides, and have a full appropriation process next year.

In closing, let me again congratulate and thank the gentleman from Wisconsin for his leadership, without which we would not have been able to get this bill as far as it has gotten to its passage and to fund our government in the coming months.

Mr. LEWIS of California. Mr. Speaker, I yield 5 minutes to the ranking member of the committee dealing with military construction and veterans benefits, the gentleman from Tennessee (Mr. WAMP).

Mr. WAMP. I thank the distinguished ranking member for the time and for the courtesies and instruction and help along the way that he has given me.

It is an honor to follow the majority leader. I know that he and the Speaker of the House, having both served on the Appropriations Committee, are frustrated, as we are, that we're only this far along on the appropriations process, with three of the 12 bills here as the fiscal year ends next week.

Having said that, I want to say that it is really awesome to be on the floor today participating in the discussion around the three bills that are included in this package because of the quality of the people involved in these three bills. The new majority, obviously, is punting on nine bills, but they're rightly bringing the three security-related bills to the floor before the fiscal year starts next week.

And the people involved here on our committee, when I think of the chair-

man of the full committee, Mr. OBEY, and the ranking member of the full committee, Mr. LEWIS of California, and Chairman MURTHA on the Defense Committee, and former Chairman YOUNG, the ranking member of the Defense Committee, and I think of DAVID PRICE and HAL ROGERS on Homeland Security, CHET EDWARDS, the chairman of the committee that I'm the ranking member on, to be included with these people, from both parties, is a real awesome honor for me because this is my first time at this level of being involved in this process.

But I've got to tell you that a far greater honor than being associated with any of you is this greatest honor of my adult life, outside of my family, in my professional life for sure, is to be the ranking member of the appropriations subcommittee that serves the people who serve us in uniform, past and present. What an unbelievable honor. What an emotional year Chairman EDWARDS and I had, hearing from the commands around the world and their military construction needs and the quality of life issues for every single man and woman in uniform, hearing from the families, the enlisted personnel, the officers.

And former Chairman YOUNG is on our subcommittee, giving us great senior counsel. And then for our veteran communities to come before us and see us come together at record levels of funding for our men and women in uniform, both past and present, this is important. This is incredibly important. It is the highest honor I've had in my professional life to be associated with this responsibility.

But I am frustrated, as I know many are from both sides of the aisle, that the other nine bills effectively are kicked over 5 months into the next fiscal year at flat funding, level funding. And I do know that a fair assessment as the issue of energy became involved in this process, mid summer, one party advancing on the issue of energy, frankly, the other party in retreat on the issue of energy, and it definitely compounded this process because every one of these bills involves energy because energy is everything right now in this country. It's critically tied to the economic condition that we are in.

All I would say, in closing, is I appreciate the work at bringing these important security-related bills to the floor. I'm frustrated that the others are not here and that the entire process broke down. I mean, I could almost say, tongue in cheek, I'm so glad to be here because I have been on the Appropriations Committee for 12 years and I was beginning to wonder if we had an Appropriations Committee anymore, because we haven't met a whole lot lately. We haven't met enough lately.

I hope that the 111th Congress next year brings the committee to the regular order all the way through the process, because I really like that. I like it when we have a conference and we go in with the Senate and we sit

across the table and we hammer out a compromise and we fight for the priorities that we believe in versus what they believe in.

Let me also say, once again, it doesn't matter who's in the majority; the folks on the other side of the dome in the United States Senate are always a problem. They didn't move any of the bills in a timely manner. At least we were trying. And that's a problem. But I don't want to let everybody off the hook. It's up to the majorities in both bodies to move this in regular order. I know Chairman OBEY is an institutionalist and would like to do that. Next year we better do it. No matter who wins the election, we better do it for the good of the taxpayer and for the good of the committee, the tradition. It's important that we reshape the priorities. We're the ones that have the hearings. Mr. EDWARDS and I spent over 100 hours together this year. I enjoyed every minute. I'm grateful.

Mr. OBEY. Mr. Speaker, I have only one remaining speaker, so I will reserve time until the end.

Mr. LEWIS of California. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. WELDON), Dr. WELDON, who's probably going to be speaking for the last time on an appropriations bill since he's chosen to retire at the end of this season. Dr. WELDON.

Mr. WELDON of Florida. Mr. Speaker, I am concerned about a provision in this bill waiving the Iran Nonproliferation Act to allow NASA to purchase launch services from Russia.

NASA is the greatest proliferator to Iran. Indeed, just this week, Russia announced its intent to provide Iran a missile defense system, not to protect its people, but to protect its nuclear weapons production facility.

Now NASA has been asking for this provision because of their concern that without it, they will not be able to get our astronauts to the space station after 2010, when the space shuttle is retired.

Now we are told we have to do this because we can't afford to fly the shuttle anymore.

Mr. Speaker, this is pathetic. In the same week we are debating a \$700 billion bailout of Wall Street, we are told we can't afford to fly the shuttle and we have to rely on Russia.

Mr. Speaker, this is bad foreign policy. It sends a bad signal to Russia and a very bad signal to Iran.

Mr. LEWIS of California. Mr. Speaker, I yield 1 minute to the ranking member of the Transportation Committee, the gentleman from Michigan (Mr. KNOLLENBERG).

Mr. KNOLLENBERG. Mr. Speaker, I rise today in support of the appropriations package before us. It includes money that is very important to Michigan and to the domestic auto industry.

I want to thank Mr. OBEY, I want to thank Mr. LEWIS, and I want to thank our colleagues from Michigan for coming together on this important issue.

This is a big step toward the successful turnaround of the American auto industry.

