

ship and its discoveries will be connected to live audiences so they can see what lies beneath the waters and help inspire a new generation of "aquanauts."

Under Admiral Lautenbacher's leadership, the National Weather Service has improved its severe weather warnings. Seconds make a difference during flash floods, tornados, tsunamis, and severe thunderstorms. With improved scientific knowledge, NOAA is providing storm-based warnings that give the public more geographically specific information about severe weather. These storm-specific warnings allow first responders and those in harm's way to take the necessary actions to protect lives and property.

An important part of NOAA's mission is to understand and predict changes in the Earth's environment. Admiral Lautenbacher has led U.S. efforts working with more than 60 countries and the European Commission to develop the Global Earth Observation System of Systems, GEOSS. Earth observations are critical to our understanding of complex climate and ocean systems. With improved data about the interconnectedness of Earth systems, we will be better equipped to help emergency managers make evacuation decisions, to aid State and local decisionmakers in protecting coastal communities and improving infrastructure development, and to more accurately predict weather and climate changes that affect our economy.

Admiral Lautenbacher also worked closely with Senator STEVENS and me to reauthorize the Magnuson-Stevens Fishery Conservation and Management Act. This act marks a natural evolution in fisheries management because it recognizes not only the need to carefully manage fish populations, but the ocean ecosystems our fisheries occupy.

Given the size of the U.S. Exclusive Economic Zone in the Pacific and the reliance of Hawaii and the Pacific Islands on the oceans, NOAA's programs are of critical importance to the Pacific. More than lending technical assistance, Admiral Lautenbacher matched word to deed by growing NOAA's capacity in the Pacific region—from establishing a new National Marine Fisheries Service regional office and lab, to breaking ground on a NOAA Pacific Regional Facility, to developing the data and environmental monitoring infrastructure needed to support science-based management.

Admiral Lautenbacher has my gratitude and deserves our Nation's gratitude for his dedication to public service. I wish him well as he moves into the next chapter of his life.●

TRIBUTE TO BOB DEMERSSEMAN

● Mr. JOHNSON. Mr. President, I rise today to recognize and congratulate Bob DeMersseman of Rapid City, SD, for over 22 years of service with the Rapid City Economic Development Partnership.

Mr. DeMersseman is retiring this December after an impressive career of service with the Economic Development Partnership. For 19 of the 22 years, Bob served as president of the organization. During his tenure, Bob and his staff and the city's economic development groups have created and expanded two industrial parks, set up the low-interest Rapid Fund loan fund, developed the Western Research Alliance to promote a growing technology community and created the Black Hills Business Development Center, an incubator to help researchers, inventors and entrepreneurs turn their ideas into commercial ventures.

Bob has been instrumental in forging vital and important relationships and partnerships with area Chambers of Commerce, economic development organizations, universities and community officials. There was a time when local communities didn't foster such working relationships and with the guidance and advice of leaders like Bob, this improved tremendously. Today, when one Black Hills community attracts or expands a business, other communities realize that they also benefit.

While developing partnerships and relationships between communities and their leaders, Bob has also realized that economic development and attracting businesses and industries to the local area has become increasingly competitive. Bob along with other Rapid City and Black Hills leaders have done a commendable job in creating and developing more tools for the tool box to promote Rapid City and the Black Hills to national and international prospects. He has helped to acquire and expand land tracts for business and industrial parks, worked hard to promote and market Rapid City and the Black Hills communities and provided valuable guidance on issues impacting the future promotion and growth of Rapid City and the Black Hills region. He has worked hard to expand Rapid City's economic base.

Here is what a few of Bob's peers say about his impact on economic development in the Rapid City area. "In my opinion, Bob has been at the front end of developing a very diversified economic development program for Rapid City, and he will be remembered for putting a lot of great things in place," said Mark Merchen, chairman of Black Hills Vision, a group working to create a regional technology corridor.

"Bob has been such a key part of our team effort to create economic development in Rapid City," said Pat Burchill, chairman of the Rapid City Economic Development Foundation, the partnership's real estate arm. "Our success has a lot to do with Bob's efforts."

I commend Bob for his passionate dedication and tireless work to expand and enhance Rapid City's economic potential as well as helping to develop and promote that same potential in the Black Hills region. I wish him all the

best in his retirement and know that he will bring a high level of enthusiasm, energy, dedication and commitment to his retirement endeavors.●

REMEMBERING MICHAEL PROCTOR SMITH

● Ms. LANDRIEU. Mr. President, today I wish to celebrate the life of Michael Proctor Smith, who passed away at his home in New Orleans on Friday, September 26, 2008. He was 71. Michael, a native of New Orleans, was an award-winning professional freelance photographer who chronicled the music, culture, and folklife of New Orleans and the State of Louisiana for over 40 years.

