

Whereas the failure of many Commission members fishing east of 45 degrees west longitude to comply with other Commission recommendations to conserve and control the overfished eastern Atlantic and Mediterranean bluefin tuna stock has been an ongoing problem;

Whereas the Commission's Standing Committee on Research and Statistics noted in its 2006 report that the fishing mortality rate for the eastern Atlantic and Mediterranean stock may be more than 3 times the level that would permit the stock to stabilize at the maximum sustainable catch level, and continuing to fish at the level of recent years "is expected to drive the spawning biomass to a very low level" giving "rise to a high risk of fishery and stock collapse";

Whereas the Standing Committee's 2008 report recommended that the annual harvest levels for eastern Atlantic and Mediterranean bluefin tuna be reduced from 32,000 metric tons to 15,000 metric tons or less to halt decline of the resource and initiate rebuilding;

Whereas the Standing Committee has stated that time and area closures could greatly facilitate the implementation and monitoring of rebuilding strategies and recommended a closure of the Mediterranean Sea in May, June, and July, as well as a minimum size limit of 25 kilograms;

Whereas in 2006, the Commission adopted the "Recommendation by ICCAT to Establish a Multi-Annual Recovery Plan for Bluefin Tuna in the eastern Atlantic and Mediterranean" containing a wide range of management, monitoring, and control measures designed to facilitate the recovery of the eastern Atlantic and Mediterranean bluefin tuna stock;

Whereas the Recovery Plan is inadequate and allows overfishing and stock decline to continue, and initial information indicates that implementation of the plan in 2007 by many eastern Atlantic and Mediterranean bluefin tuna harvesting countries has been poor;

Whereas since 1981, the Commission has adopted additional and more restrictive conservation and management recommendations for the western Atlantic bluefin tuna stock, and these recommendations have been implemented by Nations fishing west of 45 degrees west longitude, including the United States;

Whereas despite adopting, fully implementing, and complying with a science-based rebuilding program for the western Atlantic bluefin tuna stock by countries fishing west of 45 degrees west longitude, catches and catch rates remain very low;

Whereas many scientists believe that mixing occurs between the western Atlantic bluefin tuna stock and the eastern Atlantic and Mediterranean stock, and as such, poor management and noncompliance with recommendations for one stock are likely to have an adverse effect on the other stock; and

Whereas additional research on stock mixing will improve the understanding of the relationship between eastern and western bluefin tuna stocks and other fisheries, which will assist in the conservation, recovery, and management of the species throughout its range: Now, therefore, be it

Resolved, That it is the sense of the Senate that the United States delegation to the 16th Special Meeting of the International Commission for the Conservation of Atlantic Tunas, should—

(1) pursue a meaningful assessment of Commission member compliance with the "Recommendation by ICCAT to Establish a Multi-Annual Recovery Plan for Bluefin Tuna in the eastern Atlantic and Mediterranean" (Recommendation 06-05), including

seeking detailed explanations from Commission members that have failed to effectively implement the terms of the recommendation;

(2) pursue the adoption by the Commission of measures designed to eliminate non-compliance, including, as appropriate, deducting a portion of a future quota for a party to compensate for such party exceeding its quota in prior years, and where appropriate, steps should be taken to link non-compliance with reductions in fishery or market access;

(3) seek a temporary suspension of the eastern Atlantic and Mediterranean bluefin tuna fishery, including all trade, if significant progress toward establishing science-based management measures, improving monitoring and control measures, and addressing compliance issues is not made at the Commission this year;

(4) seek to strengthen the conservation and management of the eastern Atlantic and Mediterranean bluefin tuna by making recommendations to halt the decline of the stock and begin to rebuild it, including reducing annual harvest levels so that they do not exceed recommendations of the Standing Committee and expanding the time and area closure for the Mediterranean purse seine fleet to include May, June, and July; and

(5) pursue additional research on the relationship between the western Atlantic and eastern Atlantic and Mediterranean bluefin tuna stocks and the extent to which the populations intermingle.