Some will lump this in with the other bailouts this Congress is considering. They would be wrong. This is about building a partnership, about working together toward an end goal that we all seek, which is more fuel efficient vehicles.

Automakers are now going to receive a partnering hand from Washington and not just a burdensome mandate. This will help create good jobs in Michigan, especially in the high tech field of alternative energy research.

Michigan first put the world on wheels, and Michigan can put the world on wheels propelled by the next generation of alternative fuel vehicles.

I strongly support the bill and urge passage.

Mr. LEWIS of California. Mr. Speaker, if there's been a Member of the House who has told all of us the urgent need for being able to tap into our resources of oil and gas, it's been the gentleman from Pennsylvania (Mr. PETERSON). I yield him 1 minute.

Mr. PETERSON of Pennsylvania. I have mixed emotions today. It may be the last chance I have to address this body. In 1 minute, I can't say much. I want to tell how much I've appreciated both sides of the aisle, my friendships.

Mr. OBEY. If I yield the gentleman 10 seconds, will he yield to me briefly?

Mr. PETERSON. Surely. I yield.

Mr. OBEY. It's never true that the gentleman cannot say a lot in 1 minute.

Mr. PETERSON. Thank you.

In June when I offered my amendment, I wasn't planning on blowing up the appropriations process. I have, for most of a decade, talked about energy for America, and it's like the blood flowing through our veins. Available, affordable energy will depend on whether we remain a first-rate Nation.

I am pleased today that we've ended up with an appropriations bill without the moratorium. I'm not celebrating, because I know it will depend on the next Congress, you folks, it will depend on the next President whether we provide available, affordable energy for America. I urge you not to follow the last three Presidents, not the last 14 Congresses who have not treated energy with the priority they needed to.

Folks, this is more of a crisis than many people still believe. The future availability of energy at an affordable price will determine whether our people can stay in their homes, can feed their families, can travel to work and whether companies can afford to continue to stay in this country.

It's vital that you, in the next Congress, open up energy for America and yes, go to the renewables with the royalties from it. But we must open up our reserves and not treat them as a liability, but treat them as an asset as they are and enrich this country and the future of this country with available, affordable energy. I'm counting on you,

as someone who will be watching on C-SPAN.

It's been a pleasure to serve with you.

Mr. LEWIS of California. Mr. Speaker, I am pleased to yield 1 minute to the gentleman from Texas (Mr. POE).

Mr. POE. Mr. Speaker, I'm glad that this package includes disaster assistance. Eleven days ago Hurricane Ike came blasting through the Southeast Texas area. To give some magnitude of how large this hurricane was, if you take the State of New York and superimpose it in Southeast Texas, that's the mass of land affected by this disastrous hurricane, causing power outages even to 2 million still to this day, most of my Congressional district.

Most of my Congressional district was affected, and the area affected most was the areas that refine gasoline for the United States. Twenty percent of the Nation's gasoline that is refined east of the Rockies is refined in my congressional district. All of those refineries shut down. They had damage because of the surge that came into that area; not to mention the people as well that are still suffering today.

So I'm glad to see that both sides came together on this issue to offer disaster assistance to the individuals that were affected by not only Ike but by Gustav and all the other natural disasters that occurred this year.

Mr. LEWIS of California. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. UPTON).

Mr. UPTON. Mr. Speaker, last year the Congress, this Congress, authorized \$25 billion to help the auto industry. But, as we know, an authorization is no good unless you appropriate the money.

The auto industry has to have access to that capital. This is not a bailout. It is a loan. It will be paid back, just like what happened with the Chrysler issue a couple of decades ago. And it impacts tens of thousands of workers across this country, certainly in the Midwest and around the balance of the country as well.

I appreciate the work of the leadership on both sides. They listened and they delivered. Our Michigan delegation, particularly with our leader, the Dean of the House, JOHN DINGELL, we worked together for weeks and weeks, many hours, and we used the strength of every Member, be it Republican or Democrat, to try and get the interests of the appropriators and the leadership to include it as part of this package, and they delivered.

We thank the administration, all of the Cabinet members. They understood the impact that would happen without the money being appropriated.

And we thank both candidates, OBAMA and McCAIN, for their support as well.

Mr. LEWIS of California. Mr. Speaker, I do have one additional speaker. He doesn't happen to be here, but if the Members would bear with me, I would like to take just a moment on my time.

For just a moment I would like to suggest that because this is likely the last time we will be addressing Appropriations Committee business this year, I want to commend eight of our colleagues who serve on our committee who are leaving Congress at the end of this year to pursue new challenges and new opportunities. They are BUD CRAMER, TOM UDALL, RALPH REGULA, JIM WALSH, DAVE HOBSON, JOHN PETERSON, RAY LAHOOD and DAVE WELDON.

□ 1500

All told, with these retirements, the House is losing over 100 years of cumulative Appropriations Committee experience. The skill and knowledge that they bring to the committee each day will be sorely missed and not easily replaced.

Let me take a moment in a long-standing tradition of our committee in the House to thank each of our retiring colleagues for their friendship, their service, and their fine bipartisan work. Let's stand together, Republicans and Democrats, to show our appreciation and say thank you to our friends and colleagues.

Mr. LEWIS of California. If you have no additional speakers yourself, then with that I will yield back the balance of my time.

Mr. OBEY. Mr. Speaker, I yield myself the balance of the time.

Let me first second the comments made by the gentleman from California about our departing Members. They have, I believe, all been professionals. They have been an asset to this institution. They've certainly been an asset to the committee, and I appreciate the many courtesies that we have received from all of them throughout the years and wish them all the very best in retirement.