Michael was well known for documenting New Orleans social club parades and jazz funerals, neighborhood traditions, Mardi Gras Indians, spiritual church ceremonies, and many of the city and State's renowned jazz, blues, rhythm and blues, and gospel musicians. He was a fixture at every New Orleans Jazz & Heritage Festival since it began in 1970 until his retirement in 2005. His works are internationally recognized and are permanent collections at a number of museums including the Bibliothèque National in Paris, the Metropolitan Museum of Art, the Smithsonian Institution, the Historic New Orleans Collection, the New Orleans Museum of Art, the Ogden Museum of Southern Art, and the Louisiana State Museum.

In the last few years, Michael had been honored with numerous awards celebrating his work. He received a Lifetime Achievement Award from the Louisiana Endowment for the Humanities in 2002 and was named Music Photographer of the Year by Offbeat magazine. In 2004 he received a Mayor's Arts Award from the Arts Council of New Orleans and a Clarence John Laughlin Lifetime Achievement Award from the New Orleans/Gulf South chapter of the American Society of Media Photographers. In 2005, he received the Delgado Society award from the New Orleans Museum of Art, the first photographer to be so honored. The recipient of two Photographer's Fellowships from the National Endowment for the Arts, Michael's prints have toured worldwide through the U.S. Information Agency.

Michael's photographs grace the covers of many CDs and record albums, illustrate numerous books and magazine articles published in America and Europe, and are a staple of documentary films on the rich cultural history of New Orleans and Louisiana.

He was also an original owner and founder of Tipitina's, an iconic music club located at the corner of Napoleon Avenue and Tchoupitoulas Street in uptown New Orleans.

Michael is survived by his partner Karen Louise Snyder; his brother Joseph Byrd Hatchitt Smith; two daughters, Jan Lamberton Smith and Leslie Blackshear Smith; and three grandchildren, Chance King Doyle, Leslie

Elizabeth Doyle, and Francis Brandon Arant.●

TRIBUTE TO LOUISIANA WWII VETERANS

● Ms. LANDRIEU. Mr. President, I am proud to honor a group of 88 World War II veterans from every region of Louisiana who are traveling to Washington, DC, this weekend to visit the various memorials and monuments that recognize the sacrifices of our Nation's invaluable service members.

Louisiana HonorAir, a group based in Lafayette, LA, is sponsoring this Saturday's trip to the Nation's Capital. The organization is honoring each surviving World War II Louisiana veteran by giving them an opportunity to see the memorials dedicated to their service. On this trip, the veterans will visit the World War II, Korea, Vietnam and Iwo Jima memorials. They will also travel to Arlington National Cemetery to lay a wreath on the Tomb of the Unknowns.

This is the first of four flights Louisiana HonorAir will make to Washington, DC, this fall.

World War II was one of America's greatest triumphs, but was also a conflict rife with individual sacrifice and tragedy. More than 60 million people worldwide were killed, including 40 million civilians, and more than 400,000 American service members were slain during the long war. The ultimate victory over enemies in the Pacific and in Europe is a testament to the valor of American soldiers, sailors, airmen and marines. The years 1941 to 1945 also witnessed an unprecedented mobilization of domestic industry, which supplied our military on two distant fronts.

In Louisiana, there remain today more than 33,000 living WWII veterans, and each one has a heroic tale of achieving the noble victory of freedom over tyranny. The oldest in this HonorAir group was born in 1913. Two of these veterans began their service in the Louisiana National Guard as early as 1936, and were activated for Federal service in 1941.

This group served in every branch of the military, including 29 in the U.S. Army, 14 in the U.S. Army Air Corps, 23 in the U.S. Navy, 8 in the U.S. Marine Corps, 2 in the U.S. Merchant Marines, one in the U.S. Coast Guard and one in the Women's Reserve of the U.S. Naval Reserve. Our heroes served across the globe, participating in major invasions such as the Battle of the Bulge, the Battle of Huertgen Forest, and the battles of Tunisia, Naples-Foggia, Rome, Anzio, Po Valley and North Apennines. They served in Europe, North Africa and the Pacific Theater. One was wounded in Germany, and another was captured as a prisoner of war.

Many of these veterans earned Purple Hearts, including one with three Battle Stars. One of our veterans went on to serve in both Korea and Vietnam, retiring in 1967.