Mr. Speaker, today we have three moving pieces with which we have to deal between now and the closing of the session. The first is the President's unprecedented bailout request or rescue request, however you choose to term it, of \$700 billion, which has, I believe, truly astounded the Nation.

Second is the need to try to pass a second stimulus package which tries to react to the loss of jobs in this economy by providing funding for programs that will help create additional jobs and also provide funding for programs that help mitigate the pain to families of the loss of employment opportunities.

And thirdly, and most immediate, we have to pass a continuing resolution to keep the government functioning. It is important that we pass this and let the other body pass it because we can add at least a small sense of stability to the markets that are in turmoil today and I think also in the process give us more time to address the truly radical proposals that have been sent down to us by the White House with respect to that bailout.

I want to congratulate Mr. MURTHA and Mr. YOUNG because they both know

their bill. They both know their brief. And their staff has provided able support to both of them, and I appreciate the hard work that both of them have done, and I appreciate what they've contributed to this institution over their careers.

I want to say the same thing about the Military Construction Subcommittee, which has been ably led by Mr. EDWARDS and Mr. WAMP, and certainly the Homeland Security Subcommittee, led so ably by Mr. PRICE and the gentleman from Kentucky (Mr. ROGERS).

I'm especially proud of what's happened in the Military Construction bill. If you take the last year's budget plus this year's budget, we have had the largest increase in veterans health care in the history of the country, and much of that was adopted over the initial opposition of the President.

Let me also say that I—

Mr. Speaker, could I suspend and ask the gentleman a question. Did the gentleman yield back all of his time?

Mr. LEWIS of California. Yes, I did.

Mr. OBEY. I see the minority leader on the floor, and I'm sure that he would probably like to say some words.

Mr. LEWIS of California. The gentleman is very kind.

Mr. OBEY. If I suspended my remarks, would you like to proceed with the minority leader's comments right now if you could take back your time?

Mr. LEWIS of California. The chairman is most sensitive and generous. Thank you for that.

Mr. Speaker, I ask unanimous consent to reclaim 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LEWIS of California. Mr. Speaker, I yield 1 minute to the Republican leader of the House, JOHN BOEHNER of Ohio.

Mr. BOEHNER. Let me thank my colleague for yielding and thank my friend from Wisconsin for his kindness.

Here we are, we have a bill where we're going to spend \$800 billion of taxpayers' money, a bill that has not been through the committee, a bill that if there's a Member who's read it I would like to know who they are.

And the reason I bring the point up is that the appropriations process is not working. It's broken, and I think on behalf of all of our Members that we need to make a commitment to make this process work the way it was intended to work. I know appropriators on both sides of the aisle want it to work. I think Members on both sides of the aisle understand that this process needs to work because when it doesn't work, the kind of transparency and accountability that we owe to our constituents gets done behind closed doors.

There are billions of dollars worth of earmarks in this bill that no one's ever seen. Maybe sometime we'll see them. I guess we could go back here and root

them out and try to find them, but nobody knows what they are, how the money is really being spent, and that's why we have a committee process. That's why we need the committee process to work, and we need it to work for appropriators and Members of Congress on both sides of the aisle.

Having said that, I really wanted to rise because there's a significant achievement in this bill, and that is the elimination of the ban on offshore drilling and the ban on drilling for oil shale in the inner mountain West. These bans have been in place now for 25 years that have held up a lot of American energy, and we have had a battle in this Chamber for the last 4 months about bringing about an all-of-the-above energy plan.

Now, this isn't all-of-the-above, but let me tell you what, it is a very big step forward that we will, in fact, lift these bans and allow American companies to drill for more American-made oil and gas in an environmentally responsible way.

It's a joint victory, and I didn't want to miss an opportunity to come down and congratulate Members on both sides of the aisle who stood up and said, enough is enough, we need to go after American energy if we're going to help ourselves.

Now, there's a lot more to do in the energy arena, and if we're serious about helping the American economy, doing all-of-the-above will create almost 1 million new jobs, will reduce gas prices, reduce energy prices, and this is a big step. But there's a lot more to do, and we ought to do it before we leave here.

Right up here above the Speaker's rostrum is a quote from Daniel Webster, and I will just quote the part of it when he says, "Let us develop the resources of our land." That was written a long time ago. Those words were said even longer ago, and I do think the American people want us to develop the resources of our land to help improve our energy security because most Americans understand, without more energy security, our national security and our economy is threatened.

Mr. OBEY. Mr. Speaker, let me resume my comments.

What I was trying to say is that the item I'm the most proud of in this package is the fact that this Congress will have provided the largest increase in veterans health care in the history of the Republic, and in addition to that, we have also provided by action taken just a few months ago the largest increase in education benefits for veterans since the beginning of the GI Bill. I think that's truly an historic action, and I am very pleased that this House was willing to do that.

So this bill does contain the three bills that represent the security-related appropriation bills for the coming year.

Having said that, let me make one observation. As I said earlier, I initially did not plan to have the Defense

bill in this package. Much has been made today by some Members about earmarks in the bill. The fact is if the Defense bill hadn't been in this package, those earmarks would not have been in the bill. We put the Defense bill in, in the end, at the request of the minority and at the request of the Secretary of Defense who asked us to do so, and I suspect in the end it will probably, from the standpoint of the Defense Department, prove to be the right choice.

But having said that, I want to talk about why I believe we have not been able to finish the domestic appropriation bills. The President submitted a budget to us at the beginning of the year in which he insisted that we cut some \$14 billion in crucial domestic items. Example: He wanted us last year to cut 50 percent out of vocational education funding, and this year he wanted us to eliminate vocational education. He wanted us in the last 2 years to eliminate all student aid programs except Pell Grant and Work-Study. He wanted us to eliminate the program that teaches medical personnel to deal with the specialized needs of children in children's hospitals.

I've never had anybody in my life come up to me and say, "OBEY, why don't you guys in Congress get your act together and cut cancer research." And yet, that's what the President and the previous Congress did; they cut almost 1,000 research grants out of the National Institutes of Health.

At a time when we've had a 70 percent increase in the cost of home heating, the President asked us to cut the Low Income Heating Assistance Program, to help the victims of those price increases, by 22 percent. So if we had rolled over and accepted the President's domestic budget, that's what we would have had to do.

And we felt therefore, that since the President had made quite clear that he would veto any domestic appropriation bills that exceeded his budget request, we felt that rather than capitulate and make those cuts, we would simply say, "All right, Mr. President, for the 4 remaining months that you're in office, we'll be living at your budget level, but we will kick the can down the road so that if we have a President who will negotiate like an adult at the end of the road next year, then we will try to cut some compromises that will preserve some of these high-priority areas."

Now, the President made a Federal case out of our desire to spend \$14 billion on our own people, and then he has presented to the Congress in the last 2 weeks a request that we spend 50 times that much, 50 times that much, on the bailout of Wall Street. And so I say that to put in perspective the President's stubbornness.

The fact is, if he had not taken a "my-way-or-the-highway" approach to domestic appropriations, we could have sat down. . . . I told Mr. Nussle many times, I would have been happy to sit

down and split the differences right down the middle, compromise like adults are supposed to. But no, the President said, "My levels or no levels." So he gave us no choice unless, of course, we wanted to capitulate.

So, by not finishing these bills, we maintained the possibility of providing more support for medical research, more support for energy research, more support for education, and more help to the 50 million people in this country who have no health insurance, and I make no apology whatsoever for doing that. I think it is the right thing to do and the moral thing to do.

Now, let me explain just a bit about what's in this bill. We, therefore, straight-lined all of the domestic bills until March 6. In addition, we've included a number of other items. As I've indicated, we have essentially doubled the Low Income Heating Assistance Program. We're taking it up to the full authorization level.

We have provided the funds that the gentleman from Michigan just referred to, funds requested to try to enable the auto industry to modernize and retool. We did not give them the \$50 billion that they wanted. We have cut it to 25, and we did not change the authorization in the way that the auto industry wanted because we did not want government to be on the hook for 80 percent of the cost of those projects.

□ 1515

We also provided the \$5 million the White House wanted so that they can conduct their search of e-mails because of subpoenas that have been laid on them. And we have provided \$2 billion in this package so that next February, the agency doesn't have to write every family in America and say, "Sorry, but the Pell Grants for your son or daughter for the next year are going to have to be at a lower level than they were last year."

We have also provided \$23 billion in disaster funding for Iowa, Texas, and all the other States who have been hit by so many bad storms lately. And I will stipulate that I believe that the Community Development Block Grant portion of that disaster funding is inadequate and will have to be revisited next year.

These are some of the initiatives we've taken. As the gentleman has indicated, we have also in the process, at the insistence of the White House, acquiesced in the White House's desire to lift the moratorium on offshore drilling. That will mean that what happens in the future will be determined by who is elected President. To me, that is what ought to happen in a democracy. When politicians can't agree on something, instead of continuing to try to gut each other and have needless wrestling matches for 6 months at a time, the right thing to do on many occasions is to simply say, "Okay, we're going to take it to the referees. We're going to take it to the final judges, the American people."

So that's what we're doing with this package. And it is the American people who will decide whether they're comfortable with the President's deep reductions in health, in education, in science, in low-income heating assistance, or whether they believe that our investments represent a better path for America if we want to see this country grow through the coming years. Basically, that is what we are trying to do with this package.

I appreciate the work of the literally hundreds of Members who have had input into this product. I know I have certainly been grabbed every time I turn around by Members who have this idea or that. I'm sure a third of the House is unhappy because of items that are not in the bill and another third is unhappy because of items that are. But that's the way it goes when you have got 535 people, plus a President in the White House who has from time to time been known to have fairly strong views.

With that, I would simply say that I would urge support for the product. I want to especially thank the staff of the committee on both sides of the aisle. On this side especially led by Rob Nabors, our staff chief. I do not think the average American understands how hard they work. I don't know about last week, but I know this week, many of them have not been to bed in 2 or 3 days. That, I think, is a testimony to their dedication and their willingness to step up and help us do what the country needs.

I hope that we will pass this today. But I hope we will keep in mind that we have been asked to do so much with so little in some of these discretionary appropriation bills; and I hope people will keep that in mind in comparison to the huge size of the bailout that the President is asking us to provide for Wall Street.

I make no apology for making one last stand to try to preserve our ability to invest \$14 billion in our people here at home at the same time that we're being asked to provide 50 times that much to bail out Wall Street for its past mistakes.

Mr. LATHAM. Mr. Speaker, I rise in support of this funding package, and to tell my colleagues that there is much in this measure that should be supported. I also want to say that we should not be put in the position of scrambling to complete a continuing resolution to keep the government from shutting down. This is no way to run a railroad.

Nevertheless, I want to say that I am pleased that we finally have a disaster funding title. My constituents will be appreciative. While this disaster money is a few months late, the citizens of Iowa will be pleased to know that funding assistance will finally get to them—hopefully, by mid-October—about 4 or 5 months after the floods came.

I do want to say that I am pleased that we have included in this disaster portion of the package, over \$100 million in FEMA Community Development Loans. These funds are very much needed by FEMA as they have said in the past so I was pleased that they were included as I had asked. These are monies that

can go to local governments to help offset losses in local utilities, for example.