I ask the Senate to join me in honoring these 88 veterans, all Louisiana heroes, who we welcome to Washington this weekend and Louisiana HonorAir for making these trips a reality.●

TRIBUTE TO ROBERT ROTH

● Ms. LANDRIEU. Mr. President, I wish to take a few moments to acknowledge the life and work of a very ordinary, yet extraordinary, American named Bob Roth of Bristow, VA. Bob died of cancer earlier this year, at the young age of 44, leaving behind a wife of 19 years and five young children. His was one of far too many vibrant young lives cut short by this terrible disease. As was his way in life, Bob fought cancer to the very end attacking the disease as ferociously as it attacked him.

Recent developments in the FBI anthrax case had brought the case back into the media in the last month. I want to pause and recognize that the recent breaks in the case were built upon the hard work of Special Agent Roth and his team. Many of us remember what it was like on Capitol Hill in October of 2001 when an anthrax-laced letter appeared in Senator Daschle's office and another in Senator LEAHY's office. Spores were found at the U.S. Supreme Court, and postal workers who handled the letters died from inhalation. No one felt entirely safe from one of the most deadly germs known to man.

The FBI was immediately on the case, and a September 2003 Washington Post article explained their approach in the following manner:

To run the anthrax case day to day, Assistant FBI director Van Harp turned to veteran FBI agent Bob Roth whose meticulous style mirrored his own. Roth sometimes referred to himself as a cops-and-robbers kind of guy, best suited to pursuing the mobsters, embezzlers and kidnappers who had always been the FBI's bread and butter. But this case posed an entirely new set of challenges, and Roth was willing to try almost anything to solve it. . . . the FBI's frustrations with the case were palpable. At one meeting at the Washington field office, agents talked candidly about the toll the long hours were exacting on their families. Roth vented, too, groaning to no one in particular, "Get me out of this."

But he never asked to get out. Long after the media lost interest, Agent Roth worked tirelessly. As the FBI slogged through one of the most complicated, high-profile cases it ever faced, Agent Bob Roth served his country as a pioneer in the efforts to fight domestic terrorism and weapons of mass destruction. He literally risked his life investigating scenes and evidence from the anthrax case. He was later honored by being promoted to Assistant Section Chief of the Bureau's newly created Weapons of Mass Destruction Directorate. It was a role he had little time to address because he spent the last year of his life fighting against his own personal WMD: multiple myeloma, an aggressive bone cancer.

Bob was an exemplary father, devoted husband, committed Christian, community leader, and Government servant. He served 16 years for the FBI and was highly commended and decorated for his exceptional life and unfailing integrity, for his leadership and excellence in his profession for his inspiring example as a devoted husband and loving father to five beautiful children for his character and long service to our country, and for his pioneering efforts in fighting against weapons of mass destruction.

I ask that the CONGRESSIONAL RECORD reflect the impressive contributions made by Special Agent Robert Roth to his country.●

TRIBUTE TO MARY KEATING

● Ms. LANDRIEU. Mr. President, today I celebrate the life of Mary Keating, who, until she passed away last October, was a proud resident of the city and great State of New York for nearly 78 years. Mary first came to America at the young age of 17, far from her home and her family in Derry, Kilshanny, County Clare, Ireland. Not long after she arrived, she met and married Martin Keating, who also hailed from County Clare. She and Martin shared many passions, most notably their love for their family, their friends, and their deep, abiding faith in God. While neither of them were musicians, they relished the Irish country sets of their native Clare and carried them with them to this country, eventually to meet and dance them on the Rockaway Beach boardwalks, which as far as they were concerned was simply the last parish in Clare. As one of her youngest grandchildren, Ronan, observed, if you visited their home you would find a layer of dust on the top of the knob on their radio because it had not been moved from its resting spot on the Irish music station in decades.

Music was not the only way that Mary celebrated her Irish heritage. It also could be found in her love to entertain friends and family. It was well known in their neighborhood and beyond that there was always an extra spot at the dinner table in the Keating home. As Mary would say, "what is one extra potato in the pot?" One could never visit her home without enjoying at least a cup of tea and an assortment of food. Three generations of Keatings grew up savoring her specialties such Irish soda bread, turnips, and leg of lamb. Much to their chagrin, her daughters and granddaughters have never been able to make a soda bread half as delicious as Mary's, simply because the "recipe" was all done by taste and memory. As her granddaughter Kristin noted, the only one of Mary's dishes her grandchildren will not miss is her "lumpy" mashed potatoes, especially since Martin was a firm believer in the notion that children should finish everything they are served.

Mary will be remembered by all who knew her as a strong and caring woman