I have heard some complaints about the dispersal rates for funding assistance from our earlier disaster measure. In some instances, those complaints are justified but we all know bureaucracies are slow. However, one of the reasons that some of the funding did not go forth is that there was no money to send.

As most of you know, I and my colleagues on both sides pushed for a disaster relief measure to be completed before we left for the August recess because I knew that the first relief title passed on the Iraq Supplemental this summer would not go very far. I also knew that if we did not pass another flood disaster measure before we left, it would be four or five months before my fellow Iowans and others in the Midwest would see any significant relief assistance.

Unfortunately, the majority leadership refused to address the needs of Iowa and other Midwestern flood states before the recess. In turn, that meant that no funds would be forthcoming until fall. That was the reason I pushed so hard to get a supplemental before the August recess.

Had we passed that supplemental disaster measure before August, and it would have been easy to do, funds would have already been put to use by now, and the recovery efforts would now be further along.

All of that being said, we do need to pass this package today because we have put ourselves in the position where we have squandered our time. I urge members to vote for the measure.

Mr. BLUMENAUER. Mr. Speaker, while there are some positive steps taken in this legislation to help those hurt by recent disasters, additional funding for cleaning up unexploded ordnance around the country, and some important funding for our veterans, I am extremely disappointed that this bill does not include an extension of the Secure Rural Schools program. The expiration of this program would be a true disaster for my state of Oregon. While the Pacific Northwest states may be the hardest hit by expiration of the program, more than 40 other states from California to Louisiana to Texas will also feel significant impacts.

Clackamas County, in my district, could lose nearly \$12.5 million in funding that is crucial to its public and ecological health. In addition to having to lay off teachers and other school employees, other important county programs will be curtailed. Clackamas has already discontinued their road maintenance program this year. The county is also planning to close community health clinics because it is unable to continue the necessary level of funding.

I hope that the House leadership will figure out some way to extend this safety net for rural counties before the end of the year.

I also oppose this bill because it is letting our decades-long moratorium on drilling offshore expire. This means that, starting next week, the Interior Department can prepare leases for oil rigs as close as 3 miles off our coasts.

While I may disagree with my Republican colleagues about the environmental and economic impact of drilling on our nation's coasts, there is little disagreement about how this will impact gas prices—because it won't.

Even the Bush administration's own Department of Energy agrees that more drilling will

make no difference for at least a decade, and even then any impact on the price at the pump would be insignificant.

I had hoped that we would at least be able to include provisions of the House-passed energy bill that extended the moratorium to 50 miles off shore, but it appears that even that reasonable compromise is not enough for those who want to keep America addicted to oil.

I don't think this is the end of the story, and I hope the new Congress and new administration will move quickly to enact sensible protections for our coastal communities.

Lastly, I feel that holding funding to fiscal year 2008 levels for many important domestic programs from education to health to transportation will further hurt families at a time when they are already being squeezed by higher food and energy prices and a slumping economy.

Mr. HOYER. Mr. Speaker, Chairman IKE SKELTON and the Armed Services Committee have worked tirelessly to put this bill together, and I want to begin by recognizing that hard work. Chairman SKELTON is among this House's most dedicated advocates for our men and women in uniform. And he and his committee have put together a good authorization bill that deserves our support.

The bill authorizes a total of \$601.4 billion, including \$531.4B in budget authority for the Department of Defense and the Department of Energy's national security programs. It also includes significant commitments to new shipbuilding, advanced aircraft, and efforts to protect our troops in the field from improvised explosive devices.

This bill goes a long way to rebuild our military, which is still battered from years of fighting in Iraq and Afghanistan. It provides for an increase of 7,000 active-duty Army personnel, 5,000 more Marine Corps personnel, and 1,023 more Navy sailors. It dedicates significant amounts for the reset of worn-down armed forces equipment: \$8.6 billion for Army and \$1.8 billion for Marine Corps. \$800 million is also authorized for the Reserve and National Guard, which have borne a heavy share of the fighting.

But just as importantly, this bill looks out for the needs of our troops at a time when our country has asked so much from them. They deserve all the support we have to give. That's why this bill gives them a much-needed raise of 3.9%, more than the President's request, blocks increases in their healthcare payments, and authorizes \$3.2 billion to expand quality family housing.

In sum, this is a bill that strikes a sound balance between the needs of our national defense and the needs of our troops and their families. The road back to full military readiness will be long and hard—but this bill is a big step in the right direction. I urge my colleagues to support this vital piece of legislation—vital for our troops and vital for our Nation's security.

Mrs. LOWEY. Mr. Speaker, on August 16, 2007, the U.S. Government signed a new Memorandum of Understanding, MOU, with Israel to establish the security assistance framework for \$30 billion in U.S. military assistance to Israel over the next decade. This agreement reflects the unshakable U.S. commitment to maintaining Israel's qualitative military edge in the region and increases assistance to help Israel meet its security needs in

the face of growing threats in the region. I am a staunch supporter of this agreement which continues the strategic relationship between the U.S. and Israel and will help guarantee the security of both Israel and the United States.

Today, with the passage of the Continuing Resolution, Congress has declared its support for meeting our obligation for the first year of the MOU by approving a total of \$2.55 billion in FY 2009 for Israel in Foreign Military Financing. The \$2.55 billion in FMF funding includes \$170 million in the FY 09 "bridge-funding" in the FY08 supplemental (P.L. 110-161) and the FY 2008 funding level of \$2.38 billion. The Continuing Resolution also adjusts the funding level for Israeli Offshore Procurement to reflect the current percentage of Israel's FMF at \$670,650,000, a longstanding provision that has proven critical to ensuring Israel's qualitative military edge. The congressional support for this agreement and the security of Israel is clear and unequivocal.

Mr. SIMPSON. Mr. Speaker, in accordance with House earmark reforms, I would like to place in the RECORD a listing of the congressionally-directed projects I have requested in my home State of Idaho that are contained in the report of H.R. 2638, the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009 Appropriations Bill.

I'd like to take just a few minutes to describe why I support these projects and why they are valuable to the Nation and its taxpayers.

The report contains \$4,000,000 in the NPPD Infrastructure Protection and Information Security account for the Power and Cyber Systems Protection, Analysis, and Testing Program at the Idaho National Laboratory. The program would conduct vulnerability analysis, testing, and protection of power and cyber connected systems for the Department of Homeland Security, utilizing the unique resources available at the Idaho National Laboratory, such as the electric grid, SCADA and control systems, cyber and communication test beds, and the explosives test range. The proposed work entails collaboration with leading universities and other National Laboratories to leverage ongoing research at these institutions and advance the state-of-the-art in building resilience into infrastructure systems. The funding would be used to obtain full-scale systems in sectors of interest to DHS for testing of vulnerabilities, identification of protection strategies, and evaluation of resilient designs; partner with universities and National Laboratories to develop resilient control systems; and establish a program that develops new protection schemes. The INL is uniquely placed to carry out this program, which would leverage its ongoing work in this area sponsored by DoD, DHS, and Intelligence Agencies and its established relationships with industry, universities, and National Laboratories. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is the Idaho National Laboratory, located at 2525 North Freemont St., Idaho Falls, Idaho 83415.

The report contains \$1,600,000 in the Defense Production Act Purchases account for the Read Out Integrated Circuit (ROIC) Manufacturing Improvement. The United States Air Force and the Missile Defense Agency have been investigating ways to improve manufacturing capabilities and improve cryogenic and

radiation performance of these circuits. The thermal imagers of the future will operate in harsh environmental conditions for longer periods of time and will have increased resolution (through increased pixel count) over the detectors of today. Maintaining a domestic source of this technology as well as working to enhance the manufacturing capabilities of this critical technology are equally as important as increasing the yield. Funds for this project will be used to establish a long-term, known U.S. source; improve yields both by the manufacturer and by the vendors who use the contractor as a manufacturing source; decrease the cycle time required in manufacturing ROICs and a reduction of design cycle time by ROIC designers; and provide a roadmap to meet the future needs of the ROIC designers. When the program is completed, ROICs will be available with twice the number of pixels for less money than the ROIC currently costs. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is ON Semiconductor, located at 2300 Buckskin Rd., Pocatello, Idaho 83201.

The report contains \$1,600,000 in the Medical Advanced Technology account for the Integrated Patient Quality Program. To directly enhance the patient-provider encounter, the Integrated Patient Quality Program will identify the degree to which physicians utilize consumer content integrated into the DoD Electronic Medical Record (eMIL) and provide after-visit summaries to patients, and identify the impact this critical medical information has on patients' health and their ability to make informed decisions. This phase of the project will build upon the requirements' definition and technical feasibility study performed within FY08 funding that developed a functional and technical road map, and successfully tested the Integrated Patient Quality concept in a development environment. Additionally, the Integrated Patient Quality Program will explore content delivery options outside of the patient-provider face-to-face interaction to include: secure provider/patient e-mail, online laboratory results, pre-visit/test preparation, surgical decision support, and disease management to at-risk patients. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is Healthwise, Incorporated, located at 2601 N. Bogus Basin Road, Boise, Idaho 83702.

The report contains \$2,000,000 in the Support Systems Development account for the Accelerator-Driven Non-Destructive Testing. The Idaho Accelerator Center (IAC) proposes to continue development of penetrating and non-destructive testing (NDT) techniques utilizing new techniques in positron annihilation spectroscopy with accelerator-based gamma-beams, and the use of monochromatic x-ray beams that are produced by colliding high-power laser beams with high-energy electron beams. Both of these core technologies have been under development at the IAC for several years and have matured to the point that serious in-field commercialization is possible. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is Idaho State University, located at 921 South 8th Avenue, Pocatello, Idaho 83209.

The report contains \$1,440,000 in the Electronics Technology account for the 3-D Technology for Advanced Sensor Systems Project.

The military has a need for new three-dimensional (3-D) packaging of electronic systems, particularly sensor systems for portable applications. The team of Boise State University and RTI International has developed 3-D processing techniques on silicon and LTCC platforms, including technologies for die- and wafer-scale bonding and 3-D interconnects. These funds will allow them to apply these techniques to create 3-D integration and packaging solutions applicable to a general category of high performance sensor systems. These funds will be used to support summer salaries for faculty, and provide salaries for research staff, post-doctoral associates, graduate and undergraduate students. Research supplies, capital equipment, and travel will be funded as required to support the objectives of the project. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is Boise State University, located at 1910 University Drive, Boise, Idaho 83725-1135.

The report contains \$1,200,000 in the Critical Infrastructure Protection account for the Electric Grid Reliability/Assurance project. The effort will operationalize advanced electric grid modeling simulation and analysis capability that links disparate critical infrastructure sector models that run simultaneously and dynamically to share information providing greater understanding of critical infrastructure status before, during or after a destructive event. Funds will be used for the enhanced development of electric grid modeling, simulation and testing capabilities at the Idaho National Laboratory (INL). Incorporation of both real-time and distributed system modeling capabilities will provide expanded capabilities for analysis of systems critical to DoD. These efforts will provide DoD an enhanced capability to simulate, prove and make recommendations for techniques to sustain mission operations via continued power generation when power from the electric utilities is no longer present. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is Idaho National Laboratory, located at P.O. Box 1625, Idaho Falls, Idaho 83415.

The report contains \$1,200,000 in the Advanced Electronics Technologies for the Hybrid Power Generation System. Research has resulted in a breakthrough technology using compressed magnetic fields which can generate power. The continued research, development, testing and validation of the technology should result in mission extension for dismounted soldiers and considerable savings by reducing the reliance on disposable batteries. Approximately \$57,000 is being spent per soldier, per year on batteries alone in theatre. This technology will not only reduce Federal spending needed for such batteries, but will considerably reduce related military logistics costs, reduce the amount of hazardous waste disposal costs (for the toxic substances used in battery materials), and will reduce the man/machine interface by reducing the 20-30 lbs of extra batteries soldiers are currently required to carry for extended missions. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is M2E Power, Inc., located at 875 W. McGregor Court, Suite 150 Boise, Idaho 83705.

The report contains \$3,200,000 in the Chemical and Biological Defense Program Ac-

count for the Vacuum Sampling Pathogen Collection and Concentration project. Production and commercialization potential of the recently completed basic wet-vacuum pathogen collection system will be further enhanced through completion and integration of current prototype-stage "sister" technologies. The combined systems will provide safer, more accurate and faster sample collection and processing capabilities with GPS-RFID sample site documentation and sample identification, plus handling, transport and lab traceability. Current outsourced production activities will be centralized through expanded in-house production facilities for more stringent cost, QC and delivery schedule management and control. Integrated technology systems will improve safety, accuracy and standardization of bio-agent detection methods for our soldiers and civilian end users. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is Microbial-Vac Systems, Inc., located at 160 Bridon Way, Jerome, Idaho 83338.

The report contains \$3,200,000 in the Advanced Spacecraft Technology account for the Ultra Low Power Electronics. Ultra-Low Power (ULP) Electronics is an Air Force Research Lab-sponsored initiative working in collaboration with industry to develop electronics that require less power and provide increased efficiency. A key challenge for DoD electronics applications is the reduction of power consumption in the Complementary Metal Oxide Semiconductor (CMOS)—the technology platform used for advanced integrated circuits. Funding in 2009 will develop a high OPS/Watt ULP platform solution for DoD designers of electronic systems and demonstrate a base technology that can be rapidly scaled to meet general ULP industry requirements for portable electronics. The project is an iterative, multi-lot, fabrication research and development effort that includes design tool and model development necessary to deploy the new technology. A viable scaling method for reducing electronic voltage requirements and the associated ULP products will define an alternative CMOS scaling roadmap specific to portable technology. This program will establish a new technical approach and industrial capability for U.S. electronics. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is American Semiconductor, Inc., located at 3100 S. Vista Ave., Ste 230 Boise, Idaho 83705.

The report contains \$800,000 in the New Design Ssn Account for the Highly Corrosive-Resistant Alloy Joining for Nuclear Applications. This funding will be used to develop and test novel prototype design-for-manufacturing methods, flexible automated welding and inspection technology for application in submarine nuclear reactor propulsion systems. The research will result in new joining techniques to shape highly corrosive-resistant alloys to meet the requirements of underwater power generation and radiation containment. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is Premier Technology, located at 1858 W. Bridge Street, Blackfoot, Idaho 83221.

The report contains \$1,800,000 in the Air Force Military Construction Account for the Mountain Home AFB Logistics Readiness

Center. The Existing Logistic Supply is a condemned 53-year-old wooden structure beyond economical repair. The building had to be evacuated and now 60% of base supply functions operate from temporary spaces across base, creating significant delays in troop/equipment mobilization. This negatively impacts the Wing's ability to demolish and relocate from other substandard facilities on base. When funded, the Logistics Readiness Center will provide command and control for all materials in-bound and outbound, including freight processing, packing, crating, pallet buildup shop, and provide bulk and bin storage. The facility will also support secure storage and an armory and will include administrative areas. This request is consistent with the intended purpose of this account.

The entity to receive funding for this project is the 366th Wing, Mountain Home Air Force Base, Idaho, located at 366 Gunfighter Avenue, Ste. 107, Mountain Home Air Force Base, Idaho 83648.

I appreciate the opportunity to provide a list of Congressionally-directed projects in my district and an explanation of my support for them.

Mr. WAXMAN. Mr. Speaker, this Congress, the House and Senate have passed important Federal contracting reforms, but neither body has assembled them into a comprehensive package. The "Clean Contracting Act" in title 8 of the National Defense Authorization Act consolidates these provisions into a single, comprehensive reform measure.

I want to particularly thank Chairman SKELTON for working with me to help bring these provisions to the House floor today. He has been a tremendous partner in the fight to root out waste, fraud, and abuse.

The Clean Contracting Act requires agencies to enhance competition in contracting, limit the use of abuse-prone contracts, start the effort to rebuild the federal acquisition workforce, strengthen important anti-fraud measures, and increase transparency in federal contracting.

The provisions in the act respond to procurement abuses that the Oversight Com-

mittee, the Armed Services Committee, and other committees have identified in hearings and investigative reports. These egregious procurement practices have occurred in Iraq, in the response to Hurricane Katrina, and at the Department of Homeland Security—and they need to be halted. They may enrich companies like Halliburton and Blackwater, but have squandered billions of dollars that belong to the taxpayer.

This legislation says that Congress is serious about stopping waste, fraud, and abuse.

One important provision would limit the length of no-bid contracts awarded in emergencies to one year. This provision would end the abuses that occurred after Hurricane Katrina, when many "emergency" contracts were allowed to continue for many years.

Another provision would require regulations and reporting on the use of cost-plus contracts, which provide contractors with little incentive to control costs. Spending under this type of contract grew over 75 percent between 2000 and 2005.

Another important provision would prohibit contractors from charging excessive mark-up charges for work done by subcontractors. This would prevent the infamous "blue roof" scandal following Hurricane Katrina, where taxpayers were charged almost \$2500 dollars apiece for something that actually cost \$300.

Other vital provisions in this bill would prevent the abuse of interagency contracts, as was the case at Abu Ghraib, where interrogators were hired using an Interior Department contract for information technology.

The bill also includes a modified version of a provision which recently passed the House under suspension of the rules. It is based on a bill authored by Rep. MALONEY and requires the development of a database of suspension and debarment information.

My only regret is that some of the other key reforms passed by the House were not included in the final version of the legislation. I am disappointed that the House and Senate compromise does not include a ban on private interrogators in U.S. military detention facilities or mandate congressional approval for any security pact with Iraq that is negotiated by the President. I am also greatly disappointed the bill, which authorizes some additional funding for the war in Iraq, fails to set a timeline for the withdrawal of our troops.

Still, I urge members to support this bill because the Clean Contracting Act provisions will make a fundamental difference in the way our government operates and begin to restore taxpayer confidence.

Mr. SPRATT. Mr. Speaker, I rise in support of H.R. 2638, as amended, but I wish to draw particular attention to the \$5 million of funding provided within this bill for a space-based kinetic interceptor study, that, ostensibly, was included as an earmark requested by Senators ALLARD, INHOFE, KYL, and SESSIONS. Chairman OBEY's explanatory statement of the amendment under consideration expressly states, "The bill provides \$5,000,000 to support the study outlined in section 236 of S. 3001, the National Defense Authorization Act for Fiscal Year 2009."

Section 236 of the Defense Authorizaton bill no longer refers to a space-based kinetic interceptor study. The provision specific to such a study appeared in a Senate version of the authorizing bill, but it was stricken from the House amended version of the bill that we passed this afternoon for good cause.

Mr. Speaker, a study to explore the potential for space-based kinetic interceptors within our ballistic missile defense system is a bad idea. I have many reservations, but chief among them is the message that the purported study would project to the world. It would clearly indicate America's willingness to unilaterally introduce weapons into space. The notion for the proposed study may be couched by its proponents as a low cost method for determining the merits of a purely defensive mechanism, but the dual use technologies associated with kinetic interceptors could be used for a variety of offensive purposes, such as shooting down satellites. Such a step, however small, would surely be perceived as the first step toward an arms race in space, which would only place our vital military and commercial space assets at greater risk. Independent studies in the past concluded that space-based kinetic interceptors would prove impractical and costly. We have no evidence that the proposed study would prove otherwise.

Mr. Speaker, I wish to underscore that the Congress has not granted any authority to fund a space-based kinetic interceptor study and to reiterate for the record that the specific provision relied upon in this bill for authority and guidance to fund such a study does not exist.

Mr. WALSH of New York. Mr. Speaker, I am disappointed. After the disappointment of moving to the minority in 2007, I took some solace in the fact that the three highest elected Democratic leaders are all former members of the Appropriations Committee—I thought they knew and respected the work and procedures of our committee.

I am disappointed that in my last year as a member of the Appropriations Committee, this majority has seen fit to bring just one regular spending bill before the House.

Disappointed that in the continuing resolution and disaster sections of this legislation, our Committee abandoned its traditional bipartisan approach in favor of an attempt to play election-year politics.

Disappointed that, as far back as February, my friends in the majority indicated they did not wish to deal with this President on issues relating to spending and—regardless of the finger pointing that I'm sure will go on—set the stage for the train wreck before us.

It is no secret that I do not always agree with the current President on spending levels, but even if I did, he is brought into the process only after we complete our work.

In short, we gave up without a fight, and that disappoints me and that should disappoint those we represent.

We gave up without letting the Appropriations Committee work its will, without letting the membership of the House work its will.

The Senate is the Senate and we have no control over what happens—or more likely, doesn't happen there. But we do have control over whether or not the House gets its job done, and quite frankly, that did not happen this year.

So here we are, punting on what is the equivalent of a second down. I regret that.

Having said that, reflecting on twenty years here in the Congress, sixteen on the Appropriations Committee, and twelve as a subcommittee chair, there has been far more satisfaction than disappointment.

Since this is probably the last time I'll address the Congress on a pending Appropriations bill, I would respectfully request that the

Committee Chair and Appropriations Committee members return to regular order and fiercely protect the prerogatives of this great committee.

Mr. CAMPBELL of California. Mr. Speaker, today the House of Representatives voted on legislation (H.R. 2638, the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act of 2009) to fund government operations through March 6th of next year. The legislation contained a provision to provide up to \$25 billion in loan guarantees to companies that engage in the manufacturing and distribution of automobiles and trucks. Although I was advised by the House Committee on Ethics and Standards that I had no ethical conflict under the rules relative to this provision, I believe that I do have a conflict. A company which I control derives substantial income through real property leases to one of the auto companies that may receive loan guarantees under this bill. Therefore, I felt it would be improper for me to vote on or to engage in any debate or discussion on this bill. Accordingly, I voted "Present" on H.R. 2638.

Mr. OBEY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. All time for debate has expired.

Pursuant to House Resolution 1488, the previous question is ordered.

The question is on the motion by the gentleman from Wisconsin.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LEWIS of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 of rule XX, this 15-minute vote on concurring in the Senate amendment with an amendment will be followed by 5-minute votes on suspending the rules with respect to H.R. 5265 and House Resolution 1451.

The vote was taken by electronic device, and there were—yeas 370, nays 58, answered "present" 1, not voting 4, as follows:
